## **ANNEX 1:**

### **PERFORMANCE INDICATORS**

The following indicators facilitate the evaluation of compliance with the proportions referred to in Articles 16 and 17 of the Council Directive 2010/13/EU of 10 March 2010 on the coordination of certain provisions laid down by law, regulation or administrative action in Member States concerning the provision of audiovisual media services<sup>1</sup> ('Audiovisual Media Services'), (hereinafter referred to as 'the Directive').

Indicators 2 – 5 are based on criteria set out in Articles 16 and 17. All performance indicators allow compliance to be assessed at both Member State and Community level.

#### General indicator

##### **Indicator 1: Number of channels *covered* by Articles 16 and 17.**

Indicator 1 was calculated for each Member State and for all Member States taken together.

These figures were obtained by determining the total number of channels identified by Member States less the number of non-operational channels (NO) and the number of channels that were exempted from their reporting obligation due to their very low audience share or exempted from the obligation to comply with Articles 16 and 17 due to the nature of their programmes (news, sports events, games, advertising, teletext services or teleshopping) or excluded due to legal exceptions:

- Article 18 of the Directive: television broadcasts that are intended for local audiences and do not form part of a national network;
- Article 2(6) of the Directive: broadcasts intended exclusively for reception in third countries and which are not received directly or indirectly by the public in one or more Member States;
- Recital 72 of the Directive: channels broadcasting entirely in a language other than those of the Member States should not be covered by the provisions of Articles 16 and 17.

Channels for which Member States did not communicate data for Articles 16 or 17 (NC) were included.

#### Indicators concerning Article 16 (European works)

##### **Indicator 2: *Average transmission time reserved for European works.***

Indicator 2 is presented as an average proportion for each individual channel, for each Member State and for all Member States taken together.

It is obtained by determining the average transmission time reserved for European works as referred to in Article 16 (1)<sup>2</sup> by each channel covered by Article 16 for which data were

---

<sup>1</sup> Directive 2010/13/EU of 10 March 2010 – OJ L 95 of 15.4.2010

<sup>2</sup>Total transmission time excludes the time reserved for news, sports events, games, advertising, teletext services and teleshopping.

communicated ('reported channels') and by comparing that figure with the total qualifying transmission time.

The Member State averages are based on the average proportions of all channels covered by Article 16 for which data were communicated ('reported channels') by the Member State concerned.

The EU averages are based on the Member State averages.

**Indicator 3: *Compliance rate of channels achieving or exceeding the majority proportion of European works.***

Indicator 3 is presented for each Member State and for all Member States taken together. It is obtained by determining the number of channels achieving the majority proportion (more than 50%) under Article 16 and comparing that figure with the number of channels covered by Article 16 (Indicator 1). The channels for which no data were communicated (NC) are thus considered non-compliant for the purpose of this indicator.

The EU averages are based on the Member State averages.

Indicators concerning Article 17 (European works made by independent producers)<sup>22</sup>

**Indicator 4: *Average transmission time, or alternatively, average proportion of the programming budget allocated to European works by independent producers (independent productions).***

Indicator 4 is presented as an average proportion for each individual channel, for each Member State and for all Member States taken together. It is obtained by determining the average transmission time, or average programming budget, reserved for European works by independent producers on each channel covered by Article 17 for which data were communicated ('reported channels') and by comparing that figure with the total qualifying transmission time.

The Member State averages are based on the average proportions of all channels covered by Article 17 for which data were communicated ('reported channels') by the Member State concerned.

The EU averages are based on the Member State averages.

**Indicator 5: *Compliance rate of channels in achieving the minimum proportion of independent productions.***

Indicator 5 is presented for each Member State and for all Member States taken together. It is obtained by determining the number of channels achieving the minimum proportion of at least 10% under Article 17 and comparing that figure with the number of channels covered by Article 17 (Indicator 1). The channels for which no data were communicated (NC) are thus considered non-compliant for the purpose of this indicator.

The EU averages are based on the Member State averages.

**Indicator 6: *average transmission time allocated to recent European works by independent producers (recent works).***

Indicator 6 is presented as an average proportion for each individual channel, for each Member State and for all Member States taken together. It is obtained by determining the average transmission time reserved for recent European works by independent producers on each channel covered by Article 17 for which data were communicated ('reported channels') and by comparing that figure with the transmission time reserved for all independent productions.

The Member State averages are based on the average proportions of all channels covered by Article 17 and for which data were communicated ('reported channels') by the Member State concerned.

The EU averages are based on the Member State averages.

In order to better evaluate actual developments in the broadcasting of recent works, the EU average figures for recent works were also compared with total qualifying transmission time.

**ANNEX 2:**  
**CHARTS AND TABLES ON THE APPLICATION OF ARTICLES 16 AND 17**

Chart 1

Development of Main Indicators from 2007 to 2010 (EU-27)

**Table 1****Indicator 1: channels covered by Articles 16 and 17 (EU level)**

Country		Identified Channels	IND1: Covered channels				
			2007	2008	2009	2010	Evolution
