COMMISSION OF THE EUROPEAN COMMUNITIES

Brussels, 6.7.2007 SEC(2007) 968

COMMISSION STAFF WORKING DOCUMENT

Accompanying document to the

FIRST REPORT TO THE EUROPEAN SECURITIES COMMITTEE AND TO THE EUROPEAN PARLIAMENT

on convergence between International Financial Reporting Standards (IFRS) and third country national Generally Accepted Accounting Principles (GAAPs)

{COM(2007) 405 final}

1.1.US GAAP ANNNEX 1

SIGNIFICANT ISSUES ACCORDING TO CESR ADVICE

		FASB		IASB	
Theme	Issues according to CESR advice (June 2005)	Current status as of 12/06 on FASB agenda	Prospects 2007/2008	Current status as of 12/06 on IASB agenda	Prospects 2007/2008
Share-based payments (IFRS 2)	N/A anymore with the application of FAS 123R				
	Acquisition date - Under US GAAP, the acquisition date is ordinarily the date on which consideration passes and the acquired (net) assets are received. That is, the date on which the transaction closes. However, if the parties agree in writing that effective control passes to the acquirer at an earlier date then that earlier date is the acquisition date. Under IFRS3 the acquisition date is the date on which the acquirer effectively obtains control of the acquiree. Under US GAAP shares issued as consideration are measured at their market price over a reasonable period of time (a few days) before and after the parties reach an agreement on the purchase price and the transaction is announced. Under IFRS 3 shares issued as consideration are measured at their fair value on the date of the exchange transaction.				
	In process R&D - In process R&D is capitalised under IFRS but usually expensed under US GAAP		A final document		
Business Combination (IFRS 3)	Negative Goodwill - Under IFRS 3 negative goodwill is recognized immediately as a gain. Under US GAAP it is initially allocated on a pro rata basis against the carrying amounts of certain acquired non-financial assets, with any excess recognized as an extraordinary gain.	On agenda – deliberations in process	should be issued in the second quarter of 2007.	On agenda – deliberations in process	An IFRS should be issued in the third quarter of 2007.
	Minority interest - Minority interest under IFRS is measured at fair value but under US GAAP it is at historical cost.				
	Step acquisitions - Step acquisitions under IFRS 3 require revaluation of previous interests at fair value at each acquisition date. Under US GAAP previous interests are not revalued, resulting in an accumulation of fair values at different dates				
	Contingent consideration - Under US GAAP, contingent consideration is part of the purchase price when additional consideration is issued or becomes issuable whereas under IFRS 3 it is part of the purchase price at the date of acquisition if payment is probable and can be measured reliably.				

plant &	Costs of replacing component parts - Costs of replacing component parts of an asset and planned major maintenance activities may be capitalized or expensed. The deferral method which is specified under IFRS is one of four possible methods under US GAAP.	Nothing specific			
Employee benefits (IAS 19)	US GAAP and IAS 19 have the same objectives and follow the same principles. While there are differences, the fact that there are four broad options for defined benefit schemes available under IAS make it difficult to determine which version would be used as the basis for reconciliation, and against that background a reconciliation would not help investors' decisions. The key point is to have adequate disclosures to enable investors to make decisions		A final document should be issued in the first quarter of 2007.	r	A Discussion Paper should be issued in the third quarter of 2007.
Consolidated & separate financial statements (IAS 27)	Scope of Consolidation. Under IAS 27 and SIC 12, the scope of consolidation is determined by reference to the principle of control defined in general terms as the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities (IAS 27.4). The issue of consolidation of Special Purpose Entities (SPE) in the US is very complex, being based on principles combined with additional guidance that altogether make the third country framework close to IFRS in most cases. The status of Qualifying SPEs (QSPEs) is slightly different as being essentially addressed in connection with provisions on derecognition of assets.	On agenda – currently inactive	None	On agenda – no publication yet	A Discussion Paper should be issued in the second quarter of 2007. An Exposure draft should be issued in the second semester of 2008.
Investments in associates (IAS 28)	No requirement to conform accounting policies where associate's policies are different	Nothing specific			
Impairments of assets (IAS	Impairment test - Impairments under US GAAP are based firstly on a comparison of carrying amount to the expected future cash flows to be derived from an asset (or asset group) on an undiscounted basis. If the carrying amount is lower the asset (or asset group) is not impaired, if higher then impairment is measured by comparing the carrying amount to the fair value of the asset (or asset group).	"Impairment" is a topic for shor agenda of IASB or FASB	t term convergence accor	ding to the Roadmap but is	is not on the
	Subsequent reversal of an impairment loss is prohibited under US GAAP				
Provisions (IAS 37)	Measurement of decommissioning provisions – discount rates are not adjusted under US GAAP	Nothing specific		On the Agenda (ED was issued in June 2005) but the project is not part of the MoU.	An IFRS should be issued in the first semester of 2008.

