- (1) Regulation (EC) No 713/2009 of the European Parliament and of the Council¹ has been substantially amended. Since further amendments are to be made, that Regulation should be recast in the interest of clarity.

↓ 713/2009 recital 1 (adapted)

~~The Communication of the Commission of 10 January 2007 entitled ‘An Energy Policy for Europe’ highlighted the importance of completing the internal markets in electricity and natural gas. Improving the regulatory framework at Community level was identified as a key measure to achieve that objective.~~

¹ Regulation (EC) No 713/2009 of the European Parliament and of the Council of 13 July 2009 establishing an Agency for the Cooperation of Energy Regulators (OJ L 211, 14.8.2009, p. 1)

↓ 713/2009 recital 2 (adapted)

~~An independent advisory group on electricity and gas, called the European Regulators Group for Electricity and Gas (EREG) was established by Commission Decision 2003/796/EC² to facilitate consultation, coordination and cooperation between the regulatory bodies in Member States, and between those bodies and the Commission, with a view to consolidating the internal markets in electricity and natural gas. That group is composed of representatives of the national regulatory authorities established pursuant to Directive 2003/54/EC of the European Parliament and of the Council of 26 June 2003 concerning common rules for the internal market in electricity³ and Directive 2003/55/EC of the European Parliament and of the Council of 26 June 2003 concerning common rules for the internal market in natural gas⁴.~~

↓ 713/2009 recital 3 (adapted)

~~The work undertaken by the EREG since its establishment has made a positive contribution to the internal markets in electricity and natural gas. However, it is widely recognised by the sector, and has been proposed by the EREG itself, that voluntary cooperation between national regulatory authorities should now take place within a Community structure with clear competences and with the power to adopt individual regulatory decisions in a number of specific cases.~~

↓ 713/2009 recital 4 (adapted)

~~The European Council of 8 and 9 March 2007 invited the Commission to propose measures to set up an independent mechanism for national regulators to cooperate.~~

- (2) The creation of the Agency has manifestly improved coordination between regulators on cross-border issues. Since its creation, the Agency has received new important tasks concerning the monitoring of wholesale markets under Regulation (EU) No 1227/2011 of the European Parliament and of the Council⁵ and in the field of cross-border energy infrastructure under Regulation (EU) No 347/2013 of the European Parliament and Council⁶.
- (3) It is projected that the need for coordination of national regulatory actions will increase further in the coming years. Europe's energy system is in the middle of its most profound change in decades. More market integration and the change towards more variable electricity production requires increased efforts to coordinate national energy policies with neighbours and to use the opportunities of cross-border electricity trade.

⁵ Regulation (EU) No 1227/2011 of the European Parliament and of the Council of 25 October 2011 on wholesale energy market integrity and transparency (OJ L 326, 8.12.2011, p. 1).

⁶ Regulation (EU) No 347/2013 of the European Parliament and Council of 17 April 2013 on guidelines for trans-European energy infrastructure and repealing Decision No 1364/2006/EC and amending Regulations (EC) No 713/2009, (EC) No 714/2009 and (EC) No 715/2009 (OJ L 115, 25.4.2013, p. 39).

- (4) Experience with the implementation of internal market rules has shown that uncoordinated national action can lead to severe problems for the market, notably in closely interconnected areas where decisions of Member States often have a tangible impact on their neighbours. To achieve the positive effects of the internal electricity market for consumer welfare, security of supply and decarbonisation Member States, and in particular independent national regulators, are required to cooperate on those regulatory measures which have a cross-border effect.
- (5) Fragmented national state interventions in energy markets constitute an increasing risk to the proper functioning of cross-border electricity markets. The Agency should therefore be given a role in the development of a coordinated **European resource adequacy assessment**, in close cooperation with the European Network of Transmission System Operators for Electricity ("ENTSO for Electricity"), in order to avoid the problems of fragmented national assessments which follow different uncoordinated methods and do not sufficiently take into account the situation in neighbouring countries. The Agency should also supervise the technical parameters developed by the ENTSO for Electricity for an efficient participation of cross-border capacities and other technical features of capacity mechanisms.
- (6) Security of electricity supply requires a coordinated approach to prepare against unexpected supply crises. The Agency should therefore coordinate national actions related to risk preparedness, in line with [Risk Preparedness Regulation as proposed by COM(2016) 862].
- (7) Due to the close interconnection of the Union electricity grid and the increasing need to cooperate with neighbouring countries to maintain grid stability and integrate large volumes of renewable energies, ~~[regional operational centres]~~ **Regional Security Coordinators [+]** will play an important role for the coordination of transmission system operators. The Agency should guarantee regulatory oversight over the ~~[]~~ **Regional Security Coordinators [+]** where necessary.

