Annex 2 ODA methodology

The Commission methodology applied for analysing ODA indications/ forecasts provided by EU Member States:

Figures on Official Development Assistance (ODA) are in current prices and have been taken from the OECD Development Assistance Committee (DAC) for the years 1995 to 2010, inclusive, for those Member States for which DAC reports¹. For those Member States that do not report ODA volumes to the DAC, figures for 2009 and 2010 have been taken from Member States' replies to the annual questionnaire.

The Commission requested all Member States to share their replies to the DAC Advance Questionnaire on ODA 2010, in order to ensure consistency between figures published here and those that Member States report to the OECD DAC in the Advance Questionnaire. From 2011 onwards, ODA figures have been taken, as far as available, from Member States' replies. For those Member States that gave ODA figures in national currencies the Commission's annual average exchange rates for the respective years have been applied to convert them into euro. Up to 2012, the exchange rates have been taken from the Commission's autumn 2010 forecast and, beyond that, nominal exchange rate stability has been assumed.

*Where a Member State has presented only the ODA/GNI ratio, ODA has been calculated by multiplying it with the Commission's estimate of GNI. **Where a Member State has reported both the ODA figure and the ODA/GNI ratio, preference has been given to using the ODA/GNI ratio.***

The ratios of ODA to GNI might be subject to change after the publication of this report. For the year 2010 only preliminary GNI figures were available from the Commission's official AMECO database² and from EU Member States' information on their ODA volumes and national GNI provided to the Commission (in the replies to the Monterrey questionnaire) and the OECD DAC (March 2011 in response to the DAC advance ODA questionnaire). We used DAC GNI data for 2010 for EU Member States reporting to DAC and AMECO data for all others.

For the remaining years the Commission established 2 different scenarios for reaching the 2015 targets for Member States (0.7% for EU-15 Member States and 0.33% for Member States that joined the EU after 2002).

- *when Member States provided budgets for years after 2011 these figures were inserted in the projections;*
- *in this scenario, the Commission calculated the ODA amount that is required in addition to the 2010 ODA volume by distributing this required increase evenly*

¹ For figures between 1995 and 2010, the Commission services used the OECD DAC exchange rates and GNI figures to ensure consistency with percentages already published by the OECD DAC. For figures between 2011 and 2015, Commission estimates for exchange rates and GNI were used. Marginal differences in the ODA/GNI ratios for some countries in the Commission calculations compared to the OECD DAC calculations could still, however, be due to minor differences in the applied exchange rates and GNI estimates. DAC data for the years 2004-2009 are as of March 31, 2011. The OECD DAC also published figures for EU Member States that are not DAC members. Where available, such data were used.

² http://ec.europa.eu/economy_finance/ameco/user/serie/SelectSerie.cfm

between 2011 and 2015. ODA as a % of GNI was calculated using the official Commission GNI/GDP growth estimates, as described below.

- Figures for Gross National Income (GNI) in current prices for 2010 were taken from the OECD DAC where available; otherwise from the Commission's autumn 2010 forecast. The GNI figures in the February 2011 interim forecast were used for the years 2011 and 2012. For EU Member States reporting to DAC, the Commission applied the implicit nominal GNI growth rates to the 2010 GNI figures provided by DAC to ensure consistency with ratios for the previous years.

GNI figures for the years 2013 to 2015 were calculated by applying the Commission's country-specific projections of nominal GDP growth rates to the 2012 GNI forecasts.
Calculation of ODA to Africa, Sub-Saharan Africa and LDCs including Imputed Multilateral Aid

When reporting on aid to groups of countries, it is necessary to count both the aid that is provided **bilaterally** by the donor directly to each country or region **and the share of each donor's contributions to multilateral agencies** that is provided as aid to those countries or regions. The latter is known as 'imputed multilateral aid' and is included in this report in the calculations of ODA provided to Africa, Sub-Saharan Africa (SSA) and Least Developed Countries (LDCs) and other income groups. The Commission has used the OECD DAC methodology³ to make these calculations, as follows:

- 1) The percentage of each multilateral agency's total annual gross aid disbursements that each recipient country/region receives is calculated.
- 2) The recipient percentages derived in step 1) are multiplied by a donor's contribution in the same year to the core resources of the agency concerned to arrive at the imputed flow from that donor to each recipient. (Example: In a given year, WFP provides 10% of its disbursements from core resources to Sudan. Donor A contributes USD50 million to WFP core resources in the same year. Donor A's imputed multilateral ODA to Sudan through WFP is $0.1 * 50 \text{ million} = \text{USD5 million}$). This calculation is repeated for each multilateral agency.
- 3) The results from step 2) for all agencies are summed to obtain the total imputed multilateral aid from each donor to each recipient country.

