Main results of the Council

Fisheries

The Council reached agreement on the **2015 fishing opportunities for certain fish stocks in EU and non-EU waters and in the Black Sea**. The President of the Council noted “We have reached a balanced compromise that allows the sustainable use of fisheries resources, in line with the key pillars of the new Common Fisheries Policy”.

Agriculture

The Council adopted conclusions on the **error rate for agriculture expenditure**. A large number of member states also supported Presidency conclusions on **strengthening the EU policies for young farmers**. Minister Martina underscored that "The young farmers issue is a key priority of the Italian Presidency. Generational renewal in agriculture is essential not only for Italy but also for many other European countries, where the share of workers under 35 represents only an average of 8%. The conclusions adopted on the initiative of Italy include a plan to provide favourable credit conditions for young farmers who want to start or have recently started a business with the help of the European Investment Bank (EIB), the possibility to provide mortgages at zero interest and transfers of experience between young European farmers through an exchange programme. This will constitute a major investments to renovate the entire sector."

Ministers held an exchange of views on the **future of the dairy sector**. In view of the recent deterioration of the conditions in the dairy market, they focused on the main challenges faced by this sector, in particular the importance of volatility and the possible tools with which to alleviate its consequences, the role of the European Milk Market Observatory (EMMO) and the consequences of the end of the milk quotas next year.

As regards **organic farming**, the Council held a political debate and took note of the document prepared by the Presidency and the broad support for the annex setting out a political orientation.

The Presidency reported to the Council on the progress achieved during the second half of 2014 on a number of legislative proposals:

- School fruit, vegetable and milk scheme
- Official controls,
- Plant health
- Zootechnical legislation.

PARTICIPANTS

Belgium:

Mr René COLLIN

Minister for Agriculture, Nature, Rural Affairs, Tourism and Sports Infrastructure

Mr Willy BORSUS

Minister for the Middle Class, the Self-Employed, SMEs, Agriculture and Social Integration

Ms Joke SCHAUVLIEGE

Flemish Minister for the Environment, Nature and Agriculture

Bulgaria:

Ms Desislava TANEVA

Minister for Agriculture and Food

Czech Republic:

Mr Marian JUREČKA

Minister for Agriculture

Denmark:

Mr Dan JØRGENSEN

Minister for Food, Agriculture and Fisheries

Germany:

Mr Christian SCHMIDT

Federal Minister for Food and Agriculture

Estonia:

Mr Ivari PADAR

Minister for Agriculture

Ireland:

Mr Simon COVENEY

Minister for Agriculture, Food and the Marine

Greece:

Mr Georgios KARASMANIS

Minister for Rural Development and Food

Spain:

Ms Isabel GARCÍA TEJERINA

Minister for Agriculture, Food and the Environment

France:

Mr Alain VIDALIES

Secretary of State with responsibility for Transport, Oceans and Fisheries

Croatia:

Mr Tihomir JAKOVINA

Minister for Agriculture

Italy:

Mr Maurizio MARTINA

Mr Giuseppe CASTIGLIONE

Minister for Agricultural, Food and Forestry Policy

State Secretary for Agricultural, Food and Forestry Policy

Cyprus:

Mr Nicos KOUYIALIS

Minister for Agriculture, Natural Resources and Environment

Latvia:

Mr Jānis DŪKLAVS

Mr. Juris STALMEISTARS

Minister for Agriculture

Deputy Permanent Representative

Lithuania:

Ms Virginija BALTRAITIENĖ

Minister for Agriculture

Luxembourg:

Mr Fernand ETGEN

Minister for Agriculture, Viticulture and Consumer Protection, Minister for Relations with the Parliament

Hungary:

Mr Márton BITAY

Mr Olivér VÁRHELYI

State Secretary, Ministry of Agriculture

Deputy Permanent Representative

Malta:

Mr Roderick GALDES

Parliamentary Secretary for Agriculture, Fisheries and Animal Rights within the Ministry for Sustainable Development, the Environment and Climate Change

Netherlands:

Mr. Wepke KINGMA

Deputy Permanent Representative

Austria:

Mr Andr  RUPPRECHTER

Federal Minister for Agriculture, Forestry, the
Environment and Water Management

Poland:

Mr Marek SAWICKI

Minister for Agriculture and Rural Development

Portugal:

Ms Assun o CRISTAS
Mr Manuel PINTO DE ABREU

Minister for Agriculture and Maritime Affairs
State Secretary for Maritime Affairs

Romania:

