Whereas:

- (1) The Communication from the Commission to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions on "The CAP towards 2020: Meeting the food, natural resources and territorial challenges of the future"⁵ sets out potential challenges, objectives and orientations for the Common Agricultural Policy (CAP) after 2013. In the light of the debate on that Communication, the CAP should be reformed with effect from 1 January 2014. That reform should cover all the main instruments of the CAP, including Council Regulation (ECU) No ~~COM(2010)799~~ **1234/2007** of ~~...~~ **22 October 2007** establishing a common organisation of agricultural markets and on specific provisions for certain agricultural products (Single CMO Regulation)⁶. In view of the scope of the reform, it is appropriate to repeal *that* Regulation ~~(EU) No COM(2010)799~~ and to replace it with a new Single CMO Regulation. The reform should also, as far as possible, harmonise, streamline and simplify the provisions, particularly those covering more than one agricultural sector, including by ensuring that non-essential elements of measures may be adopted by the Commission by way of delegated acts.
- (2) ***The power to adopt acts in accordance with Article 290 of the Treaty on the Functioning of the European Union should be delegated to the Commission in respect of certain specific issues.*** It is of particular importance that the Commission carry out appropriate consultations during its preparatory work, including at expert level. The Commission, when preparing and drawing up delegated acts, should ensure a simultaneous, timely and appropriate transmission of relevant documents to the European Parliament and to the Council.

⁵ COM(2010) 672 final, 18.11.2010.

⁶ OJ L 299, 16.11.2007, p. 1.

- (3) Pursuant to Article 43(3) of the Treaty on the Functioning of the European Union (the Treaty), the Council shall adopt measures on fixing prices, levies, aid and quantitative limitations. In the interest of clarity, where Article 43(3) of the Treaty applies, this Regulation should explicitly refer to the fact that measures will be adopted by the Council on that basis.
- (4) This Regulation should contain all the basic elements of the Single CMO. ~~The fixing of prices, levies, aid and quantitative limitations is in certain cases inextricably linked to those basic elements.~~
- (5) This Regulation should apply to all agricultural products listed in Annex I to the Treaty *on the European Union and the Treaty on the Functioning of the European Union* in order to ensure the existence of a common organisation of the market for all such products, as required by Article 40(1) of the Treaty.
- (6) It should be clarified that Regulation (EU) No [...] [horizontal CAP Regulation]⁷ and the provisions adopted pursuant to it should *in principle* apply to the measures set out in this Regulation. In particular, the [horizontal CAP Regulation] lays down provisions to guarantee compliance with the obligations laid down by CAP provisions, including checks and the application of administrative measures and administrative penalties in case of non-compliance, and rules related to the lodging and releasing of securities and the recovery of undue payments.
- (6a)* In order to take into account the specificities of the rice sector, the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission in respect of updating the definitions concerning the rice sector set out in Part I of Annex II of this Regulation.

⁷ ...

- (7) This Regulation and other acts adopted under Article 43 to the Treaty refer to the description of products and references to the headings or subheadings of the combined nomenclature. Amendments to the Common Customs Tariff nomenclature may necessitate consequential technical adjustments to such Regulations. ~~The Commission should be able to adopt implementing measures to make such adjustments. In order to take into account such amendments, the power to adopt certain acts should be delegated to the Commission in respect of making the necessary adjustments.~~ In the interests of clarity and simplicity, Council Regulation (EC) No 234/79 of 5 February 1979 on the procedure for adjusting the Common Customs Tariff nomenclature used for agricultural products⁸ which currently provides for such a power should be repealed and the power integrated into the present Regulation.
- ~~(8) In order to take into account the specificities of the rice sector, the power to adopt certain acts in accordance with Article 290 of the Treaty should be delegated to the Commission in respect of updating the definitions concerning the rice sector set out in Part I of Annex II of this Regulation.~~
- (9) ~~In order to ensure that production is orientated towards certain varieties of paddy rice, the Commission should be able to adopt implementing measures in respect of fixing increases and reductions of the public intervention price. Union scales for the classification, identification and presentation of carcasses in the beef and veal, pigmeat, and sheepmeat and goatmeat sectors should be fixed.~~
- (10) Marketing years should be fixed for cereals, rice, sugar, dried fodder, seeds, *wine*, olive oil and table olives, flax and hemp, fruit and vegetables, bananas, milk and milk products, and silkworms, and adapted as far as possible to the biological production cycles of each of those products.

⁸ OJ L 34, 9.2.1979, p. 2.

- (11) In order to take into account the specificities of the fruit and vegetables and processed fruit and vegetables sectors, the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission in respect of fixing the marketing years for those products.
- (12) In order to stabilise the markets and to ensure a fair standard of living for the agricultural community, a differentiated system of price support for the different sectors has been developed and direct support schemes have been introduced, taking into account the different needs in each of these sectors on the one hand and the interdependence between different sectors on the other. Those measures take the form of public intervention or, as the case may be, the payment of aid for private storage. There continues to be a need to maintain price support measures whilst streamlining and simplifying them.
- (13) For the sake of clarity and transparency, the provisions should be made subject to a common structure, whilst maintaining the policy pursued in each sector. For that purpose it is appropriate to distinguish between reference prices and intervention prices and to define the latter, ~~in particular, clarifying that only intervention prices for public intervention correspond to the applied administered prices referred to in the first sentence of paragraph 8 of Annex 3 to the WTO Agreement on Agriculture (i.e. price gap support)~~. In this context it should be understood that market intervention can take the form of public intervention as well as other forms of intervention that do not use ex-ante established price indications.
- (14) As appropriate to each sector concerned in the light of the practice and experience under previous CMOs, the system of intervention should be available during certain periods of the year and should be open during that period either on a permanent basis or should be opened depending on market prices.

- (15) ~~The price level at which buying in under public intervention, i.e. price gap support, should be carried out at a fixed price for certain quantities for some products and in other cases should depend on tendering, reflecting the practice and experience under previous CMOs.~~
- (16) This Regulation should provide for the possibility of disposal of products bought in public intervention. Such measures should be taken in a way that avoids market disturbances and that ensures equal access to goods and equal treatment of purchasers.
- (16a) The existing scheme for food distribution to the most deprived in the Union adopted under the ~~common agricultural policy~~ **CAP** should be the subject of a separate regulation adopted to reflect its social cohesion objectives. Provision should nevertheless be made in this Regulation to allow for disposal of products held in public intervention by making them available for use in the scheme.
- (17) In order to ~~ensure~~ **provide for** market transparency, the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission in respect of laying down the conditions under which it may decide to grant private storage aid in order to achieve the aim of balancing the market and stabilising the market prices, and taking into account the market situation.

- (18) In order to *ensure that products bought in under public intervention or subject to aid for private storage are suitable for long-term storage and of fair, sound and marketable quality and to take into account the specificities of the different sectors for the purposes of ensuring the cost-effective operation of public intervention and private storage*, the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission in respect of ~~adopting laying down~~ the requirements and conditions to be met by *those products to be bought in under public intervention and to be stored under the system of private storage aid*, in addition to the requirements laid down in this Regulation, as well as *quality criteria for buying-in and sales of cereals and paddy rice in respect of adopting the applicable price increases or reductions for quality purposes as regards both buying-in and sales and in respect of adopting the provisions relating to the obligation for the paying agencies to have all the beef boned after the take-over and prior to the placing into storage.*
- (19) In order to *ensure appropriate storage capacity and the efficiency of the public intervention system in terms of cost effectiveness, distribution and access for operators, and to maintain the quality of products bought in under public intervention for their disposal at the end of the storage period take account of the diversity of situations relating to the storage of intervention stocks in the Union and to ensure adequate access to public intervention for operators*, the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission in respect of the requirements to be met by ~~intervention~~ storage places for ~~the all products to be bought in under the system subject to public intervention, provisions relating to the sale of small quantities remaining in storage in the Member States; and rules for direct sale quantities which may no longer be repackaged or are deteriorated;~~ and certain rules on storage of products inside and outside the Member State responsible for them and their treatments as regards customs duties and any other amounts to be granted or levied under the CAP.

- (20) In order to ensure that private storage has the desired effect on the market, the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission in respect of ~~measures for reducing the amount of aid to be paid~~ *rules and conditions applicable* where the quantity stored is lower than the contracted quantity; and conditions for granting of an advance payment.
- (21) In order to ~~safeguard the rights and obligations of operators participating in~~ *ensure the proper functioning of the* public intervention ~~or~~ *and* private storage ~~measures~~ *systems*, the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission in respect of provisions ~~relating to~~ *for* the use of tendering procedures; ~~the eligibility of additional conditions to be fulfilled by~~ operators; and an obligation to lodge a security ~~guaranteeing~~.
- (22) In order to *take account of technical developments and of the needs of the beef and veal, pigmeat, and sheepmeat and goatmeat sectors, as well as the need to standardise the presentation of the different products for the purposes of improving market transparency, price recording and the application of the market intervention measures* ~~standardise the presentation of the different products for the purposes of improving market transparency, price recording and the application of market intervention arrangements in the form of public intervention and private storage~~, the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission in respect of *adapting and updating* Union scales for the classification of carcasses in ~~the beef and veal, pigmeat and sheepmeat and goatmeat~~ *those* sectors *as well as laying down certain related additional provisions and derogations*.
- (23) ~~In order to ensure accuracy and reliability of the classification of carcasses, the power to adopt certain acts in accordance with Article 290 of the Treaty should be delegated to the Commission in respect of the review of the application of classification of carcasses in Member States by a Union committee.~~

- ~~(24) The existing scheme for food distribution to the most deprived in the Union adopted under the common agricultural policy should be the subject of a separate regulation adopted to reflect its social cohesion objectives. Provision should nevertheless be made in this Regulation to allow for disposal of products held in public intervention by making them available for use in the scheme.~~
- (25) The consumption of fruit and vegetables and milk products amongst children should be encouraged, including by durably increasing the share of those products in the diets of children at the stage when their eating habits are being formed. Union aid to finance or co-finance the supply to children in educational establishments of such products should therefore be promoted.
- (26) In order to ensure a sound budgetary management of the schemes, appropriate provisions for each one should be established. Union aid should not be used to replace funding for any national existing school fruit schemes. In the light of budgetary constraints, Member States should nonetheless be able to replace their financial contribution to the schemes with contributions from the private sector. In order to make their school fruit scheme effective, Member States should provide for accompanying measures for which ~~Member States~~ *they* should be allowed to grant national aid.

