3. The conditions referred to in paragraphs 1 and 2 above indicate, for all products covered by this Agreement, the working or processing which must be carried out on non-originating materials used in manufacturing and apply only in relation to such materials. Accordingly, it follows that if a product, which has acquired originating status by fulfilling the conditions set out in either List is used in the manufacture of another product, the conditions applicable to the product in which it is incorporated do not apply to it, and no account shall be taken of the non-originating materials which may have been used in its manufacture.

The notification to the Commission shall indicate why the wholly obtained products as defined in the Article 5, paragraphs 1(f) and (g) cannot be sufficiently utilized to satisfy the on-land demand, the reasons why the application of this paragraph will stimulate the development of the fisheries sector in that State, and shall include the necessary information about the species concerned, the products to be manufactured as well as an indication of the respective quantities to be involved and the measures taken to comply with the Western Central Pacific Commission mandate.

- (b) A report on the implementation of subparagraph (a) shall be drawn up no later than three years after the notification.
- (c) On the basis of this report, the European Community and the requesting Pacific State shall hold consultations on the utilization of subparagraph (a), taking into account in particular its development effects and the effective conservation and sustainable management of the resources and, if appropriate, amend it.

3. The endorsement referred to in paragraph 2 shall be inserted in the 'Remarks' box of the duplicate movement certificate EUR.1.
4. The duplicate, which must bear the date of issue of the original movement certificate EUR.1, shall take effect as from that date.

Article 19

Issue of movement certificates EUR.1 on the basis of a proof of origin issued or made out previously

When originating products are placed under the control of a customs office in a Pacific State or in the European Community, it shall be possible to replace the original proof of origin by one or more movement certificates EUR.1 for the purpose of sending all or some of these products elsewhere within the Pacific States or within the European Community. The replacement movement certificate(s) EUR.1 shall be issued by the customs office under whose control the products are placed and endorsed by the customs authority under whose control the products are placed.

Article 20

Conditions for making out an invoice declaration

1. An invoice declaration as referred to in Article 15(1)(b) may be made out:
 - (a) by an approved exporter within the meaning of Article 21, or
 - (b) by any exporter for any consignment consisting of one or more packages containing originating products whose total value does not exceed EUR 6 000.
2. An invoice declaration may be made out if the products concerned can be considered as products originating in a Pacific State or in the European Community or in one of the other countries or territories referred to in Articles 3 and 4 and fulfil the other requirements of this Protocol.
3. The exporter making out an invoice declaration shall be prepared to submit at any time, at the request of the customs authorities of the exporting country, all appropriate documents proving the originating status of the products concerned as well as the fulfilment of the other requirements of this Protocol.
4. An invoice declaration shall be made out by the exporter by typing, stamping or printing on the invoice, the delivery note or another commercial document, the declaration, the text of which appears in Annex IV to this Protocol, using one of the linguistic versions set out

in that Annex and in accordance with the provisions of the domestic law of the exporting country. If the declaration is handwritten, it shall be written in ink in printed characters.

5. Invoice declarations shall bear the original signature of the exporter in manuscript. However, an approved exporter within the meaning of Article 21 shall not be required to sign such declarations provided that he gives the customs authorities of the exporting country a written undertaking that he accepts full responsibility for any invoice declaration which identifies him as if it had been signed in manuscript by him.
6. An invoice declaration may be made out by the exporter when the products to which it relates are exported, or after exportation on condition that it is presented in the importing country no longer than two years after the importation of the products to which it relates.

Article 21

Approved exporter

1. The customs authorities of the exporting country may authorize any exporter who makes frequent shipments of products under the trade cooperation provisions of the Agreement to make out invoice declarations irrespective of the value of the products concerned. An exporter seeking such authorization must offer to the satisfaction of the customs authorities all guarantees necessary to verify the originating status of the products as well as the fulfilment of the other requirements of this Protocol.
2. The customs authorities may grant the status of approved exporter subject to any conditions which they consider appropriate.
3. The customs authorities shall grant to the approved exporter a customs authorization number which shall appear on the invoice declaration.
4. The customs authorities shall monitor the use of the authorization by the approved exporter.
5. The customs authorities may withdraw the authorization at any time. They shall do so where the approved exporter no longer offers the guarantees referred to in paragraph 1, does not fulfil the conditions referred to in paragraph 2 or otherwise makes an incorrect use of the authorization.

Article 22

Validity of proof of origin

1. A proof of origin shall be valid for ten months from the date of issue in the exporting country, and must be submitted within the said period to the customs authorities of the importing country.
2. Proofs of origin which are submitted to the customs authorities of the importing country after the final date for presentation specified in paragraph 1 may be accepted for the purpose of applying preferential treatment, where the failure to submit these documents by the final date set is due to exceptional circumstances.

