Sugar undertakings which have not signed pre-sowing delivery contracts at the minimum price for quota beet, as provided for in Article 101g, for a quantity of beet equivalent to the sugar for which they hold a quota, adjusted, as the case may be, by the coefficient for a preventive withdrawal fixed pursuant to the first subparagraph of Article 101d(2), shall be required to pay at least the minimum price for quota beet for all the sugar beet they process into sugar.*
- 2d. Subject to the approval of the Member State concerned, agreements within the trade may derogate from paragraphs 2a, 2b and 2c.*

- (a) surplus sugar, isoglucose or inulin syrup available to become industrial sugar, industrial isoglucose or industrial inulin syrup; or*
 - (b) temporary quota production of which a part may be reserved for export respecting the commitments of the Union resulting from agreements concluded in accordance with Article 218 of the Treaty.*

3. By way of derogation from paragraph 1, a contract *and/or an offer for a contract* shall not be required where raw milk is delivered by a farmer to a ~~processor of raw milk where the processor is a~~ co-operative of which the farmer is a member if ~~its~~ *the* statutes *of that cooperative or the rules and decisions provided for in or derived from these statutes* contain provisions having similar effects *to the provisions as those* set out in points (a), (b) and (c) of paragraph 2.
4. All elements of contracts for the delivery of raw milk concluded by farmers, collectors or processors of raw milk, including ~~those~~ elements referred to in *point (c) of* paragraph 2(~~e~~), shall be freely negotiated between the parties.

Notwithstanding the first subparagraph,

- (i) where a Member State decides to make written contracts for the delivery of raw milk compulsory in accordance with paragraph 1 of this Article, it may establish a minimum duration, applicable only to written contracts between a farmer and the first purchaser of raw milk. Such a minimum duration shall be at least six months and shall not impair the proper functioning of the internal market; and/or*

ANNEX II

DEFINITIONS REFERRED TO IN ARTICLE 3(1)

Part I: Definitions concerning the rice sector

- I. The terms ‘paddy rice’, ‘husked rice’, ‘semi-milled rice’, ‘wholly milled rice’, ‘round grain rice’, ‘medium grain rice’, ‘long grain rice A or B’ and ‘broken rice’ shall be defined as follows:
1. (a) ‘Paddy rice’ means rice which has retained its husk after threshing.
 - (b) ‘Husked rice’ means paddy rice from which only the husk has been removed. Examples of rice falling within this definition are those with the commercial descriptions ‘brown rice’, ‘cargo rice’, ‘loonzain’ and ‘riso sbramato’.
 - (c) ‘Semi-milled rice’ means paddy rice from which the husk, part of the germ and the whole or part of the outer layers of the pericarp but not the inner layers have been removed.
 - (d) ‘Wholly milled rice’ means paddy rice from which the husk, the whole of the outer and inner layers of the pericarp, the whole of the germ in the case of long grain or medium grain rice and at least part thereof in the case of round grain rice have been removed, but in which longitudinal white striations may remain on not more than 10 % of the grains.
 2. (a) ‘Round grain rice’ means rice, the grains of which are of a length not exceeding 5,2 mm and of a length/width ratio of less than 2.
 - (b) ‘Medium grain rice’ means rice, the grains of which are of a length exceeding 5,2 mm but not exceeding 6,0 mm and of a length/width ratio no greater than 3.
 - (c) ‘Long grain rice’ means:
 - (i) long grain rice A, rice, the grains of which are of a length exceeding 6,0 mm and of ~~which the~~ length/width ratio ~~is~~ greater than 2 but less than 3;
 - (ii) long grain rice B, rice, the grains of which are of a length exceeding 6,0 mm and of ~~which the~~ length/width ratio ~~is~~ equal to or greater than 3.
 - (d) ‘Measurements of the grains’ means grain measurements ~~are taken~~ on wholly milled rice *taken* by the following method:
 - (i) take a sample representative of the batch;

- (ii) sieve the sample so as to retain only whole grains, including immature grains;
- (iii) carry out two measurements of 100 grains each and work out the average;
- (iv) express the result in millimetres, rounded off to one decimal place.

3. 'Broken rice' means grain fragments the length of which does not exceed three quarters of the average length of the whole grain.

II. As regards grains and broken grains which are not of unimpaired quality, the following definitions shall apply:

A. 'Whole grains' means grains from which only part of the end has been removed, irrespective of characteristics produced at each stage of milling.