Mr Daniel BOT NOIU

State Secretary, Ministry of Agriculture and Rural
Development

Slovenia:

Mr Dejan  IDAN

Deputy Prime Minister and Minister for Agriculture,
Forestry and Food

Slovakia:

Ms Magdal na LACKO-BARTO OV 

State Secretary at the Ministry of Agriculture and Rural
Development

Finland:

Mr Petteri ORPO

Minister for Agriculture and Forestry

Sweden:

Mr Sven-Erik BUCHT

ITEMS DEBATED

FISHERIES

Fishing opportunities 2015 for certain fish stocks in EU and non EU waters

The Council reached a political agreement on fishing opportunities for 2015 for EU vessels in Union and certain non-Union waters on the basis of a Presidency compromise, drawn up in agreement with the Commission. This agreement concerns both fish stocks which are not subject to international negotiations or agreements and stocks which are subject to international negotiations or agreements ([14950/14](#) + [14950/14 ADD1](#) + [14950/14 ADD2](#) + [14950/14 ADD3](#)).

This is the first time that these fishing opportunities being set under the rules of the Common Fisheries Policy (CFP) reformed last year. The new CFP establishes that decision-making such as fixing fishing opportunities must be guided, among other things, by scientific advice. Furthermore, the new CFP aims to restore and maintain a maximum sustainable yield (MSY) of the fish stocks and provides for a progressive elimination of discards in all EU fisheries through the introduction of an obligation to land all catches.

The Council will adopt the regulation on fishing opportunities, after finalisation by the legal/linguistic experts, through a written procedure.

As the existing provisions in the area of the proposal are applicable until 31 December 2014, with the exception of certain effort limitations which are applicable until 31 January 2015, the regulation will apply from 1 January 2015 onwards.

The following table sets out the indicative values of the principal TACs for 2015 compared with those for 2014 and the Commission proposal.

<i>Species Latin name</i>	Species English name	Espèces nom français	ICES fishing zone	COUNCIL TACs 2015 (UE)	COUNCIL TACs 2014 (UE)	COUNCIL % comparison 2015/2014	COMMISSION Proposal for 2015	comparison Council TAC 2014 / Commis. Prop. 2015	Notes

Notes:

- (1) Stocks in Norwegian waters: no fishing opportunities pending the consultations on those arrangements for 2014.
- (2) Stocks shared with Norway: provisional fishing opportunities subject to the bilateral fisheries agreements with Norway, pending the consultations on those arrangements for 2014.
- (3) TACs adopted by the Commission for the conservation of Antarctic marine living resources (CCAMLR) are not allocated to the members of CCAMLR and hence the Union's share is undetermined.
- (4) These TACs are not allocated to the members of South East Atlantic Fisheries Organisation (SEAFO) and hence the Union's share is undetermined.

Fishing opportunities for 2015 in the Black Sea

Ministers reached a political agreement on a regulation fixing for 2015 the fishing opportunities for certain fish stocks in the Black Sea ([15830/14 ADD 1](#)) on the basis of a Presidency compromise, drawn up in agreement with the Commission.

The Council will adopt this regulation, after finalisation by the legal/linguistic experts, through a written procedure.

The main element of the Presidency compromise endorsed by the Commission is a roll-over in the EU total allowable catches (TACs) in the Black Sea for turbot and sprat.

The following table sets out the indicative values of the TACs in the Black Sea for 2015 compared with those for 2014 and the Commission proposal.

<i>Species Latin name</i>	Species English name	Espèces nom français	ICES fishing zone	COUNCIL TACs 2015	COUNCIL TACs 2014	COUNCIL comparison 2015/2014	COMMISSION proposal for 2015	comparison Council TAC 2014 / Commission proposal 2015
<i>Psetta maxima</i>	Turbot	Turbot	Black Sea (TUR/F3742C)	86.4	86.4	0%	74	-15%
<i>Sprattus sprattus</i>	Sprat	Sprat	Black Sea (SPR/F3742C)	11 475	11 475	0%	11 475	0%

The Council, the Commission and the Member States concerned agreed that it was appropriate to reinforce the control and monitoring measures in order to address the misreporting of an illegal fishery for turbot in the Black Sea. Such measures have been developed jointly by the member states concerned and the Commission since 2012.

In addition, the Council and the Commission agreed that existing regional cooperation on fishing in the Black Sea should be further enhanced to promote sustainable stock management in this area in particular in the framework of the General Fisheries Commission for the Mediterranean (GFCM), and that they would each take actions in line with their competence including possible establishment of international management measures, such as long term management plans.