3. In other cases of belated presentation, the customs authorities of the importing country may accept the proofs of origin where the products have been submitted before the said final date.

Article 23

Submission of proof of origin

Proofs of origin shall be submitted to the customs authorities of the importing country in accordance with the procedures applicable in that country. The said authorities may require a translation of a proof of origin and may also require the import declaration to be accompanied by a statement from the importer to the effect that the products meet the conditions required for the implementation of the Agreement.

Article 24

Importation by installments

Where, at the request of the importer and on the conditions laid down by the customs authorities of the importing country, dismantled or non-assembled products within the meaning of General Rule 2(a) for the interpretation of the Harmonized System falling within Sections XVI and XVII or heading 7308 and 9406 of the Harmonized System are imported by instalments, a single proof of origin for such products shall be submitted to the customs authorities upon importation of the first instalment.

Article 25

Exemptions from proof of origin

1. Products sent as small packages from private persons to private persons or forming part of travellers' personal luggage shall be admitted as originating products without requiring the submission of a proof of origin, provided that such products are not imported by way of trade and have been declared as meeting the requirements of this Protocol and where there is no doubt as to the veracity of such a declaration. In the case of products sent by post, this declaration can be made on customs declaration CN22/CN23 or on a sheet of paper annexed to that document.
2. Imports which are occasional and consist solely of products for the personal use of the recipients or travellers or their families shall not be considered as imports by way of trade if it is evident from the nature and quantity of the products that no commercial purpose is in view.
3. Furthermore, the total value of these products shall not exceed EUR 500 in the case of small packages or EUR 1 200 in the case of products forming part of travellers' personal luggage.

Article 26

Information procedure for cumulation purposes

1. When Articles 3(1) and 4(1) are applied, the evidence of originating status within the meaning of this Protocol of the materials coming from a Pacific State, from the European Community, from another ACP State or from an OCT shall be given by a movement certificate EUR.1 or by the supplier's declaration, a specimen of which appears in Annex V A to this Protocol, given by the exporter in the State or in the European Community from which the materials came.
2. When Articles 3(4) and 4(4) are applied, the evidence of the working or processing carried out in a Pacific State, in the European Community, in another ACP State or in an OCT shall be given by the supplier's declaration a specimen of which appears in Annex V B to this Protocol, given by the exporter in the State or in the European Community from which the materials came.
3. A separate supplier's declaration shall be made up by the supplier for each consignment of goods on the commercial invoice related to that shipment or in an annex to that invoice, or on a delivery note or other commercial document related to that shipment which describes the materials concerned in sufficient detail to enable them to be identified.
4. The supplier's declaration may be made out on a pre-printed form.
5. The suppliers' declarations shall bear the original signature of the supplier in manuscript. However, where the invoice and the supplier's declaration are established using electronic data-processing methods, the supplier's declaration need not be signed in manuscript provided the responsible official in the supplying company is identified to the satisfaction of the customs authorities in the State where the suppliers' declarations are established. The said customs authorities may lay down conditions for the implementation of this paragraph.
6. The supplier's declarations shall be submitted to the customs authorities in the exporting country requested to issue the movement certificate EUR.1.
7. The supplier making out a declaration must be prepared to submit at any time, at the request of the customs authorities of the country where the declaration is made out, all appropriate documents proving that the information given on this declaration is correct.
8. Suppliers' declarations made and information certificates issued before the date of entry into force of this Protocol in accordance with Article 26 of Protocol II to the Cotonou Agreement shall remain valid.

Article 27

Supporting documents

The documents referred to in Articles 16(3) and 20(3) used for the purpose of proving that products covered by a movement certificate EUR.1 or an invoice declaration can be considered as products originating in a Pacific State, in the European Community or in one of the other countries or territories referred to in Articles 3 and 4 and fulfill the other requirements of this Protocol may consist inter alia of the following:

- (a) direct evidence of the processes carried out by the exporter or supplier to obtain the goods concerned, contained for example in his accounts or internal bookkeeping;

- (b) documents proving the originating status of materials used, issued or made out in a Pacific State, in the European Community or in one of the other countries or territories referred to in Articles 3 and 4 where these documents are used in accordance with national law;
- (c) documents proving the working or processing of materials in a Pacific State, in the European Community or in one of the other countries or territories referred to in Articles 3 and 4, issued or made out in a Pacific State, in the European Community or in one of the other countries or territories referred to in Articles 3 and 4 where these documents are used in accordance with national law;
- (d) movement certificates EUR.1 or invoice declarations proving the originating status of materials used, issued or made out in a Pacific State, in the European Community or in one of the other countries or territories referred to in Articles 3 and 4 and in accordance with this Protocol.

