Betreff: Parlamentarische Anfrage Nr. 10121/J (Abg. Weigerstorfer u.a.) betreffend  
„ADHS – aktuelle Statistiken zur Verschreibung von Psychopharmaka“

Bezug: Ihre E-Mails vom 1. sowie 2. September 2016,

Sehr geehrte Damen und Herren,

der Hauptverband der österreichischen Sozialversicherungsträger nimmt wie folgt  
Stellung:

Die Daten umfassen die auf Kosten der sozialen Krankenversicherung im  
extramuralen (außerhalb der Krankenhäuser) Bereich abgegebenen Verordnun-  
gen. Spitalsbehandlungen sind daher nicht enthalten.

Arzneispezialitäten mit einem Kassenverkaufspreis unter der jeweiligen Rezept-  
gebühr sind nur für gebührenbefreite Personen vorhanden bzw. erfasst. Weiters  
geht auch der Bereich der Kostenerstattung nicht in die vorliegenden Daten ein.

Zur Beantwortung der Fragen wird auf die jeweils eingefügte Beilage verwiesen.  
Aufgrund technischer Gegebenheiten war es zweckmäßig, die Alterskohorten  
durchwegs in 5-Jahresschritten anzuführen. Datensätze, die keiner Alterskohorte  
eindeutig zuordenbar sind, wurden in der Kohorte „nicht zugeordnet“ angeführt.

**5. Bitte gliedern Sie für die Jahre 2014 und 2015 die Summe der Verordnungen an Kinder und Jugendliche für den Wirkstoff Methylphenidat nach „Facharzt“, „Allgemeinmediziner“ und „Sonstige“.**

Zu beachten ist, dass oftmals die Erstverschreibung durch einen Facharzt, die Folgeverschreibung jedoch durch Allgemeinmediziner erfolgt. Die Gruppe „Sonstige“ umfasst insbesondere Zahnärzte, Allgemeinmediziner mit Hausapotheken, Psychotherapeuten, Rettungsdienste und Krankenanstalten.