(27) In order to promote the healthy eating habits of children *and to ensure that the aid is targeted at children in regular attendance at educational establishments administered or recognised by Member States*, to ensure the efficient and targeted use of European Funds and to promote awareness of the scheme the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission in respect of the school fruit scheme concerning: *the additional criteria related to the targeting of aid; the products that are ineligible for the scheme; the target group of the scheme; the national or regional strategies that Member States must draw up in order to benefit from the aid, including the accompanying measures;* the approval and selection of aid applicants; ~~objective criteria for the allocation of aid between Member States, the indicative allocation of aid between Member States and~~ the method for reallocating aid between Member States ~~based~~ *on the basis of requests for aid applications* received; the costs eligible for *Union* aid; ~~including the possibility of fixing an overall ceiling for such costs; the obligation for the Member States to monitor and evaluate the effectiveness of their school fruit schemes;~~ and requiring ~~participating~~ Member States *with a school fruit scheme* to publicise the subsidising role of the ~~scheme~~ *Union aid*.

- (28) In order to take account of the evolution in the dairy products consumption patterns, ~~and of~~ the innovations and developments on the dairy products market, *the availability of products on the different markets of the Union and nutritional aspects, as well as in order* to ensure ~~that the appropriate beneficiaries and applicants qualify for the aid and~~ *the efficient and effective use of Union aid, to ensure that aid applicants respect their obligations,* to promote awareness of the aid scheme *and to ensure that the aid is reflected in the price of the products,* the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission in respect of the school milk scheme concerning: the products that are eligible for the scheme; ~~the Member State's~~ national or regional strategies; ~~that Member States must draw up in order to benefit from the aid and~~ the target group for the scheme; the ~~conditions for granting~~ *beneficiaries and applicants eligible for the aid; requirement for the applicants to be approved by Member States; the use of dairy products in the preparation of meals in educational establishments;* aid; the lodging of a security ~~guaranteeing the execution~~ where an advance of aid is paid; ~~monitoring and evaluation; and~~ requiring educational establishments to ~~communicate~~ *publicise* the subsidising role of the *Union aid; and price monitoring under the* scheme.
- (29) The aid scheme for hop producer organisations is only used in one Member State. In order to create flexibility and to harmonise the approach in this sector with the other sectors, the aid scheme should be discontinued, with the possibility to support the producer organisations under rural development measures.

- (30) Union financing is required to encourage approved operator organisations to draw up work programmes for the purpose of improving the production quality of olive oil and table olives. In that context, this Regulation should provide for Union support to be allocated in accordance with the priorities given to the activities undertaken within the respective work programmes. However, the activities concerned should be limited to the most useful and co-financing should be introduced in order to improve the quality of such programmes.
- (31) In order to ensure *the efficient and effective use of that* the *Union* aid provided for olive oil and table olive operator organisations ~~meet their objective of to~~ improving the production quality of olive oil and table olives ~~and to ensure that olive oil and table olive operator organisations respect their obligations~~, the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission concerning the conditions for the approval of operator organisations for the purposes of the aid scheme, ~~the suspension or withdrawal of such approval~~; the *specific* measures ~~eligible for that can be financed by the~~ Union ~~financing aid and the activities and costs that cannot~~; the *minimum* allocation of Union financing to ~~particular measures specific areas~~; the ~~activities and costs that are not eligible for Union financing requirement to lodge a security~~; and the *criteria to be taken into account in the* selection and approval of work programmes ~~and concerning requiring the lodging of a security~~.
- (32) ~~This Regulation distinguishes~~ *A distinction should be made* between fruit and vegetables, ~~which include fruit and vegetables~~ for marketing ~~or and fruit and vegetables~~ intended for processing, on the one hand, and processed fruit and vegetables, on the other hand. Rules on producer organisations, operational programmes and Union financial assistance *should only not* apply to *processed* fruit and vegetables ~~and fruit and vegetables solely intended for processing~~.

- (33) The production of fruit and vegetables is unpredictable and the products are perishable. Even limited surpluses can significantly disturb the market. Therefore, measures for crisis management should be established and those measures should continue to be integrated into operational programmes.
- (34) The production and marketing of fruit and vegetables should fully take into account environmental concerns, including cultivation practices, management of waste materials and disposal of products withdrawn from the market, in particular as regards protection of water quality, maintenance of biodiversity and the upkeep of the countryside.
- (35) Support for setting up producer groups should be provided for all sectors in all Member States under rural development policy. ~~so~~ The specific support in the fruit and vegetables sector should *therefore* be discontinued.
- (36) In order to give producer organisations in the fruit and vegetables sector greater responsibility for their financial decisions and to gear the public resources assigned to them towards future requirements, terms should be set out for the use of those resources. Joint financing of operational funds set up by producer organisations is an appropriate solution. Additional scope for financing should be permitted in particular cases. Operational funds should only be used to finance operational programmes in the fruit and vegetables sector. In order to control Union expenditure, there should be a cap on assistance granted to producer organisations that establish operational funds.
- (37) In regions where the organisation of production in the fruit and vegetables sector is weak, granting of additional national financial contributions should be allowed. In case of Member States which are at a particular disadvantage with regard to structures, such contributions should be reimbursed by the Union.

- (38) In order to ensure an efficient, targeted and sustainable support of producer organisations in the fruit and vegetables sector, the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission in respect of operational funds and operational programmes, the ~~structure and content of a~~ *obligation to monitor and evaluate the effectiveness of the* national framework and ~~a~~ national strategies; Union financial assistance; crisis prevention and management measures; and national financial assistance.
- (39) It is important to provide for support measures in the wine sector which are liable to strengthen competitive structures. While those measures should be defined and financed by the Union, it should be left to Member States to select the appropriate set of measures to meet the needs of their regional bodies, taking into account their particularities, where necessary, as well as integrating them into national support programmes. Member States should be responsible for the implementation of such programmes.
- (39a) The provisions on support to vine-growers by way of allocation of payment entitlements as decided by Member States were made definitive. Therefore the only such support which may be provided is the one decided by Member States by 1 December 2013 ~~under in accordance with Article 137 103o~~ of Regulation (ECU) No ~~1234/2007~~ ~~[COM(2010)799]~~ and under the conditions set out in that ~~provision~~ *Article*.
- (40) One key measure eligible for national support programmes should be the promotion and marketing of Union wines in third countries. Restructuring and conversion activities should continue to be covered on account of their positive structural effects on the wine sector. Support should also be available for investments in the wine sector which are geared towards improving economic performance of the enterprises as such. Support for by-product distillation should be a measure available to Member States which desire to use such an instrument to ensure the quality of wine, while preserving the environment.

- (41) Preventive instruments such as harvest insurance, mutual funds and green harvesting should be eligible for support under the wine support programmes so as to encourage a responsible approach to crisis situations.
- ~~(42) The provisions on support to vine growers by way of allocation of payment entitlements as decided by Member States were made definitive. Therefore the only such support which may be provided is the one decided by Member States by 1 December 2013 under Article 137 of Regulation (EU) No [COM(2011)799] and under the conditions set out in that provision.~~
- (43) In order to ensure that wine support programmes meet their objectives and that there is ~~a~~***an efficient and effective targeted*** use of the European Funds, the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission in respect of rules: on the responsibility for expenditure between the date of receipt of the support programmes, and modifications to support programmes and their date of applicability; ~~on eligibility criteria of support measures, the type of~~ expenditure and operations *that may be included in Member States' support programmes and the possibility to make payments through intermediaries in the case of support for harvest insurance eligible for support; measures ineligible for support and the maximum level of support per measure; on changes to support programmes after they have become applicable; on requirements and thresholds for advance payments, including the requirement for to lodge a security where an advance payment is made; containing general provisions and definitions for the purposes of support programmes; to avoid misuse of the support measures and on the avoidance of* double funding of projects; under which producers shall withdraw the by-products of winemaking, exceptions from this obligation in order to avoid additional administrative burden and provisions for the voluntary certification of distillers; ~~and laying down the requirements for the enabling~~ Member States *to establish conditions for the proper functioning for the implementation* of the support measures, ~~as well as restrictions to ensure consistency with the scope of the support measures; in their programmes regarding payments to beneficiaries, including payments through insurance intermediaries.~~

- (44) Beekeeping is characterised by the diversity of production conditions and yields and the dispersion and variety of economic operators, both at the production and marketing stages. Moreover, in view of the spread of varroasis in several Member States in recent years and the problems which that disease causes to honey production, action by the Union continues to be necessary as varroasis cannot be completely eradicated and is to be treated with approved products. Given such circumstances and in order to improve the production and marketing of apiculture products in the Union, national programmes for the sector should be drawn up every three years with a view to improving the general conditions for the production and marketing of apiculture products. Those national programmes should be partly financed by the Union.
- (44a) The measures which may be included in the apiculture programmes should be specified. *In order to ensure that the Union aid scheme is adapted to the latest developments and that the measures covered are effective in reaching an improvement in the general conditions for the production and marketing of apiculture products*, the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission in respect of updating that list by adapting those measures or adding new measures.
- (45) In order to ensure ~~a targeted~~ *the effective and efficient* use of Union funds for apiculture, the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission in respect of: *the avoidance of double funding between programmes* ~~the measures which may be included in apiculture programmes, rules on the obligations relating to the content of national programmes, their drawing up and the related studies;~~ and the ~~conditions for~~ *basis of* the allocation of the Union's financial contribution to each participating Member State.
- (46) Union aid for silkworm rearing should be decoupled into the direct payments system following the approach taken for aids in other sectors.