Article 28

Preservation of proof of origin and supporting documents

1. The exporter applying for the issue of a movement certificate EUR.1 shall keep for at least three years the documents referred to in Article 16(3).
2. The exporter making out an invoice declaration shall keep for at least three years a copy of this invoice declaration as well as the documents referred to in Article 20(3).
3. The supplier making out a supplier's declaration shall keep for at least three years copies of the declaration and of the invoice, delivery notes or other commercial document to which this declaration is annexed as well as the documents referred to in Article 20(7).
4. The customs authorities of the exporting country issuing a movement certificate EUR.1 shall keep for at least three years the application form referred to in Article 16(2).
5. The customs authorities of the importing country shall keep for at least three years the movement certificates EUR.1 and the invoice declarations submitted to them.

Article 29

Discrepancies and formal errors

1. The discovery of slight discrepancies between the statements made in the proof of origin and those made in the documents submitted to the customs office for the purpose of carrying out the formalities for importing the products shall not ipso facto render the proof of origin null and void if it is duly established that this document does correspond to the products submitted.
2. Obvious formal errors such as typing errors on a proof of origin should not cause this document to be rejected if these errors are not such as to create doubts concerning the correctness of the statements made in this document.

Article 30

Amounts expressed in euro

1. For the application of the provisions of Article 20(1)(b) and Article 25(3) in cases where products are invoiced in a currency other than euro, amounts in the national currencies of a Pacific State, of the Member States of the European Community and of the other countries or territories referred to in Articles 3 and 4 equivalent to the amounts expressed in euro shall be fixed annually by each of the countries concerned.
2. A consignment shall benefit from the provisions of Article 20(1)(b) or Article 25(3) by reference to the currency in which the invoice is drawn up, according to the amount fixed by the country concerned.
3. The amounts to be used in any given national currency shall be the equivalent in that currency of the amounts expressed in euro as at the first working day of October. The amounts shall be communicated to the Commission of the European Communities by 15 October and shall apply from 1 January the following year. The Commission of the European Communities shall notify all countries concerned of the relevant amounts.
4. A country may round up or down the amount resulting from the conversion into its national currency of an amount expressed in euro. The rounded-off amount may not differ from the amount resulting from the conversion by more than 5 per cent. A country may retain unchanged its national currency equivalent of an amount expressed in euro if, at the time of the annual adjustment provided for in paragraph 3, the conversion of that amount, prior to any rounding-off, results in an increase of less than 15 per cent in the national currency equivalent. The national currency equivalent may be retained unchanged if the conversion would result in a decrease in that equivalent value.
5. The amounts expressed in euro shall be reviewed by the Special Committee on Customs Cooperation and Rules of Origin at the request of the European Community or of the Pacific States. When carrying out this review, the Special Committee on Customs Cooperation and Rules of Origin shall consider the desirability of preserving the effects of the limits concerned in real terms. For this purpose, it may decide to modify the amounts expressed in euro.

TITLE V

ARRANGEMENTS FOR ADMINISTRATIVE COOPERATION

Article 31

Administrative conditions for products to benefit from the Agreement

1. Products originating within the meaning of this Protocol in the Pacific States or in the European Community shall benefit, at the time of the customs import declaration, from the preferences resulting from the Agreement only on condition that they were exported on or after the date on which the exporting country complies with the provisions laid down in paragraph 2.
2. The contracting Parties shall undertake to put in place:

- (a) the necessary national and regional arrangements required for the implementation and enforcement of the rules and procedures laid down in this Protocol, including where appropriate the arrangements necessary for the application of Articles 3 and 4;
- (b) the administrative structures and systems necessary for an appropriate management and control of the origin of products and compliance with the other conditions laid down in this Protocol.

It shall make the notifications referred to in Article 32.

Article 32

Notification of customs authorities

1. The Pacific States and the Member States of the European Community shall provide each other, through the Commission of the European Communities, with the addresses of the customs authorities responsible for issuing and verifying of movement certificates EUR.1 and invoice declarations or supplier's declarations, and with specimen impressions of the stamps used in their customs offices for the issue of these certificates.

Movement certificates EUR.1 and invoice declarations or supplier's declarations shall be accepted for the purpose of applying preferential treatment from the date the information is received by the Commission of the European Communities.

2. The Pacific States and the Member States of the European Community shall inform each other immediately whenever there are any changes to the information referred to in paragraph 1.
3. The authorities referred to in paragraph 1 shall act under the authority of the government of the country concerned. The authorities in charge of control and verification shall be part of the governmental authorities of the country concerned.

