REPORT FROM THE COMMISSION

SEVENTH ANNUAL REPORT ON IMPLEMENTATION OF THE EUROPEAN FISHERIES FUND (2013)

1. SUMMARY OF THE AUDIT ON MANAGEMENT AND CONTROL SYSTEMS SET UP BY THE MEMBER STATES AND CARRIED OUT ON BEHALF OF THE COMMISSION, AND SUMMARY OF THE OUTCOME OF AUDITS ON EFF ASSISTANCE CARRIED OUT BY THE MEMBER STATES

1.1. European Commission audits in 2013 for the EFF

In 2013, DG MARE's audit strategy for the European Fisheries Fund (EFF) consisted of three enquiries: 1) review of the work carried out by the audit authorities in Member States¹; 2) audits on accounts of recoveries (kept by certifying authorities), and 3) audits to bridge the assurance gap covering compliance of the managing authorities or their intermediate bodies with certain key requirements².

As shown in Table 1, nine audits were carried out in 2013 reviewing the work of the audit authorities for seven operational programmes. These audits indicate that reliance can be placed on the opinions of these seven audit authorities. One audit authority was classified under category 1 (works well; minor improvements are needed) and six were classified under category 2 (works, but some improvements are needed). From the three audits on accounts of recoveries, national systems were considered to be in category 1 for one Member State and in category 2 for two Member States. The 'bridging the assurance gap' audits in two Member States led to the following results: one management and control system of the audited bodies was classified as category 2; and the other one as category 3 (works partially; substantial improvements are needed).

Recommendations were addressed to the national authorities concerned as necessary, requiring the implementation of corrective measures.

1.2. Member State audits in 2013 for the EFF

In 2013, the Commission received 93 system audit reports submitted by 23 Member States (pursuant to Article 61(1) (a) EFF Regulation). Table 2 includes a summary of the authorities covered by these audits and the assurance level provided by the assessment of the effectiveness of the key requirements and the overall audit opinion mentioned in the reports.

For 35 reports, the assurance level was category 1, meaning that the audited system works well and only minor improvements would be needed. For 52 reports, the level was category 2, meaning that the system works but some improvements are needed. For six reports, the level was category 3, i.e. the system works partially and substantial improvements are needed³.

All Member States also submitted an annual control report and opinion (pursuant to Art.61(1) (e) EFF). As shown in the last column of Table 2, for 17 cases the audit opinion was unqualified, whereas for the remaining nine cases a qualified opinion was given. The audit opinions are based on the results of both the system audits and the audits of operations (pursuant to Art.61(1) (b) EFF).

The results of DG MARE's analysis of these reports are taken into account for the overall assurance to be provided in the Annual Activity Report, signed by the Director-General.

-

For Denmark, Malta and the UK, shortcomings leading to the category 3 outcome have been resolved subsequently.

A modification of the OP was enforced with the Commission Decision C(2013) 9036 of 06/12/2013. In 2013 Bulgaria showed better progress in implementation of the OP, which translated into higher commitments at national level but the payment rates remained low. Particularly good progress was made under Axis 4 in the second half of 2013, which accelerated the entire implementation of this axis by both FLAGs and the management authority.

Nevertheless, successive administrative changes in the EFF management authority influenced the overall implementation of the programme.