B. 'Clipped grains' means grains from which the entire end has been removed.

C. 'Broken grains or fragments' means grains from which a part of the volume greater than the end has been removed; broken grains include:

large broken grains (pieces of grain of a length not less than half that of a grain, but not constituting a complete grain),

medium broken grains (pieces of grain of a length not less than a quarter of the length of a grain but which are smaller than the minimum size of 'large broken grains'),

fine broken grains (pieces of grain less than a quarter of the size of a grain but too large to pass through a sieve with a mesh of 1,4 mm),

fragments (small pieces or particles of grain which can pass through a sieve with a mesh of 1,4 mm); split grains (pieces produced by a longitudinal split in the grain) come under this definition.

D. 'Green grains' means grains which are not fully ripened.

E. 'Grains showing natural malformation' means grains showing a natural malformation whether or not of hereditary origin, as compared with the morphological characteristics typical of the variety.

F. 'Chalky grains' means grains at least three-quarters of the surface of which looks opaque and chalky.

- G. 'Grains striated with red' means grains showing longitudinal red striations of differing intensity and shades, due to residues from the pericarp.
- H. 'Spotted grains' means grains showing a well-defined small circle of dark colour of more or less regular shape; spotted grains also include those which show slight black striations on the surface only; the striations and spots must not show a yellow or dark aureole.
- I. 'Stained grains' means grains which have undergone, on a small area of their surface, an obvious change in their natural colour; the stains may be of different colours (blackish, reddish, brown); deep black striations are also to be regarded as stains. If the colour of the stains is sufficiently marked (black, pink, reddish-brown) to be immediately visible and if they cover an area not less than half that of the grain, the grains must be considered to be yellow grains.
- J. 'Yellow grains' means grains which have undergone, totally or partially, otherwise than by drying, a change in their natural colour and have taken on a lemon or orange-yellow tone.
- K. 'Amber grains' means grains which have undergone, otherwise than by drying, a slight uniform change in colour over the whole surface; this change alters the colour of the grains to a light amber-yellow.

- 2. 'half-carcass': the product obtained by separating the carcass referred to in point (1) symmetrically through the middle of each cervical, dorsal, lumbar and sacral vertebra and through the middle of the sternum and the ischiopubic symphysis.*

II. Categories

The bovine carcasses shall be divided into the following categories:

- Z: carcasses of animals aged from 8 months to less than 12 months;*

**DETAILED RULES ON TRANSFERS OF SUGAR OR ISOGLUCOSE QUOTAS IN
ACCORDANCE WITH ARTICLE 101K**

I

For the purpose of this Annex:

- (a) 'merger of undertakings' means the consolidation of two or more undertakings into a single undertaking;*
- (b) 'transfer of an undertaking' means the transfer or absorption of the assets of an undertaking having quota to one or more undertakings;*
- (c) 'transfer of a factory' means the transfer of ownership of a technical unit, including all the plant required to manufacture the product concerned, to one or more undertakings, resulting in the partial or total absorption of the production of the undertaking making the transfer;*
- (d) 'lease of a factory' means the leasehold contract of a technical unit including all the plant required for the manufacture of sugar, with a view to its operation, concluded for a period of at least three consecutive marketing years, which the parties agree not to terminate before the end of the third marketing year, with an undertaking which is established in the same Member State as the factory concerned, if, after the lease takes effect, the undertaking which rents the factory can be considered a solely sugar-producing undertaking for its entire production.*

II

- 1. Without prejudice to point 2, in the event of the merger or transfer of sugar-producing undertakings or the transfer of sugar factories, the quota shall be adjusted as follows:*
 - (a) in the event of the merger of sugar-producing undertakings, the Member States shall allocate to the undertaking resulting from the merger a quota equal to the sum of the quotas allocated prior to the merger to the sugar-producing undertakings concerned;*
 - (b) in the event of the transfer of a sugar-producing undertaking, the Member State shall allocate the quota of the transferred undertaking to the transferee undertaking for the production of sugar or, if there is more than one transferee undertaking, the allocation shall be made in proportion to the sugar production absorbed by each of them;*
 - (c) in the event of the transfer of a sugar factory, the Member State shall reduce the quota of the undertaking transferring ownership of the factory and shall increase the quota of the sugar-producing undertaking or undertakings purchasing the factory in question by the quantity deducted in proportion to the production absorbed.*