- (47) The aid for Union-produced skimmed milk and skimmed-milk powder intended for use as a feedingstuff and for processing into casein and caseinates has not proved effective in supporting the market and should therefore be discontinued, along with the rules concerning the use of casein and caseinates in the manufacture of cheese.
- (47a) Article 85f of Regulation (EC) No 1234/2007 sets out the deadline of 31 December 2015 for the application of the transitional planting rights regime. The decision to end the transitional prohibition on planting vines at Union level on 31 December 2018 is justified by the attainment of the main objectives of the 2008 reform of the EU wine market, in particular the end of the long-standing structural surplus of wine production and the progressive improvement of competitiveness and market orientation of the wine sector in the Union. Such positive developments resulted from a marked decrease of vine areas across the Union, the leave of less competitive producers, as well as the phasing-out of certain market support measures removing the incentive for investments without economic viability. The reduction of supply capacity and the support for structural measures and promotion of wine exports allowed for a better adaptation to a decreasing demand at Union level, which results from a progressive decrease of consumption in traditional wine-producing Member States.*
- (47b) However, the perspectives of progressive growth of demand at world market level until 2020 provide an incentive to increase supply capacity, and therefore to plant new vines, over the next decade. While the key objective of increasing the competitiveness of Union wine sector should be pursued in order not to lose market shares in the world market, an excessively quick increase of new vine plantings in response to forecasted development in international demand may lead again to a situation of excessive supply capacity in the medium-term. In order to ensure an orderly growth of vine plantings during the period between 2019 and 2024, a new system for the management of vine plantings should be established at Union level.*

- (47c) A scheme of authorisations for new vine plantings should therefore be established. Under this system, authorisations may be granted without a cost to be charged to the producers, and should expire after a certain period of time if they are not used. This would contribute to the swift and direct use of the authorisations by the wine producers to whom they are granted, avoiding speculation.*
- (47d) The growth of new vine plantings should be framed by a safeguard mechanism at Union level based on the obligation for Member States to make available annually authorisations for new plantings representing 1% of the planted vine areas, while allowing for certain flexibility in order to respond to specific circumstances of each Member State. Member States should be able to decide on making available smaller areas at national or regional levels, including for areas eligible for specific geographical indications, on the basis of objective and non-discriminatory criteria, while ensuring the limitations imposed are different from 0% and are not over-restrictive in relation to the objectives pursued.*
- (47e) In order to guarantee that authorisations are granted in a non-discriminatory manner, certain criteria should be laid down.*
- (47f) The granting of authorisations to producers grubbing up an existing vine area should be done automatically upon submission of an application and independently of the scheme of authorisations for new plantings, since it does not contribute to the overall increase of vine areas.*
- (47g) This scheme of authorisations for new vine plantings should not apply to Member States not applying the Union transitional planting rights regime and be optional for those Member States where, although the planting rights applied on 31 December 2007, the vine planting area is below a certain threshold.*

- (47h) *Transitional provisions should be laid down in order to ensure a smooth transition between the former planting rights regime and the new scheme, in particular in order to avoid excessive plantings before the start of the new scheme.***
- (47i) *The control of non-authorized plantings should be done effectively in order to ensure the compliance with the rules for the new scheme.***
- (47j) *In order to ensure a harmonised and effective implementation of the new scheme of authorisations for new vine plantings the power to adopt certain acts in accordance with Article 290 of the Treaty should be delegated to the Commission in respect of the necessary measures, in particular in respect of the conditions of objective and non-discriminatory eligibility that may be set out as regards applications for authorisation, the penalties applied to producers not using the authorisations granted to them, the conditions for the exemption of certain vine plantings from the scheme, the rules relating to the priority criteria, the addition of priority criteria, and the co-existence of vines related to the grubbing-up requirement in order to obtain an authorisation.***
- (48) The application of standards for the marketing of agricultural products can contribute to improving the economic conditions for the production and marketing as well as the quality of such products. The application of such standards is therefore in the interest of producers, traders and consumers.
- (49) Following the Communication from the Commission on agricultural product quality policy⁹ and subsequent debates, it is deemed appropriate to maintain marketing standards by sectors or products, in order to take into account the expectations of consumers and to contribute to the improvement of the economic conditions for the production and marketing of agricultural products as well as to their quality.

⁹ COM/2009/0234 final.

- (50) ~~In order to guarantee that all products are of sound, fair and marketable quality, and without prejudice to Regulation (EC) No 178/2002 of the European Parliament and of the Council of 28 January 2002 laying down the general principles and requirements of food law, establishing the European Food Safety Authority and laying down procedures in matters of food safety¹⁰, a basic general marketing standard as envisaged in the aforementioned Communication of the Commission should be appropriate for products not covered by marketing standards by sectors or products. When such products conform to an applicable international standard, as appropriate, those products should be considered as conforming to the general marketing standard.~~
- (51) For some sectors and/or products, definitions, designations and/or sales descriptions are important elements for the determination of conditions of competition. Therefore, it is appropriate to lay down definitions, designations and sales descriptions for those sectors and/or products, which should only be used in the Union for the marketing of products which comply with the corresponding requirements.
- (52) Provisions of a horizontal nature should be established for marketing standards.
- (52a) Marketing standards should be divided between obligatory rules for specific sectors or products and optional reserved terms to be established on a sectoral or product basis. The optional reserved terms should continue to support the aims of the obligatory rules.*
- (53) Marketing standards should apply to enable the market to be supplied with products of standardised and satisfactory quality and should relate, in particular, to definitions, grading into classes, presentation and labelling, packaging, production method, conservation, transport, information on producers, content of certain substances, related administrative documents, storage, certification and time limits.

¹⁰ OJ L 31, 1.2.2002, p. 1.

- (54) Taking into account the interest of consumers to receive adequate and transparent product information, it should be possible to determine the place of farming, on a case by case approach at the appropriate geographical level, while taking into account the specificities of some sectors, in particular concerning processed agricultural products.
- (55) Marketing standards should, *in principle*, apply to all agricultural products *concerned* marketed in the Union.
- (55a) ~~It is appropriate to introduce the possibility for~~ Member States *should be able* to maintain or adopt certain national rules on quality levels as regards spreadable fats.
- (56) ~~It is appropriate to provide for s~~Special rules *should be provided for* in respect of products imported from third countries if national provisions in force in third countries justify derogations from the marketing standards if their equivalence to Union legislation is guaranteed.
- ~~(57) It is appropriate to introduce the possibility for Member States to maintain or adopt certain national rules on quality levels as regards spreadable fats.~~
- ~~(58) In order to address changes in the market situation, taking into account the specificity of each sector, the power to adopt certain acts in accordance with Article 290 of the Treaty should be delegated to the Commission in respect of acts to adopt, modify and derogate from requirements related to the general marketing standard, and rules concerning the conformity to it.~~

- (59) In order to take account of the *natural and essential characteristics of the products concerned and of the* expectations of consumers and to ~~contribute to the~~ improvement of the economic conditions for the production and marketing ~~of agricultural products~~ as well as ~~to their~~ *the quality of certain agricultural products*, and in order to adapt to the constantly changing market conditions, to the evolving consumer demands, ~~as well as in order to take into account and to~~ the developments in relevant international standards ~~and as well as to take technical progress into account and~~ avoid creating obstacles to product innovation, the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission in respect of ~~acts to~~ adopting marketing standards by sectors or products, at all stages of the marketing, as well as derogations and exemptions from ~~the application of~~ such standards ~~and in respect of necessary modification, derogation or exemption from definitions and sales descriptions.~~
- (59a) In order to take into account the specificity of each product or sector, *the different marketing stages, the technical conditions, any possible considerable practical difficulty, and also the accuracy and repeatability of the methods of analysis*, the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission concerning a tolerance for one or more specific standards beyond which the entire batch of products should be considered not to respect the standard.
- (59b) ~~It is appropriate to determine~~ Certain oenological practices and restrictions for the production of wine *should be determined*, in particular as regards coupage and the use of certain types of grape must, grape juice and fresh grapes originating in third countries. In order to meet the international standards, for further oenological practices, the Commission should, as a general rule, base itself on the oenological practices recommended by the International Organisation of Vine and Wine (OIV).

- (59c) ~~It is appropriate to lay down r~~Rules *should be laid down* for the classification of wine grape varieties, according to which Member States producing more than 50 000 hectolitres per year continue to be responsible for classifying the wine grape varieties from which wine may be made on their territories. Certain wine grape varieties should be excluded.
- (59d) For the wine sector, Member States should be allowed to limit or to exclude the use of certain oenological practices and be allowed to keep more stringent restrictions for wines produced in their territory, as well as ~~permit allow~~ the experimental use of unauthorised oenological practices ~~under conditions to be defined~~.
- (60) In order to ensure the correct and transparent application of national rules for ~~certain products and/or sectors~~ *spreadable fats and wine* as regards marketing standards, the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission in respect of establishing conditions for application of such marketing standards as well as the conditions for the holding, circulation and use of the products obtained from the experimental practices.
- (61) In order to take account of the specificities in trade between the Union and certain third countries, *and* the special character of ~~some certain~~ agricultural products ~~and the specificity of each sector~~, the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission ~~concerning a tolerance for each marketing standard beyond which the entire batch of products should be considered as not respecting the standard and~~ concerning ~~rules which define~~ the conditions under which imported products are considered as providing an equivalent level of ~~compliance with conformity to~~ the Union requirements concerning marketing standards and which allow for measures derogating from the rules that products be marketed in the Union only in accordance with such standards, and ~~determine~~ the rules relating to the application of the marketing standards to products exported from the Union.

