COMMISSION STAFF WORKING DOCUMENT

**ACCOMPANYING THE REPORT FROM THE COMMISSION TO THE
EUROPEAN PARLIAMENT AND THE COUNCIL:**

**EUROPEAN UNION SAFA PROGRAMME
(Safety Assessment of Foreign Aircraft)**

Aggregated Information Report

(01 January 2009 to 31 December 2009)

COM(2011) 159 final

Appendix A – Data Collection by SAFA Programme Participating States

(January-December 2009)

No.	Member State	No. Inspections	No. Findings	Average no. of inspected items/inspection
EU Member States				
1	Austria	315	544	42.64
2	Belgium	144	211	29.95
3	Bulgaria	22	35	22.14
4	Cyprus	72	43	45.17
5	Czech Republic	29	12	33.62
6	Denmark	61	29	40.74
7	Estonia	23	6	27.00
8	Finland	123	33	41.81
9	France	2,729	3,343	33.84
10	Germany	1,370	803	39.81
11	Greece	792	82	18.39
12	Hungary	14	28	33.00
13	Ireland	68	26	48.63
14	Italy	969	1,158	33.01
15	Latvia	56	33	38.16
16	Lithuania	19	14	40.84
17	Luxembourg	46	14	35.15
18	Malta	6	2	36.17
19	Netherlands	216	491	39.56
20	Poland	179	15	40.53
21	Portugal	246	95	45.67
22	Romania	88	33	29.50
23	Slovak Republic	6	3	26.83
24	Slovenia	30	18	31.20
25	Spain	735	1,115	40.53
26	Sweden	92	91	45.52
27	United Kingdom	1,012	432	39.42
	Total	9,462	8,709	35.65

(January-December 2009)

No.	Member State	No. Inspections	No. Findings	Average no. of inspected items/inspection
Non-EU ECAC SAFA Participating States				
1	Albania	0	0	0
2	Armenia	25	14	43.96

3	Azerbaijan	0	0	0
4	Bosnia Herzegovina	13	22	34.54

Zimbabwe	FV	15	0.13%

(*) = number of inspections in relation to total number of inspections (%) conducted during the time period being considered in this report

The EU SAFA programme is implemented on a non-discriminatory basis on operators certified in the 42 SAFA participating States (plus Montenegro which being a member of ECAC is not yet a SAFA participating States) (all 43 EU/ECAC countries appear in bold) and on operators certified in other non-European States. The fact that inspections on ECAC operators account for almost two thirds of the total number of inspections is a direct consequence of the fact that a vast portion of European air traffic is performed by operators from those states.

APPENDIX C - Aircraft types inspected (by manufacturer)
(Listed in alphabetical order)

Large airliners (over 100 seats)

No.	Aircraft Manufacturer
1	AIRBUS
2	ANTONOV
3	BOEING
4	BRITISH AEROSPACE
5	EMBRAER
6	FOKKER
7	ILYUSHIN
8	LOCKHEED
9	MCDONNELL DOUGLAS (now part of the Boeing Company)
10	TUPOLEV
11	YAKOVLEV

Regional airliners (19-99 seats)

No.	Aircraft Manufacturer
1	ANTONOV
2	AVIONS DE TRANSPORT RÉGIONAL (ATR)
3	BOMBARDIER AEROSPACE
4	BRITISH AEROSPACE
5	CONVAIR
6	DORNIER
7	EMBRAER
8	FAIRCHILD
9	FOKKER
10	LET
11	LOCKHEED
12	SAAB
13	YAKOVLEV

Commuter, business and general aviation aeroplanes

No.	Aircraft Manufacturer
1	BEECH
2	BOMBARDIER AEROSPACE
3	BRITTEN-NORMAN
4	CESSNA
5	CIRRUS AIRCRAFT CORPORATION
6	DASSAULT
7	DIAMOND AIRCRAFT INDUSTRIES
8	DORNIER
9	FAIRCHILD
10	GULFSTREAM
11	ISRAEL AIRCRAFT INDUSTRIES
12	PIAGGIO
13	PILATUS AIRCRAFT
14	PIPER
15	RAYTHEON
16	ROCKWELL
17	SHORT BROTHERS
18	SOCATA

Helicopters

No.	Aircraft Manufacturer
1	AGUSTA
2	AEROSPATIALE
3	BELL HELICOPTER TEXTRON
4	EUROCOPTER
5	KAMOV OKB
6	MIL HELICOPTERS
7	ROBINSON HELICOPTER COMPANY
8	SIKORSKY

The distribution of SAFA inspections by aircraft manufacturers is in line with the volume of traffic performed with the respective types. In 2009, inspections covered also general aviation and helicopter operations, although the overall majority concentrated on commercial operations with aeroplanes.

Appendix F.1 - Inspection items concerning the flight deck

Ratio Number of Findings per Inspections: Flight Deck Items

F.1.1 – Flight Crew License

When checking the Flight Crew licences, SAFA inspectors verify whether:

- (i) the holders are appropriately qualified for the privileges exercised;
- (ii) the licence (the medical certificate) is valid or contains the necessary endorsements, or
- (iii) whether any eventual limitations (e.g. the use of corrective lenses) are complied with.