Intangibles Assets (IAS 38)	Capitalisation of development costs. Development costs and purchased IPR&D are expensed under US GAAP (with some exceptions)	This potential short-term convergence project is currently in the staff research phase.	N/C	On research agenda (led by a national standard- setter)	An Agenda Decisions should be made in the fourth quarter of 2007.
Financial instruments (IAS 39)	Key differences that could affect investors decisions are: • Derecognition of securitizations • Split accounting on convertible bonds • Reversal of impairments on debt securities	At joint meetings held in April 2 objectives to improve, simplify, instruments. The Boards are add Value Measurement, Fair Value projects are described in the next	and converge financial re dressing some of those im coption and Financial Ir	eporting requirements for f spediments in various activ	inancial e projects: Fair
Investment Property (IAS 40)	US GAAP does not permit property to be measured at fair value . A cost based method of accounting is generally required	To be considered by the FASB as option project	part of the fair value	See Fair value option proje	ect
Agriculture (IAS 41)	Differences in fair value of specific agriculture items	Nothing specific			

OTHER ISSUES WHICH WERE NOT SIGNIFICANT OR NOT IDENTIFIED IN CESR ADVICE BUT ON WHICH THERE IS A CONVERGENCE PROJECT

			FASB		IASB
Theme	Issues according to CESR advice (June 2005)	Current status as of 12/06 on FASB agenda	Prospects 2007/2008	Current status as of 12/06 on IASB agenda	Prospects 2007/2008
Subsequent events (IAS 10)	Not in the advice	To be examined	The Board expects to begin deliberation of issues in this project in late 2006 or early 2007.	Nothing specific	
	Not significant - Various differences in detail exist between US GAAP and IFRS. Nevertheless, basics and objectives of the standards are the same in both standards.	On the agenda - no publication yet	The Board plans to issue an Exposure Draft for public comment in the second quarter of 2007.	To be examined (jointly with the FSAB)	An ED should be issued in the second quarter of 2007. An IFRS should be issued in the second semester of 2008.
Segment reporting (IAS 14)	Not significant	Nothing specific yet		IFRS 8 was issued in Nov 2006 with an application on 1 Jan 2009.	N/A
Leases (IAS 17)	Not significant - IAS 17 and US GAAP have the same objective – to require leases that effectively transfer ownership of assets (usually called finance leases) to be capitalised. Differences of detail, between the standards may give rise to different treatment of the same leases under the two GAAPs, but a reasonably knowledgeable investor could be expected to understand that the lease terms will be different if the standards changed.	A joint international working group was formed in 2006 and will provide input on the issues to be considered in a lease project.	The Board will begin deliberations of those issues in 2007; those deliberations will result in issuing for public comment a discussion paper that explores lease accounting issues and describes the preliminary views of both Boards. That discussion paper is expected to be published in 2008.	On the agenda since July 2006 - no publication yet	A working group meeting held in Feb 2007. A Discussion Paper should be issued in the second semester of 2008.
recognition	Not significant - General principles are consistent between the two GAPS, but there are some differences of detail. Unlikely to affect investors' decision making as long as there is full disclosure of accounting policies and sufficient information provided under US GAAP for investor making decisions.	On agenda – no publication yet	The Board's goal is to issue a Preliminary Views by the end of 2007 covering both concepts- and standards-level revenue recognition guidance.	On agenda – no publication yet	A Discussion Paper should be issued in the fourth quarter of 2007.
Government grants (IAS 20)	Not significant	Nothing specific yet		On agenda – no publication yet	Timing yet to be determined - pending work on other projects

Borrowing costs (IAS 23)	Not significant	Nothing specific yet		On agenda – an ED was issued in May 2006.	An IFRS should be issued in the first quarter of 2007.
Earnings per share (IAS 23)	No significant differences	On agenda – The Board commenced redeliberations and noted that it and the IASB reached different conclusions on the earnings per share treatment of options, warrants, and their equivalents classified as equity, mandatorily convertible instruments, and convertible debt. The Board directed the staff to further analyze those differences for discussion at a future meeting.	An Exposure Draft should be issued in the second quarter of 2007.	On agenda – no publication yet	An Exposure Draft should be issued in the first quarter of 2007. An IFRS should be issued by the end of 2007.
Joint-ventures	No significant differences	Nothing specific yet		On the agenda - no publication yet	An Exposure Draft should be issued in the second quarter of 2007. An IFRS should be issued in the first half of 2008.
Fair Value measurement guidance		Statement 157 was issued in Sept 06	N/A	On agenda – Discussion Paper was issued in Nov 2006	A roundtable is going to take place in the second quarter of 2007. An ED should be issued in the second semester of 2008.
Fair Value Option	leter to his so in the provious labe	On agenda – On January 25, 2006, the Board issued an FASB Exposure Draft, The Fair Value Option for Financial Assets and Financial Liabilities, for Phase 1.	The Board will continue its discussions on disclosure requirements at a Board meeting in January 2007. A Statement for Phase 1 will be issued in the first quarter of 2007. The Board's activity on Phase 2 will begin after a final Statement has been issued for Phase 1.	On the agenda - no publication yet	N/C
Financial Instruments: Liabilities and Eauity		On the agenda - no publication yet	The Preliminary Views are expected to be issued in the second quarter of 2007.	On agenda – deliberations in process	A Discussion Paper should be issued in the second quarter of 2007.
Financial Statements Presentation	Nothing specific	On agenda – no publication yet	The FASB decided that it would not publish a separate Exposure Draft on Phase A of the project. Rather, it will expose its Phase A decisions along with its Phase B decisions. The initial output for Phase B is an initial discussion document (similar to a Preliminary Views or a Discussion Paper) that is expected to be published in the third quarter of 2007.	Exposure draft on phase A	On the first phase, an IFRS should be issued in the second quarter of 2007. On the second phase, a Discussion Paper should be issued in the second quarter of 2007 and an Exposure Draft should be issued in the second semester of 2008.

Issues advised by CESR concerning the equivalence assessment on Japanese Accounting Standards and

the ASBI's approach to those issues

(Note 1) The ASBI puts the above "No." for convenience.

(Note 2) Headings in the column "Remedies" means as follows.

Supplementary statement : Pro-forms statements including a limited restatement for taking account of under Japanese GAAP one identified aspects of IFRS requirement that is not present of not fully applied

Disclosure B : Quantitative indication of the impact of an event or transaction under IAS/IFRS provisions (The gross and net of tax effect of the difference on the profit and loss or on the shareholders' equity)

Disclosure A : Additional narrative and/or quantitative disclosures augmenting the disclosures already provided pursuant to Japanese GAAP

Future Agenda : To be reconsidered later

ANNEX 3:

Implementation Plan for Incorporating IFRSs into Canadian GAAP Calendar of Implementation Goals (As of June 30, 2006)

- 006 Expose definition of publicly accountable enterprises
- Initial meetings with Canadian Securities Administrators to initiate dialogue about disclosure requirements for transition to IFRSs
- Initial discussions with the SEC to determine if it will consider an exemption for comparative year financial information, similar to that provided for countries adopting **IFRSs** in 2005
- Determine policy for what, if any, modifications can be made to an IFRS on adoption into Canadian GAAP
- Consider treatment of Canadian standards that will have no IFRS equivalent at the changeover

Standards anticipated to be adopted

Accounting Changes* (effective January 1, 2007)

Earnings per Share* (effective 2007)

Financial Instruments — Disclosures* (effective October 1, 2007)

- 2007 Define criteria for assessment during Progress Review
- Expose disclosures required prior to adoption
- Determine basis for exposing existing IFRS for adoption into Canadian GAAP

Standards anticipated to be adopted

Business Combinations* (effective January 1, 2009)

Going Concern*

Income Taxes* (effective 2008)

Inventories* (effective July 1, 2007)

Joint Ventures*

Liabilities and Equity*

^{*} Standards anticipated to be adopted in substantially the same wording as IFRS counterpart

^{*} Standards anticipated to be adopted in substantially the same wording as IFRS counterpart

- Complete progress review
 Announce changeover timing
 Finalize disclosures required prior to adoption
 Issue omnibus exposure draft of existing IFRSs

Standards anticipated to be adopted Consolidations*

Government Grants*

Internally Developed Intangible Assets*

Fair Value Measurement*

- 2009 • Determine rules of procedure for the exposure of IFRS after changeover
- Finalize process for translation to both official languages

Standards anticipated to be adopted beyond 2008 Financial Statement Presentation*

Impairment*

Insurance Contracts*

Research and Development Costs*

Revenue Recognition*
