REPORT FROM THE COMMISSION

**FIFTH ANNUAL REPORT ON IMPLEMENTATION OF THE EUROPEAN
FISHERIES FUND (2011)**

ANALYSIS PER MEMBER STATE

Austria

The Austrian Operational Programme (OP) covers the entire territory of Austria which is designated as a non-convergence region with one convergence region (Burgenland).

Total eligible public expenditure of the OP amounts to EUR 10 393 753, out of which the EFF allocation amounts to EUR 5 259 318, divided between the convergence (EUR 249 769 with EUR 187 326 EFF allocation) and non-convergence region (EUR 10 143 984 with EUR 5 071 992 EFF allocation).

The allocation is almost entirely focused on axis 2 (98%).

Overall assessment: There is good progress in the implementation of the OP. The management and control system is functioning well.

In 2011, an EFF amount of EUR 678 790.50 was committed by the Member State and EUR 881 027 was certified to the Commission.

Belgium

The OP covers the entire territory of Belgium (except Hainaut) which is designated as a non-convergence region.

Total eligible public expenditure of the OP amounts to EUR 48 239 502, out of which the EFF allocation amounts to EUR 26 261 648.

Allocation between priority axes: 44% for axis 1, 13% for axis 2, 30% for axis 3; 7% for axis 4 and 5% for axis 5.

Overall assessment: There is good progress in the implementation of the OP. The management and control system is functioning well.

In 2011, an EFF amount of EUR 2 837 260.68 was committed by the Member State and no EFF expenditure was certified to the Commission.

Bulgaria

The OP covers the entire territory of Bulgaria which is designated as a convergence region. The total eligible public expenditure of the OP amounts to EUR 102 546 648, out of which the EFF allocation is EUR 75 876 747.

Allocation between priority axes: 10 % for axis 1, 45 % for axis 2, 25 % for axis 3, 15 % for axis 4 and 5 % for axis 5.

Overall assessment: the implementation of the OP in 2011 continues to show low commitment and payment rates. 4 132 961 EUR were de-committed from the 2009 financial envelope.

In 2011, an EFF amount of EUR 7 190 296.83 was committed by the Member State and EUR 7 190 296.83 was certified to the Commission.

The functioning of the management and control system for the EFF needs to be improved in order to ensure an effective implementation of the OP. As a consequence, the progress of the Bulgarian EFF Programme is slow; this is likely to result in a de-commitment of funds at the

end of the year. The high turnover of personnel has significantly affected the OP implementation.

Cyprus

Cyprus represents 0.46% of the total EFF amount. The OP covers the entire territory of the Republic of Cyprus which is designated as a non-convergence region. The total eligible public expenditure of the OP amounts to EUR 39 448 836, out of which the EFF allocation is EUR 19 724 418.

Allocation between priority axes: 26.36% for Axis 1, 16.48% for Axis 2, 50.32% for Axis 3, , 5.07% for Axis 4, and 1.77% for Axis 5.

In 2011, the OP was modified in terms of its financial table (Commission Decision C (2011)1658 of 16.03.2011).

Overall assessment: The OP progresses very well both in financial and operational terms. The MA has issued calls for expression of interest activating measures under all the Priority Axes of the OP. There is no N+2 risk for de-commitment until the end of the programming period.

In 2011, the EFF amount EUR 6 819 290 was committed by the Member State and EUR 4 367 980.78 was certified to the Commission.

Czech Republic

The OP covers the entire territory of the Czech Republic with the exception of Prague region and is designated as a convergence region.

The total eligible OP public expenditure is EUR 36 142 234, out of which the EFF allocation is EUR 27 106 675 EFF.

Allocation between priority axes: almost equally distributed between Axis 2 and 3 (44% and 51% respectively).

Overall assessment: good progress in implementation. Considering the deficiencies identified in the functioning of the management and control systems (involving mainly the Audit Authority), the Commission did not have reasonable assurance that the estimated error rate of 0% reported by the Audit Authority was correct.

