NOTE

From:	Presidency
To:	Working Party on Information Exchange and Data Protection (DAPIX)
No. prev. doc.:	11540/16
Subject:	Implementation of the "Prüm Decisions" regarding fingerprints - Search capacities

Pursuant to Article 13 of the "Prüm implementing Decision" (Council Decision 2008/616/JHA of 23 June 2008), Member States shall submit declarations to the General Secretariat of the Council in which they lay down their maximum search capacities per day for dactyloscopic data of identified persons and dactyloscopic data of persons not yet identified.

Delegations comply with this obligation by completing the tables below.

Changes compared to the previous version (11540/16) originate in the initiative of the **RO** and **SK** delegation to recalibrate the daily search capacities, **particularly regarding searches against unsolved latent (UL) and unsolved palmprint latent (ULP) databases**. Delegations were invited to agree on the revised figures set out in 11211/1/17 REV 1¹. In addition to the discussion in the DAPIX meeting of 25 July 2017, Member States were invited to submit further reactions in writing which they did by 21 August 2017. The figures set out in bold in the table annexed reflect all changes compared to 11540/16. Member States are invited to confirm these figures and to agree on the tables. Once agreed upon, the tables will be inserted into the Prüm implementation overview (5081/17) as the binding quantitative basis for daily search capacities.

¹ The initial version of 11211/17 had been issued due to a clerical error and has to be considered as null and void.