As the existing provisions are applicable until 31 December 2014, the regulation will apply from 1 January 2015.

AGRICULTURE

Conclusions

A large number of member states supported Presidency conclusions on **strengthening the EU policies for young farmers**, exploring possible solutions complementing the CAP tools in favour of young farmers to reduce the existing barriers to entering the sector ([see document](#)).

The Council also adopted conclusions on the **error rate for agriculture expenditure** ([see document](#)).

Future of the dairy sector

Ministers held an exchange of views on the future of the dairy sector ([16764/14](#)) and took stock of a Polish request for additional measures for the milk market ([16550/14](#)).

In view of the recent deterioration of the conditions in the dairy market and in light of the forthcoming end of the milk quotas, most member states considered that market volatility was one of the main concerns and challenges for the near future. While some delegations called for further measures to alleviate this volatility, others considered that the existing "safety net" offered enough protection to the milk sector and should be properly implemented first.

Most delegations welcomed the setting up of the European Milk Market Observatory (EMMO) but some pointed out that this tool could be improved with more updated and timely data or by taking into account not only milk prices but also other indicators.

On the actions which could help farmers to cope with the possible consequences of the end of milk quotas, views diverged between member states on the possibility of facilitating the payments of super-levies for exceeding quotas in the year 2014/2015, through non-interest-bearing instalments. Some member states regretted that a proper "soft landing" to facilitate the transition after the end of the quota system had not been put in place some months ago.

The Commission noted that milk production in the EU had considerably increased in recent months in some member states. It also stressed that while a decrease in milk prices had been observed in several member states, the sector was not considered to be in crisis.

Organic farming

The Council held a political debate and took note of the document prepared by the Presidency and the broad support for the annex setting out a political orientation on the proposal on organic farming ([16628/14](#)).

Following the discussions in the Council and its preparatory bodies, the Presidency endeavoured to address the concerns expressed by the member states and proposed:

- a significant reduction in the number and scope of delegated acts;
- maintaining the status quo as regards mixed farms (where there is both organic and non-organic production);
- introducing derogations for the use of non-organic seeds, non-organic animals and non-organic juveniles, in line with the existing rules;

The proposal aims to review the existing legislation on organic production and labelling of organic products and amend the regulation on official controls (not yet adopted - see below) with the objective of removing obstacles to the development of organic production in the EU, guaranteeing fair competition for farmers and operators and improving consumer confidence in organic products.

Progress reports on legislative proposals

The Council took note of the Presidency reports on the progress achieved during the second half of 2014 on a number of legislative proposals currently being examined by the Council and its preparatory bodies.

– *School fruit, vegetables and milk scheme*

This proposal amends the new regulation for a Single Common Market Organisation (CMO) adopted as part of the Common Agricultural Policy (CAP) reform ([5958/14](#)). This amendment aims to streamline the existing schemes with a view to increasing their efficiency and effectiveness and reducing the administrative burden. School milk and milk products and fruit and vegetables schemes were established in the EU in 1977 and 2007 respectively to promote the consumption of fruit and vegetables and milk products in schools. As a supplement to this proposal, the Commission has also tabled a proposal amending the regulation determining **measures on fixing certain aids and refunds** related to the CMO ([6054/14](#)).

In the light of the discussions in the Council, the Presidency has identified the following main issues ([16700/14](#)):

- the legal basis of the proposals;
- the objective and the scope of the regime;
- the criteria for the allocation of EU aid.

The European Parliament started its work on the proposal in July 2014. The European Parliament is currently working on the report, which is due to be voted on at committee level in February/March 2015.

– ***Official controls***

The aim of the proposal on official controls is to simplify and streamline the existing legal framework, in order to improve the efficiency of official controls performed by the member states along the agri-food chain while minimising the burden for operators and ensuring they are on a level-playing field ([9464/13](#)). The proposal also intends to establish a unique set of rules applicable to all sectors (in particular, plant health, plant reproductive material and animal by-products are now included in the proposal).

While many difficulties identified in the discussions in the Council have been overcome since the submission of the proposal in May 2013, the Presidency considered that further work is still needed on the following issues ([16398/14](#)):

- the financing of the official controls and other official activities (Articles 76 to 84);
- the role of the official veterinarian in the performance of official controls on live animals and products of animal origin in the EU and at EU borders (Articles 15, 47 and 53);
- specific rules for official controls and action taken by the competent authorities in the different sectors covered by the scope of the proposal (Articles 15 to 24).