Article 33

Mutual assistance

1. In order to ensure the proper application of this Protocol, the European Community, the Pacific States and the other countries referred to in Article 3 and 4 shall assist each other, through the competent customs administrations, in checking the authenticity of the movement certificates EUR.1, the invoice declarations or the supplier's declarations and the correctness of the information given in these documents. The Pacific States shall also:
 - (a) provide the European Community and each other with all the necessary support in the event of a request for a monitoring of the proper management and control of the Protocol in the country concerned, including visits on the spot;
 - (b) in accordance with article 34, verify the originating status of products and the compliance with the other conditions laid down in this Protocol.
2. The authorities consulted shall furnish the relevant information concerning the conditions under which the product has been made, indicating especially the conditions in which the

rules of origin have been respected in the various Pacific States, in the European Community and the other countries concerned referred to in Articles 3 and 4.

Article 34

Verification of proofs of origin

1. Subsequent verifications of proofs of origin shall be carried out based on risk analysis and at random or whenever the customs authorities of the importing country have reasonable doubts as to the authenticity of such documents, the originating status of the products concerned or the fulfillment of the other requirements of this Protocol.
2. For the purposes of implementing the provisions of paragraph 1, the customs authorities of the importing country shall return the movement certificate EUR.1 and the invoice, if it has been submitted, the invoice declaration, or a copy of these documents, to the customs authorities of the exporting country giving, where appropriate, the reasons for the request of verification. Any documents and information obtained suggesting that the information given on the proof of origin is incorrect shall be forwarded in support of the request for verification.
3. The verification shall be carried out by the customs authorities of the exporting country. For this purpose, they shall have the right to call for any evidence and to carry out any inspection of the exporter's accounts or any other check considered appropriate.
4. If the customs authorities of the importing country decide to suspend the granting of preferential treatment to the products concerned while awaiting the results of the verification, release of the products shall be offered to the importer subject to any precautionary measures judged necessary.
5. The customs authorities requesting the verification shall be informed of the results of this verification as soon as possible. These results must indicate clearly whether the documents are authentic and whether the products concerned can be considered as products originating in a Pacific State, in the European Community or in one of the other countries referred to in Articles 3 and 4 and fulfil the other requirements of this Protocol.
6. If in cases of reasonable doubt there is no reply within ten months of the date of the verification request or if the reply does not contain sufficient information to determine the authenticity of the document in question or the real origin of the products, the requesting customs authorities shall, except in exceptional circumstances, refuse entitlement to the preferences.
7. Where the verification procedure or any other available information appears to indicate that the provisions of this Protocol are being contravened, the exporting country on its own initiative or at the request of the importing country shall carry out appropriate enquires or arrange for such enquiries to be carried out with due urgency to identify and prevent such contraventions and for this purpose the exporting country concerned may invite the participation of the importing country in these verifications..

Article 35

Verification of suppliers' declarations

1. Verification of suppliers' declarations shall be carried out based on risk analysis and at random or whenever the customs authorities of the country where such declarations have been taken into account to issue a movement certificate EUR.1 or to make out an invoice declaration, have reasonable doubts as to the authenticity of the document or the correctness of the information given in this document.
2. The customs authorities to which a supplier's declaration is submitted may request the customs authorities of the State where the declaration was made to issue an information certificate, a specimen of which appears in Annex VI to this Protocol. Alternatively, the certifying authorities to which a supplier's declaration is submitted may request the exporter to produce an information certificate issued by the customs authorities of the State where the declaration was made.

A copy of the information certificate shall be preserved by the office which has issued it for at least three years.

3. The customs authorities requesting the verification shall be informed of the results thereof as soon as possible. The results must indicate clearly whether the information given in the supplier's declaration is correct and make it possible for them to determine whether and to what extent this supplier's declaration could be taken into account for issuing a movement certificate EUR.1 or for making out an invoice declaration.
4. The verification shall be carried out by the customs authorities of the country where the supplier's declaration was made out. For this purpose, they shall have the right to call for any evidence or to carry out any inspection of the supplier's account or any other check which they consider appropriate in order to verify the correctness of any supplier's declaration.
5. Any movement certificate EUR.1 or invoice declaration issued or made out on the basis of an incorrect supplier's declaration shall be considered null and void.

Article 36

Dispute settlement

Where disputes arise in relation to the verification procedures of Articles 34 and 35 which cannot be settled between the customs authorities requesting a verification and the customs authorities responsible for carrying out this verification or where they raise a question as to the interpretation of this Protocol, they shall be submitted to the Special Committee on Customs Cooperation and Rules of Origin.

