ANNEX VIII

PROCESS OF RECOGNITION OF EQUIVALENCE

1. Principles:

- (a) equivalence can be determined for an individual measure, a group of measures or a system related to a certain commodity or a category of commodities or all of them;
- (b) the examination by the importing Party of a request for recognition of equivalence of measures pertaining to a certain commodity of the exporting Party shall not be a reason to disrupt trade or suspend on-going imports from the exporting Party of the commodity in question;
- (c) the process of recognition of equivalence is an interactive process between the exporting Party and the importing Party. The process consists of an objective demonstration of equivalence of individual measures by the exporting Party and an objective assessment of the equivalence with a view to the possible recognition of equivalence by the importing Party;
- (d) the final recognition of equivalence of the relevant measures of the exporting Party rests solely with the importing Party.

2. Preconditions:

- (a) the process depends on the health or pest status, the law and the effectiveness of the inspection and control system related to the commodity in the exporting Party. To this end the law in the sector concerned shall be taken into account, as well as the structure of the competent authority of the exporting Party, the command chain, the authority, the operational procedures and resources, and the effectiveness of the competent authorities as regards inspection and control systems, including the level of enforcement related to the commodity and the regularity and the rapidity of information flow to the importing Party in case of identified hazards. This recognition may be supported by documentation, verification and document, reports and information related to past experiences, assessments and verifications earlier documented;
- (b) the Parties shall initiate the process of recognition of equivalence pursuant to Article 57 of this Agreement after the successful completion of the approximation of a measure, a group of measures or a system included in the approximation list set out in Article 55(4) of this Agreement;
- (c) the exporting Party shall initiate the process only when no safeguard measures imposed by the importing Party apply to the exporting Party as regards the commodity.

3. The process:

- (a) the exporting Party initiates the process by submitting to the importing Party a request for recognition of equivalence of an individual measure or a group of measures or a system for a commodity or a category of commodities in a sector or sub-sector or all of them;
- (b) when appropriate, this request includes also the request and the required documentation for approval by the importing Party on the basis of equivalence of any programme or plan of the exporting Party required by the importing Party and/or the status of approximation as laid down in Annex XI of this Agreement regarding the measures or systems described in point (a) of this paragraph as a condition for allowing import of that commodity or a categories of commodities;
- (c) with this request, the exporting Party:
 - (i) explains the importance for trade of that commodity or categories of commodities;
 - (ii) identifies the individual measure(s) with which it can comply from all the measures expressed in the import conditions of the importing Party applicable to that commodity or category of commodities;
 - (iii) identifies the individual measure(s) for which it seeks equivalence out of the total of the measures expressed in the import conditions of the importing Party, applicable to that commodity or categories of commodities;

- (d) in reply to this request the importing Party explains the overall and individual objective and the rationale behind its measure(s), including the identification of the risk;
- (e) with this explanation, the importing Party informs the exporting Party on the relationship of its domestic measures and the import conditions for that commodity or categories of commodities;
- (f) the exporting Party objectively demonstrates to the importing Party that the measures that it has identified are equivalent to the import conditions for that commodity or category of commodities;
- (g) the importing Party objectively assesses the demonstration of equivalence by the exporting Party;
- (h) the importing Party concludes whether equivalence is achieved or not;
- (i) the importing Party provides to the exporting Party full explanation and supporting data for its determination and decision if so required by the exporting Party.

4. Demonstration of equivalence of measures by the exporting party and assessment of this demonstration by the importing Party:
- (a) the exporting Party shall objectively demonstrate equivalence for each of the identified measures of the importing Party expressed in its import conditions. When appropriate, equivalence shall objectively be demonstrated for any plan or program required by the importing Party as a condition to allow import (e.g. residue plan, etc.);
 - (b) objective demonstration and assessment in this context should be based, as far as possible, on:
 - (i) internationally recognised standards; and/or
 - (ii) standards based on proper scientific evidence; and/or
 - (iii) risk assessment; and/or
 - (iv) documents, reports and information related to past experiences, assessments and/or
 - (v) verifications; and
 - (vi) legal status or level of administrative status of the measures; and

(vii) level of implementation and enforcement on the basis of, in particular:

- corresponding and relevant results of surveillance and monitoring programmes;
- inspection results of the exporting Party;
- results of analysis with recognised analysis methods;
- verification and import check results by the importing Party;
- the performance of the competent authorities of the exporting Party; and
- earlier experiences.

