A. INTRODUCTION AND FINANCING OF THE GENERAL BUDGET

1. Annex PARTA-1 — INTRODUCTION

The general budget of the European Union is the instrument which sets out and authorises the total amount of revenue and expenditure deemed necessary for the European Union and the European Atomic Energy Community for each year.

The budget is established and implemented in compliance with the principles of unity, budgetary accuracy, annuality, equilibrium, unit of account, universality, specification, sound financial management and transparency.

- The *principle of unity* and the *principle of budgetary accuracy* mean that all Community revenue and expenditure and that of the European Union when it is charged to the budget must be incorporated in a single document.
- The *principle of annuality* means that the budget is adopted for one budgetary year at a time and that both commitment and payment appropriations for the current budgetary year must, in principle, be used in the course of the year.
- The *principle of equilibrium* means that forecasts of revenue for the budgetary year must be equal to payment appropriations for that year: borrowing to cover any budget deficit which may arise is not compatible with the own resources system and will not be authorised.
- In accordance with the *principle of unit of account*, the budget is drawn up and implemented in euros and the accounts shall be presented in euros.
- The *principle of universality* means that total revenue is to cover total payment appropriations with the exception of a limited number of revenue items which are assigned to particular items of expenditure. All revenue and expenditure is entered in full in the budget without any adjustment against each other.
- The *principle of specification* means that each appropriation must have a given purpose and be assigned to a specific objective in order to prevent any confusion between appropriations.
- The *principle of sound financial management* is defined by reference to the principles of economy, efficiency and effectiveness.
- The budget is established in compliance with the *principle of transparency*, ensuring sound information on implementation of the budget and the accounts.

The budget presents appropriations and resources by purpose (activity-based budgeting), with a view to enhancing transparency in the management of the budget with reference to the objectives of sound financial management and in particular efficiency and effectiveness.

The expenditure authorised by the present budget totals EUR 141 816 770 555 in commitment appropriations and EUR 126 527 133 769 in payment appropriations, representing a growth rate of 0,23 % and of 2,90 % respectively by comparison with the 2010 budget.

Budgetary revenue totals EUR 126 527 133 769. The uniform rate of call for the VAT resource is 0,30 % (except for Austria, Germany, Netherlands and Sweden for which the rate of call has been fixed at 0,225 %, 0,15 %, 0,10 % and 0,10 % respectively) whilst that for the GNI resource is 0,7535 %. Traditional own resources (customs duties and sugar levies) account for 13,26 % of the financing of the budget for 2011. The VAT resource accounts for 10,90 % and the GNI resource for 74,69 %. Other revenue for this financial year is estimated at EUR 1 460 773 123.

The own resources needed to finance the 2011 budget account for 1,00 % of the total GNI, thus falling below the ceiling of 1,23 % of GNI calculated using the method set out in Article 3(1) of Council Decision 2007/436/EC, Euratom of 7 June 2007 on the system of the European Communities' own resources (OJ L 163, 23.6.2007, p. 17).

The tables below set out step by step the method used to calculate the financing of the 2011 budget.

⁹ Rounded percentages.

¹⁰ The amount of enlargement-related expenditure corresponds to: (i) payments made to the 10 new Member States (which joined the EU on 1 May 2004) under 2003 appropriations, as adjusted by applying the EU GDP deflator for years 2004-2009, as well as payments made to Bulgaria and Romania under 2006 appropriations, as adjusted by applying the EU GDP deflator for years 2007-2009; and (ii) total allocated expenditure in those Member States, except for agricultural direct payments and market-related expenditure as well as that part of rural development expenditure originating from the EAGGF, Guarantee Section. This amount is deducted from total allocated expenditure to ensure that expenditure which is unabated before enlargement remains so after enlargement.

¹¹ The 'UK advantage' corresponds to the effects arising for the United Kingdom from the changeover to capped VAT and the introduction of the GNP/GNI-based own resource.

¹² These windfall gains correspond to the net gains of the United Kingdom resulting from the increase — from 10 to 25 % as of 1 January 2001 — in the percentage of traditional own resources retained by Member States to cover the collection costs of traditional own resources (TOR).

Remarks

The common organisation of the market in the sugar sector provided that sugar, isoglucose and inulin syrup producers had to pay basic and B production levies. These levies were intended to cover market support expenditure. At present amounts entered under this article are a consequence of the revision of past established levies. Levies for the marketing years 2007/2008 and following years are entered under Article 1 1 7 of this chapter as a 'production charge'.

Figures are net of collection costs.

Remarks

The GNI-based resource is an ‘additional’ resource, providing the revenue required to cover expenditure in excess of the amount yielded by traditional own resources, VAT-based payments and other revenue in any particular year. By implication, the GNI-based resource ensures that the EU budget is always balanced *ex ante*.

The GNI call rate is determined by the additional revenue needed to finance the budgeted expenditure not covered by the other resources (VAT-based payments, traditional own resources and other revenue). Thus a call rate is applied to the GNI of each of the Member States.

The rate to be applied to the Member States’ gross national income for this financial year is 0,7535 %.

Remarks

The budgetary imbalance correction mechanism in favour of the United Kingdom (UK correction) was introduced by the European Council in Fontainebleau in June 1984 and the resulting own resources decision of 1985. The purpose of the mechanism is to reduce the UK budgetary imbalance through a reduction in its payments to the EU.