In 2011, an EFF amount of EUR 5 279 250 was committed by the Member State and EUR 7 671 187.20 was certified to the Commission.

Germany

The OP covers the entire territory of the Federal Republic of Germany with the exception of the Länder Hamburg, Hesse, Rhineland-Palatinate and Saarland, who do not participate to the program. The Länder Brandenburg, Mecklenburg-West Pomerania, Saxony, Saxony-Anhalt, Thuringia and the region of Luneburg in Lower Saxony are designated as convergence regions and the rest of the Länder as non-convergence regions.

The total eligible public expenditure amounts to EUR 233 668 166, out of which the EFF allocation is EUR 149 121 176.

Allocation between priority axes: 4.5% for axis 1, 14.5% for axis 2, 47% for axis 3, 12.3% for axis 4 and 2.3% for axis 5.

Overall assessment: The OP has a slow rate of implementation.

In 2011, an EFF amount of EUR 15 478 613 was committed by the Member State and EUR 13 447 500.06 was certified to the Commission.

Denmark

The OP covers the entire territory of Denmark which is designated as a non-convergence area.

Total eligible public expenditure amounts to EUR 267 350 338 out of which the EFF allocation is EUR 133 675 169.

Allocations between priority axes: 30.20% for axis 1, 28.2% for axis 2, 27.3% for axis 3, 9.3% for axis 4 and 5% for axis 5

Overall assessment: The OP has a satisfactory rate of implementation.

In 2011, an EFF amount of EUR 17 963 839 was committed by the Member State and EUR 19 207 290.65 was certified to the Commission.

Estonia

The OP covers the entire territory of Estonia which is designated as a convergence region.

Total eligible public expenditure of the OP amounts to EUR 112 757 386, out of which EFF allocation is EUR 84 568 039.

The allocation between priority axes: 18% for axis 1, 29% for axis 2; 25% for axis 3, 23% for axis 4 and 5% for axis 5.

Overall assessment: The programme implementation is running smoothly. Management and control system functioning well.

In 2011, an EFF amount of EUR 13 458 144 was committed by the Member State and EUR 10 967 984.31 was certified to the Commission.

Spain

The Spanish OP covers Galicia, Castilla-La Mancha, Extremadura, Andalucia, Principado de Asturias, Region de Murcia, and Ciudades autonomas de Ceuta y Melilla as convergence regions and the rest of the country as a non-convergence region.

Total public contribution amounts to EUR 2 115 720 056, out of which EFF allocation is EUR 1 131 890 912.

Allocation between priority axes: 39% for axis 1, 28.5% for axis 2, 26.4% for axis 3 and 4.4% for axis 4.

Overall assessment: The implementation of the OP slowed down in 2011. National commitment were reduced by 43% in convergence area and by 67% in non convergence area. Certified amounts followed the same pattern. Axis 2, in particular in non convergence area, was more particularly affected by this slow down in 2011. Overall, in terms of commitments, the implementation rate was 39% in convergence area by the end of 2010 and was 48% by the end of 2011. In non convergence area, it was 49% by the end of 2010 and 54% by the end of 2011.

In 2011, an EFF amount of EUR 93 479 162 was committed by the Member State and EUR 137 440 333.87 was certified to the Commission.

Finland

The OP covers the entire territory of the country which is designated as a non-convergence region. It also includes support for the Åland Islands.

The total eligible public expenditure of the programme is EUR 91 848 827, out of which EFF allocation is EUR 39 448 827.

Allocation between priority axes: 8.7% for axis 1, 43.1% for axis 2, 37.5% for axis 3, 9.1% for axis 4 and 1.6% for axis 5.

Overall assessment: The OP has a good rate of implementation. Finland reported an error rate of 3.23% in the 2011 annual control report..

In 2011, an EFF amount of EUR 6 947 151.70 was committed by the Member State and EUR 5 424 406.97 was certified to the Commission.