2. *Where a number of the sugar-beet or cane growers directly affected by one of the operations referred to in point 1 expressly show their willingness to supply their beet or cane to a sugar-producing undertaking which is not party to those operations, the Member State may make the allocation on the basis of the production absorbed by the undertaking to which they intend to supply their beet or cane.*
3. *In the event of closure, in circumstances other than those referred to in point 1, of:*
 - (a) *a sugar-producing undertaking,*
 - (b) *one or more factories of a sugar-producing undertaking.*

The Member State may allocate the part of the quotas involved in such closure to one or more sugar-producing undertakings.

Also in the case referred to in point (b) of the first subparagraph, where some of the producers concerned expressly show their willingness to supply their beet or cane to a given sugar-producing undertaking, the Member State may allocate the proportion of the quotas corresponding to the beet or cane concerned to the undertaking which they intend to supply with those products.

4. *Where the derogation referred to in Article 101(5) is invoked, the Member State concerned may require the beet growers and the sugar undertakings concerned by that derogation to include in their agreements within the trade special clauses enabling the Member State to apply points 2 and 3 of this Section.*
5. *In the event of the lease of a factory belonging to a sugar-producing undertaking, the Member State may reduce the quota of the undertaking offering the factory for rent and allocate the portion by which the quota was reduced to the undertaking which rents the factory in order to produce sugar in it.*

If the lease is terminated during the period of three marketing years referred to in point 1 (d) the adjustment of quota under the first subparagraph of this point shall be cancelled retroactively by the Member State as at the date on which the lease took effect. However, if the lease is terminated by reason of force majeure, the Member State shall not be bound to cancel the adjustment.

6. *Where a sugar-producing undertaking can no longer ensure that it meets its obligations under Union legislation towards the sugar-beet or cane producers concerned, and where that situation has been ascertained by the competent authorities of the Member State concerned, the latter may allocate for one or more marketing years the part of the quotas involved to one or more sugar-producing undertakings in proportion to the production absorbed.*
7. *Where a Member State grants a sugar producing undertaking price and outlet guarantees for processing sugar beet into ethyl alcohol, that Member State may, in agreement with that undertaking and the beet growers concerned, allocate all or part of the sugar production quotas to one or more other undertakings for one or more marketing years.*

III

In the event of the merger or transfer of isoglucose-producing undertakings or the transfer of an isoglucose-producing factory, the Member State may allocate the quotas involved for the production of isoglucose to one or more other undertakings, whether or not they have a production quota.

IV

The measures taken pursuant to Sections II and III may take effect only if the following conditions are met:

- (a) the interests of each of the parties concerned are taken into consideration;*
- (b) the Member State concerned considers that they are likely to improve the structure of the beet, cane and sugar-manufacturing sectors;*
- (c) they concern undertakings established in the same territory for which the quota is set in Annex IIIb.*

V

When the merger or transfer occurs between 1 October and 30 April of the following year, the measures referred to in Sections II and III shall take effect for the current marketing year.

When the merger or transfer occurs between 1 May and 30 September of the same year, the measures referred to in Sections II and III shall take effect for the following marketing year.

VI

Where Sections II and III are applied, Member States shall inform the Commission of the adjusted quotas not later than 15 days after the expiry of the periods referred to in Section V.]

[ANNEX III d

Purchase terms for beets, referred to in Article 101

POINT I

For the purposes of this Annex ‘Contracting Parties’ means:

- (a) sugar undertakings (hereinafter referred to as manufacturers), and*
- (b) beet sellers (hereinafter referred to as sellers).*

POINT II

- 1. Delivery contracts shall be made in writing for a specified quantity of quota beet.*
- 2. Delivery contracts shall specify whether an additional quantity of beet may be supplied, and under what terms.*

POINT III

- 1. Delivery contracts shall indicate the purchase prices for the quantities of beet referred to in point (a) and, if appropriate, point (b), of Article 101(2a) of this Regulation. In the case of the quantities referred to in point (a) of Article 101(2a), those prices may not be lower than the minimum price for quota beet referred to in Article 101g(1).*
- 2. Delivery contracts shall lay down a fixed sugar content for beet. They shall include a conversion scale showing the different sugar contents and factors for converting the quantities of beet supplied into quantities corresponding to the sugar content shown in the delivery contract.*

The scale shall be based on the yields corresponding to the different sugar contents.

