- ii) the legality and regularity of the expenditure for which reimbursement has been requested from the Commission in reference to the accounting year (and included in the accounts), and
- iii) the functioning of the management and control system, and verified the management declaration in relation to the programme [name of programme, CCI number] (hereafter ‘the programme’),

in order to issue an audit opinion in accordance with Article 71(3).

2. RESPONSIBILITIES OF THE MANAGING AUTHORITY

[name of the managing authority], identified as the managing authority of the programme, is responsible to ensure proper functioning of the management and control system in regard to the functions and tasks provided for in Articles 66 to 70.

In addition, the [name of the managing authority or of the body carrying out the accounting function where relevant], is responsible to ensure and declare the completeness, accuracy and veracity of the accounts, as required in Article 70 of Regulation (EU) No [...] .

Moreover, in accordance with Article 68 of Regulation (EU) No [...] it is the responsibility of the managing authority to confirm that the expenditure entered in the accounts is legal and regular and complies with applicable law.

3. RESPONSIBILITIES OF THE AUDIT AUTHORITY

As established by Article 71 of Regulation (EU) No [...], my responsibility is to independently express an opinion on the completeness, veracity and accuracy of the accounts, whether expenditure for which reimbursement has been requested from the Commission and which are declared in the accounts is legal and regular, and whether the management and control system put in place functions properly.

My responsibility is also to include in the opinion a statement as to whether the audit work puts in doubt the assertions made in the management declaration.

The audits in respect of the programme were carried out in accordance with the audit strategy and complied with internationally accepted audit standards. These standards require that the audit authority complies with ethical requirements, plans and performs the audit work in order to obtain reasonable assurance for the purpose of the audit opinion.

An audit involves performing procedures to obtain sufficient and appropriate evidence to support the opinion set out below. The procedures performed depend on the auditor's

professional judgement, including assessing the risk of material non-compliance, whether due to fraud or error. The audit procedures performed are those I believe are appropriate in the circumstances and are compliant with the requirements of Regulation (EU) No [...].

I believe that the audit evidence gathered is sufficient and appropriate to provide the basis for my opinion, [*in case there is any scope limitation:*] except those which are mentioned in the paragraph ‘Scope limitation’.

The summary of the findings drawn from the audits in respect of the programme are reported in the attached annual control report in accordance with point (b) of Article 71(3) of Regulation (EU) No [...].

5.6 Where a non-statistical sampling method is used, specify the reasons for using the method, the percentage of sampling units covered by audits, the steps taken to ensure randomness of the sample bearing in mind that the sample has to be representative.

In addition, define the steps taken to ensure a sufficient size of the sample, enabling the audit authority to draw up a valid audit opinion. A total (projected) error rate should also be calculated where non-statistical sampling method has been used.

ANNEX XXI

Determination of the level of financial corrections: flat-rate and extrapolated financial corrections – Article 98(1)

Elements for applying an extrapolated correction

Where extrapolated financial corrections are to be applied, the results of the examination of the representative sample are extrapolated to the rest of the population from which the sample was drawn for purposes of determining the financial correction.

Elements for consideration when applying a flat rate correction

- (a) gravity of the serious deficiency(-ies) in the context of the management and control system as a whole;
- (b) the frequency and extent of the serious deficiency(-ies);
- (c) the degree of financial prejudice to the Union budget.

The level of flat rate financial correction is determined as follows:

- (a) where the serious deficiency(-ies) is so fundamental, frequent or widespread that it represents a complete failure of the system that puts at risk the legality and regularity of all expenditure concerned, a flat rate of 100 % is applied;
- (b) where the serious deficiency(-ies) is so frequent and widespread that it represents an extremely serious failure of the system that puts at risk the legality and regularity of a very high proportion of the expenditure concerned, a flat rate of 25 % is applied;
- (c) where the serious deficiency(-ies) is due to the system not fully functioning or functioning so poorly or so infrequently that it puts at risk the legality and regularity of a high proportion of the expenditure concerned, a flat rate of 10 % is applied;
- (d) where the serious deficiency(-ies) is due to the system not functioning consistently so that it puts at risk the legality and regularity of a significant proportion of the expenditure concerned, a flat rate of 5 % is applied.