The European Parliament adopted its position at first reading on 15 April 2014. This position was subsequently confirmed by the newly elected European Parliament in July 2014.

– ***Plant health***

The proposal on protective measures against pests of plants aims to address increased risks in this area, which stem from new pests and diseases. It will also modernise instruments related to intra-EU trade or trade with third countries, focusing on a risk-based approach. Better surveillance and early eradication of outbreaks of new pests are the tools which should be used to ensure plant health ([9574/13](#)).

Together with proposals on animal health, official controls (see above) and plant reproductive material (see below), the regulation on plant health aims to strengthen the enforcement of health and safety standards for the whole agri-food chain.

The proposals have been examined by the Council and its preparatory bodies and the main issues have been clarified by the Presidency during the discussions with member states ([16414/14](#)).

The European Parliament adopted its opinion at first reading on 15 April 2014. Political contact with the Parliament will be initiated once a mandate for negotiation has been adopted for the Council.

– ***Zootechnical legislation***

The proposals for a new zootechnical legislation aim for the bovine, porcine, ovine, caprine and equine species at providing in a single legal framework the principles and rules governing breed societies and their activities and the official controls applicable to them. ([6444/14](#) and [6445/14](#)). They promote the free trade in breeding animals and their genetic material considering the sustainability of breeding programs and preservation of genetic resources.

The proposals have been examined by the Council and its preparatory bodies and the Presidency has identified the main issues raised by the texts through contributions from member states ([16367/14](#)).

The European Parliament has just begun its examination of the proposal and is expected to adopt its position mid 2015.

ANY OTHER BUSINESS

– *Implementation of the landing obligation*

The Presidency briefed the ministers about the progress of discussions between Council and EP on the "omnibus" regulation, in preparation for the implementation of the landing obligation.

The Presidency indicated that the first scheduled trilogue took place on 10 December 2014. Parties made good progress on a number of issues but an agreement on the whole package could not be reached due to diverging views on the scope. The Parliament argues in favour of limiting the scope of the proposal to 2015 only (pelagic fish and Baltic Sea) while the Council continues to insist that the "omnibus" regulation should cover all phases of the landing obligation.

While supporting the Presidency's efforts and approach, many member states regretted the delay in the preparations of the "omnibus" regulation. They expressed concerns about the possible inconsistencies generated by this situation and urged the Presidency and the Commission to finalise an agreement with the Parliament as soon as possible.

A central objective of the reformed common fisheries policy (CFP) is the progressive elimination of discards in all EU fisheries through the introduction of an obligation to land all catches. In order to make the landing obligation operational, certain provisions in the current technical measures and control regulations should be removed or amended. All the changes identified were combined in a single text, the so called "omnibus" regulation proposed by the Commission.

– *Simplification of the agricultural policy*

The Commission presented to ministers the key elements of the simplification agenda it launched to reduce the burdens which increase costs for farmers and other operators.

Most of the member states supported the Commission initiative to simplify the agricultural legislation. Many pointed out the "greening" of the CAP as a priority for simplification. Some stressed that the simplification of the rules for geographical indications should not lead to a weakening of the framework.

The Commission identified areas where rules could be simplified:

- all current proposals should deliver in terms of simplification;
- Commission regulations implementing the CMO (Common market organisation) will be revised to reduce their number;
- direct payments (including a review of the rules on the ecological focus areas after the first year of application);
- rules for Geographical Indications should be closely examined to ensure that they are as effective and simple as possible.

– *35th and 36th conferences of directors of EU paying agencies*

The Greek delegation and the Presidency presented the conclusions of the 35th and the 36th conferences of EU paying agency directors which took place respectively in Komotini (Greece) from 9 to 11 April 2014 and in Rome from 10 to 12 November 2014 (16615/14; 16631/14).

The conferences of the paying agency directors take place every six months, in whichever member state is holding the EU Presidency at the time.

The key topics of the 35th conference in Greece were the implementation of the CAP reform for the period 2014-2020 and the effort to reduce error rates in agriculture expenditure in the light of the new legal framework.

The 36th conference in Italy discussed the implementation of "greening" requirements in the reformed CAP (in particular ecological focus areas or EFAs), the error rates in agriculture expenditure and the audit opinions on legality and regularity for agricultural funds.

– *Additional measures for the fruit and vegetables sector*

The Council took stock of the demands of the Polish delegation on additional measures for the fruit and vegetable sector, in particular apples (16317/14) and of a similar demand by the Spanish and the Cyprus delegations which requested the extension of the Commission delegated regulation 1031/2014 laying down further temporary exceptional support measures for producers of certain fruit and vegetables (16878/14).