- 3. Where a seller has signed a delivery contract with a manufacturer for the delivery of beet as referred to in point (a) of Article 101(2a), all deliveries by that seller, converted in accordance with paragraph 2 of this Point, shall be considered to be deliveries within the meaning of point (a) of Article 101(2a), up to the quantity of beet specified in the delivery contract.*

4. *Manufacturers producing a quantity of sugar lower than their quota beet for which they have signed pre-sowing delivery contracts under point (a) of Article 101(2a), shall distribute the quantity of beet corresponding to any additional production up to the amount of their quota among the sellers with whom they have signed pre-sowing delivery contracts within the meaning of point (a) of Article 101(2a).*

Agreements within the trade may derogate from this provision.

POINT IV

1. *Delivery contracts shall contain provisions concerning the staggering and normal duration of beet deliveries.*
2. *Provisions referred to in paragraph 1 shall be those applicable during the previous marketing year, taking account of the level of actual production; agreements within the trade may derogate therefrom.*

POINT V

1. *Delivery contracts shall provide for beet collection places.*
2. *Where sellers and manufacturers have already signed a delivery contract for the previous marketing year, the collection places agreed upon by them for deliveries during that marketing year shall remain in operation. Agreements within the trade may derogate from this provision.*
3. *Delivery contracts shall provide that loading and transport costs from the collection places are to be borne by the manufacturer subject to special agreements based on local rules or usages in operation before the previous marketing year.*
4. *However, in Denmark, Greece, Spain, Ireland, Portugal, Finland and the United Kingdom, where beet is delivered free-at-factory, delivery contracts shall require manufacturers to contribute to loading and transport costs and shall stipulate the percentage or amounts.*

POINT VI

1. *Delivery contracts shall provide for reception points for beet.*
2. *Where sellers and manufacturers have already signed a delivery contract for the previous marketing year, the reception points agreed upon by them for deliveries during that marketing year shall remain in operation. Agreements within the trade may derogate from this provision.*

POINT VII

- 1. Delivery contracts shall provide for the sugar content to be determined using the polarimetric method. A sample of the beet shall be drawn at the time of reception.**
- 2. Agreements within the trade may provide for samples to be drawn at another stage. In such cases, the delivery contract shall provide for a correction to compensate for any drop in the sugar content between the reception and the drawing of the sample.**

POINT VIII

Delivery contracts shall provide for gross weight, tare and sugar content to be determined using one of the following procedures:

- (a) jointly, by the manufacturer and the beet growers' trade organisation, if an agreement within the trade so provides;**
- (b) by the manufacturer, under the supervision of the beet growers' trade organisation;**
- (c) by the manufacturer, under the supervision of an expert recognised by the Member State concerned, provided the seller defrays the costs thereof.**

POINT IX

- 1. Delivery contracts shall require manufacturers to do one or more of the following for the whole quantity of beet delivered:**
 - (a) to return the fresh pulp from the tonnage of beet delivered free of charge to the seller, ex-factory;**
 - (b) to return part of that pulp, pressed, dried or dried and molassed, free of charge to the seller, ex-factory;**
 - (c) to return the pulp, pressed or dried, to the seller, ex-factory; in this case, the manufacturer may require the seller to pay the pressing or drying costs;**
 - (d) to pay the seller compensation which takes account of the possibilities of selling the pulp concerned.**

When parts of the whole quantity of beet delivered are subject to different treatment, the delivery contract shall impose more than one of the obligations provided for in the first subparagraph.

- 2. Agreements within the trade may provide for pulp to be delivered at a stage other than that referred to in paragraph 1(a), (b) and (c).**

POINT X

- 1. Delivery contracts shall fix the time limits for any advance payments and for payment of the purchase price for beet.**
- 2. The time limits referred to in paragraph 1 shall be those valid during the previous marketing year. Agreements within the trade may derogate from this provision.**

POINT XI

Where delivery contracts lay down rules covering matters which are dealt with in this Annex, or where they contain provisions governing other matters, their provisions and effects shall not conflict with this Annex.