- (8) As large parts of new electricity generation will be connected at local level, distribution system operators will play an important role when it comes to operating the European electricity system in a flexible and efficient manner.

↓ 713/2009 recital 5 (adapted)

- (9) ~~The~~ Member States should cooperate closely, eliminating obstacles to cross-border exchanges of electricity and natural gas with a view to achieving the objectives of ~~Community~~ the Union energy policy. ~~On the basis of the impact assessment of the resource requirements for a central entity, it was concluded that an independent central entity offered a number of long-term advantages over other options. An~~ European Union Agency for the Cooperation of Energy Regulators (the Agency) ~~should be~~ was established by Regulation (EC) No 713/2009 in order to fill the regulatory gap at ~~Community~~ Union level and to contribute towards the effective functioning of the internal markets in electricity and natural gas. The Agency ~~should also enable~~ enables national regulatory authorities to enhance their cooperation at ~~Community~~ Union level and participate, on a mutual basis, in the exercise of ~~Community~~ Union-related functions.

↓ 713/2009 recital 6 (adapted)

- (10) The Agency should ensure that regulatory functions performed by the national regulatory authorities in accordance with [the recast Electricity Directive as proposed by COM(2016) 864/2] ~~Directive 2009/72/EC of the European Parliament and of the Council of 13 July 2009 concerning common rules for the internal market in electricity⁷~~ and Directive 2009/73/EC of the European Parliament and of the Council ~~of 13 July 2009 concerning common rules for the internal market in natural gas⁸~~ are properly coordinated and, where necessary, completed at ~~the~~ Community Union level. To that end, it is necessary to guarantee the independence of the Agency from electricity and gas producers, transmission and distribution system operators, whether public or private, and consumers and to ensure the conformity of its actions with ~~Community~~ Union law, its technical and regulatory capacities and its transparency, amenability to democratic control and efficiency.

- (11) The Agency should monitor regional cooperation between transmission system operators in the electricity and gas sectors as well as the execution of the tasks of the ~~European Network of Transmission System Operators for Electricity~~ (ENTSO for Electricity), and the European Network of Transmission System Operators for Gas ("ENTSO for Gas"). ⇒ The Agency should also monitor the implementation of the tasks of other entities with regulated functions of Union-wide dimension, such as energy exchanges. ⇐ The involvement of the Agency is essential in order to ensure that the cooperation between transmission system operators ⇒ and the operation of other entities with Union-wide functions ⇐ proceeds in an efficient and transparent way for the benefit of the internal markets in electricity and natural gas.

↓ 713/2009 recital 8

- (12) The Agency should monitor, in cooperation with the Commission, the Member States and relevant national authorities, the internal markets in electricity and natural gas and inform the European Parliament, the Commission and national authorities of its findings where appropriate. Those monitoring tasks of the Agency should not duplicate or hamper monitoring by the Commission or national authorities, in particular national competition authorities.

- (13) ~~It is appropriate to~~ ☒ The Agency ☒ provides an integrated framework ~~within~~ which ☒ enables ☒ national regulatory authorities ~~are able~~ to participate and cooperate. That framework ~~should~~ facilitates the uniform application of the legislation on the internal markets in electricity and natural gas throughout the ~~Community~~ ☒ Union ☒. As regards situations concerning more than one Member State, the Agency ~~should be~~ ☒ has been ☒ granted the power to adopt individual decisions. That power should under ⇒ clearly specified ⇐ ~~certain~~ conditions cover technical ⇒ and regulatory ⇐ issues ⇒ which require regional coordination ⇐, ~~the~~ ⇒ notably concerning the implementation of network codes and guidelines, cooperation within [] **Regional Security Coordinators** [+], ⇐ the regulatory ~~regime for~~ ⇒ decisions necessary to effectively monitor wholesale market integrity and transparency, decisions concerning ⇐ electricity and natural gas infrastructure that connects or that might connect at least two Member States and, as a last resort, exemptions from the internal market rules for new electricity interconnectors and new gas infrastructure located in more than one Member State.