Most of the findings identified under this inspection item refer to pilots not holding the required English Language Proficiency endorsement. Bearing in mind the fact that ICAO has introduced a 3 years moratorium urging Contracting States to accept licences not endorsed with the required English Language Proficiency, the corresponding SAFA findings are categorised as category 1 (minor) or category 2 (significant) depending on whether the licensing state has issued, and files with ICAO, a corrective action plan. As from the date the moratorium expires (March 2011), a licence not having the required English Language Proficiency endorsement will result in a category 3 finding.

F.1.2 – Weight and Balance

Aircrafts have to be loaded such as their operation conforms to the manufacturer's limitations regarding weight and balance (position of centre of gravity). Findings identified under this inspection item have revealed insufficient data available to flight crew to allow them to check the correctness of weight and balance sheet, discrepancies between data presented in the sheet and the on-board manuals or even incorrect weight and balance sheets.

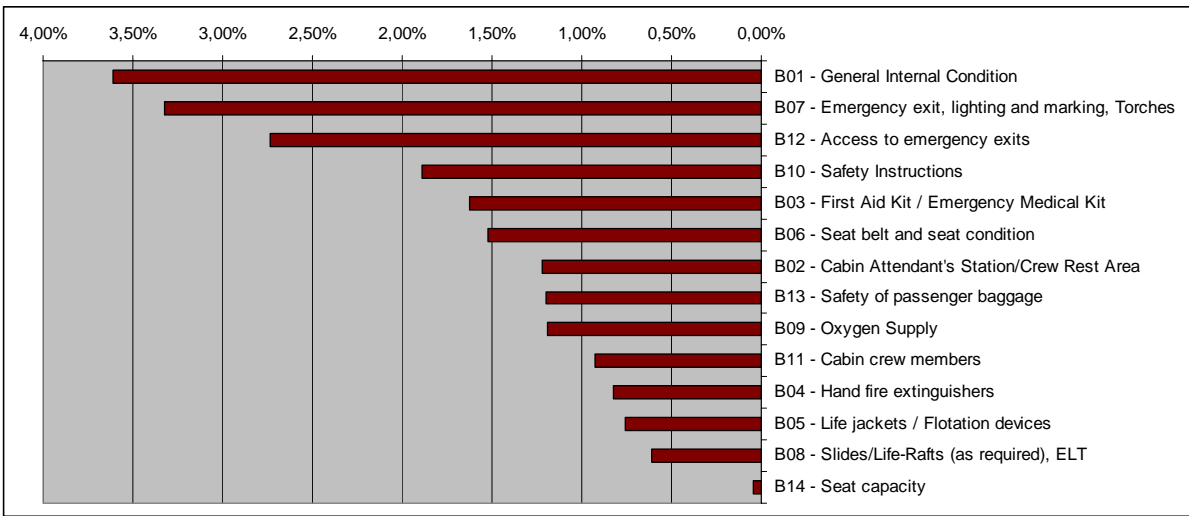

Should inspectors identify that the safe operation of an aircraft might be jeopardised as a result of a misleading weight and balance calculation, corrective measures are required prior

to the departure of the aircraft. These measures include e.g. re-calculation of the weight and balance sheet, offloading of cargo or fuel, redistribution of cargo.

F.1.3 – Flight Preparation

Flight preparation is an important part of the flight during which the crew analyses the flight relevant information such as weather forecast, NOTAMs (Notice to Airmen) for en-route as well as for landing and alternate aerodromes. During this time, the crew also prepares the Operational Flight Plan (OFP). The findings vary from minor findings (e.g. OFP not signed by the Pilot in Command) to more serious findings (e.g. no or incorrect fuel monitoring) or even findings having a major impact on safety (e.g. incomplete flight preparation, none or incomplete set of NOTAMs). In case of major category 3 findings, SAFA inspectors impose immediate corrective actions before the flight can commence.

Appendix F.2 – Inspection items concerning passenger cabin

Ratio Number of Findings per Inspections: Cabin & Safety Items

F.2.1 - General internal condition

Cabin crew members have to be able to perform their normal and abnormal duties without hindrance. Findings pursuant to SAFA inspections have mainly revealed the poor condition of the cabin, loose carpeting impeding the crew to perform their duties, improper stowed luggage, catering equipment not correctly secured.

F.2.2 - Emergency exits, lighting and marking, torches

Findings mainly concerned emergency exit lights which were not functioning properly, torches (flashlights) in poor condition or non available or torches non available in sufficient quantity. These findings have also revealed the non-installation or inadequately functioning of floor proximity (emergency) escape path marking systems. Floor proximity escape path marking systems indicate the location of the emergency exits. They are important especially in case of fire or smoke in the passenger cabin or in a situation where the normal cabin lights do not function. In case of major findings the aircraft were allowed to depart after the findings were eliminated or, depending on the circumstances, in accordance with an operational

restriction (for example in case of an unserviceable emergency exit some passengers would have to be offloaded).