In all cases the settlement of disputes between the importer and the customs authorities of the importing country shall take place under the legislation of that country.

Article 37

Penalties

Penalties shall be imposed on any person who draws up, or causes to be drawn up, a document which contains incorrect information for the purpose of obtaining a preferential treatment for products.

Article 38

Free zones

1. The Pacific States and the European Community shall take all necessary steps to ensure that products traded under cover of a proof of origin or a supplier's declaration and which in the course of transport use a free zone situated in their territory, are not substituted by other goods and do not undergo handling other than normal operations designed to prevent their deterioration.
2. By means of an exemption to the provisions contained in paragraph 1, when products originating in a Pacific State or in the European Community are imported into a free zone under cover of a proof of origin and undergo treatment or processing, the authorities concerned shall issue a new movement certificate EUR.1 at the exporter's request, if the treatment or processing undergone complies with the provisions of this Protocol.

Article 39

Derogations

1. Derogations from this Protocol may be adopted by the Special Committee on Customs Cooperation and Rules of Origin, hereafter in this article referred to as "the Committee", where the development of existing industries or the creation of new industries in the Pacific States justifies them.

The Pacific State or States concerned shall, either before or when it submits the matter to the Committee, notify the European Community of its request for derogation together with the reasons for the request in accordance with paragraph 2.

The European Community shall respond positively to all the Pacific States' requests which are duly justified in conformity with this Article and which cannot cause serious injury to an established European Community industry.

2. In order to facilitate the examination by the Committee of requests for derogation, the Pacific State or States making the request shall, by means of the form given in Annex VII to this Protocol, furnish in support of its request the fullest possible information covering in particular the points listed below:
 - description of the finished product,
 - nature and quantity of materials originating in a third country,
 - nature and quantity of materials originating in a Pacific States or the countries or territories referred to in Articles 3 and 4 or the materials which have been processed there,
 - manufacturing processes,
 - value added,
 - number of employees in the enterprise concerned,

- anticipated volume of exports to the European Community,
- other possible sources of supply for raw materials
- reasons for the duration requested in the light of efforts made to find new sources of supply,
- other observations.

The same rules shall apply to any requests for extension.

The Committee may modify the form.

3. The examination of requests shall in particular take into account:
 - (a) the level of development or the geographical situation of the Pacific State concerned;
 - (b) cases where the application of the existing rules of origin would significantly affect the ability of an existing industry in a Pacific State to continue its exports to the European Community, with particular reference to cases where this could lead to cessation of its activities;
 - (c) specific cases where it can be clearly demonstrated that significant investment in an industry could be deterred by the rules of origin and where a derogation favouring the realization of the investment program would enable these rules to be satisfied by stages.
4. In every case an examination shall be made to ascertain whether the rules relating to cumulation of origin do not provide a solution to the problem.
5. In addition, when a request for derogation concerns a least-developed or an island Pacific State, its examination shall be carried out with a favourable bias having particular regard to:
 - (a) the economic and social impact of the decision to be taken especially in respect of employment;
 - (b) the need to apply the derogation for a period taking into account the particular situation of the Pacific State concerned and its difficulties.
6. In the examination of requests, special account shall be taken, case by case, of the possibility of conferring originating status on products which include in their composition materials originating in neighbouring developing countries, least-developed countries or developing countries with which one or more Pacific States have special relations, provided that satisfactory administrative cooperation can be established.
7. Without prejudice to paragraphs 1 to 6, the derogation shall be granted where the value added to the non-originating products used in the Pacific State concerned is at least 45% of the value of the finished product, provided that the derogation is not such as to cause serious injury to an economic sector of the European Community or of one or more Member States.

8. The Committee shall take steps necessary to ensure that a decision is reached as soon as possible and in any case not later than seventy-five working days after the request is received by the EC Co-chairman of the Committee. If the European Community does not inform a Pacific State of its position on the request within this period, the request shall be deemed to have been accepted.

9.

(a) The derogation shall be valid for a period, generally of five years, to be determined by the Committee.

(b) The derogation decision may provide for renewals without a new decision of the Committee being necessary, provided that the Pacific State or States concerned submit, three months before the end of each period, a proof that they are still unable to meet the conditions of this Protocol which have been derogated from.

If any objection is made to the extension, the Committee shall examine it as soon as possible and decide whether to prolong the derogation. The Committee shall proceed as provided for in paragraph 8. All necessary measures shall be taken to avoid interruptions in the application of the derogation.

(c) In the periods referred to in subparagraphs (a) and (b), the Committee may review the terms for implementing the derogation should a significant change be found to have taken place in the substantive factors governing the decision to grant the derogation. On conclusion of its review the Committee may decide to amend the terms of its decision as regards the scope of derogation or any other condition previously laid down.