France

The OP covers four convergence regions, Guadeloupe, Guyane, Martinique and Réunion (the DOMs) and the rest of the country designated as non-convergence region.

Current total public contribution amounts to EUR 562 950 450.06 (following 3rd OP modification on 04.05.2011 (C(2011)2935) out of which EFF allocation is EUR 216 053 084.

Allocation between priority axes: 30.1% for axis 1, 25.1% for axis 2, 41.0% for axis 3, 2.6% for axis 4 and 1.2% for axis 5.

Overall assessment: By the end of 2011, a total amount of EUR 79 303 704 had been certified to the Commission. In non-convergence regions implementation was very high for axis 1 (mainly for permanent and temporary cessation of fishing activities) while lagging behind for other axes. Implementation in convergence regions is very slow due to administrative delays, to the difficulty to identify new projects and to find private funding.

In 2011, an EFF amount of EUR 27 178 892 was committed by the Member State and EUR 19 528 675 was certified to the Commission.

Greece

Greece represents 4.83% of the total EFF amount. The OP covers the whole territory of Greece (the regions of Sterea Ellada and South Aegean are non-convergence regions while the rest of the country is a convergence region).

The total public contribution amounts to EUR 274 105 143 out of which the EFF allocation is EUR 207 832 237 (EUR 176 836 728 for the 11 Convergence regions and EUR 30 995 509 for the 2 non-convergence regions).

Allocation between priority axes: 37% was allocated to Axis 1, 28.7% to Axis 2, 16% to Axis 4, 15.55% to Axis 3, and 2.53% to Axis 5.

Overall assessment: The rate of implementation of the OP is slow mainly due to:

a) the complicated national legal framework (the issue of a Joint Ministerial Decision is prerequisite for the implementation of each measure, long delays in the establishment of an institutional framework for the spatial planning of aquaculture that aimed at clarifying the licensing regime for aquaculture units),

b) the numerous political changes resulting in the transfer of the responsibility of the Managing Authority (MA) from the Ministry of Agriculture to the Ministry of Development, Competitiveness and Shipping, where a Secretary General -who inter alia chairs the Monitoring Committee- had not been nominated until the recent governmental elections,

c) the insufficient administrative capacity of the MA and the Intermediate body (staff losses, lack of specific competences such as legal officer specialized in EU law and IT officer), and

d) the economic crisis resulting both in low commitment and payment rates at national level and low interest from private beneficiaries to invest despite of the co-funding facility. The Managing Authority has worked on the setting up of a financial mechanism (a holding fund known as ENALIO), to facilitate guarantees and borrowing for private project promoters. The instrument, however, is not up and running yet, as further to the two (2) calls for tenders that have been launched, it is proving difficult to find a bank to manage and co-fund the instrument.

In 2011, an EFF amount of EUR 91 812 784.42 was committed by the Member State and EUR 26 878 883.21 was certified to the Commission.

One payment claim has been submitted to the Commission amounting to EUR 22 193 944.49 for the Convergence regions and EUR 4 684 938.72 for the non-convergence.

Hungary

The Hungarian OP covers Budapest area (Közép-Magyarország) as a non-convergence region and the rest of the country as a convergence region.

The total public contribution is EUR 46 840 816, out of which the EFF allocation is EUR 34 850 860 (EUR 34 291 357 for convergence regions and EUR 559 503 for the non-convergence region).

Allocation between priority axes: 69.3% for axis 2; 25.6% for axis 3 and 5% for axis 5.

Overall assessment: The OP rate of implementation is good for Axis 2, but rather slow for Axis 3. Management and control system is functioning well.

In 2011, an EFF amount of EUR 6 209 679 was committed by the Member State and EUR 3 077 169 was certified to Commission.

Ireland

The Irish OP covers the entire country which is designated as a non-convergence region.