Together with these delegations, some member states pointed out that the extension of the support for certain fruit and vegetables adopted by the Commission should be better adapted to the needs of the countries affected. They considered that the scope or the period retained for applying the measures should be adapted.

– *Market situation for pig meat*

The Belgian, Danish, Irish, French, Hungarian, Polish and Romanian delegations, supported by the Estonian and Austrian delegations, expressed their concerns about the market situation for pig meat in light of the Russian import restrictions (16674/14).

Some delegations shared the concerns of these member states and requested the introduction of a temporary support scheme for private storage which would ease the market before alternative markets can be found. The Commission noted that in addition to the overproduction in some member states, the Russian embargo was also responsible of this situation. While reminding delegations about the current budgetary constraints, he indicated its readiness to evaluate again the situation at the beginning of next year.

– *Rural development programme for the 2007-2013 and 2014-2020 periods*

The Council was briefed by the Polish delegation together with the Bulgarian, Czech, Greek, Croatian, Cyprus, Lithuanian, Hungarian, Maltese, Romanian, Slovenian and Slovak delegations about a request for extending the eligibility of expenditure for the rural development programmes 2007-2013.

Some other member states supported this initiative which should allow better use of the rural development funds. The Commission intends to accelerate the adoption of rural development programmes but could explore the possibility of extending the eligibility if needed.

The programming period for rural development programmes from 2007 to 2013 is set to end on 31 December this year. However the delegations mentioned above stressed that this deadline should be postponed by six months to enable the full and effective use of funds in member states, in particular those affected by the difficult economic situation and those participating in the Leader programme.

On the same issue, the Presidency also briefed the ministers about the approval of rural development programmes for the period 2014-2020 and on the treatment of the 2014 commitments of programmes co-financed by the European Agricultural Fund for Rural Development (EARDF). In addition, the Belgian delegation requested an extension of the transitional arrangements for rural development programmes to ensure effective continuity between the programming periods 2007-2013 and 2014-2020.

– *Damage to forests caused by sleety rain*

The Hungarian delegation briefed the ministers on the serious damage to forests caused by extreme recent weather conditions, in particular sleety rain which built up a thick layer of ice on both vegetation and soil.

The exact extent of the damages is still difficult to estimate, since most of the affected area is still inaccessible. However, Hungary intends to obtain more data on the damages from January 2015 onwards. On this basis, resources potentially made available out of the rural development programme 2014-2020 will be used for restoration activities. The Commission listed the financial measures which could be initiated to compensate for the damages to the Hungarian forest.

– *Plant reproductive material law*

The Presidency informed ministers on the state of play of the discussions on the regulation on the production and making available on the market of plant reproductive material. The main objective of the proposal is to guarantee the health, identity and quality of plant reproductive material (including seeds and plant propagating material) for users, in particular farmers.

Further to the rejection of the Commission proposal by the Parliament at first reading on 11 March 2014, the Council took a position on the issue in June 2014 and on 5 December 2014. The Presidency addressed a letter to the Commission asking it to present the amendments to the text on plant reproductive material requested by the Council as soon as possible. The letter emphasised that since the proposal is part of a package of new regulations concerning official controls, plant health and animal health, any further delay with the proposal could cause a misalignment of legislation, with serious consequences for all sectors involved.

The Commission will consider how to respond to this demand over the next few days.

– *Meeting on animal welfare*

The Council was briefed by the Danish, German and Netherlands delegations about the outcome of a trilateral ministerial meeting on animal welfare which took place on 14 December 2014 in Vught in the Netherlands ([16654/14](#)). In this context, a joint declaration was adopted by the three member states ([16923/14](#)).

Some member states supported the initiative. However some others noted that considering the high level of EU standards for animal welfare, equal treatment among EU and non EU producers should be ensured and priority to better enforcement of existing legislation should be given.

Denmark, Germany and the Netherlands considered that the EU should work further on the animal welfare policy and regulation and focus on:

- better regulation, to develop proposals for simpler and modern legislation in the area;
- better welfare, to improve the current level of animal welfare in several areas where legislation exists;
- promotion of knowledge and raising awareness on animal welfare issues.

– *Indication of the country of origin for food*

The Presidency invited the Commission to provide information to the Council about the reports on applicability and appropriateness of the mandatory indication of the country of origin or place of provenance for certain type of foods which the Commission was required to submit by 13 December 2014 ([16825/14](#)).