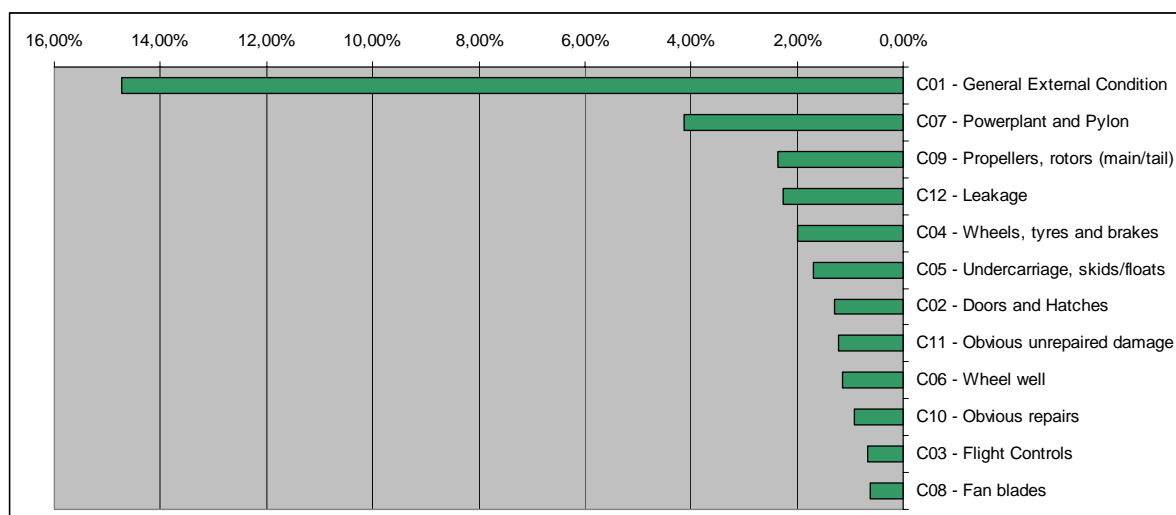

F.2.3 – Access to emergency exits

International standards require aircraft to provide means for the rapid evacuation of passengers in case on an emergency. Findings revealed under this item include emergency exits blocked by luggage or seats. Most of the times these deficiencies were corrected prior to the departure of the aircraft either by removing the blockage or by redistributing the passengers so they can use other emergency exits.

Appendix F.3 - Inspection items concerning general condition of aircraft

Ratio Number of Findings per Inspections: Aircraft Condition & Cargo Items

F.3.1 - General external condition

Checking the general external condition means examination for apparent presence of the following findings: corrosion, cleanliness, ice, snow, frost, legibility of markings, windshield delamination, damages, exterior lights etc. The majority of the findings concerned paint damage, illegible or missing safety markings, unserviceable exterior lights, missing or loose screws.

F.3.2 - Powerplant and pylon

The engine, the engine housing, the pylon (attachment of the engine to the wing or aircraft structure) and the access panels in the engine housing and pylon are carefully inspected. Findings reported relate to missing rivets/fasteners on engine cowlings and pylon panels, damage of acoustic panels in the engine intake area, missing or deteriorated safety markings.

F.3.3 – Propellers, rotors

Under this inspection item SAFA inspectors check the condition of the propellers or, in case of helicopters, the condition of the main and tails rotors. The majority of the findings refer to dents on the surface of the propellers/rotors which are then assessed (for severity) in accordance with the tolerances given by their respective manufacturers.

F.4 – Inspection items concerning cargo compartment

F.4.1 - Safety of cargo on board

In several cases it was established that cargo in the cargo holds was not properly secured. Heavy items were not restrained, which might lead to damage of the aircraft in case of rapid acceleration / deceleration or air turbulence. In other cases, barrier nets were either not installed or in poor condition. Cargo containers and pallets were in poor condition. Locks to secure the containers were not in the proper position or unserviceable. Depending on severity of the findings corrective actions imposed by inspectors included: relocation or reloading of cargo, off-loading of unserviceable cargo pallets.

F.4.2 - Dangerous goods

“Dangerous Goods” refer to certain types of material/s needing special care and treatment because of the fact that they are flammable, toxic, poisonous, etc. When properly packed, stored, labelled, protected etc., “Dangerous Goods” may be transported. Recorded findings included improper storage and labelling of the Dangerous Goods carried onboard, unavailability of the required documents and manuals (Emergency Response Guide), missing authorisation for the transportation of Dangerous Goods and no proper notification to the Captain (NOTOC) of Dangerous Goods carried onboard. In those cases when major (cat. 3) findings have been identified the aircraft was allowed to depart only after corrective actions were carried out (e.g. offloading of dangerous goods, repackaging and labelling).

F.4.3 - General condition of cargo compartment

Findings related to the general condition of the cargo compartment, such as damage to panels, deficiencies with the locking system, improper repairs of panels, and missing separation nets.