Remarks

Article 15 of the Financial Regulation states that the balance from each financial year, whether surplus or deficit, is entered as revenue or expenditure in the budget of the subsequent financial year.

The relevant estimates of such revenue or expenditure are entered in the budget during the budgetary procedure and, where appropriate, in a letter of amendment submitted pursuant to Article 34 of the Financial Regulation. They are drawn up in accordance with the principles set out in Article 15 of Regulation (EC, Euratom) No 1150/2000.

After the closure of the accounts for each financial year, any discrepancy in relation to the estimates is entered in the budget for the following financial year through an amending budget, that must be presented by the Commission within 15 days following the submission of the provisional accounts.

A deficit is entered in Article 27 02 01 of the statement of expenditure of Section III 'Commission'.

Remarks

Under Article 7(1) of Council Regulation (EEC, Euratom) No 1553/89 Member States shall send the Commission a statement of the total amount of the VAT resources base for the previous calendar year before 31 July.

Each Member State is debited with an amount calculated on the basis of that statement according to European Union rules and credited with the 12 payments actually made during the previous financial year. The Commission works out the balance and informs the Member States in time for them to enter it in the Commission's account referred to in Article 9(1) of Regulation (EC, Euratom) No 1150/2000 on the first working day of December of the same year.

Any corrections to the abovementioned statements resulting from Commission controls in accordance with Article 9 of Regulation (EEC, Euratom) No 1553/89 or/and any changes to the GNI of previous financial years that have an effect on the capping of the 'VAT' base will lead to adjustments of the 'VAT' balances.

Legal basis

Council Regulation (EEC, Euratom) No 1553/89 of 29 May 1989 on the definitive uniform arrangements for the collection of own resources accruing from value added tax (OJ L 155, 7.6.1989, p. 9).

Remarks

Article 3 of the Protocol on the position of Denmark and Article 5 of the Protocol on the position of the United Kingdom and Ireland, annexed to the Treaty on European Union and the Treaty on the Functioning of the European Union, grant full exemption to these countries from supporting the financial consequences of some specific area of freedom, security and justice policies, with the exception of the related administrative costs. They can therefore obtain an adjustment to the own resources paid for each year in which they do not participate.

Each Member State's contribution to the adjustment mechanism is calculated by applying to the budget expenditure resulting from this operation or policy the scale of the aggregate gross national income and its components from the preceding year, supplied by the Member States in accordance with Article 2(2) of Council Regulation (EC, Euratom) No 1287/2003 on the harmonisation of gross national income at market prices (OJ L 181, 19.7.2003, p. 1).

The Commission works out each Member State's balance and informs them in time for them to enter it in the account referred to in Article 9(1) of Regulation (EC, Euratom) No 1150/2000 on the first working day of December, according to Article 10a of the same Regulation.

Remarks

Council Decision 2003/76/EC stipulates that the Commission shall be entrusted with winding up the financial operations of the European Coal and Steel Community which are still in progress when the ECSC Treaty expires.

Pursuant to Article 4 of this Decision, net revenue from the investment of available assets will constitute revenue in the general budget of the European Union earmarked for a specific purpose, namely financing research projects in sectors related to the coal and steel industry by a coal and steel research fund.

The net revenue available for financing research projects in year $n + 2$ appears in the balance sheet of the ECSC in liquidation for year n , and after the liquidation process has been completed will appear as assets in the balance sheet of the Coal and Steel Research Fund. This financing mechanism took effect in 2003. Revenue coming from 2009 will be used for research in 2011. In order to reduce as far as possible the fluctuations that movements in the financial markets could cause in the financing of research, a smoothing arrangement is applied. The amount of net revenue expected to be available for research in 2011 comes to EUR 60 929 750.

In accordance with Article 4 of Decision 2003/76/EC, 72,8 % of the fund's appropriations will be for the steel-related sector and 27,2 % for the coal-related sector.

In accordance with Articles 18 and 160(1a) of the Financial Regulation, revenue will be used to provide additional appropriations under Chapter 08 23 of the statement of expenditure in Section III 'Commission'.

Legal basis

Council Decision 2003/76/EC of 1 February 2003 establishing the measures necessary for the implementation of the Protocol, annexed to the Treaty establishing the European Community, on the financial consequences of the expiry of the ECSC Treaty and on the Research Fund for Coal and Steel (OJ L 29, 5.2.2003, p. 22).

Remarks

This article is intended to record capital repayments and interest payments on special loans and risk capital granted from the appropriations in Chapters 22 03 and 19 08 of the statement of expenditure in Section III 'Commission' to Mediterranean third countries.

It also comprises capital repayments and interest payments on special loans and risk capital granted to certain Mediterranean EU Member States which, however, represent a very small proportion of the overall amount. These loans/risk capital were granted at a time the countries had not yet joined the European Union.

The revenue obtained normally exceeds the amounts forecast in the budget because of the interest payments on special loans which may still be disbursed during the preceding financial year as well as during the current financial year. The interest on special loans and risk capital is charged from the moment the loans are disbursed; interest on special loans is paid in six-monthly instalments and interest on risk capital generally in annual instalments.