Total public contribution amounts to EUR 65 555 603 out of which EFF allocation is EUR 42 266 603.

Allocation between priority axes: 82% for axis 1, 14.5 % for axis 3 and 3.5% for axis 4. Scrapping which takes 82% (i.e. EUR 34 800 000) of the OP is at a satisfactory level with EUR 7 300 000 still to be spent. 46 vessels have already been scrapped.

Overall assessment: The OP implementation is progressing well. A second interim payment claim was received on 22 December 2011 thus removing any risk of de-commitment.

In 2011, no project was committed by the Member State and an no EFF amount was certified to the Commission.

Italy

The OP includes Sicily, Puglia, Campania, Basilicata and Calabria as convergence regions and the rest of the country as a non-convergence area.

The total public contribution amounts to 848 685 708 out of which the EFF allocation is EUR 424 342 854 (EUR 318 281 864 for convergence regions and EUR 106 060 990 for non-convergence).

Allocation between priority axes: 39% for axis 1, 25% for axis 2, 25.5% for axis 3, 5.5% for axis 4 and 5% for axis 5.

Overall assessment: Italy has a large programme with substantial allocation to axis 1 representing a major challenge for absorption. The complex management system where the regions manage their share of the OP, and delays in the implementation of Axis 3 and 4 contributed to the low rate of absorption in the earlier stage of the programme. Eventually, in 2011 the implementation of the operational program boosted, mainly thanks to a massive use of Axis 1 measures (permanent and temporary cessations of fishing activities in the framework of a Fishing Effort Adjustment Plan). Also Axis 4 eventually started the implementation and in late 2011 five fisheries groups were selected with about 30 more groups in the pipeline, although not yet producing certified expenditure. On the other side, the measure "modernisation of fishing vessels" had to be interrupted due to the findings of the Court of Auditors in its audit on overcapacity. In general, measures managed by the central Managing authority and by non-convergence regions had better implementation rate than in convergence regions. Nevertheless, no decommitments of EFF allocations occurred in 2011. In late 2011 the Managing authority approved a shift of EFF allocations to reinforce the implementation of Axis 1 and 4.

In 2011, an EFF amount of EUR 74 548 985 was committed by the Member State and EUR 59 267 535 was certified to the Commission.

Lithuania

The OP covers the entire territory of the country which is designated as a convergence region.

Total public contribution amounts to EUR 71 256 575 out of which EFF allocation is EUR 54 713 408.

Allocation between priority axes: 14% for axis 1, 51% for axis 2, 18% for axis 3, 12% for axis 4 and 5% for axis 5.

Overall assessment: The implementation of the programme is running smoothly, with great progress in priority axes 1 and 2 and some delays in axis 4 and 3. Management and control system is functioning well.

In 2011, an EFF amount of EUR 8 950 374.19 was committed by the Member State and EUR 4 675 239.50 was certified to the Commission.

Latvia

The OP covers the entire territory of the country which is designated as a whole as a convergence region.

Total eligible public expenditure of the OP for the whole programming period amounts to EUR 166 687 419, out of which EFF allocation is EUR 125 015 563.

Allocation between priority axes: 21% for axis 1, 39% for axis 2, 22% for axis 3, 14% for Axis 4 and 4% for Axis 5.

Overall assessment: The OP has a good execution rate and the implementation is running smoothly. The management and control system is functioning well.

In 2011, an EFF amount of EUR 36 649 096 was committed by the Member State and EUR 25 474 344 was certified to the Commission.

Malta

The OP covers the entire territory of the country which is designated as a whole as a convergence region.

The total public contribution amounts to EUR 11 163 105, out of which the EFF allocation is EUR 8 372 329.

Allocation between priority axes: 25.98% for axis 1, 20.4% for axis 2, 48.9% for axis 3, and 4.7% for axis 5.