- (61a) Provisions concerning wine should be applied in the light of the agreements concluded ~~under Article 218 of~~ *in accordance with* the Treaty.
- (61b) *In order to take into account the characteristics of certain sectors, consumer expectations, developments in scientific and technical knowledge, the situation in the market and developments in marketing standards and in international standards, as well as to ensure that products described by means of optional reserved terms conform to the applicable conditions of use, the power to adopt certain acts should be delegated to the Commission concerning details on the requirements for the introduction of an additional reserved term, introducing an additional optional reserved term and laying down and amending it conditions of use, as well as concerning additional rules on the use of optional reserved terms.*
- (62) The concept of quality wines in the Union is based, inter alia, on the specific characteristics attributable to the wine's geographical origin. Such wines are identified for consumers through protected designations of origin and geographical indications. In order to allow for a transparent and more elaborate framework underpinning the claim to quality by the products concerned, a regime should be established under which applications for a designation of origin or a geographical indication are examined in line with the approach followed by Union's horizontal quality policy applicable to foodstuffs other than wine and spirits in Council Regulation (EC) No 510/2006 of 20 March 2006 on the protection of geographical indications and designations of origin for agricultural products and foodstuffs¹¹.
- (63) In order to preserve the particular quality characteristics of wines with a designation of origin or a geographical indication, Member States should be allowed to apply more stringent rules.

¹¹ OJ L 93, 31.3.2006, p. 12.

- (64) To qualify for protection in the Union, designations of origin and geographical indications for wine should be recognised and registered at the Union level in accordance with procedural rules laid down by the Commission.
- (65) Protection should be open to designations of origin and geographical indications of third countries where they are protected in their country of origin.
- (66) The registration procedure should enable any natural or legal person having a legitimate interest in a Member State or a third country to exercise his rights by notifying his objections.
- (67) Registered designations of origin and geographical indications should enjoy protection against uses which unduly take advantage of the reputation that complying products command. So as to promote fair competition and not to mislead consumers, that protection should also affect products and services not covered by this Regulation, including those not found in Annex I to the ~~Treaty~~ *Treaties*.
- (68) In order to take *into account* existing labelling practices ~~into account~~, the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission in respect of permitting the use of a name of a wine grape variety ~~to be used even though it~~ *which* contains or consists of a protected designation of origin or a protected geographical indication.

- (69) In order to take *into* account ~~of~~ the specificities of the production in the demarcated geographical area, to ensure product quality and traceability and to ensure the legitimate rights or interests of producers or operators the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission concerning the principles for the demarcation of the geographical area, and ~~definitions~~, restrictions and derogations related to the production in the demarcated geographical area; concerning the conditions under which product specifications may include additional requirements; and concerning ~~the elements of the product specification~~; the type of applicant that may apply for the protection of a designation of origin or geographical indication; the procedures to be followed in respect of an application for the protection of a designation of origin or geographical indication, ~~including on~~ preliminary national procedures, scrutiny by the Commission, objection procedures, and procedure on amendment, cancellation and conversion of protected designations of origin or protected geographical indication; ~~the procedures conditions~~ applicable to trans-border applications; ~~procedures conditions~~ for applications relating to geographical areas in a third country; the date from which protection ~~shall run applies~~; the ~~procedures conditions~~ related to amendments to product specifications; and the date on which an amendment *of a protection shall enter into force applies*.
- (70) In order to ensure adequate protection and that economic operators and competent authorities are not prejudiced by the application of this Regulation as regards wine names which have been granted protection prior to 1 August 2009, the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission in respect of adoption restrictions regarding the protected name and in respect of transitional provisions concerning: wine names recognised by Member States as designations of origin or geographical indications by 1 August 2009; ~~preliminary national procedure~~; wines placed on the market or labelled before a specific date; and amendments to the product specifications.

- (71) Certain terms are traditionally used in the Union and convey information to consumers about particularities and quality of wines complementing the information conveyed by designations of origin and geographical indications. So as to ensure the working of the internal market and fair competition and to avoid consumers being misled, those traditional terms should be eligible for protection in the Union.
- (72) In order to ensure an adequate protection, *and* the legitimate rights of producers or operators ~~and to take account of the specificities in trade between the Union and certain third countries~~ the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission in respect of ~~provisions regarding~~ the language and the spelling of a traditional term to be protected; ~~regarding the definition of~~ the type of applicants that may apply for the protection of a traditional term; the conditions of validity of an application for recognition of a traditional term; the grounds for objecting to a proposed recognition of a traditional term; the scope of the protection, including the relationship with trade marks, protected traditional terms, protected designations of origin or geographical indications, homonyms, or certain wine grape names; the grounds for cancellation of a traditional term; *and* the date of submission of an application or a request; ~~the procedures to be followed in respect of an application for the protection of a traditional term, including scrutiny by the Commission, objection procedures and the procedures on cancellation and modification and in respect of the conditions under which traditional terms may be used on products from third countries and provide for related derogations.~~
- (72a) *In order to take into account the specificities in trade in wine sector products between the Union and certain third countries, the power to adopt certain acts should be delegated to the Commission in respect of the conditions under which traditional terms may be used on products from third countries and related derogations, as well as derogations from the rules on labelling and presentation as regards products to be exported where required by the legislation of the third country concerned.*

- (73) The description, designation and presentation of products of the wine sector covered by this Regulation can have significant effects on their marketability. Differences between the laws of the Member States on the labelling of products of the wine sector may impede the smooth functioning of the internal market. Rules should therefore be laid down which take into account the legitimate interests of consumers and producers. For this reason, it is appropriate to provide for Union rules on labelling.
- (74) In order to ensure compliance with existing labelling practices, ~~with horizontal rules related to labelling and presentation, and;~~ to ~~consider~~ *take into account* the specificities of the wine sector; ~~in order to ensure the efficiency of the certification, approval and verification procedures~~ and *to ensure* the legitimate interests of operators and that economic operators are not prejudiced the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission in respect of exceptional circumstances justifying omitting reference to the terms “protected designation of origin” or “protected geographical indication”; in respect of the presentation and use of labelling particulars other than those provided for in this Regulation; certain compulsory particulars; optional particulars; and presentation; in respect of ~~the necessary measures as regards temporary~~ *temporary* labelling and presentation of wines bearing a designation of origin or a geographical indication, ~~whose where that~~ designation of origin or geographical indication meets the necessary requirements; *and* in respect of wine placed on the market and labelled before 1 August 2009; ~~and in respect of derogations on labelling and presentation.~~
- ~~(75) Provisions concerning wine should be applied in the light of the agreements concluded under Article 218 of the Treaty.~~

- ~~(76) — It is appropriate to lay down rules for the classification of wine grape varieties, according to which Member States producing more than 50 000 hectolitres per year continue to be responsible for classifying the wine grape varieties from which wine may be made on their territories. Certain wine grape varieties should be excluded.~~
- ~~(77) — It is appropriate to determine certain oenological practices and restrictions for the production of wine, in particular as regards coupage and the use of certain types of grape must, grape juice and fresh grapes originating in third countries. In order to meet the international standards, for further oenological practices, the Commission should as a general rule base itself on the oenological practices recommended by the International Organisation of Vine and Wine (OIV).~~
- ~~(78) — For the wine sector, Member States should be allowed to limit or to exclude the use of certain oenological practices and be allowed to keep more stringent restrictions for wines produced in their territory, as well as permit the experimental use of unauthorised oenological practices under conditions to be defined.~~
- (78a) In order to taking into account the specificities of the sugar sector ~~and the interests of all parties~~, the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission in respect of ~~such~~ agreements *within the trade for buying sugar beet and sugar cane*, in particular as regards the conditions governing the purchase, delivery, taking over and payment of ~~beet-sugar~~.
- (78b) For a better management of wine-growing potential Member States should communicate to the Commission an inventory of their production potential based on the vineyard register. To encourage Member States to communicate the inventory, support for restructuring and conversion ~~is~~ *should be* limited to those Member States which have communicated the inventory.

- (78c) In order to facilitate the monitoring and the verification of the production potential by Member States, the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission in respect of the ~~scope and~~ content of the vineyard register and exemptions.
- (79) In order to provide for a satisfactory level of traceability of the products concerned, in particular in the interest of consumer protection, ~~provision should be made for~~ all the wine sector products covered by this Regulation *should be required* to have an accompanying document when circulating within the Union.
- ~~(80) For a better management of wine growing potential Member States should communicate to the Commission an inventory of their production potential based on the vineyard register. To encourage Member States to communicate the inventory, support for restructuring and conversion is limited to those Member States which have communicated the inventory.~~
- ~~(81) In order to facilitate the monitoring and the verification of the production potential by Member States, the power to adopt certain acts in accordance with Article 290 of the Treaty should be delegated to the Commission in respect of the scope and content of the vineyard register and exemptions.~~
- (82) In order to facilitate the transport of wine products and verification thereof by Member States, the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission in respect of rules on the accompanying document; *and its use usage and the exemptions to the obligation to use such a document; establish on* the conditions under which an accompanying document is to be regarded as certifying protected designations of origin or geographical indications; ~~establish on~~ *establish on* an obligation to keep a register *and on its use; on* specifying who shall keep a register and *on* exemptions from the obligation to keep a register; ~~indicate and on~~ *indicate and on* the operations to be included in the register; ~~and establish rules concerning the use of accompanying documents and registers.~~

(83) Specific instruments will still be needed after the end of the quota system to ensure a fair balance of rights and obligations between sugar undertakings and sugar beet growers. Therefore, the standard provisions governing agreements between them should be established.

~~(84) — In order to taking into account the specificities of the sugar sector and the interests of all parties, the power to adopt certain acts in accordance with Article 290 of the Treaty should be delegated to the Commission in respect of such agreements, in particular as regards the conditions governing the purchase, delivery, taking over and payment of beet.~~

(84a) In the absence of Union legislation on formalised, written contracts, Member States may, within their own contract law systems, make the use of such contracts compulsory provided that in doing so the Union law is respected and in particular that the proper functioning of the internal market and the common market organisation is respected. Given the diversity of situations across the Union, in the interests of subsidiarity, such a decision should remain with Member States. However, in the milk and milk products sector, to ensure appropriate minimum standards for such contracts and good functioning of the internal market and the common market organisation, some basic conditions for the use of such contracts should be laid down at the Union level. Since some dairy co-operatives may have rules with similar effect in their statutes, in the interests of simplicity they should be exempted from the requirement for a contract. In order to ensure that any such system is effective it should apply equally where intermediate parties collect milk from farmers to deliver to processors.