TITLE VI CEUTA AND MELILLA

Article 40

Special conditions

1. The term "European Community" used in this Protocol does not cover Ceuta and Melilla. The term "products originating in the European Community" does not cover products originating in Ceuta and Melilla.

2. The provisions of this Protocol shall apply *mutatis mutandis* in determining whether products may be deemed as originating in a Pacific State when imported into Ceuta and Melilla.

3. Where products wholly obtained in Ceuta, Melilla or in the European Community undergo working and processing in a Pacific State, they shall be considered as having been wholly obtained in a Pacific State.

4. Working or processing carried out in Ceuta, Melilla or in the European Community shall be considered as having been carried out in a Pacific State, when materials undergo further working or processing in a Pacific State.

5. For the purpose of implementing paragraphs 3 and 4, the insufficient operations listed in Article 7 of this Protocol shall not be considered as working or processing.
6. Ceuta and Melilla shall be considered as a single territory.

TITLE VII FINAL PROVISIONS

Article 41

Revision and application of rules of origin

1. The Trade Committee may decide to amend the provisions of this Protocol.
2. In accordance with Article 68 of the Agreement, the Special Committee on Customs Cooperation and Rules of Origin shall, inter alia, take decisions on derogations from this Protocol, under the conditions laid down in Article 39.

Article 42

Annexes

The Annexes to this Protocol shall form an integral part thereof.

Article 43

Implementation of the Protocol

The European Community and the Pacific States shall each take the steps necessary to implement this Protocol.

ANNEX I TO PROTOCOL II

INTRODUCTORY NOTES TO THE LIST IN ANNEX II

Note 1:

The list sets out the conditions required for all products to be considered as sufficiently worked or processed within the meaning of Article 6 of the Protocol.

Note 2:

1. First two columns in the list describe the product obtained. The first column gives the heading number or chapter number used in the Harmonized System and the second column gives the description of goods used in that system for that heading or chapter. For each entry in the first two columns a rule is specified in columns 3 or 4. Where, in some cases, the entry in the first column is preceded by an "ex", this signifies that the rules in columns 3 or 4 apply only to the part of that heading as described in column 2.
2. Where several heading numbers are grouped together in column 1 or a chapter number is given and the description of products in column 2 is therefore given in general terms, the adjacent rules in columns 3 or 4 apply to all products which, under the Harmonized System, are classified in headings of the chapter or in any of the headings grouped together in column 1.
3. Where there are different rules in the list applying to different products within a heading, each indent contains the description of that part of the heading covered by the adjacent rules in columns 3 or 4.
4. Where, for an entry in the first two columns, a rule is specified in both columns 3 and 4, the exporter may opt, as an alternative, to apply either the rule set out in column 3 or that set out in column 4. If no origin rule is given in column 4, the rule set out in column 3 has to be applied.

Note 3:

1. The provisions of Article 6 of the Protocol concerning products having acquired originating status which are used in the manufacture of other products apply regardless of whether this status has been acquired inside the factory where these products are used or in another factory in the European Community or in the Pacific States.

Example:

An engine of heading No 8407, for which the rule states that the value of the non-originating materials which may be incorporated may not exceed 40 per cent of the ex-works price, is made from "other alloy steel roughly shaped by forging" of heading No ex 7224.

If this forging has been forged in the European Community from a non-originating ingot, it has already acquired originating status by virtue of the rule for heading No ex 7224 in the list. The forging can then count as originating in the value calculation for the engine regardless of whether it was produced in the same factory or in another factory in the

European Community. The value of the non-originating ingot is thus not taken into account when adding up the value of the non-originating materials used.

2. The rule in the list represents the minimum amount of working or processing required and the carrying out of more working or processing also confers originating status; conversely, the carrying out of less working or processing cannot confer originating status. Therefore, if a rule provides that non-originating material at a certain level of manufacture may be used, the use of such material at an earlier stage of manufacture is allowed and the use of such material at a later stage is not.
3. Without prejudice to Note 3.2 where a rule states that "materials of any heading" may be used, materials of the same heading as the product may also be used, subject, however, to any specific limitations which may also be contained in the rule. However, the expression "manufacture from materials of any heading, including other materials of heading No ..." means that only materials classified in the same heading as the product of a different description than that of the product as given in column 2 of the list may be used.
4. When a rule in the list specifies that a product may be manufactured from more than one material, this means that any one or more materials may be used. It does not require that all be used.

Example:

The rule for fabrics of heading Nos 5208 to 5212 provides that natural fibres may be used and that chemical materials among other materials may also be used. This does not mean that both have to be used; it is possible to use one or the other or both.