According to regulation 1169/2011 on the provision of food information to consumers (food labelling), a possible mandatory requirement for the indication of the origin on the labelling of certain food products should be considered in a report to be submitted by the Commission to the European Parliament and the Council on the feasibility and analysis of the costs and benefits of such measures, including the legal impact on the internal market and the impact on international trade.

The Commission confirmed that those reports will be submitted at the beginning of next year.

– *Losses for beekeepers caused by migratory birds*

The Cyprus delegation briefed the Council about the losses suffered by beekeepers as a result of migratory birds feeding on bees and called upon the Commission to examine a possible compensation for its beekeepers affected by those losses ([16776/14](#)).

The Commission underscored that tools are available, in particular in the rural development programme submitted by Cyprus to address this problem and informed of its availability to give guidance to Cyprus on how to use them.

OTHER ITEMS APPROVED

FOOD LAW

Caseins intended for human consumption

The Council agreed a general approach on a draft directive approximating the member states' laws relating to caseins and caseinates intended for human consumption ([15875/14](#)).

The draft directive is aimed at

- aligning the provisions conferring implementing powers on the Commission with the rules introduced by the Lisbon Treaty;
- aligning the compositional requirements of caseins and caseinates with the relevant Codex Alimentarius standard;
- updating the provisions applicable to caseins and caseinates taking into account EU legislation adopted in the meantime.

AGRICULTURE

Cyprus tax exemption on motor fuel in agriculture

The Council adopted a decision on the request by Cyprus for state aid to farmers in the form of a temporary tax exemption on motor fuel used for agricultural purposes ([16616/1/14](#)).

Farmers in Cyprus have been severely affected by the economic and financial crisis in the country, a recent drought and the Russian ban on agricultural products. In this context, Cyprus proposed to alleviate the burden on its farmers by extending the existing tax exemption on motor fuel used for agricultural purposes.

Under the community guidelines for state aid in the agriculture and forestry sector for 2007-2013, it was possible to grant reduced tax rates and exemptions to agricultural taxation, by applying a taxation level down to zero. Taking advantage of that possibility, since 2004, the Cypriot legislation has provided for state aid in the form of this tax exemption. However, the EU guidelines for state aid in the agriculture and forestry sectors for 2014-2020 no longer provide for such a possibility. The existing tax exemption in question was not repealed following the new EU guidelines on state aid. Cyprus would like it to be extended from 1 July to 31 December 2014 before complying with the general rules for state aid from 1 January 2015.

This extension is under the terms of the third subparagraph of article 108(2) of the TFEU, pursuant to which unanimity is required to decide that a specific state aid will be deemed compatible with the internal market.

Council conclusions on Court of Auditors reports

The Council adopted conclusions on special reports from the European Court of Auditors (ECA)

- No 4/2014 entitled "Integration of EU water policy objectives with the CAP: a partial success" ([15563/14](#));
- No 8/2014 entitled "Has the Commission effectively managed the integration of coupled support into the Single Payment Scheme?" ([15564/14](#));
- No 9/2014 entitled "Is the EU investment and promotion support to the wine sector well managed and are its results on the competitiveness of EU wines demonstrated?" ([15565/14](#)).

As regards report No 4/2014, the Council considers that agriculture has a major role to play in the sustainable management of water quantity and quality. A number of the ECA's recommendations were already taken up in the 2013 CAP reform. Furthermore, tools and mechanisms are provided in the rural development framework for protecting water resources. The Council emphasises the promotion of growth in the farming sector together with the contribution to the environment.

For report No 8/2014, the Council notes that the report identifies errors to be avoided in the future. However, the modalities of decoupling in the EU vary greatly between the member states, given the diversity of national and regional specificities. Moreover, in the framework of the CAP reform, new direct payment rules provide that Member States will implement the coupled support in certain sectors or regions in clearly defined cases, in line with the subsidiarity principle. Clear guidelines on the direct payment schemes should be provided by the Commission.

Concerning report No 9/2014, the Council highlights the fact that the support for both investments and promotion provided by the CAP has often contributed to enhancing the competitiveness of the EU's wine sector. However, the Council notes that although preference should be given to small and medium-sized enterprises (SMEs), neither large firms nor brands should be excluded from the schemes, since they help EU wine producers gain a foothold in third-country markets and their reputation in those markets often has a multiplier effect on SMEs.

FISHERIES

Deep sea fishing opportunities 2015-2016

The Council adopted a regulation fixing for 2015 and 2016 the fishing opportunities for EU vessels for certain deep-sea fish stocks ([15459/14](#)).

A political agreement was reached on this regulation at the Agriculture and Fisheries Council meeting in November this year ([15282/14](#)). This political agreement concerns certain stocks of deep water fish such as certain deep sea sharks, the black scabbardfish (*Aphanopus carbo*), roundnose grenadier (*Coryphaenoides rupestris*) and roughhead grenadier (*Macrorous berglax*), alfonsinos (*Beryx spp.*), red seabream (*Pagellus bogaraveo*) and greater forkbeard (*Phycis blennoides*).

The fishing opportunities for the deep-sea species have been fixed biennially at the EU level since 2003.

Illegal fishing - Belize removed from the list of non-cooperating countries

The Council adopted an implementing decision amending the list of non-cooperating third countries in fighting IUU fishing pursuant to regulation 1005/2008 establishing a Community system to prevent, deter and eliminate illegal, unreported and unregulated (IUU) fishing ([15295/14](#)).

This decision removes Belize from the list of non-cooperating third countries. It appears that Belize has implemented its international law obligations and has adopted an adequate legal framework for fighting IUU fishing.

In March 2014, the Council triggered a series of measures affecting the trade in fisheries products and other fisheries-related activities with Belize, Cambodia and Guinea in order to put a stop to commercial benefits stemming from illegal fishing activities. Fisheries products caught by vessels from these countries were banned from being imported into the EU.

Regulation [1005/2008](#) establishes a Community system to prevent, deter and eliminate IUU fishing. This key instrument in the fight against illegal fishing aims to allow access to the EU market only to fisheries products that have been certified as legal by the flag state or the exporting state concerned.

Partnership agreement between EU and Cape Verde - New protocol

The Council adopted a decision on the signing, on behalf of the EU, and provisional application of the protocol between the EU and the Republic of Cape Verde setting out the fishing opportunities and the financial contribution provided for by the fisheries partnership agreement (FPA) between the two parties ([15845/14](#)).

The FPA between the EU and Cape Verde entered into force in 2007. The main objective of the protocol to this FPA is to define the fishing opportunities offered to EU vessels. Following the negotiations, a new protocol was initialled on 28 August 2014, for a period of four years, with the previous protocol expiring on 31 August 2014. In order to allow EU vessels to carry on fishing activities, the new protocol should be applied from the date of its signature on a provisional basis, pending the completion of the procedures for its formal conclusion.

In addition to the signing and the provisional application of this protocol, the Council also adopted a regulation concerning the allocation of fishing opportunities between member states ([15846/14](#)).

Partnership agreement between EU and Madagascar - New protocol

The Council adopted a decision on the signing, on behalf of the EU, and provisional application of the protocol setting out the fishing opportunities and the financial contribution provided for in the fisheries partnership agreement (FPA) between the EU and the Republic of Madagascar ([15227/14](#)).

The FPA between the EU and Madagascar entered into force in 2007. The main objective of the protocol to this FPA is to define the fishing opportunities offered to EU vessels. Following the negotiations, a new protocol was initialled on 19 June 2014 with the previous protocol due to expire on 31 December 2014. In order to allow EU vessels to carry on fishing activities, the new protocol should be applied from the date of its signature on a provisional basis, pending the completion of the procedures for its formal conclusion.

In addition to the signing and the provisional application of this protocol, the Council also adopted a regulation concerning the allocation of fishing opportunities between member states ([15228/1/14](#) [REV 1](#)).

JUSTICE AND HOME AFFAIRS

Visa facilitation agreement - Tunisia

The Council adopted a decision authorising the Commission to open negotiations for the conclusion of an agreement between the European Union and the Republic of Tunisia on the facilitation of the issuance of short-stay visas.

Readmission agreement - Tunisia

The Council adopted a decision authorising the Commission to open negotiations for the conclusion of an agreement between the European Union and the Republic of Tunisia on readmission.

ECONOMIC AND FINANCIAL AFFAIRS

Capital requirements directive: liquidity coverage requirement and leverage ratio

The Council decided not to object to the adoption by the Commission of two regulations supplementing the so-called capital requirements directive ("CRD4") 2013/36/EU with regard to the methodology for the determination of liquidity coverage requirements and for the calculation of the leverage ratio.

The regulations are delegated acts pursuant to article 290 of the Treaty on the Functioning of the EU. They can now enter into force, unless the European Parliament objects.