- (84b) In order to ensure the rational development of production and thus a fair standard of living for dairy farmers, their bargaining power vis-à-vis processors should be strengthened which should result in a fairer distribution of value-added along the supply chain. Therefore, in order to attain these CAP objectives, a provision should be adopted pursuant to Articles 42 and 43(2) of the Treaty to allow producer organisations constituted by dairy farmers or their associations to negotiate contract terms, including price, for some or all of its members' production with a dairy. In order to maintain effective competition on the dairy market, this possibility should be subject to appropriate quantitative limits.
- (85) Producer organisations and their associations can play useful roles in concentrating supply and promoting best practices. Interbranch organisations can play important part in allowing dialogue between actors in the supply chain, and in promoting best practices and market transparency. Existing rules on the definition and recognition of such organisations and their associations covering certain sectors should therefore be harmonised, streamlined and extended ~~to provide for recognition on request under statutes set out in EU law in all~~ **sectors.**
- (86) Existing provisions in various sectors, boosting the impact of producer organisations their associations and interbranch organisations by permitting Member States, under certain conditions, to extend certain rules of such organisations to non-member operators have proved effective and should be harmonised, streamlined and extended to all sectors.
- (87) As regards live plants, beef and veal, pigmeat, sheepmeat and goatmeat, eggs and poultrymeat provision should be made for the possibility of adopting certain measures to facilitate the adjustment of supply to market requirements which may contribute to stabilising the markets and to ensuring a fair standard of living for the agricultural community concerned.

- (88) In order to encourage action by producer organisation, their associations, *operator organisations* and interbranch organisations to facilitate the adjustment of supply to market requirements, with the exception of action relating to withdrawal from the market, the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission in respect of measures **concerning in the** live plants, beef and veal, pigmeat, sheepmeat and goatmeat, eggs and poultrymeat sectors ~~to improve~~*ing* quality; promote better organisation of production, processing and marketing; ~~facilitate~~*ing* the recording of market price trends; and ~~permitting~~*ing* the establishment of short and long-term forecasts on the basis of the means of production used.
- (89) In order to improve the operation of the market for wines, Member States should be able to implement decisions taken by interbranch organisations. The scope of such decisions should, however, exclude practices which could distort competition.
- ~~(90) — In the absence of Union legislation on formalised, written contracts, Member States may, within their own contract law systems, make the use of such contracts compulsory provided that in doing so the Union law is respected and in particular that the proper functioning of the internal market and the common market organisation is respected. Given the diversity of situations across the Union, in the interests of subsidiarity, such a decision should remain with Member States. However, in the milk and milk products sector, to ensure appropriate minimum standards for such contracts and good functioning of the internal market and the common market organisation, some basic conditions for the use of such contracts should be laid down at the Union level. Since some dairy co-operatives may have rules with similar effect in their statutes, in the interests of simplicity they should be exempted from the requirement for a contract. In order to ensure that any such system is effective it should apply equally where intermediate parties collect milk from farmers to deliver to processors.~~

~~(91) In order to ensure the rational development of production and thus a fair standard of living for dairy farmers, their bargaining power vis-à-vis processors should be strengthened which should result in a fairer distribution of value added along the supply chain. Therefore, in order to attain these CAP objectives, a provision should be adopted pursuant to Articles 42 and 43(2) of the Treaty to allow producer organisations constituted by dairy farmers or their associations to negotiate contract terms, including price, for some or all of its members' production with a dairy. In order to maintain effective competition on the dairy market, this possibility should be subject to appropriate quantitative limits.~~

(92) The registration of all supply contracts regarding hops produced in the Union is a burdensome measure and should be discontinued.

(93) In order to ensure that the objectives and responsibilities of producer organisations, associations of producer organisations, ~~interbranch organisations and~~ operator organisations *in the olive oil and table olives sector and interbranch organisations* are clearly defined so as to contribute to the effectiveness of their actions *without undue administrative burden and without undermining the principle of freedom of association in particular toward non-members of such organisations*, ~~to take into account the specificities of each sector, and to ensure the respect of competition and the good functioning of the common market organisation~~, the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission in respect of rules on: the specific aims which may, ~~shall must~~ or ~~shall must~~ not be pursued by such organisations and associations, ~~including derogations from those listed in this Regulation~~; the rules of *such organisations and* associations, the *additional conditions for recognition by Member States, the obligation for Member States to ensure the adequacy of the structure, legal personality, membership period, size, and of democratic* accountability, *the principle of main activity related to the production by members and activities* of such organisations and associations, ~~the effects deriving from recognition, the withdrawal of recognition, and mergers~~; transnational organisations and associations *and the principle of administrative assistance in the case of transnational cooperation*; outsourcing *and the nature* of activities *which may be outsourced* and the provision of technical means by organisations or associations; the *basis for calculation of* minimum volume or value of marketable production of organisations and associations; *the acceptance of members who are not producers in the case of producer organisations and who are not producer organisations in the case of association of producer organisations*; the extension of certain rules of the organisations to non-members and the compulsory payment of subscriptions by non-members, including *the use and allocation of that payment by those organisations and* a list of stricter production rules which may be extended, further requirements as regards representativeness, the economic areas concerned, including Commission scrutiny of their definition, minimum periods during which the rules should be in force before their extension, the persons or organisations to whom the rules or contributions may be applied, and the circumstances in which the Commission may require that the extension of rules or compulsory contributions be refused or withdrawn.

- (94) A single market involves a trading system at the external borders of the Union. That trading system should include import duties and export refunds and should, in principle, stabilise the Union market. The trading system should be based on the undertakings accepted under the Uruguay Round of multilateral trade negotiations and in bilateral agreements.
- (95) Monitoring trade flows is foremost a matter of management which should be addressed in a flexible way. The decision on the introduction of licence requirements should be made taking account of the need for licences for the management of the markets concerned and, in particular, for monitoring the imports or exports of the products in question.
- (96) In order to take *into* account ~~of~~ the evolution of trade and market developments, the needs of the markets concerned and ~~when necessary for the~~ monitoring imports or exports *concerned*, the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission in respect of the list of the products of sectors subject to the presentation of an import or export licence; and the cases and situations where the presentation of an import or export licence is not required.

- (97) In order to define the main elements of the licence system, the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission in respect of ~~acts to rules on:~~ **define** the rights and obligations deriving from the licence, its legal effects, ~~including the possibility of a~~ *and* tolerance as regards the respect of the obligation to import or export, ~~and the indication of the origin and provenance where that is compulsory; provide that~~ the issue of an import licence or the release into free circulation ~~shall being~~ subject to the presentation of a document issued by a third country or an entity certifying inter alia the origin, the authenticity and the quality characteristics of the products; ~~adopt the rules applicable to~~ the transfer of the licence or, ~~as necessary,~~ the restrictions on this transmissibility; *additional conditions for import licences for hemp* ~~adopt the rules necessary for the reliability and the efficiency of the licence system~~ and the ~~situations where a specific principle of~~ administrative assistance between Member States ~~is needed~~ to prevent or deal with cases of fraud and irregularities; and ~~determine~~ the cases and situations where the lodging of a security guaranteeing that the products are imported or exported within the period of validity of the licence is or is not required.
- (98) The essential elements of customs duties applicable to agricultural products reflecting WTO agreements and bilateral agreements are laid down in the Common Customs Tariff. The Commission should be empowered to adopt measures for the detailed calculation of import duties pursuant to those essential elements.
- (99) In order to prevent or counteract adverse effects on the Union market which could result from imports of certain agricultural products, imports of such products should be subject to payment of an additional duty, if certain conditions are fulfilled.
- (100) In order to ensure the efficiency of the entry price system, the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission ~~in respect of~~ providing for inclusion a check of the customs value against another value than the unit price.

- (101) It is appropriate, under certain conditions, to open and administer import tariff quotas resulting from international agreements concluded in accordance with the Treaty or from other acts.
- (102) In order to ensure fair access to the quantities available, ~~the application of the agreements, commitments and rights of the Union,~~ and an equal treatment of operators within the import tariff quota, the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission in respect of ~~acts to:~~ *determine* the conditions and eligibility requirements that an operator has to fulfil to submit an application within the import tariff quota; ~~adopt provisions relating to~~ *establishing rules on* the transfer of rights between operators and, ~~where~~ *when* necessary, the limitations to transfer within the management of the import tariff quota; *make* the participation in the import tariff quota subject to the lodging of a security; ~~adopt all the providing, where~~ necessary, ~~provisions~~ for any particular specificities, requirements or restrictions applicable to the tariff quota as set out in the international agreement or other act concerned.
- (103) Agricultural products may in certain cases benefit from special import treatment in third countries if the products comply with certain specifications and/or price conditions. Administrative cooperation between the authorities in the importing third country and the Union is necessary to ensure the correct application of such a system. To that end, the products should be accompanied by a certificate issued in the Union.
- (104) In order to ensure that products that are exported may benefit from a special treatment on import into a third country if certain conditions are respected, ~~in accordance with pursuant to international~~ agreements concluded by the Union in accordance with ~~Article 218 of the Treaty~~, the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission ~~in respect of~~ *concerning rules* requiring the competent authorities of the Member States, on request and after appropriate checks, to issue a document certifying that the conditions are met.