5. Where a rule in the list specifies that a product must be manufactured from a particular material, the condition obviously does not prevent the use of other materials which, because of their inherent nature, cannot satisfy the rule. (See also Note 6.3 below in relation to textiles).

Example:

The rule for prepared foods of heading No 1904 which specifically excludes the use of cereals and their derivatives does not prevent the use of mineral salts, chemicals and other additives which are not products from cereals.

However, this does not apply to products which, although they cannot be manufactured from the particular materials specified in the list, can be produced from a material of the same nature at an earlier stage of manufacture.

Example:

In the case of an article of apparel of ex Chapter 62 made from non-woven materials, if the use of only non-originating yarn is allowed for this class of article, it is not possible to start from non-woven cloth – even if non-woven cloths cannot normally be made from yarn. In such cases, the starting material would normally be at the stage before yarn – that is the fibre stage.

6. Where, in a rule in the list, two percentages are given for the maximum value of non-originating materials that can be used, then these percentages may not be added together. In other words, the maximum value of all the non-originating materials used may

never exceed the highest of the percentages given. Furthermore, the individual percentages must not be exceeded in relation to the particular materials they apply to.

Note 4:

1. The term "natural fibres" is used in the list to refer to fibres other than artificial or synthetic fibres. It is restricted to the stages before spinning takes place, including waste, and, unless otherwise specified, includes fibres that have been carded, combed or otherwise processed but not spun.
2. The term "natural fibres" includes horsehair of heading No 0503, silk of heading Nos 5002 and 5003 as well as the wool fibres, fine or coarse animal hair of heading Nos 5101 to 5105, the cotton fibres of heading Nos 5201 to 5203 and the other vegetable fibres of heading Nos 5301 to 5305.
3. The terms "textile pulp", "chemical materials" and "paper-making materials" are used in the list to describe the materials not classified in Chapters 50 to 63, which can be used to manufacture artificial, synthetic or paper fibres or yarns.
4. The term "man-made staple fibres" is used in the list to refer to synthetic or artificial filament tow, staple fibres or waste, of heading Nos 5501 to 5507.

Note 5:

1. Where for a given product in the list a reference is made to this note, the conditions set out in column 3 shall not be applied to any basic textile materials, used in the manufacture of this product, which, taken together, represent 10 per cent or less of the total weight of all the basic textile materials used. (See also Notes 5.3 and 5.4 below).
2. However, the tolerance mentioned in Note 5.1 may only be applied to mixed products which have been made from two or more basic textile materials.

The following are the basic textile materials:

- silk,
- wool,
- coarse animal hair,
- fine animal hair,
- horsehair,
- cotton,
- paper-making materials and paper,
- flax,
- true hemp,
- jute and other textile bast fibres,

- sisal and other textile fibres of the genus Agave,
- coconut, abaca, ramie and other vegetable textile fibres,
- synthetic man-made filaments,
- artificial man-made filaments,
- current conducting filaments
- synthetic man-made staple fibres of polypropylene,
- synthetic man-made staple fibres of polyester,
- synthetic man-made staple fibres of polyamide,
- synthetic man-made staple fibres of polyacrylonitrile,
- synthetic man-made staple fibres of polyimide,
- synthetic man-made staple fibres of polytetrafluoroethylene,
- synthetic man-made staple fibres of polyphenylene sulphide,
- synthetic man-made staple fibres of polyvinyl chloride,
- other synthetic man-made staple fibres,
- artificial man-made staple fibres of viscose,
- other artificial man-made staple fibres,
- yarn made of polyurethane segmented with flexible segments of polyether whether or not gimped,
- yarn made of polyurethane segmented with flexible segments of polyester whether or not gimped,
- products of heading No 5605 (metallized yarn) incorporating strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of a transparent or coloured adhesive between two layers of plastic film,
- other products of heading No 5605.

Example:

A yarn of heading No 5205 made from cotton fibres of heading No 5203 and synthetic staple fibres of heading No 5506 is a mixed yarn. Therefore, non-originating synthetic staple fibres that do not satisfy the origin rules (which require manufacture from chemical materials or textile pulp) may be used up to a weight of 10 per cent of the yarn.

Example:

A woollen fabric of heading No 5112 made from woollen yarn of heading No 5107 and synthetic yarn of staple fibres of heading No 5509 is a mixed fabric. Therefore synthetic yarn which does not satisfy the origin rules (which require manufacture from chemical materials or textile pulp) or woollen yarn that does not satisfy the origin rules (which require manufacture from natural fibres, not carded or combed or otherwise prepared for spinning) or a combination of the two may be used provided their total weight does not exceed 10 per cent of the weight of the fabric.

