The Committee took note of reservations and statements on this item and agreed to revert to the issue at the continuation of its session on 17 October. The following statements were made at this time.

Statements by the Commission

"Commission Declaration in respect of the protection of Geographical Indications:

1. The Commission will, throughout ongoing or future negotiations on geographical indications, maintain close contact with each interested Member State through the available consultative structures and will welcome ad hoc requests for further consultations.
2. The Commission is committed to achieving the best possible level of protection of Union registered geographical indications under ongoing or future negotiations of trade agreements in light of the market situation in each trading partner and the interests of the Member States.
3. The Commission takes note of Greece's concerns as to the results regarding the protection of certain geographical indications under the Comprehensive Economic and Trade Agreement (CETA) between Canada, of the one part, and the European Union and its Member States, of the other part, in particular in respect of the Protected Designation of Origin Feta. The Commission recognises that the results achieved regarding the terms covered under CETA Article 20.21, including FETA, provide a level of protection that does not create a precedent for ongoing or future negotiations.

4. The Commission confirms its intention, in view of the CETA agreement, to ensure strict implementation of the protection of geographical indications foreseen in this Agreement, inter alia, of its provisions on administrative enforcement, and regarding entities entitled to use exceptions under Article 20.21.
5. The Commission commits to make full use of the mechanisms of the CETA Committee on Geographical Indications established under Article 26.2 of the Agreement so as to ensure that Canadian consumers are adequately informed about the intrinsic quality and characteristics of the products covered under CETA Article 20.21.
6. The Commission commits within five years at the latest to use the appropriate mechanisms provided within the CETA Agreement, with the aim to achieve for all EU geographical indications listed in Annex 20-A of the Agreement, including Feta, the same level of protection.
7. In view of the possibilities offered under Regulation (EU) No 1144/2014 of the European Parliament and of the Council of 22 October 2014 on information provision and promotion measures concerning agricultural products implemented in the internal market and in third countries, the Commission will continue offering Member States as well as geographical indication producers and exporters, especially the most vulnerable among them, support to promote geographical indications."

Commission Declaration in respect of the protection of the precautionary principle in CETA:

"The Commission confirms that CETA preserves the ability of the European Union and its Member States to apply their fundamental principles governing regulatory activities. For the European Union, those principles include those established in the Treaty of the European Union and the Treaty on the Functioning of the European Union and include, in particular, the precautionary principle as mentioned in Article 191 and reflected in Articles 168(1), 169(1) and (2) of the Treaty on the Functioning of the European Union. Consequently the Commission confirms that nothing in CETA prevents the application of the precautionary principle in the European Union as set out in the Treaty on the Functioning of the European Union."

Commission Declaration in respect of the content of the legal bases:

"The Commission notes that the Council has added Articles 43(2), 153(2) and 192(1) TFEU to the substantive legal bases proposed by the Commission for the "Council decision on signature of the Comprehensive Economic and Trade Agreement between Canada of the one part, and the European Union and its Member States, of the other part". The Commission considers that this amendment is unwarranted because all the matters concerned fall entirely within the scope of Article 207 TFEU."

Statement by Greece

"Greece notes that the results achieved under the negotiations for a Comprehensive Economic and Trade Agreement (CETA) between the European Union and its Member States, of one part and Canada, of the other part, on the protection of "Feta", a Greek cheese entitled to special protection under the EU legislation on Protected Designation of Origin (PDO) products, provide only a minimum level of protection and, as such, do not constitute a precedent for future EU Trade Agreements with third countries.

Greece considers that PDO "Feta", as one of the major EU geographical indications, should be given the same level of protection as EU GIs of similar importance. Moreover, Greece considers that the protection of PDO "Feta" as well as of other Geographical Indications substantially contribute to the promotion of regional development, growth and employment within the European Union. The results achieved on the specific protection of PDO "Feta" under the CETA Agreement completely disregard the above target and thus do not ensure its full protection within the Canadian market.

In this framework, Greece takes fully note of the European Commission's commitment: a) to achieve the best possible level of protection of all EU registered geographical indications (GIs), including PDO "Feta", under ongoing or future negotiations of Trade Agreements with third countries, taking sufficiently into account the above target and b) to take all measures necessary to protect the PDO "Feta" not only within the EU, but also in third-countries' markets, notably as regards the use of unfair practices which lead to consumer misinformation.

In this respect, Greece welcomes the European Commission's statement regarding (1) the European Commission's commitment to maintain close contact with the interested Member States throughout ongoing or future negotiations on GIs, (2) its commitment to achieve the best possible level of protection for GIs under ongoing or future negotiations with third countries, (3) its intention to ensure, in cooperation with all competent Canadian authorities, the strict implementation of the protection foreseen under the CETA Agreement, namely the establishment of the proper internal Canadian administrative enforcement mechanisms and procedures in order to adjust the Canadian internal market to CETA provisions, as well as the registration of the Canadian entities entitled to use exceptions under Art 20.21. (4) its commitment to make full use of the mechanisms of the CETA Committee on Geographical Indications so as to ensure that Canadian consumers are adequately informed about the intrinsic quality and characteristics of the products covered under CETA Agreement Art 20.21., (5) its commitment, within five (5) years from the entry into force of the CETA Agreement, to use the appropriate mechanisms, with a view to achieving for all EU GIs therein, including PDO "Feta", the same level of protection, (6) support Greece in its efforts to promote GIs by exploiting the possibilities offered under Regulation (EU) No 1144/2014. Greece intends to follow up on the above points and considers them as part of the good faith in the implementation of the CETA Agreement.

In presenting this statement, Greece has taken fully into consideration the strategic political and economic dimension of the CETA Agreement."

Statement by Ireland

"Should the implementation of the Agreement by the European Union necessitate a recourse to measures pursuant to Title V of Part Three of the Treaty on the Functioning of the European Union, the provisions of the Protocol on the position of the United Kingdom and Ireland in respect of the area of freedom, security and justice, annexed to the Treaty on European Union and the Treaty on the functioning of the European Union, will be fully respected."

Statement by Portugal

"Bearing in mind the compliance with the principle of competence sharing between the European Union and its Member States, as has been defined by the Treaties, the Decisions of the Council authorizing the conclusion, signature and provisional application of Comprehensive Economic and Trade Agreement between Canada, of the one part, and the European Union and its Member States, of the other part, shall not affect the autonomy of Portugal's decisions regarding issues within its national competence, whose decision to be bound by the Agreement, pursuant to the Constitutional principles and rules, depends on the conclusion of the internal ratification procedures and the entry into force of the agreement in the international legal system."

Statement by United Kingdom

"The United Kingdom welcomes the signature of the Comprehensive Economic and Trade Agreement between Canada of the one part, and the European Union and its Member States, of the other part.

However, the United Kingdom considers that the Agreement contains provisions related to the temporary presence of natural persons for business and readmissions which are pursuant to Title V of Part III of the Treaty on the Functioning of the Union. The United Kingdom recalls that, in accordance with Article 2 of Protocol (No. 21) to the Treaties on the position of the United Kingdom and Ireland in Respect of the Area of Freedom, Security and Justice, no provision of any international agreement concluded by the Union pursuant to that Title shall be binding upon or applicable in the United Kingdom unless, in accordance with Article 3 of the Protocol, it notifies its intention that it wishes to take part in the adoption and application of a proposed measure.

As a result, in accordance with Article 3 of Protocol (No. 21), the United Kingdom notified the President of the Council that, to the extent that the Decisions relate to the temporary presence of natural persons for business, it intends to take part in the Council Decisions."

The Committee took note of delegations' positions ahead of the Council meeting. The following additional statement was made at this time.

"Commission Statement in respect of water:

The Commission reaffirms that nothing in CETA will interfere with the right of any Member State to decide autonomously how to use and protect its water sources. Article 1.9 in CETA reaffirms that nothing in the Agreement obliges the European Union to permit the commercial use of water for any purpose. CETA would only apply in this sector if the European Union or its Member State autonomously decided to allow the commercial use of water.

Even if a Member State of the European Union does decide to allow a commercial use of water, CETA fully safeguards the possibility for a Member State to reverse its decisions in this regard, as well as the right to regulate the commercial use of water for public policy purposes."

Statement by Spain

"The proposal for access to deep-sea species is of great interest to the Kingdom of Spain, which has followed it particularly closely in recent years and is strongly committed to it, to the point that it will accept compromises for the sake of reaching a balanced agreement that will satisfy all parties, such as limiting fishing activity with bottom trawls below 800 metres in European Union waters and an own system of sanctions or of data collection, as well as an authorisation regime that will lead to a disproportionate administrative workload.

Spain has been flexible, even accepting, as indicated, redundant management systems, but a situation has been arrived at as regards observer coverage which Spain cannot agree with, since the impact which this compromise would involve will cause problems in terms of security, economic costs and the operability of the fleet, since it envisages 20% observer coverage for targeted fishing, which is not covered by the mandate the Council gave to the Presidency, which was for 15%.

The Kingdom of Spain's commitment to protection of vulnerable marine ecosystems is beyond question. Spain has been working for years on mapping sea beds in order inter alia to achieve better and greater protection of ecosystems and the environment. The human and material investment made has been enormous, but has always been seen as an investment in sustainability. However, this compromise has disproportionate costs, does not comply with the principle of proportionality and its added value is not clear.

For all these reasons, the Kingdom of Spain is voting against this proposal."

Statement by Germany

"Germany welcomes the agreement reached on the proposal for an amendment to Regulation (EC) No 1370/2007 on public passenger transport services by rail and by road. Regarding the social provisions contained in the aforementioned Regulation (see recitals 16 and 17 of Regulation (EC) No 1370/2007 and Article 4(5) and (6) in the current version and in the version amended by the proposal including the new recital), Germany believes that in the future, after the Regulation has been amended, Member States will – as has been the case so far under existing law – be at liberty to adopt more extensive rules under national law to flesh out the European standards. This also explicitly comprises the right to make more binding rules in national law than in the Regulation governing the transfer of staff in the event of a change of operator. Germany believes that its legal opinion is vindicated by remarks made by the European Commission and the Presidency (for instance, at the 2581st meeting of Coreper, Part 1, on 13 April 2016)."

23. Draft Directive of the European Parliament and of the Council amending Directive 2012/34/EU of the European Parliament and of the Council as regards the opening of the market for domestic passenger transport services by rail and the governance of the railway infrastructure **(First reading) (Legislative deliberation)**

Statement by Germany

"The Federal Republic of Germany endorses the compromises on the political pillar of the Fourth Railway Package, which continue to make it possible for integrated systems to exist, while at the same time providing for strong and effective regulation and transparency of financial flows.

The Federal Republic of Germany deems it important to note that Article 7d lays down the conditions for controlling financial transfers for - for example - dividend payments and loans and that recital 17 does not introduce any additional rules.

The Federal Republic of Germany continues to interpret Article 7d and recital 18 in the sense that it is possible for infrastructure managers to pay income and dividends directly or via another legal entity within the undertaking to the owner. The term 'owner of the company', to which revenue may be transferred, under Article 7d, is to be understood as including not only the State as the direct owner of the infrastructure company, but also the State as the ultimate owner."