- (104a)** In order to prevent illicit crops from disturbing the market for hemp for fibre, this Regulation should provide for checks on imports of hemp and hemp seed to ensure that such products offer certain guarantees with regard to the tetrahydrocannabinol content. In addition, imports of hemp seed intended for uses other than sowing should continue to be subject to a control system which provides for the authorisation of the importers concerned.
- (105) The customs duty system makes it possible to dispense with all other protective measures at the external borders of the Union. The internal market and duty mechanism could, in exceptional circumstances, prove to be inadequate. In such cases, in order not to leave the Union market without defence against disturbances that might ensue, the Union should be able to take all necessary measures without delay. Such measures should comply with the international commitments of the Union.
- (106) The possibility of prohibiting the use of inward and outward processing arrangements should be provided for. It is thus appropriate to enable suspension of the use of inward and outward processing arrangements in ~~such situations~~ *the case of the occurrence or threat of market disturbance*.
- (107) Provisions for granting refunds on exports to third countries, based on the difference between prices within the Union and on the world market, and falling within the limits set by the commitments made within the WTO, should serve to safeguard the Union's participation in international trade in certain products ~~falling within to which~~ this Regulation *applies*. Subsidised exports should be subject to limits in terms of value and quantity.

- (108) Compliance with the limits in terms of value should be ensured at the time when the export refunds are fixed through the monitoring of payments under the rules relating to the European Agricultural Guarantee Fund. Monitoring can be facilitated by the compulsory advance fixing of export refunds, while allowing the possibility, in the case of differentiated refunds, of changing the specified destination within a geographical area to which a single export refund rate applies. In the case of a change of destination, the export refund applicable to the actual destination should be paid, with a ceiling on the amount applicable to the destination fixed in advance.
- (109) Compliance with the quantity limits should be ensured by a reliable and effective system of monitoring. To that end, the granting of export refunds should be made subject to an export licence. Export refunds should be granted up to the limits available, depending on the particular situation of each product concerned. Exceptions to that rule should be permitted only for processed products not listed in Annex I to the Treaty, to which volume limits do not apply. Provision should be made for a derogation from strict compliance with management rules where exports benefiting from export refunds are not likely to exceed the quantity laid down.
- (110) In the case of the export of live bovine animals, provision should be made whereby export refunds are granted and paid only if the provisions established in Union legislation concerning animal welfare, in particular those concerning the protection of animals during transport, are respected.
- ~~(111) In order to ensure equality of access to export refunds for exporters of agricultural products covered by this Regulation, the power to adopt certain acts in accordance with Article 290 of the Treaty should be delegated to the Commission in respect of applying certain rules for agricultural products to products exported in the form of processed goods.~~

- ~~(112) In order to encourage exporters to respect animal welfare conditions and to enable the competent authorities to verify correct expenditure of export refunds where this is conditional on respect for animal welfare requirements, the power to adopt certain acts in accordance with Article 290 of the Treaty should be delegated to the Commission in respect of animal welfare requirements outside the customs territory of the Union, including the use of independent third parties.~~
- (113) In order to ensure ~~that operators respect their obligations when participating in tendering procedures~~ *the proper functioning of the export refund system*, the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission in respect of ~~designating the primary requirement for release of licence securities for tendered export refunds~~ *the obligation to lodge a security guaranteeing the execution of operator's obligations*.
- (114) In order to minimise the administrative burden for operators and authorities, the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission in respect of acts to set thresholds below which the obligation to issue or present an export licence may not be required, designate destinations or operations where an exemption for the obligation to present an export licence can be justified and permit in justified situation export licences to be granted ex-post.

- (115) In order to ~~adhere to~~ *address* practical situations justifying full or partial eligibility to export refunds, and in order to help operators bridge the period between the application for and the final payment of the export refund, the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission in respect of measures pertaining to: another date for the refund; ~~the consequences for the payment of the export refund when the product code or destination mentioned in a licence is not in conformity with the actual product or destination~~; advance payment of export refunds including the conditions for the lodging and release of a security; ~~checks and additional~~ proof when doubts on the real destination of products exist including the opportunity for re-importation into the customs territory of the Union; destinations treated as exports from the Union, and inclusion of destinations within the customs territory of the Union eligible for export refunds.
- (115a)* In order to ensure equality of access to export refunds for exporters of **agricultural** products ~~covered by this Regulation listed in Annex I to the Treaty and of products processed thereof~~, the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission in respect of applying certain rules for agricultural products to products exported in the form of processed goods.
- (116) In order to ensure that products benefiting from export refunds are exported from the customs territory of the Union **and**, to avoid their return to that territory, and **in order** to minimise the administrative burden for operators in generating and submitting proof that refund products reached a country of destination for differentiated refunds, the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission in respect of ~~measures pertaining to~~ *rules on*: the time limit by which the exit from the customs territory of the Union must be finalised, including the time for temporary re-entry; the processing that products benefiting from export refunds may undergo during that period; the proof of having reached a destination for differentiated refunds; the refund thresholds and conditions under which exporters may be exempted from such proof; and conditions for approval of proof of reaching a destination for differentiated refunds by independent third parties.

- (116a) In order to encourage exporters to respect animal welfare conditions and *in order* to enable the competent authorities to verify correct expenditure of export refunds where this is conditional on respect for animal welfare requirements, the power to adopt certain acts [in accordance with Article 290 of the Treaty] should be delegated to the Commission in respect of animal welfare requirements outside the customs territory of the Union, including the use of independent third parties.
- (117) In order to take account of the specificities of the different sectors, the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission in respect of specific requirements and conditions for operators and of the products eligible for an export refund ~~including, in particular, the definition and characteristics of the products~~, and the establishment of coefficients for the purposes of calculating export refunds *taking into account the ageing process of certain spirit drinks obtained from cereals*.
- ~~(118) In order to prevent illicit crops from disturbing the market for hemp for fibre, this Regulation should provide for checks on imports of hemp and hemp seed to ensure that such products offer certain guarantees with regard to the tetrahydrocannabinol content. In addition, imports of hemp seed intended for uses other than sowing should continue to be subject to a control system which provides for the authorisation of the importers concerned.~~
- (119) Minimum export prices for flowering bulbs are no longer useful and should be abolished.
- (120) In accordance with Article 42 of the Treaty the provisions of the Treaty concerning competition ~~shall~~ apply to production of and trade in agricultural products only to the extent determined by Union legislation within the framework of Article 43(2) and (3) of the Treaty and in accordance with the procedure laid down therein.

- (121) *It should therefore be provided that* ~~the~~ The rules on competition relating to the agreements, decisions and practices referred to in Article 101 of the Treaty and to the abuse of dominant positions ~~should be applied~~ to the production of, and trade in, agricultural products, in so far as their application does not jeopardise the attainment of the objectives of the CAP.
- (122) A special approach should be allowed in the case of farmers' or producer organisations or their associations the objective of which is the joint production or marketing of agricultural products or the use of joint facilities, unless such joint action excludes competition or jeopardises the attainment of the objectives of Article 39 of the Treaty.
- (123) A special approach should be allowed as regards certain activities of interbranch organisations on the condition that they do not lead to the partitioning of markets, affect the sound operation of the CMO, distort or eliminate competition, entail the fixing of prices, or create discrimination.
- (124) The proper working of the single market would be jeopardised by the granting of national aid. Therefore, the provisions of the Treaty governing State aid should, as a general rule, apply to agricultural products. In certain situations exceptions should be allowed. Where such exceptions apply, the Commission should be in a position to draw up a list of existing, new or proposed national aid, to make appropriate observations to the Member States and to propose suitable measures.
- (124a)* The provisions on the grubbing-up premium and certain measures under wine support programmes should not by themselves preclude national payments for the same purposes.
- (125) Due to the specific economic situation of the production and marketing of reindeer and reindeer products, Finland and Sweden should continue to grant national payments in that regard.

- (125a) In Finland sugar beet growing is subject to particular geographical and climatic conditions which will adversely affect the sector beyond the general effects of the sugar reform. That Member State should therefore be authorised, on a permanent basis, to make national payments to its sugar beet growers.
- (126) In order to address justified cases of crisis even after the end of the transitional period, the distillation support measure provided for under the support programmes in 2012, Member States should be able to make national payments for crisis distillation within an overall budgetary limit of 15 % of the respective value of the Member State's relevant yearly budget for its national support programme. Such national payments should be notified to the Commission and approved ~~under this Regulation~~ before being granted.
- ~~(127) The provisions on the grubbing-up premium and certain measures under wine support programmes should not by themselves preclude national payments for the same purposes.~~
- ~~(128) In Finland sugar beet growing is subject to particular geographical and climatic conditions which will adversely affect the sector beyond the general effects of the sugar reform. That Member State should therefore be authorised, on a permanent basis, to make national payments to its sugar beet growers.~~
- (129) Member States should be allowed to continue to make national payments for nuts as currently provided for under Article 120 of Regulation (EC) No 73/2009 in order to cushion the effects of decoupling of the former Union aid scheme for nuts. For clarity, since that Regulation is to be repealed, ~~the~~ *those* national payments should be provided for in this Regulation.

- (130) Restrictions to free circulation resulting from the application of measures intended to combat the spread of animal diseases could cause difficulties on the market in one or more Member States. Experience shows that serious market disturbances such as a significant drop in consumption or in prices may be attributed to a loss in consumer confidence due to public health or animal or plant health risks. In the light of experience, measures attributable to a loss in consumer confidence should be extended to plant products.
- (131) The exceptional market support measures for beef and veal, milk and milk products, pigmeat, sheepmeat and goatmeat, eggs and poultrymeat should be directly related to health and veterinary measures adopted in order to combat the spread of disease. They should be taken at the request of Member States in order to avoid serious disruption on the markets.
- (132) Special intervention measures should be provided in order to react efficiently and effectively against threats of market disturbance. The scope of those measures should be defined.
- (133) In order to react efficiently and effectively against threats of market disturbance caused by significant price rises or falls on internal or external markets or ~~any other factors affecting the market~~ *exceptional events and circumstances*, the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission in respect of the ~~necessary~~ measures *necessary to address the market disturbance in for* the sector concerned *and to prevent it from turning into a more severe or prolonged crisis* including, where necessary, measures to extend or modify the scope, duration or other aspects of other measures provided for under this Regulation, or suspend import duties in whole or in part including for certain quantities ~~and/or~~ periods.
- (134) The Commission should be authorised to adopt the necessary measures to *resolve* specific problems in case of emergency.