Where, due to a failure of the responsible authorities to take corrective measures following the application of a financial correction in an accounting year, the same serious deficiency (-ies) is identified in a subsequent accounting year, the rate of correction may, due to the persistence of the serious deficiency(-ies) be increased to a level not exceeding that of the next higher category.

ANNEX XXII

Methodology on the allocation of global resources per Member State – Article 103(2)

Allocation method for the less developed regions eligible under the Investment for jobs and growth goal - Article 102(2)(a)

1. Each Member State's allocation shall be the sum of the allocations for its individual eligible regions, calculated in accordance with the following steps:
 - a) determination of an absolute amount per year (in EUR) obtained by multiplying the population of the region concerned by the difference between that region's GDP per capita, measured in PPS, and the EU-27 average GDP per capita (in PPS);
 - b) application of a percentage to the above absolute amount in order to determine that region's financial envelope; this percentage shall be graduated to reflect the relative prosperity, measured in PPS, as compared to the EU-27 average, of the Member State in which the eligible region is situated, i.e.:
 - i. for regions in Member States whose level of GNI per capita is below 82% of the EU-27 average: 2,8%;
 - ii. for regions in Member States whose level of GNI per capita is between 82% and 99% of the EU-27 average: 1,3%;
 - iii. for regions in Member States whose level of GNI per capita is over 99% of the EU-27 average: 0,9%;
 - c) to the amount obtained in accordance with point (b) is added, if applicable, an amount resulting from the allocation of a premium of EUR 500 per unemployed person per year, applied to the number of persons unemployed in that region exceeding the number that would be unemployed if the average unemployment rate of all the less developed regions applied;
 - d) to the amount obtained in accordance with point (c) is added, if applicable, an amount resulting from the allocation of a premium of EUR 500 per young unemployed person (age group 15-24) per year, applied to the number of young persons unemployed in that region exceeding the number that would be unemployed if the average youth unemployment rate of all less developed regions applied;
 - e) to the amount obtained in accordance with point (d) is added, if applicable, an amount resulting from the allocation of a premium of EUR 250 per person (age group 25-64) per year, applied to the number of persons in that region that would need to be subtracted in order to reach the average level of low education rate (less than primary, primary and lower secondary education) of all less developed regions;
 - f) to the amount obtained in accordance with point (e) is added, if applicable, an amount of EUR 1 per tonne of CO₂ equivalent per year applied to the population share of the region of the number of tonnes of CO₂ equivalent by which the Member State exceeds the target of greenhouse gas emissions outside the emissions trading scheme set for 2030 as proposed by the Commission in 2016;
 - g) to the amount obtained in accordance with point (f) is added, an amount resulting from the allocation of a premium of EUR 400 per person per year, applied to the

population share of the region of net migration from outside the EU to the Member State since 1 January 2013.

Allocation method for transition regions eligible under the Investment for jobs and growth goal - Article 102(2)(b)

2. Each Member State's allocation shall be the sum of the allocations for its individual eligible regions, calculated in accordance with the following steps:
 - a) determination of the minimum and maximum theoretical aid intensity for each eligible transition region. The minimum level of support is determined by the initial average per capita aid intensity of all more developed regions, i.e. EUR 18 per head and per year. The maximum level of support refers to a theoretical region with a GDP per head of 75% of the EU-27 average and is calculated using the method defined in points (a) and (b) of paragraph 1. Of the amount obtained by this method, 60% is taken into account;
 - b) calculation of initial regional allocations, taking into account regional GDP per capita (in PPS) through a linear interpolation of the region's relative GDP per capita compared to EU-27;
 - c) to the amount obtained in accordance with point (b) is added, if applicable, an amount resulting from the allocation of a premium of EUR 500 per unemployed person per year, applied to the number of persons unemployed in that region exceeding the number that would be unemployed if the average unemployment rate of all the less developed regions applied;
 - d) to the amount obtained in accordance with point (c) is added, if applicable, an amount resulting from the allocation of a premium of EUR 500 per young unemployed person (age group 15-24) per year, applied to the number of young persons unemployed in that region exceeding the number that would be unemployed if the average youth unemployment rate of all less developed regions applied;
 - e) to the amount obtained in accordance with point (d) is added, if applicable, an amount resulting from the allocation of a premium of EUR 250 per person (age group 25-64) per year, applied to the number of persons in that region that would need to be subtracted in order to reach the average level of low education rate (less than primary, primary and lower secondary education) of all less developed regions;
 - f) to the amount obtained in accordance with point (e) is added, if applicable, an amount of EUR 1 per tonne of CO₂ equivalent per year applied to the population share of the region of the number of tonnes of CO₂ equivalent by which the Member State exceeds the target of greenhouse gas emissions outside the emissions trading scheme set for 2030 as proposed by the Commission in 2016;
 - g) to the amount obtained in accordance with point (f) is added, an amount resulting from the allocation of a premium of EUR 400 per person per year, applied to the population share of the region of net migration from outside the EU to the Member State since 1 January 2013.