POINT XII

- 1. Agreements in the trade as described in Annex II, Part Ia, point 11 to this Regulation shall contain arbitration clauses.**
- 2. Where agreements within the trade at Community, regional or local level lay down rules covering matters which are dealt with in this Regulation, or where they contain provisions governing other matters, their provisions and effects shall not conflict with this Annex.**
- 3. Agreements referred to in paragraph 2 lay down, in particular:**
 - (a) rules on the distribution to sellers of quantities of beet which the manufacturer decides to buy prior to sowing, for the manufacture of sugar within the limits of the quota;**

 - (h) details of:**
 - (i) the part of the pulp referred to in Point IX(1)(b),**
 - (ii) the costs referred to in Point IX(1)(c),**
 - (iii) the compensation referred to in Point IX(1)(d);**
 - (i) the removal of pulp by the seller;**
 - (j) without prejudice to Article 101g(1) of this Regulation, rules on how any difference between the reference price and the actual selling price of the sugar is to be allocated between the manufacturer and sellers.**

POINT XIII

Where there is no set agreement within the trade as to how the quantities of beet intended for the manufacture of sugar within the quota limits which the manufacturer offers to buy before sowing should be allocated among the sellers, the Member State concerned may itself lay down rules for such allocation.

Those rules may also grant to traditional sellers of beet to cooperatives delivery rights other than those which they would enjoy if they belonged to such cooperatives.]

ANNEX VII

OENOLOGICAL PRACTICES REFERRED TO IN ARTICLE 62

Part I

Enrichment, acidification and de-acidification in certain wine-growing zones

A. Enrichment limits

1. Where climatic conditions have made it necessary in certain winegrowing zones of the Union, the Member States concerned may allow to supplement the natural alcoholic strength by volume of fresh grapes, grape must, grape must in fermentation, new wine still in fermentation and wine obtained from wine grape varieties classifiable according to Article 63.
2. The increase in natural alcoholic strength by volume shall be achieved by means of the oenological practices referred to in Section B and shall not exceed the following limits:
 - (a) 3 % volume in wine-growing zone A ;
 - (b) 2 % volume in wine-growing zone B ;
 - (c) 1,5 % volume in wine-growing zones C .
3. In years when climatic conditions have been exceptionally unfavourable, Member States may request that the limit(s) laid down in point 2 be raised by 0,5 %. In response to such a request, the Commission under the powers as referred to in Article 68 shall adopt the implementing act as soon as possible. The Commission shall endeavour to take a decision within four weeks after the request has been submitted.

B. Enrichment processes

1. The increase in natural alcoholic strength by volume provided for in Section A shall only be effected:
 - (a) in respect of fresh grapes, grape must in fermentation or new wine still in fermentation, by adding sucrose, concentrated grape must or rectified concentrated grape must;

- (b) in respect of grape must, by adding sucrose, concentrated grape must or rectified concentrated grape must, or by partial concentration, including reverse osmosis;
 - (c) in respect of wine, by partial concentration through cooling.
2. The processes referred to in point 1 shall be mutually exclusive where wine or grape must is enriched with concentrated grape must or rectified concentrated grape must and an aid has been paid under Article 103y of Regulation (EC) No 1234/2007.
3. The addition of sucrose provided for in points 1(a) and (b) may only be performed by dry sugaring and only in the following areas:
- (a) wine-growing zone A;
 - (b) wine-growing zone B;
 - (c) wine-growing zone C,

with the exception of vineyards in Italy, Greece, Spain, Portugal, Cyprus and vineyards in the French departments under jurisdiction of the courts of appeal of:

- Aix-en-Provence,
- Nîmes,
- Montpellier,
- Toulouse,
- Agen,
- Pau,
- Bordeaux,
- Bastia.

However, enrichment by dry sugaring may be authorised by the national authorities as an exception in the abovementioned French departments. France shall notify the Commission and the other Member States forthwith of any such authorisations.