These calculations are available only for countries reporting to the DAC (the EU20). This excludes Bulgaria, Cyprus, Estonia, Latvia, Lithuania, Malta, and Romania for which there are insufficient data to impute their multilateral aid by country/region. For 2010, the data on are estimated for the 15 EU countries that are members of the DAC, since the detailed geographic spend by multilateral agencies in 2010 is not yet available. For example for Africa, the imputed share for Africa in Austria's 2009 multilateral ODA is multiplied by Austria's multilateral ODA in 2010.

CZ	Ethiopia	Capacity Building	Capacity development in the field of engineering geology and hydrogeology	2010 - 2012	Aquatest a.s.	0,10	grant	The project aims to train the employees of Geological Survey of Ethiopia (GSE) in the field of engineering geology and hydrogeology in order to introduce new methods of compilation, editing, presentation and practical interpretation of maps of groundwater sources.
CZ	Ethiopia	Capacity Building	Soil protection, minimization of negative effects of agriculture and water supply management in the Southern Nations, Nationalities and Peoples' Regional State	2010 - 2012	Mendel University in Brno	0,30	grant	The project will be carried out in Alaba Special Wereda and Awassa Zuriya Wereda districts. The water management part of this project is focused on revitalization of existing wells and enlargement of water supply system. The second part of the project will deliver specific measures among others to prevent soil degradation, for cultivation and planting of seedlings and application of erosion control measures.
CZ	Mongolia	Adaptation	Plant Production Support in Arid Regions of Mongolia	2010	Czech University of Life Sciences in Prague	0,36	grant	The aim of the project is to carry out analysis of needs in crop production sector and afforestation of desert areas and to recommend steps to maintain, enhance and optimize crop production. Moreover, appropriate protection measures against sand and dust storms will be proposed together with efficient irrigation measures, measures to prevent soil salinisation, and to use alternative energy resources.
CZ	Mongolia	Adaptation	Water supply - extension of water resources in the province of Orkhon	2010 - 2012	Geomina cooperative	0,16	grant	Under this project 16 wells are going to be built in order to secure sustainable supply of water in the Zalugeen Gol and Ulaan Tolgoi regions. Complementary objective is to create water balance of these regions and to develop a water management plan for further development of grazing lands, fields and residential centers.
CZ	Georgia	Mitigation	Electrification of remote areas in Georgia	2010	Sunny Watt	0,30	grant	The project aims to ensure sustainable development of Tusheti region through electrification of public buildings and building an appropriate grid, using renewable energy resources (photovoltaic panels).
CZ	Moldova	Capacity Building	Flood warning and monitoring system on the Prut River	2010 - 2012	Aquatest a.s	0,44	grant	The primary objective is to improve public awareness of incoming floods on the river Prut. The new monitoring system will enable early warning of population by periodical monitoring of water flow. The secondary objective is to demonstrate suitable technological approach to river basin monitoring network, which could be used for others river basins as well.

NL	Burkina Faso, Ethiopia, Kenya, Senegal, Tanzania, Uganda	mitigation	African Biogas Partnership Programme (ABPP)	2009-2014	HIVOS	25.60	grant	The Africa Biogas Partnership Programme (ABPP) comprises a partnership between HIVOS and SNV in supporting national programmes on domestic biogas in six African countries. The Programme aims at constructing 70,000 biogas plants in Ethiopia, Kenya, Tanzania, Uganda, Senegal and Burkina Faso providing about half a million people access to a sustainable source of energy by the year 2013. The overall objective of the ABPP is to contribute to the achievement of the Millennium Development Goals through the dissemination of domestic biogas plants as a local, sustainable energy source through the development of a commercially viable, market-oriented biogas sector. The financial contribution of the Netherlands amounts to €30 million, covering approximately one third of the total programme costs. These funds are channelled through Hivos, which carries out the role of fund and programme manager, operating from an office in Nairobi. SNV will provide capacity building services in the six countries and take responsibility for knowledge management at supra-national level. Use will be made of knowledge generated by SNV through the setting-up of large-scale domestic biogas programmes in Asia. It aims to support developing countries in the development of knowledge and capacity on biomass production for energy purposes, including assessment of the possible economical benefits and adverse impacts on the environment. The funding includes the € 17 million Dutch Sustainable Biomass Fund, which is designed for partnerships with private sector and non-governmental organisations in the field of sustainable production of biomass. The Global Sustainable Biomass Fund supports developing countries in making their biomass production for energy uses sustainable. It thus enables them to access the local or international market of sustainable biomass for energy uses. The overall goal of the subsidy is to enhance sustainable economical growth, the improvement of people's living conditions and the achievement of the Millennium Development Goals.