Overall assessment: In Malta the EFF Operational Programme was implemented smoothly with important progress made in Axis 1 – the objectives for de-commissioning were by far more than achieved. A substantial processing and marketing project was fairly advanced, and port installations up-graded. A national aquaculture strategy for the forthcoming programming period was prepared through a preparatory study. No major difficulties are foreseen in the implementation of the Operational programme.

The Managing Authority was shifted from the Resources (Fisheries) towards the Office of the Prime Minister where the administration of the Structural Funds is situated. This change led to a second modification of the Operational Programme.

In 2011, an EFF amount of EUR 2 447 671.89 was committed by the Member State and EUR 1 131 003 was certified to the Commission.

The Netherlands

The OP covers the entire territory of the Netherlands which is designated as a whole as a non-convergence region. Total eligible public expenditure of the OP amounts to EUR 120 578 417, out of which the EFF allocation is EUR 48 578 417.

Allocation between priority axes: 35% for axis 1; 15% for axis 2; 35% for axis 3; 10% for axis 4 and 5% for axis 5.

Overall assessment: The OP has a rather slow rate of implementation. The management and control system has been accepted by the Commission, but some shortcomings in its functioning have been observed. The Dutch authorities reported an error rate of 5.9% in the 2011 annual control report.

In 2011, an EFF amount of EUR 5 786 964 was committed by the Member State and EUR 4 638 743.45 was certified to the Commission.

Poland

The EFF OP covers the entire territory of Poland which is designated as a whole as a convergence region.

The total eligible public expenditure amounts to EUR 978 790 099, out of which the EFF allocation is EUR 734 092 574.

Initially, the allocation between priority axes was 23% for axis 1, 20% for axis 2, 20% for axis 3, 32% for axis 4, and 5% for axis 5. Following an OP modification on 21 December 2011 (decision C(2011) 9964), the allocation between priority axes is as follows: 19.1% for axis 1, 22.2% for axis 2, 21.7% for axis 3, 32% for axis 4 and 5% for axis 5.

Overall assessment: The management and control systems were approved by the Commission. The implementation level was further improving in 2011, notably in axes 2 and 3.

In 2011, an EFF amount of EUR 141 544 199.90 was committed by the Member State and EUR 102 119 571.92 was certified to the Commission.

Portugal

The Portuguese OP includes Lisbon and the autonomous Region of Madeira as a non-convergence regions and the rest of the country as a convergence regions. Total public contribution amounts to EUR 325 790 279, out of which the EFF allocation is EUR 246 485 249.

Allocation between axes: 25.5% for axis 1, 30.10% for axis 2, 33.84% for axis 3, 7.06% for axis 4 and 3.5% for axis 5.

Overall assessment: The implementation of the OP made good progress in 2011 mainly for commitments but is still delayed in terms of achievements. The overall rate of commitment is 62% for convergence but only 47% for non-convergence regions. The management and control system was accepted by the Commission.

In 2011, an EFF amount of EUR 30 175 775 was committed by the Member State and EUR 29 368 170.52 was certified to the Commission.

Romania

The Romanian OP covers the entire territory of the country which is designated as a whole as a convergence region.

The total eligible public expenditure of the programme amounts to EUR 307 618 942.7 out of which the EFF allocation is EUR 230 714 207. Allocation between priority axes: 4.32% for axis 1, 45.51% for axis 2, 13% for axis 3, 32.51% for axis 4 and 4.66 % for axis 5.

Overall assessment: The OP is a large programme in financial terms if compared with the size of the fisheries sector; implementation of the OP in 2011 showed relative progress, since the description of the Management and Control System (MCS) was only approved on 16 November 2011. Nevertheless, this step ahead was overshadowed by a Report received from the Romanian Audit Report on the functioning of the MCS and outlining a number of deficiencies. Romania also experienced a de-commitment of EUR 68 563 Euro in 2011, which prove significant deficiencies in the implementation of the OP. These deficiencies concern the functioning of the MCS, and the heavy and complicate administrative environment. The high turnover of personnel continued with a series of staff changes at all hierarchical levels thus affecting the OP implementation.