↓ 713/2009 recital 9 (adapted)

- (14) The Agency has an important role in developing framework guidelines which are non-binding by nature ("framework guidelines"), ~~with which n~~ Network codes ~~must~~ ☒ should ☒ be in line ☒ with those framework guidelines ☒. It is also considered appropriate for the Agency, and consistent with its purpose, to have a role in reviewing ⇒ draft ⇐ network codes ~~(both when created and upon modification)~~ to ensure that they are in line with the framework guidelines ⇒ and provide for the necessary degree of harmonisation ⇐, before it ~~may recommend~~ ☒ submits ☒ them to the Commission for adoption.

↓ new

- (15) With the adoption of a set of network codes and guidelines which provide for a stepwise implementation and a further refinement of common regional and Union-wide rules, the role of the Agency in monitoring the implementation of the network codes and guidelines has increased. Effective monitoring of network codes and guidelines is a key function of the Agency and crucial for the implementation of internal market rules.
- (16) From experience with the implementation of network codes and guidelines it has emerged that it is useful to streamline the procedure for the regulatory approval of regional or Union-wide terms and conditions or methodologies to be developed under the guidelines and network codes by submitting them directly to the Agency in order for national regulators, represented in the Board of Regulators, to be able to decide upon them.

(17) Since the stepwise harmonisation of the Union energy markets involves finding regional solutions regularly as an interim step, it is appropriate to reflect the regional dimension of the internal market and to provide for appropriate governance mechanisms. Regulators responsible for coordinated regional approvals should be able to prepare Board of Regulators decisions on issues of regional relevance in a regional subcommittee of the Board of Regulators, unless those issues are of general importance for the Union.

↓ 713/2009 recital 11 (adapted)

(18) Since the Agency has an overview of the national regulatory authorities, it should have an advisory role towards the Commission, other ~~Community~~ Union institutions and national regulatory authorities as regards the issues relating to the purpose for which it was established. It should also be required to inform the Commission where it finds that the cooperation between transmission system operators does not produce the results which are needed or that a national regulatory authority whose decision is not in compliance with the Guidelines does not implement the opinion, recommendation or decision of the Agency appropriately.

↓ 713/2009 recital 12

- (19) The Agency should also be able to make recommendations to assist regulatory authorities and market players in sharing good practices.

↓ 713/2009 recital 13

- (20) The Agency should consult interested parties, where appropriate, and provide them with a reasonable opportunity to comment on proposed measures, such as network codes and rules.

↓ 713/2009 recital 14 (adapted)

- (21) The Agency should contribute to the implementation of the guidelines on trans-European energy networks as laid down in Regulation (EU) No 347/2013 of the European Parliament and of the Council⁹ ~~Decision No 1364/2006/EC of the European Parliament and of the Council of 6 September 2006 laying down guidelines for trans-European energy networks~~¹⁰, in particular when providing its opinion on the non-binding Union ~~Community~~-wide ten-year network development plans (Union ~~Community~~-wide network development plans) in accordance with Article ~~4~~ 6(3) of this Regulation.

⁹ Regulation (EU) No 347/2013 of the European Parliament and of the Council of 17 April 2013 on guidelines for trans-European energy infrastructure and repealing Decision No 1364/2006/EC and amending Regulations (EC) No 713/2009, (EC) No 714/2009 and (EC) No 715/2009 (OJ L 115, 25.4.2013, p. 39).

¹⁰ ~~OJ L 262, 22.9.2006, p. 1.~~

(22) The Agency should contribute to the efforts of enhancing energy security.

↓ 713/2009 recital 16

(23) ⇒ In order to ensure that the Agency's framework is efficient and coherent with other decentralised agencies, the rules governing the Agency should be aligned to the Common Approach agreed between the European Parliament, the Council of the EU and the European Commission on decentralised agencies¹¹. However, insofar as necessary, ⇐ ~~the~~ structure of the Agency should be adapted to meet the specific needs of energy regulation. In particular, the specific role of the national regulatory authorities needs to be taken fully into account and their independence guaranteed.

↓ new

(24) Additional changes to the present Regulation may be envisaged in the future in order to bring the Regulation fully in line with the Common Approach on decentralised agencies. Based on the current needs of energy regulation, deviations from the Common Approach are necessary. This proposal therefore does not prejudice any further amendments to the Founding Regulation of the Agency which the Commission may wish to propose following further evaluation, as provided for in this act or on its own initiative.

- (25) The Administrative Board should have the necessary powers to establish the budget, check its implementation, draw up internal rules, adopt financial regulations and appoint a Director. A rotation system should be used for the renewal of the members of the Administrative Board who are appointed by the Council so as to ensure a balanced participation of Member States over time. The Administrative Board should act independently and objectively in the public interest and should not seek or follow political instructions.

↓ 713/2009 recital 18 (adapted)

⇒ new

- (26) The Agency should have the necessary powers to perform its regulatory functions in an efficient, transparent, reasoned and, above all, independent manner. The independence of the Agency from electricity and gas producers and transmission and distribution system operators is not only a key principle of good governance but also a fundamental condition to ensure market confidence. Without prejudice to its members' acting on behalf of their respective national authorities, the Board of Regulators should therefore act independently from any market interest, should avoid conflicts of interests and should not seek or follow instructions or accept recommendations from a government of a Member State, from ⇒ Union institutions ⇐ ~~the Commission~~ or another public or private entity ⇒ or person ⇐ . The decisions of the Board of Regulators should, at the same time, comply with ~~Community~~ ⊗ Union ⊗ law concerning energy, such as the internal energy market, the environment and competition. The Board of Regulators should report its opinions, recommendations and decisions to the ~~Community~~ ⊗ Union ⊗ institutions.

↓ 713/2009 recital 19 (adapted)

- (27) Where the Agency has decision-making powers, interested parties should, for reasons of procedural economy, be granted a right of appeal to a Board of Appeal, which should be part of the Agency, but independent from its administrative and regulatory structure. ⇒ In order to guarantee its functioning and full independence, the Board of Appeal should have a separate budget line in the budget of the Agency. ⇐ In the interest of continuity, the appointment or renewal of the members of the Board of Appeal should allow for partial replacement of the members of the Board of Appeal. The decisions of the Board of Appeal ⊗ can ⊗ ~~may~~ be subject to appeal before the Court of Justice of the European ⊗ Union ⊗ ~~Communities~~.
-

- (28) The Agency should exercise its decision-making powers in line with the principles of fair, transparent and reasonable decision-making. All procedural rules of the Agency should be laid down in its rules of procedures.

- (29) The Agency should be mainly financed from the general budget of the ~~European~~ Union, by fees and by voluntary contributions. In particular, the resources currently pooled by regulatory authorities for their cooperation at ~~Community~~ Union level should continue to be available to the Agency. The ~~Community~~ Union budgetary procedure should remain applicable as far as any subsidies chargeable to the general budget of the ~~European~~ Union are concerned. - (31) The Agency should have highly professional staff. In particular, it should benefit from the competence and experience of staff seconded by the national regulatory authorities, the Commission and the Member States. The Staff Regulations of Officials of the European Communities ("the Staff Regulations") and the Conditions of employment of other servants of the European Communities ("the Conditions of Employment"), laid down in Regulation (EEC, Euratom, ECSC) No 259/68¹⁴ and the rules adopted jointly by the ~~European Community~~ ☒ Union ☒ institutions for the purpose of applying those regulations should apply to the staff of the Agency. (32) The regulatory work of the Director and the Board of Regulators pursuant to this Regulation, may be supported by working groups.

(34) Through the cooperation of national regulators within the Agency it is evident that majority decisions are a key pre-requisite to achieve progress on matters concerning the internal energy market which have significant economic effects in various Member States. ↓ 713/2009 recital 27

~~In particular, the Commission should be empowered to adopt the Guidelines necessary in situations in which the Agency becomes competent to decide upon the terms and conditions for access to and operational security of cross border infrastructure. Since those measures are of general scope and are designed to amend non-essential elements of this Regulation, by supplementing it with new non-essential elements, they must be adopted in accordance with the regulatory procedure with scrutiny provided for in Article 5a of Decision 1999/468/EC.~~

¹⁵ ~~OJ L 184, 17.7.1999, p. 23.~~

~~The Commission should submit to the European Parliament and to the Council by three years after the first director has taken up his duties, and every four years thereafter, a report on the Agency's specific tasks and the results achieved, accompanied by any appropriate proposals. (37) Since the objectives of this Regulation, namely the participation and cooperation of national regulatory authorities at ~~Community~~ ☒ Union ☒ level, cannot be sufficiently achieved by the Member States and can therefore be better achieved at ~~Community~~ ☒ Union ☒ level, the ~~Community~~ ☒ Union ☒ may adopt measures, in accordance with the principle of subsidiarity as set out in Article 5 of the Treaty ☒ on European Union ☒. In accordance with the principle of proportionality, as set out in that Article, this Regulation does not go beyond what is necessary in order to achieve those objectives.