- (135) *It should be possible to require u*Undertakings, Member States and/or third countries ~~may be required~~ to submit communications for the purposes of applying this Regulation, monitoring, analysing and managing the market in agricultural products, ensuring market transparency, the proper functioning of CAP measures, of checking, controlling, monitoring, evaluating and auditing CAP measures, and ~~implementing~~ *complying with the requirements laid down in* international agreements, including notification requirements under those agreements. In order to ensure a harmonised, streamlined and simplified approach, the Commission should be empowered to adopt all the necessary measures regarding communications. In so doing it should take into account the data needs and synergies between potential data sources.
- (136) In order to *ensure the integrity of information systems and to ensure the authenticity and legibility of documents and associated data transmitted* ~~make communications fast, efficient, accurate, and cost effective~~, the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission in respect of the nature and type of the information to be notified; *the categories of data to be processed and maximum retention periods* ~~the methods of notification; the rules related to~~ the access rights to the information or information systems made available; and the conditions ~~and means~~ of publication of the information.
- (137) Union legislation concerning the protection of individuals with regard to the processing of personal data and on the free movement of such data, in particular Directive 95/46/EC of the European Parliament and of the Council of 24 October 1995 on the protection of individuals with regard to the processing of personal data and on the free movement of such data and Regulation (EC) No 45/2001 of the European Parliament and of the Council of 18 December 2000 on the protection of individuals with regard to the processing of personal data by the Community institutions and bodies and on the free movement of such data ~~is~~ *are* applicable.

- (138) Funds should be transferred from the Reserve for crises in the agricultural sector under the conditions and procedure referred to in paragraph 14 of the Interinstitutional Agreement between the European Parliament, the Council and the Commission on cooperation in budgetary matters and on sound financial management¹², and it should be clarified that this Regulation is the applicable basic act.
- (139) In order to ensure the smooth transition from the arrangements provided for in Regulation (ECU) No 1234/2007 ~~{COM(2010)799}~~ to those laid down in this Regulation, the power to adopt certain acts ~~in accordance with Article 290 of the Treaty~~ should be delegated to the Commission in respect of the necessary measures, in particular those necessary to protect the acquired rights and legitimate expectations of undertakings.
- (140) The use of urgency procedure should be reserved for exceptional cases where this proves to be necessary in order to react efficiently and effectively against threats of market disturbance or where market disturbances are occurring. The choice of an urgency procedure should be justified and the cases in which the urgency procedure should be used should be specified.
- (141) In order to ensure uniform conditions for the implementation of this Regulation, implementing powers should be conferred on the Commission. Those powers should be exercised in accordance with Regulation (EU) No 182/2011 of the European Parliament and the Council of 16 February 2011 laying down the rules and general principles concerning mechanisms for control by the Member States of the Commission's exercise of implementing powers¹³.

- (142) The examination procedure should be used for the adoption of the acts implementing this Regulation given that those acts relate to the CAP as referred to in point (ii) of Article 2(2)(b) of Regulation (EU) No 182/2011. However, the advisory procedure should be used for the adoption of the acts implementing this Regulation relating to competition matters given that the advisory procedure is used for the adoption of acts implementing competition law in general.
- (143) The Commission should adopt immediately applicable implementing acts where, in duly justified cases imperative grounds of urgency so require, relating to adopting, amending or revoking Union safeguard measures, suspending the use of processing or inward or outward processing arrangements, if necessary to react immediately to the market situation, and resolving specific problems in an emergency, if such immediate action is needed to deal with the problems.
- (144) In respect of certain measures under this Regulation which require swift action or which consist in the mere application of general provisions to specific situations without involving discretion, the Commission should be empowered to adopt implementing acts without applying Regulation (EU) No 182/2011.
- (145) The Commission should further be empowered to carry out certain administrative or management tasks which do not entail the adoption of delegated or implementing acts.

In the interests of clarity and legal certainty Regulations (EC) No 1601/96 and (EC) No 1037/2001 should be repealed.

ANNEX II

DEFINITIONS REFERRED TO IN ARTICLE 3(1)

Part I: Definitions concerning the rice sector

- I. The terms ‘paddy rice’, ‘husked rice’, ‘semi-milled rice’, ‘wholly milled rice’, ‘round grain rice’, ‘medium grain rice’, ‘long grain rice A or B’ and ‘broken rice’ shall be defined as follows:
1. (a) ‘Paddy rice’ means rice which has retained its husk after threshing.
 - (b) ‘Husked rice’ means paddy rice from which only the husk has been removed. Examples of rice falling within this definition are those with the commercial descriptions ‘brown rice’, ‘cargo rice’, ‘loonzain’ and ‘riso sbramato’.
 - (c) ‘Semi-milled rice’ means paddy rice from which the husk, part of the germ and the whole or part of the outer layers of the pericarp but not the inner layers have been removed.
 - (d) ‘Wholly milled rice’ means paddy rice from which the husk, the whole of the outer and inner layers of the pericarp, the whole of the germ in the case of long grain or medium grain rice and at least part thereof in the case of round grain rice have been removed, but in which longitudinal white striations may remain on not more than 10 % of the grains.
2. (a) ‘Round grain rice’ means rice, the grains of which are of a length not exceeding 5,2 mm and of a length/width ratio of less than 2.
 - (b) ‘Medium grain rice’ means rice, the grains of which are of a length exceeding 5,2 mm but not exceeding 6,0 mm and of a length/width ratio no greater than 3.
 - (c) ‘Long grain rice’ means:
 - (i) long grain rice A, rice, the grains of which are of a length exceeding 6,0 mm and of ~~which the~~ length/width ratio ~~is~~ greater than 2 but less than 3;
 - (ii) long grain rice B, rice, the grains of which are of a length exceeding 6,0 mm and of ~~which the~~ length/width ratio ~~is~~ equal to or greater than 3.
 - (d) ‘Measurements of the grains’ means grain measurements ~~are taken~~ on wholly milled rice *taken* by the following method:
 - (i) take a sample representative of the batch;

- (ii) sieve the sample so as to retain only whole grains, including immature grains;
- (iii) carry out two measurements of 100 grains each and work out the average;
- (iv) express the result in millimetres, rounded off to one decimal place.

3. 'Broken rice' means grain fragments the length of which does not exceed three quarters of the average length of the whole grain.

II. As regards grains and broken grains which are not of unimpaired quality, the following definitions shall apply:

- A. 'Whole grains' means grains from which only part of the end has been removed, irrespective of characteristics produced at each stage of milling.
- B. 'Clipped grains' means grains from which the entire end has been removed.
- C. 'Broken grains or fragments' means grains from which a part of the volume greater than the end has been removed; broken grains include:

large broken grains (pieces of grain of a length not less than half that of a grain, but not constituting a complete grain),

medium broken grains (pieces of grain of a length not less than a quarter of the length of a grain but which are smaller than the minimum size of 'large broken grains'),

fine broken grains (pieces of grain less than a quarter of the size of a grain but too large to pass through a sieve with a mesh of 1,4 mm),

fragments (small pieces or particles of grain which can pass through a sieve with a mesh of 1,4 mm); split grains (pieces produced by a longitudinal split in the grain) come under this definition.

- D. 'Green grains' means grains which are not fully ripened.
- E. 'Grains showing natural malformation' means grains showing a natural malformation whether or not of hereditary origin, as compared with the morphological characteristics typical of the variety.
- F. 'Chalky grains' means grains at least three-quarters of the surface of which looks opaque and chalky.

- G. 'Grains striated with red' means grains showing longitudinal red striations of differing intensity and shades, due to residues from the pericarp.
- H. 'Spotted grains' means grains showing a well-defined small circle of dark colour of more or less regular shape; spotted grains also include those which show slight black striations on the surface only; the striations and spots must not show a yellow or dark aureole.
- I. 'Stained grains' means grains which have undergone, on a small area of their surface, an obvious change in their natural colour; the stains may be of different colours (blackish, reddish, brown); deep black striations are also to be regarded as stains. If the colour of the stains is sufficiently marked (black, pink, reddish-brown) to be immediately visible and if they cover an area not less than half that of the grain, the grains must be considered to be yellow grains.
- J. 'Yellow grains' means grains which have undergone, totally or partially, otherwise than by drying, a change in their natural colour and have taken on a lemon or orange-yellow tone.
- K. 'Amber grains' means grains which have undergone, otherwise than by drying, a slight uniform change in colour over the whole surface; this change alters the colour of the grains to a light amber-yellow.

Part II: Definitions concerning the hops sector

1. 'hops' means the dried inflorescences, also known as cones, of the (female) climbing hop plant (*Humulus lupulus*); these inflorescences, which are greenish yellow and of an ovoid shape, have a flower stalk and their longest dimension generally varies from 2 to 5 cm;
2. 'hop powder' means the product obtained by milling the hops, containing all the natural elements thereof;
3. 'hop powder with higher lupulin content' means the product obtained by milling the hops after mechanical removal of a part of the leaves, stalks, bracts and rachides;
4. 'extract of hops' means the concentrated products obtained by the action of a solvent on the hops or on the hop powder;
5. 'mixed hop products' means a mixture of two or more of the products referred to in points (1) to (4).