On the other hand, Romania made some progress on Axis 4 in 2011, which led to the selection of 15 FLAGs at the beginning of 2012.

In 2011, an EFF amount of EUR 36 992 536.83 was committed by the Member State and EUR 22 029 538.97 was certified to the Commission.

Sweden

The OP covers the entire territory of the country which is designated as a whole as a non-convergence region.

Total eligible public expenditure amounts to EUR 104 774 205, out of which the EFF allocation is EUR 54 664 803.

Allocation between priority axes: 25% for axis 1, 20% for axis 2, 35% for axis 3, 15% for axis 4 and 5% for axis 5.

Overall assessment: The OP has a satisfactory rate of implementation. Sweden reported an error rate of 3.7% in the 2011 annual control report.

In 2011, an EFF amount of EUR 5 616 079 was committed by the Member State and EUR 5 523 684.63 was certified to the Commission.

Slovenia

The OP covers the entire territory of the country which is designated as a whole as a convergence region.

The total public contribution amounts to EUR 28 853 712, out of which the EFF allocation is EUR 21 640 283.

Allocation between priority axes: 10% for axis 1, 37% for axis 2, 35% for axis 3, 10% for axis 4 and 8% for axis 5.

In 2011, an EFF amount of EUR 7 499 761.55 was committed by the Member State and EUR 3 523 408.72 was certified to the Commission.

Slovenia continued its heavy investment in the up-grading of fishing harbours and gave widespread support to aquaculture be it in fresh- or seawater; preparations took place for implementing Axes 1 and 4.

Overall assessment: No major difficulties are foreseen in the implementation of the Operational Programme.

The Management and Control System remained unchanged, and the committed funding could be completely absorbed.

Slovakia

The OP covers the entire territory of the country which is designated as a Convergence region, with the exception of Bratislava and surrounding districts in Non-Convergence.

The total OP public expenditure was reduced from EUR 18 922 750, applying the rule of automatic de-commitment to EUR 18 705 554, out of which EFF allocation is EUR 13 579 930.

Allocation between priority axes was also modified with this decision: 84% for axis 2, 11% for axis 3 and 5% for axis 5.

Overall assessment: The slow initial progress in the implementation improved during 2011. However, axis 3 and the non-convergence region continue to be a concern with very small commitment rate. Slovakia reported an error rate of 2.33% in the 2011 annual control report..

In 2011, an EFF amount of EUR 5 878 933 was committed by the Member State and EUR 1 257 371.92 was certified to the Commission. EUR 108 598 in non-convergence objective was de-committed

United Kingdom

The OP covers Cornwall and the Isles of Scilly, West Wales and the Valleys, Highlands and Islands as convergence regions and the rest of the UK as non-convergence region.

The total OP public expenditure is EUR 246 800 000 out of which the EFF allocation is EUR 137 827 889.

Allocation between priority axes for all areas: 28.8% for axis 1, 24.4% for axis 2, 36.0% for axis 3, 8.4% for axis 4 and 2.5 % for axis 5.

Overall assessment: As in previous years, EFF implementation progress varies between the devolved administrations. While England and Scotland show the best progress, Wales and Northern Ireland are lagging behind.

In 2011, an EFF amount of EUR 83 000 000 was committed by the Member State and EUR 27 814 843.45 was certified to the Commission.

The main achievements of the year 2011 are the acceptance of Management and Control System for Priority Axis 1, 2, 3 and 5 and launching Priority Axis 4. Following the mid-term evaluation, in 2011 preparations started for the Operational Programme modification.

II FINANCIAL TABLES

TABLE I. FINANCIAL EXECUTION CONVERGENCE

Country		Decided a	Committed b	Paid c	% (b) / (a)	% (c) / (a)
Belgique-Belgie	Period 2007-2013	0.00	0.00	0.00	0.00%	0.00%