5. Conclusion of the importing Party

The process may include an inspection or verification;

In case the importing Party arrives at a negative conclusion, it shall provide the exporting Party with a detailed and reasoned explanation.

6. For plants and plant products, equivalence concerning phytosanitary measures, shall be based on the conditions referred to in Article 57(6) of this Agreement.

ANNEX IX

IMPORT CHECKS AND INSPECTION FEES

A. Principles of import checks

Import checks consist of documentary checks, identity checks and physical checks.

As regards animals and animal products, the physical checks and their frequency shall be based on the level of the risk associated with such imports.

In carrying out the checks for plant health purposes, the importing Party shall ensure that the plants, plant products and other objects shall be meticulously inspected on an official basis, either in their entirety or by inspecting a representative sample, in order to make sure, that they are not contaminated by pests.

In the event that the checks reveal non-conformity with the relevant standards and/or requirements, the importing Party shall take measures proportionate to the risk involved. Wherever possible, the importer or his representative shall be given access to the consignment and the opportunity to provide any relevant information to assist the importing Party in taking a final decision concerning the consignment. Such decision shall be proportional to the level of the risk associated with such imports.

B. Frequencies of physical checks

The Parties shall assess the necessity of plant health import checks in bilateral trade for commodities referred to in the above Annex as originating in non-EU countries.

A reduced frequency of plant health import checks could be set up for regulated commodities with the exception of plants, plant product and other objects defined in accordance with Commission Regulation (EC) No 1756/2004 of 11 October 2004 specifying the detailed conditions for the evidence required and the criteria for the type and level of the reduction of the plant health checks of certain plants, plant products or other objects listed in Part B of Annex V to Council Directive 2000/29/EC.

ANNEX X

CERTIFICATION

A. Principles of certification

Plants and plant products and other objects:

In respect of certification of plants and plant products and other objects, the competent authorities shall apply the principles laid down in the relevant ISPMs.

Animals and animal products:

1. The competent authorities of the Parties shall ensure that certifying officers have a satisfactory knowledge of the veterinary law as regards the animals or animal products to be certified and, in general, are informed about the rules to be followed for drawing up and issuing of the certificates and, if necessary, as to the nature and extent of the enquiries, tests or examinations which should be carried out before certification.
2. Certifying officers must not certify data of which they have no personal knowledge or which cannot be ascertained by them.
3. Certifying officers must not sign blank or incomplete certificates, or certificates relating to animals or animal products, which they have not inspected or which have passed out of their control. Where a certificate is signed on the basis of another certificate or attestation, the certifying officer shall be in possession of the latter document before signing.

4. A certifying officer may certify data which have been:
 - (a) ascertained on the basis of paragraphs 1, 2 and 3 of this Annex by another person authorised by the competent authority and acting under the control of the latter authority, provided that the certifying officer can verify the accuracy of the data; or
 - (b) obtained, within the context of monitoring programmes, by reference to officially recognised quality assurance schemes or by means of an epidemiological surveillance system where this is authorised under the relevant veterinary law.
5. The competent authorities of the Parties shall take all necessary steps to ensure the integrity of certification. In particular they shall ensure that certifying officers designated by them:
 - (a) have a status which ensures their impartiality and have no direct commercial interest in the animals or products being certified or in the holdings or establishments in which they originate; and
 - (b) are fully aware of the significance of the contents of each certificate which they sign.
6. Certificates shall be drawn up in order to ensure that a specific certificate refers to a specific consignment in a language understood by the certifying officer and in at least one of the official languages of the importing Party as set out in Part C of this Annex.

7. Each competent authority shall be in a position to link a certificate with the relevant certifying officer and ensure that a copy of all certificates issued is available for a period to be determined by that competent authority.
8. Each Party shall introduce the checks and the controls necessary to prevent the issuing of false or misleading certifications and the fraudulent use of certificates purported to be issued for the purposes set out in the veterinary law.
9. Without prejudice to any judicial proceedings or penalties, the competent authorities shall carry out investigations or checks and take appropriate measures to penalise any instances of false or misleading certification, which are brought to their attention. Such measures may include the temporary suspension of the certifying officers from their duties until the investigation is over. In particular:
 - (a) if in the course of the checks it is found that a certifying officer has knowingly issued a fraudulent certificate, the competent authority shall take all necessary steps to ensure, as far as is possible, that the person concerned cannot repeat the offence;
 - (b) if in the course of the checks it is found that an individual or an undertaking has made fraudulent use of or has altered an official certificate, the competent authority shall take all necessary measures to ensure, as far as possible, that the individual or the undertaking cannot repeat the offence. Such measures may include a refusal to issue an official certificate to the person or the undertaking concerned.