Allocation method for the more developed regions eligible under the Investment for jobs and growth goal - Article 102(2)(c)

3. The total initial theoretical financial envelope shall be obtained by multiplying an aid intensity per head and per year of EUR 18 by the eligible population.
4. The share of each Member State concerned shall be the sum of the shares of its eligible regions, which are determined on the basis of the following criteria, weighted as indicated:
 - a) total regional population (weighting 20%);
 - b) number of unemployed people in NUTS level 2 regions with an unemployment rate above the average of all more developed regions (weighting 15%);
 - c) employment to be added to reach the average employment rate (ages 20 to 64) of all more developed regions (weighting 20%);
 - d) number of persons aged 30 to 34 with tertiary educational attainment to be added to reach the average tertiary educational attainment rate (ages 30 to 34) of all more developed regions (weighting 20%);
 - e) number of early leavers from education and training (aged 18 to 24) to be subtracted to reach the average rate of early leavers from education and training (aged 18 to 24) of all more developed regions (weighting 15%);
 - f) difference between the observed GDP of the region (measured in PPS), and the theoretical regional GDP if the region were to have the same GDP per head as the most prosperous NUTS level 2 region (weighting 7,5%);
 - g) population of NUTS level 3 regions with a population density below 12,5 inhabitants/km² (weighting 2,5%).
5. To the amounts by NUTS level 2 region obtained in accordance with point (4) is added, if applicable, an amount of EUR 1 per tonne of CO₂ equivalent per year applied to the population share of the region of the number of tonnes of CO₂ equivalent by which the Member State exceeds the target of greenhouse gas emissions outside the emissions trading scheme set for 2030 as proposed by the Commission in 2016.
6. To the amounts by NUTS level 2 region obtained in accordance with point (5) is added, an amount resulting from the allocation of a premium of EUR 400 per person per year, applied to the population share of the region of net migration from outside the EU to the Member State since 1 January 2013.

Allocation method for the Member States eligible for the Cohesion Fund - Article 102(3)

7. The financial envelope shall be obtained by multiplying the average aid intensity per head and per year of EUR 62.9 by the eligible population. Each eligible Member State's allocation of this theoretical financial envelope corresponds to a percentage based on its population, surface area and national prosperity, and shall be obtained by applying the following steps:
 - a) calculation of the arithmetical average of that Member State's population and surface area shares of the total population and surface area of all the eligible Member States. If, however, a Member State's share of total population exceeds its share of total surface area by a factor of five or more, reflecting an extremely high population density, only the share of total population will be used for this step;
 - b) adjustment of the percentage figures so obtained by a coefficient representing one third of the percentage by which that Member State's GNI per capita (measured in purchasing power parities) for the period 2014-2016 exceeds or falls below the average GNI per capita of all the eligible Member States (average expressed as 100%).

For each eligible Member State, the share of the Cohesion Fund shall not be higher than one third of the total allocation minus the allocation for the European territorial development goal after the application of paragraphs 10 to 16. This adjustment will proportionally increase all other transfers resulting from paragraphs 1 to 6.

Allocation method for the European territorial cooperation goal – Article 9

8. The allocation of resources by Member State, covering cross-border, transnational and outermost regions' cooperation is determined as the weighted sum of the shares determined on the basis of the following criteria, weighted as indicated:
- a) total population of all NUTS level 3 land border regions and of other NUTS level 3 regions of which at least half of the regional population lives within 25 kilometres of the land border (weighting 36%);
 - b) population living within 25 kilometres of the land borders (weighting 24%);
 - c) total population of the Member States (weighting 20%);
 - d) total population of all NUTS level 3 regions along border coastlines and of other NUTS level 3 regions of which at least half of the regional population lives within 25 kilometres of the border coastlines. (weighting 9.8%);
 - e) population living in the maritime border areas within 25 kilometres of the border coastlines (weighting 6.5%);
 - f) total population of outermost regions (weighting 3.7%).

The share of the cross-border component corresponds to the sum of the weights of criteria (a) and (b). The share of the transnational component corresponds to the sum of weights of criteria (c), (d) and (e). The share of the outermost regions' cooperation corresponds to the weight of criterion (f).

Allocation method for the additional funding for the outermost regions identified in Article 349 TFEU and the NUTS level 2 regions fulfilling the criteria laid down in Article 2 of Protocol No 6 to the 1994 Act of Accession – Article 104(1)(e)

9. An additional special allocation corresponding to an aid intensity of EUR 30 per inhabitant per year will be allocated to the outermost NUTS level 2 regions and the northern sparsely populated NUTS level 2 regions. That allocation will be distributed per region and Member State in a manner proportional to the total population of those regions.

Minimum and maximum levels of transfers from the funds supporting economic, social and territorial cohesion

10. In order to contribute to achieving adequate concentration of cohesion funding on the least developed regions and Member States and to the reduction of disparities in average per capita aid intensities, the maximum level of transfer (capping) from the Funds to each individual Member State will be determined as a percentage of the GDP of the Member State, whereby these percentages will be as follows:
- a) for Member States whose average GNI per capita (in PPS) is under 60% of the EU-27 average: 2,3% of their GDP
 - b) for Member States whose average GNI per capita (in PPS) is equal to or above 60% and below 65% of the EU-27 average: 1,85% of their GDP

- c) for Member States whose average GNI per capita (in PPS) is equal to or above 65% of the EU-27 average: 1,55% of their GDP.

The capping will be applied on an annual basis, and will - if applicable - proportionally reduce all transfers (except for the more developed regions and European territorial cooperation goal) to the Member State concerned in order to obtain the maximum level of transfer.

11. The rules described in paragraph 10 shall not result in allocations per Member State higher than 108 % of their level in real terms for the 2014-2020 programming period. This adjustment shall be applied proportionately to all transfers (except for the European territorial development goal) to the Member State concerned in order to obtain the maximum level of transfer.
12. The minimum total allocation from the Funds for a Member State shall correspond to 76% of its individual 2014-2020 total allocation. The adjustments needed to fulfil this requirement shall be applied proportionally to the allocations from the Funds, excluding the allocations under the European territorial cooperation goal.
13. The maximum total allocation from the Funds for a Member State having a GNI per capita (in PPS) of at least 120% of the EU-27 average shall correspond to its individual 2014-2020 total allocation. The adjustments needed to fulfil this requirement shall be applied proportionally to the allocations from the Funds, excluding the allocation under the European territorial cooperation goal.

Additional provisions

14. For all regions that were classified as less developed regions for the 2014-2020 programming period, but whose GDP per capita is above 75% of the EU-27 average, the minimum yearly level of support under the Investment for jobs and growth goal will correspond to 60% of their former indicative average annual allocation under the Investment for jobs and growth goal, calculated by the Commission within the multiannual financial framework 2014-2020.
15. No transition region shall receive less than what it would have received if it had been a more developed region.
16. A total of EUR 60 000 000 will be allocated for the PEACE PLUS programme where it is acting in support of peace and reconciliation. In addition, at least EUR 60 000 000 shall be allocated for the PEACE PLUS programme from the allocation for Ireland under the European Territorial Cooperation goal (INTERREG) for the continuation of North-South cross border co-operation.

The application of paragraphs 1 to 16 will result in Member State allocations as follows:
