EU position regarding the EU contribution to the WCO budget

The EU should take note of the minutes of the 95th Sessions of the Finance Committee and support its approval.

Following the ruling of ILOAT of 28 April 2014 in favour of the complainant (the Organization's Staff) in relation to the full implementation of the CCR's recommendation for staff emoluments for 2012, the CCR recommendations have de facto become "legally" binding for the WCO – at least for the year 2012. The Secretariat will implement the full 2.2% 2012 recommendation from the CCR in accordance with the guidance of the Finance Committee.

The ILOAT ruling clearly stipulates that the CCR recommendations are more than purely a benchmark for the WCO, and that any discretion on the WCO to deviate from such recommendations would completely contradict the principles established by ILOAT's case law.

This raises two issues to be considered.

Firstly, what would be the role of the Finance Committee and subsequently the WCO Council in respect of future adjustments of staff emoluments? Following the ILOAT ruling the Finance Committee would in principle have very little influence on future staff emoluments adjustments, but would in principle have to take note of the CCR recommendations. From an EU perspective such future scenario would be unacceptable. Moreover, this would not be in line with the Terms of Reference for the Finance Committee, under which the Committee's role and responsibility is to provide support and advice to the Policy Commission and Council in budgetary and financial matters.

Secondly, consideration would have to be given to which other options would be available to ensure that the Finance Committee can fulfil the mandate set out in its Terms of Reference in respect of staff salary adjustments. The EU is of the opinion that the Finance Committee should return to the issue, during the proposed November meeting, of looking into what other options may be available rather than being linked to the CCR reference system.

Such other options could include, for example, drawing from analysis of salary systems applied by the United Nation, the EU, or other interrogational organisations comparable to the WCO, could provide for the Finance Committee being able to perform the functions assigned to it by the Council, including taking into account the global economic climate and the financial situation of the WCO when addressing potential salary adjustments.

The EU should support the Secretary General being acquitted of his financial responsibilities for financial year 2012/2013.

The EU should support the approval of the proposed final updated scale of contributions reflecting a 1.5 % increase in the overall contributions for the financial year 2014/2015.

The EU should support the approval of the proposed general operating expenses of 16,415,679.35 euro for 2014/2015 (equivalent to a 1.99% increase).

The EU should support the Staffing table for 2014/2015, showing the budgeted posts, including the number of Technical Attaches, as agreed;

The EU should support the approval of the high-level costing of the Strategic Plan, as agreed;

The EU should support the approval of the revised daily subsistence and kilometric allowances with effect from 1 January 2014;

The EU should support the approval of the proposed capital expenditure of € 690.000 € for 2014/2015.

The EU should support the adoption of the Technical Attachés Manual.

The EU should support the adoption of the proposed amendments to the Staff Manual, with effect from 1 July 2014.