B. Certificate referred to in Article 60(2)(a) of this Agreement

The health attestation in the certificate reflects the status of equivalence of the commodity concerned. The health attestation states compliance with the production standards of the exporting Party recognised as equivalent by the importing Party.

C. Official languages for certification

1. Import into the European Union

For plants, plant products and other objects:

The certificates shall be drawn up in a language understood by the certifying officer and in at least one of the official languages of the importing Party.

For animals and animal products:

The health certificate must be drawn up in at least one of the official languages of the EU Member State of destination and in one of those of the EU Member State in which the import checks provided for in Article 63 of this Agreement are carried out. However, an EU Member State may consent to the use of an official Union language other than its own.

2. Import into Georgia

The health certificate must be drawn up in Georgian, and in at least one of the official languages of the certifying EU Member State.

ANNEX XI
APPROXIMATION

ANNEX XI-A

PRINCIPLES FOR THE EVALUATION OF PROGRESS IN THE APPROXIMATION
PROCESS FOR THE PURPOSE OF RECOGNITION OF EQUIVALENCE

Part I - Gradual approximation

1. General rules

The sanitary, phytosanitary and animal welfare law of Georgia shall be gradually approximated to that of the Union, based on the approximation list of the EU sanitary, phytosanitary and animal welfare law. That list shall be divided into priority areas that relate to measures, as defined in Annex IV to this Agreement. For this reason Georgia shall identify its trade priority areas.

Georgia shall approximate domestic rules to the EU acquis by either:

- (a) implementing and enforcing through the adoption of additional domestic rules or procedures the rules in relevant EU acquis, or
- (b) by amending relevant domestic rules or procedures to incorporate the rules in relevant EU acquis.

In either case, Georgia shall:

- (a) eliminate any laws, regulations or any other measures inconsistent with the approximated domestic legislation;
- (b) ensure the effective implementation of approximated domestic legislation.

Georgia shall document such approximation in tables of correspondence according to a model indicating the date on which domestic rules enter into force and the official journal in which the rules were published. The model of the tables of correspondence for the preparation and evaluation is provided in Part II of this Annex. If the approximation is not complete, reviewers¹ shall describe the shortcomings in the column provided for comments.

Irrespective of the priority area identified, Georgia shall prepare specific tables of correspondence demonstrating the approximation for other general and specific legislation, including, in particular, the general rules related to:

- (a) control systems:
 - domestic market,
 - imports;
- (b) animal health and welfare:
 - the identification and the registration of animals and the registration of their movements,
 - the control measures for animal diseases,
 - domestic trade with live animals, semen, ova and embryos,
 - animal welfare on farms, during transport and slaughter;
- (c) food safety:
 - placing on the market of food and feed,
 - labelling, presentation and advertising of food including nutritional and health claims,
 - residues controls,
 - specific rules for feed;

¹ Reviewers shall be experts appointed by the European Commission.

- (d) animal by-products;

Part II - Evaluation

1. Procedure and method

Georgia's sanitary, phytosanitary and animal welfare law covered by Chapter 4 (Sanitary and Phytosanitary Measures) of Title IV (Trade and Trade-related Matters) of this Agreement shall be gradually approximated to that of the Union and shall be effectively enforced¹.

Tables of correspondence shall be prepared according to the model as laid down in point (2) of this Annex for each single approximated act and submitted in English for review by the reviewers.

If the result of the evaluation is positive for an individual measure, a group of measures, a system applicable to a sector, sub-sector, a commodity or a group of commodities, the conditions of Article 57(4) of this Agreement shall apply.

¹ For this occasion, it may be supported by the EU Member States' experts separately or in the margin of the CIB programs (twinning projects, TAIEX etc.).

2. Tables of correspondence

2.1. When preparing tables of correspondence, the following shall be taken into consideration:

The EU acts shall serve as a basis for preparation of a table of correspondence. To this end the version in force at the time of approximation shall be used. Particular attention shall be paid to precise translation into the national language, as linguistic imprecisions may lead to misinterpretation, in particular if they concern the scope of the law¹.

¹ To facilitate the approximation process, consolidated versions of certain pieces of Union legislation are available at the EUR-LEX web page under:
http://eur-lex.europa.eu/RECH_menu.do?ihmlang=en

2.2. Model of table of correspondence:
