- **Autoproducers** are producers, both privately or publicly owned, that generate electricity and/or heat wholly or partly for their own use as an activity which supports their primary activity.

Note: the Commission may further clarify terminology by adding relevant NACE references in accordance with the regulatory procedure with scrutiny referred to in Article 11(2) after a revision of the NACE classification has entered into force.

2.1.4. IMPORTS/EXPORTS

Unless specified differently, “imports” refer to ultimate origin (the country in which the energy product was produced) for use in the country and “exports” refer to the ultimate country of consumption of the produced energy product. Amounts are considered as imported or exported when they have crossed the political boundaries of the country, whether customs clearance has taken place or not.