4. The addition of concentrated grape must or rectified concentrated grape must shall not have the effect of increasing the initial volume of fresh crushed grapes, grape must, grape must in fermentation or new wine still in fermentation by more than 11 % in wine-growing zone A, 8 % in wine-growing zone B and 6,5 % in wine-growing zone C.
5. The concentration of grape must or of wine subjected to the processes referred to in point 1:
 - (a) shall not have the effect of reducing the initial volume of these products by more than 20 %;
 - (b) shall, notwithstanding point (2)(c) of Section A, not increase the natural alcoholic strength of these products by more than 2 % volume.
6. The processes referred to in points 1 and 5 shall not raise the total alcoholic strength by volume of the fresh grapes, grape must, grape must in fermentation, new wine still in fermentation, or wine:
 - (a) in wine-growing zone A to more than 11,5 % volume;
 - (b) in wine-growing zone B to more than 12 % volume;
 - (c) in wine-growing zone C I to more than 12,5 % volume;
 - (d) in wine-growing zone C II to more than 13 % volume; and
 - (e) in wine-growing zone C III to more than 13,5 % volume.
7. By way of derogation from point 6, Member States may:
 - (a) in relation to red wine, raise the upper limit of total alcoholic strength by volume of the products referred to in point 6 to 12 % volume in wine-growing zone A and 12,5 % volume in winegrowing zone B;
 - (b) raise the total alcoholic strength by volume of the products referred to in point 6 for the production of wines with a designation of origin to a level to be determined by Member States.

C. Acidification and de-acidification

[To be completed]

[To be completed]

Restrictions

A. General

1. All authorised oenological practices shall exclude the addition of water, except where required on account of a specific technical necessity.
2. All authorised oenological practices shall exclude the addition of alcohol, except for practices related to obtaining fresh grape must with fermentation arrested by the addition of alcohol, liqueur wine, sparkling wine, wine fortified for distillation and semi-sparkling wine.
3. Wine fortified for distillation shall only be used for distillation.

B. Fresh grapes, grape must and grape juice

1. Fresh grape must in which fermentation is arrested by the addition of alcohol shall be used only during the stage of preparation of products which do not fall under CN codes 2204 10, 2204 21 and 2204 29. This is without prejudice to any stricter provisions which Member States may apply to the preparation in their territory of products which do not fall under CN codes 2204 10, 2204 21 and 2204 29.
2. Grape juice and concentrated grape juice shall not be made into wine or added to wine. They shall not undergo alcoholic fermentation in the territory of the Union.
3. The provisions of points 1 and 2 shall not apply to products intended for the production, in the United Kingdom, Ireland and Poland, of products falling within CN code 2206 00 for which Member States may allow the use of a composite name, including the sales designation 'wine'.
4. Grape must in fermentation extracted from raisined grapes shall be put on the market only for the manufacture of liqueur wines only in the wine-growing regions where this usage was traditional on 1 January 1985, and for the manufacture of wine of overripe grapes.
5. Fresh grapes, grape must, grape must in fermentation, concentrated grape must, rectified concentrated grape must, grape must with fermentation arrested by the addition of alcohol, grape juice, concentrated grape juice and wine, or mixtures of those products, originating in third countries, may not be turned into products referred to in **this part II of Annex VI** or added to such products in the territory of the Union.

C. Blending of wines

Coupage of a wine originating in a third country with a Union wine and coupage between wines originating in third countries shall be prohibited in the Union.

D. By-products

1. The over-pressing of grapes shall be prohibited. Member States shall decide, taking account of local and technical conditions, the minimum quantity of alcohol that shall be contained in the marc and the lees after the pressing of grapes.

The quantity of alcohol contained in those by-products shall be decided by Member States at a level at least equal to 5 % in relation to the volume of alcohol contained in the wine produced.

2. Except for alcohol, spirits and piquette, wine or any other beverage intended for direct human consumption shall not be produced from wine lees or grape marc. The pouring of wine onto lees or grape marc or pressed aszú pulp shall be allowed under conditions to be determined by the Commission by means of delegated acts pursuant to Article 59(1) where this practice is traditionally used for the production of 'Tokaji fordítás' and 'Tokaji máslás' in Hungary and 'Tokajský forditáš' and 'Tokajský mášláš' in Slovakia.
3. The pressing of wine lees and the re-fermentation of grape marc for purposes other than distillation or production of piquette is prohibited. The filtering and centrifuging of wine lees shall not be considered as pressing where the products obtained are of sound, genuine and merchantable quality.
4. Piquette, where its production is authorised by the Member State concerned, shall be used only for distillation or for consumption in wine-producers' households.
5. Without prejudice to the possibility for Member States to decide to require disposal of by-products by way of distillation, any natural or legal persons or groups of persons who hold by-products shall be required to dispose of them subject to conditions to be determined by the Commission by means of delegated acts pursuant to Article 59(1).