ANNEX VII

OENOLOGICAL PRACTICES REFERRED TO IN ARTICLE 62

Part I

Enrichment, acidification and de-acidification in certain wine-growing zones

A. Enrichment limits

1. Where climatic conditions have made it necessary in certain winegrowing zones of the Union, the Member States concerned may allow to supplement the natural alcoholic strength by volume of fresh grapes, grape must, grape must in fermentation, new wine still in fermentation and wine obtained from wine grape varieties classifiable according to Article 63.
2. The increase in natural alcoholic strength by volume shall be achieved by means of the oenological practices referred to in Section B and shall not exceed the following limits:
 - (a) 3 % volume in wine-growing zone A ;
 - (b) 2 % volume in wine-growing zone B ;
 - (c) 1,5 % volume in wine-growing zones C .
3. In years when climatic conditions have been exceptionally unfavourable, Member States may request that the limit(s) laid down in point 2 be raised by 0,5 %. In response to such a request, the Commission under the powers as referred to in Article 68 shall adopt the implementing act as soon as possible. The Commission shall endeavour to take a decision within four weeks after the request has been submitted.

B. Enrichment processes

1. The increase in natural alcoholic strength by volume provided for in Section A shall only be effected:
 - (a) in respect of fresh grapes, grape must in fermentation or new wine still in fermentation, by adding sucrose, concentrated grape must or rectified concentrated grape must;

- (b) in respect of grape must, by adding sucrose, concentrated grape must or rectified concentrated grape must, or by partial concentration, including reverse osmosis;
 - (c) in respect of wine, by partial concentration through cooling.
2. The processes referred to in point 1 shall be mutually exclusive where wine or grape must is enriched with concentrated grape must or rectified concentrated grape must and an aid has been paid under Article 103y of Regulation (EC) No 1234/2007.
3. The addition of sucrose provided for in points 1(a) and (b) may only be performed by dry sugaring and only in the following areas:
- (a) wine-growing zone A;
 - (b) wine-growing zone B;
 - (c) wine-growing zone C,

with the exception of vineyards in Italy, Greece, Spain, Portugal, Cyprus and vineyards in the French departments under jurisdiction of the courts of appeal of:

- Aix-en-Provence,
- Nîmes,
- Montpellier,
- Toulouse,
- Agen,
- Pau,
- Bordeaux,
- Bastia.

However, enrichment by dry sugaring may be authorised by the national authorities as an exception in the abovementioned French departments. France shall notify the Commission and the other Member States forthwith of any such authorisations.

4. The addition of concentrated grape must or rectified concentrated grape must shall not have the effect of increasing the initial volume of fresh crushed grapes, grape must, grape must in fermentation or new wine still in fermentation by more than 11 % in wine-growing zone A, 8 % in wine-growing zone B and 6,5 % in wine-growing zone C.
5. The concentration of grape must or of wine subjected to the processes referred to in point 1:
 - (a) shall not have the effect of reducing the initial volume of these products by more than 20 %;
 - (b) shall, notwithstanding point (2)(c) of Section A, not increase the natural alcoholic strength of these products by more than 2 % volume.
6. The processes referred to in points 1 and 5 shall not raise the total alcoholic strength by volume of the fresh grapes, grape must, grape must in fermentation, new wine still in fermentation, or wine:
 - (a) in wine-growing zone A to more than 11,5 % volume;
 - (b) in wine-growing zone B to more than 12 % volume;
 - (c) in wine-growing zone C I to more than 12,5 % volume;
 - (d) in wine-growing zone C II to more than 13 % volume; and
 - (e) in wine-growing zone C III to more than 13,5 % volume.
7. By way of derogation from point 6, Member States may:
 - (a) in relation to red wine, raise the upper limit of total alcoholic strength by volume of the products referred to in point 6 to 12 % volume in wine-growing zone A and 12,5 % volume in winegrowing zone B;
 - (b) raise the total alcoholic strength by volume of the products referred to in point 6 for the production of wines with a designation of origin to a level to be determined by Member States.

C. Acidification and de-acidification

1. Fresh grapes, grape must, grape must in fermentation, new wine still in fermentation and wine may be subject to:
 - (a) de-acidification in wine-growing zones A, B and C I ;

- (b) acidification and de-acidification in wine-growing zones C I, C II and C III (a), without prejudice to point 7 of this Section; or
 - (c) acidification in wine-growing zone C III (b).
2. Acidification of the products, other than wine, referred to in point 1 may be carried out only up to a limit of 1,50 g/l expressed as tartaric acid, or 20 milliequivalents per litre.
 3. Acidification of wines may be carried out only up to a limit of 2,50 g/l expressed as tartaric acid, or 33,3 milliequivalents per litre.
 4. De-acidification of wines may be carried out only up to a limit of 1 g/l expressed as tartaric acid, or 13,3 milliequivalents per litre.
 5. Grape must intended for concentration may be partially de-acidified.
 6. Notwithstanding point 1, in years when climatic conditions have been exceptional, Member States may authorise acidification of the products referred to in point 1 in wine-growing zones A and B, under the conditions referred to in points 2 and 3 of this Section.
 7. Acidification and enrichment, except by way of derogation to be adopted by the Commission by means of delegated acts pursuant to Article 59(1), and acidification and de-acidification of one and the same product shall be mutually exclusive processes.

D. Processes

1. None of the processes referred to in Sections B and C, with the exception of the acidification and de-acidification of wines, shall be authorised unless carried out, under conditions to be determined by the Commission by means of delegated acts pursuant to Article 59(1), at the time when the fresh grapes, grape must, grape must in fermentation or new wine still in fermentation are being turned into wine or into any other wine sector beverage intended for direct human consumption other than sparkling wine or aerated sparkling wine in the wine-growing zone where the fresh grapes used were harvested.
2. The concentration of wines shall take place in the wine-growing zone where the fresh grapes used were harvested.
3. Acidification and de-acidification of wines shall take place only in the wine making undertaking and in the wine-growing zone where the grapes used to produce the wine in question were harvested.

4. Each of the processes referred to in points 1, 2 and 3 shall be notified to the competent authorities. The same shall apply in respect of the quantities of concentrated grape must rectified concentrated grape must or sucrose held in the exercise of their profession by natural or legal persons or groups of persons, in particular producers, bottlers, processors and merchants to be determined by the Commission by means of delegated acts pursuant to Article 59(1), at the same time and in the same place as fresh grapes, grape must, grape must in fermentation or wine in bulk. The notification of these quantities may, however, be replaced by entry in a goods inwards and stock utilisation register.
5. Each of the processes referred to in Sections B and C shall be recorded on the accompanying document, as provided for in Article 103, under cover of which the products having undergone the processes are put into circulation.
6. Those processes, subject to derogations justified by exceptional climatic conditions, shall not be carried out:
 - (a) in wine-growing zone C after 1 January;
 - (b) in wine-growing zones A and B after 16 March, andthey shall be carried out only for products of the grape harvest immediately preceding those dates.
7. Notwithstanding point 6, concentration by cooling and acidification and de-acidification of wines may be practised throughout the year.

Part II Restrictions

A. General

1. All authorised oenological practices shall exclude the addition of water, except where required on account of a specific technical necessity.
2. All authorised oenological practices shall exclude the addition of alcohol, except for practices related to obtaining fresh grape must with fermentation arrested by the addition of alcohol, liqueur wine, sparkling wine, wine fortified for distillation and semi-sparkling wine.
3. Wine fortified for distillation shall only be used for distillation.

B. Fresh grapes, grape must and grape juice

1. Fresh grape must in which fermentation is arrested by the addition of alcohol shall be used only during the stage of preparation of products which do not fall under CN codes 2204 10, 2204 21 and 2204 29. This is without prejudice to any stricter provisions which Member States may apply to the preparation in their territory of products which do not fall under CN codes 2204 10, 2204 21 and 2204 29.
2. Grape juice and concentrated grape juice shall not be made into wine or added to wine. They shall not undergo alcoholic fermentation in the territory of the Union.
3. The provisions of points 1 and 2 shall not apply to products intended for the production, in the United Kingdom, Ireland and Poland, of products falling within CN code 2206 00 for which Member States may allow the use of a composite name, including the sales designation 'wine'.
4. Grape must in fermentation extracted from raisined grapes shall be put on the market only for the manufacture of liqueur wines only in the wine-growing regions where this usage was traditional on 1 January 1985, and for the manufacture of wine of overripe grapes.
5. Fresh grapes, grape must, grape must in fermentation, concentrated grape must, rectified concentrated grape must, grape must with fermentation arrested by the addition of alcohol, grape juice, concentrated grape juice and wine, or mixtures of those products, originating in third countries, may not be turned into products referred to in ~~this part II of Annex VI~~ or added to such products in the territory of the Union.

C. Blending of wines

Coupage of a wine originating in a third country with a Union wine and coupage between wines originating in third countries shall be prohibited in the Union.

D. By-products

1. The over-pressing of grapes shall be prohibited. Member States shall decide, taking account of local and technical conditions, the minimum quantity of alcohol that shall be contained in the marc and the lees after the pressing of grapes.

The quantity of alcohol contained in those by-products shall be decided by Member States at a level at least equal to 5 % in relation to the volume of alcohol contained in the wine produced.

2. Except for alcohol, spirits and piquette, wine or any other beverage intended for direct human consumption shall not be produced from wine lees or grape marc. The pouring of wine onto lees or grape marc or pressed aszú pulp shall be allowed under conditions to be determined by the Commission by means of delegated acts pursuant to Article 59(1) where this practice is traditionally used for the production of ‘Tokaji fordítás’ and ‘Tokaji máslás’ in Hungary and ‘Tokajský forditáš’ and ‘Tokajský mášláš’ in Slovakia.
3. The pressing of wine lees and the re-fermentation of grape marc for purposes other than distillation or production of piquette is prohibited. The filtering and centrifuging of wine lees shall not be considered as pressing where the products obtained are of sound, genuine and merchantable quality.
4. Piquette, where its production is authorised by the Member State concerned, shall be used only for distillation or for consumption in wine-producers’ households.
5. Without prejudice to the possibility for Member States to decide to require disposal of by-products by way of distillation, any natural or legal persons or groups of persons who hold by-products shall be required to dispose of them subject to conditions to be determined by the Commission by means of delegated acts pursuant to Article 59(1).
