|---|----|
| Appendix 1 – Definitions of AfT Categories | 3 |
| Appendix 2 – EU Member States AfT Donor Profiles | 5 |
| Appendix 3 – Aid for Trade by Region, Country and Category | 34 |
| Appendix 4 – Trade Related Assistance by Region, Country and Category | 53 |
| Appendix 5 – Category 6 in EU AfT 2010 | 69 |
| Appendix 6 – List of Least Developing Countries (LDC) and ACP Countries | 74 |

APPENDIXES

Appendix 1 – Definitions of AfT Categories

Aid for Trade (AfT) figures are obtained summing the following five categories: Trade Policy and Regulation (category 1), Trade Related Infrastructure (category 3), Building Productive Capacity (category 4, including trade development), Trade Related Adjustment (category 5) and Other Trade Related needs (category 6).

Trade Related Assistance can be viewed as a subset of Aid for Trade comprising three categories: Trade Policy and Regulation (category 1), Trade Development (category 2), and Other Trade Related Needs (category 6).

These categories are computed as follows:

- Trade Policy and Regulation (TPR or category 1) refers to trade policy and planning, trade facilitation, regional trade agreements, multilateral trade negotiations, multi-sector wholesale/retail trade and trade promotion. This category includes training of trade officials, analysis of proposals and positions and their impact, support for national stakeholders to articulate commercial interests and identify trade-offs, dispute issues, and institutional and technical support to facilitate implementation of trade agreements and to adapt to and comply with rules and standards.

Technically, this category is the sum of the following sectors codes: 33110, 33120, 33130, 33140 & 33181(in the OECD CRS online database).

- Trade Development (TD or category 2) includes support aimed at stimulating trade by domestic firms and encouraging investment in trade-oriented industries, such as trade-related business development and activities to improve business climate, privatisation, assistance to banking and financial services, agriculture, forestry, fishing, industry, mineral resources and mining, and tourism. This category is the trade-related subset of category 4 (which includes all building productive capacity of a trade-related and non-trade-related nature).

This category is obtained by extracting all lines marked as “trade development” from category 4.

- Trade Related Infrastructure (TRI or category 3) includes physical infrastructure including transport and storage, communications, and energy generation and supply.

Technically, this category is the sum of the following sectors codes: 210**, 220**, 230** (in the OECD CRS online database).

- Building Productive Capacity (BPC or category 4) includes business development and activities aimed at improving the business climate, privatisation, assistance to banking and financial services, agriculture, forestry, fishing, industry, mineral resources and mining, tourism. It includes trade- and non-trade-related capacity building.

Technically, this category is the sum of the following sectors codes: 25010, 240**, 311**, 312**, 313**, 321**, 322**, 332** (in the OECD CRS online database).

- Trade Related Adjustment (TRA or category 5). This code was created by OECD/DAC at the end of 2007. It covers contributions to the government budget to assist with the implementation of recipients' own trade reforms and adjustments to trade policy measures taken by other countries, as well as assistance to manage balance of payments shortfalls due to changes in the world trading environment.

Technically, this category is the sum of the sectors codes 33150 (in the OECD CRS online database).

- Other Trade Related Needs (OTRN or category 6) refers to programmes supporting trade in sectors not comprised in the other five categories (including the wider Aid for Trade agenda), such as vocational training or public sector policy programmes. It is also used to report on larger cross-sectorial programmes with important subcomponents in the other AfT categories. This is useful, as the CRS methodology requires the use of one single CRS code per reported programme, an approximation which limits in some cases the ability of the CRS to capture TRA.

The change in methodology from the Doha Trade-Capacity-Building Database to CRS in 2007 and the new definitions create some limitations in the comparisons of figures over time. The amounts captured in the former database as "Trade Policy and Regulation" (category 1) and "Trade development" (category 2) are nowadays split into three categories, namely categories 1, 2 and 6. Due to the definitions of codes in the CRS, it is not possible to continue counting some activities as TPR or TD, since they have different CRS purpose codes and so they are captured in category 6. Moreover, figures prior to 2007 do not include category 6, which did not exist at the time. Therefore, comparisons of TRA before and after 2007 need to be taken with caution.

The evaluation of TRA for the period 2001-2010 is therefore inferred from the direct combination of the four different databases: OECD CRS, Doha Development Database, Monterrey Questionnaires and EU (for category 6).

APPENDIX 2 – EU MEMBER STATES AfT DONOR PROFILES

Aid for Trade flows reported in the following donor profiles come from the following data sources:

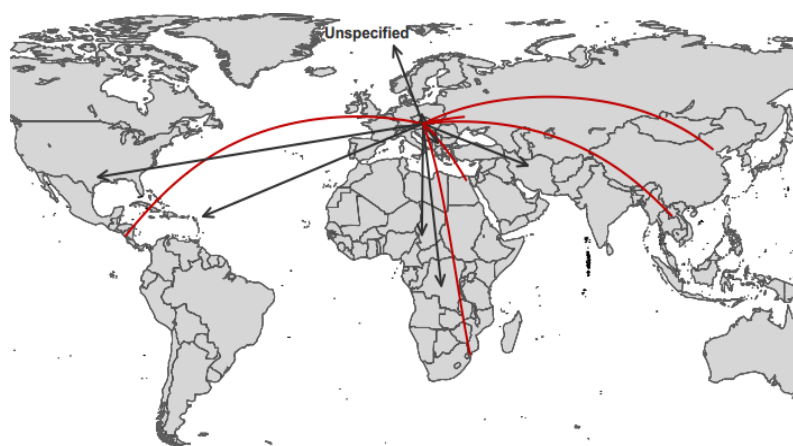

- The OECD Creditor Reporting System (CRS), in which most of EU Member States (15 out of 27) provide quantitative data on their Official Development Assistance (ODA).
- Information included in the "Monterrey questionnaire" for data of EU Member States that did not report to the OECD CRS and for the category 6 for EU.