There is currently no requirement in EU law to meet an own funds requirement based on the leverage ratio. But institutions will be required to disclose the leverage ratio as of 1 January 2015. The delegated act amends the method for calculating the leverage ratio.

CUSTOMS UNION

Tariffs and quotas on certain products

The Council adopted a regulation amending regulation 1388/2013 opening and providing for the management of autonomous tariff quotas of the EU for certain agricultural and industrial products ([16081/14](#)).

The regulation aims to ensure that adequate and uninterrupted supplies of products which are not produced in sufficient quantity in the EU can be imported at reduced or zero duty rates of the Common Customs Tariff duty for appropriate volumes, without disturbing the markets for such products.

The Council also adopted a regulation amending regulation 1387/2013 suspending the autonomous Common Customs Tariff duties on certain agricultural, fishery and industrial products ([16082/14](#)).

CULTURE

European Capitals of Culture 2020-2033¹

The Council appointed the following three experts to the selection and monitoring panel for the European Capital of Culture action for the period 2015-2018:

- Mr Pauli Sivonen,
- Mr Ulrich Fuchs,
- Ms Aiva Rozenberga

The experts were recommended by Finland Germany and Latvia, in accordance with the Council's implementing decision on the practical and procedural arrangements for the appointment by the Council of three experts to the selection panel². The panel has a total of ten experts; the remaining seven are appointed by the European Parliament, the Commission and the Committee of the Regions.

The general aim of the action is to promote greater mutual understanding between European citizens and to strengthen the feeling of European citizenship, simultaneously highlighting the richness of European cultures and both their diversity and their shared features.

¹ OJ L 132, 3.5.2014.

² OJ L 175, 14.6.2014

TRANSPORT

Air traffic controllers' licences

The Council decided not to oppose adoption by the Commission of a regulation laying down technical requirements and administrative procedures relating to air traffic controllers' licences and requirements ([14342/14](#) + [14342/14 ADD1](#)).

The Commission regulation is to be adopted pursuant to regulation 216/2008, which is the European Aviation Safety Agency regulation. It will amend implementing regulation 923/2012 and repeal regulation 805/2011.

The Commission regulation is subject to the regulatory procedure with scrutiny. This means that now that the Council has given its consent, the Commission may adopt the regulation, unless the European Parliament objects.

Trans-European rail system's interoperability – telematics

The Council decided not to oppose adoption by the Commission of a regulation which updates regulation 454/2011 on the technical specification for interoperability relating to the trans-European rail system's subsystem 'telematics applications for passenger services' ([15038/14](#) + [15038/14 ADD1](#)).

The update concerns technical documents amended in accordance with a change management process carried out by the European Railway Agency.

The Commission regulation is subject to the regulatory procedure with scrutiny. This means that now that the Council has given its consent, the Commission may adopt the regulation, unless the European Parliament objects.

EMPLOYMENT

Mobilisation of the European Globalisation Adjustment Fund for four member states

The Council adopted the four following decisions mobilising a total amount of €35.5 million under the European Globalisation Adjustment Fund (EGF), providing support for workers made redundant in France, Greece, Italy and Poland:

- an amount of €25.9 million is to be mobilised after 5 213 employees of Air France were dismissed as a result of major structural changes in world trade patterns due to globalisation
- €6.4 million is to be paid out of the EGF following the dismissal of 600 employees of the Greek retail enterprise Odyssefs Fokas
- €1.9 million is to be made available for 608 dismissed employees of the Whirlpool company, a manufacturer of electrical equipment operating in Italy
- a further €1.3 million will be mobilised after 1 079 employees of Fiat Poland have been made redundant.

The EGF helps workers to find new jobs and develop new skills when they have lost their jobs as a result of changing global trade patterns, e.g. when a large company shuts down or a factory is moved outside the EU, or as a result of the global financial and economic crisis. The help from the EGF consists in co-financing measures such as job-search assistance, careers advice, tailor-made training and re-training, mentoring and promoting entrepreneurship. It also provides one-off, time-limited individual support, such as job-search allowances, mobility allowances and allowances for participating in lifelong learning and training activities.

TRANSPARENCY

Public access to documents

On 15 December 2014, the Council approved:

- the replies to confirmatory applications No 36/c/05/14 (doc. *15621/14*), No 37/c/06/14 (doc. *15654/1/14 REV 1*), No 38/c/07/14 (doc. *15664/1/14 REV 1*) and No 39/c/08/14 (doc. *15667/1/14 REV 1*).
