Category

Capital region: These regions consist of one or more NUTS 2 regions and approximates the functional urban area of the national capital. In most cases, it consists of only one NUTS 2 region. The exceptions are: Berlin, Brussels, London, Prague and Vienna. Combining these regions ensures that the distortion in economic indicators caused by commuting is substantially reduced. These regions in most cases differ than the capital metropolitan region.

Types of NUTS 3 regions

Metropolitan regions

This classification was developed in cooperation with the OECD and consists of NUTS 3 approximation of all functional urban areas of more than 250 000 as defined by the EU-

OECD. Two types of metropolitan regions are identified: capital and other. The capital metropolitan regions contains the national capital.

Predominantly urban, intermediate, predominantly rural regions

This classification is based on the OECD classification, but revised by the Commission. A detailed methodology is included in the Eurostat Regional Yearbook 2010.

Border regions

Border regions are NUTS 3 regions which are eligible for cross-border co-operation programmes under the European Regional Development Fund regulation.

Types of municipalities

Degree of urbanisation

- **Cities:** Local administrative units with more than 50 % of their population in an urban centre;
- **Towns and suburbs:** Local administrative units with more than 50 % of their population in urban clusters but less than 50 % live in an urban centre;
- **Rural area:** Local administrative units with more than 50 % of their population in rural grid cells