Example:

Tufted textile fabric of heading No 5802 made from cotton yarn of heading No 5205 and cotton fabric of heading No 5210 is only a mixed product if the cotton fabric is itself a mixed fabric being made from yarns classified in two separate headings or if the cotton yarns used are themselves mixtures.

Example:

If the tufted textile fabric concerned had been made from cotton yarn of heading No 5205 and synthetic fabric of heading No 5407, then, obviously, the yarns used are two separate basic textile materials and the tufted textile fabric is accordingly a mixed product.

3. In the case of products incorporating "yarn made of polyurethane segmented with flexible segments of polyether whether or not gimped" this tolerance is 20 per cent in respect of this yarn.
4. In the case of products incorporating "strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of an adhesive between two layers of plastic film", this tolerance is 30 per cent in respect of this strip.

Note 6:

1. In the case of those textile products, which are marked in the list by a footnote referring to this Introductory Note, textile trimmings and accessories which do not satisfy the rule set out in the list in column 3 for the made up products concerned may be used provided that their weight does not exceed 10% of the total weight of all the textile materials incorporated.

Textile trimmings and accessories are those classified in Chapters 50 to 63. Linings and interlinings are not be regarded as trimmings or accessories.

2. Any non-textile trimmings and accessories or other materials used which contain textiles do not have to satisfy the conditions set out in column 3 even though they fall outside the scope of Note 3.5.
3. In accordance with Note 3.5, any non-originating non-textile trimmings and accessories or other product, which do not contain any textiles, may, anyway, be used freely where they cannot be made from the materials listed in column 3.

For example,¹ if a rule in the list says that for a particular textile item, such as a blouse, yarn must be used, this does not prevent the use of metal items, such as buttons, because they cannot be made from textile materials.

4. Where a percentage rule applies, the value of trimmings and accessories must be taken into account when calculating the value of the non-originating materials incorporated.

Note 7:

1. For the purposes of heading Nos ex 2707, 2713 to 2715, ex 2901, ex 2902 and ex 3403, the "specific processes" are the following:
 - (a) vacuum distillation;
 - (b) redistillation by a very thorough fractionation process ²;
 - (c) cracking;
 - (d) reforming;
 - (e) extraction by means of selective solvents;
 - (f) the process comprising all the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralization with alkaline agents; decolorization and purification with naturally active earth, activated earth, activated charcoal or bauxite;
 - (g) polymerization;
 - (h) alkylation;
 - (i) isomerization.
2. For the purposes of heading Nos 2710, 2711 and 2712, the "specific processes" are the following:
 - (a) vacuum distillation;
 - (b) redistillation by a very thorough fractionation process (1)
 - (c) cracking;
 - (d) reforming;
 - (e) extraction by means of selective solvents;
 - (f) the process comprising all the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralization with alkaline agents; decolorization and purification with naturally active earth, activated earth, activated charcoal or bauxite;

¹ This example is given for the purpose of explanation only. It is not legally binding
² See additional Explanatory Note 4(b) to Chapter 27 of the Combined Nomenclature

- (g) polymerization;
 - (h) alkylation;
 - (i) isomerization;
 - (j) in respect of heavy oils falling within heading No ex 2710 only, desulphurization with hydrogen resulting in a reduction of at least 85 per cent of the sulphur content of the products processed (ASTM D 1266-59 T method);
 - (k) in respect of products falling within heading No 2710 only, deparaffining by a process other than filtering;
 - (l) in respect of heavy oils falling within heading No ex 2710 only, treatment with hydrogen at a pressure of more than 20 bar and a temperature of more than 250°C with the use of a catalyst, other than to effect desulphurization, when the hydrogen constitutes an active element in a chemical reaction. The further treatment with hydrogen of lubricating oils of heading No ex 2710 (e.g. hydrofinishing or decolorization) in order, more especially, to improve colour or stability shall not, however, be deemed to be a specific process;
 - (m) in respect of fuel oils falling within heading No ex 2710 only, atmospheric distillation, on condition that less than 30 per cent of these products distils, by volume, including losses, at 300°C by the ASTM D 86 method;
 - (n) in respect of heavy oils other than gas oils and fuel oils falling within heading No ex 2710 only, treatment by means of a high-frequency electrical brush-discharge.
3. For the purposes of heading Nos ex 2707, 2713 to 2715, ex 2901, ex 2902 and ex 3403, simple operations such as cleaning, decanting, desalting, water separation, filtering, colouring, marking, obtaining a sulphur content as a result of mixing products with different sulphur contents, any combination of these operations or like operations do not confer origin.
