THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EC) No 882/2004 of the European Parliament and of the Council of 29 April 2004 on official controls performed to ensure the verification of compliance with feed and food law, animal health and animal welfare rules<sup>1</sup>, and in particular Article 11(4) thereof,

Whereas:

- (1) Commission Regulation (EC) No 1881/2006<sup>2</sup> sets maximum levels for erucic acid in vegetable oils and fats intended as such for human consumption, foods containing added vegetable oils and fats, infant formulae and follow-on formulae.
- (2) Commission Directive 80/891/EEC<sup>3</sup> establishes a method of analysis for determining the erucic acid content in oils and fats intended to be used as such for human consumption and in foodstuffs containing added oils and fats. This method of analysis has become obsolete and needs to be replaced.
- (3) It is appropriate not to establish a specific method of analysis but to establish performance criteria with which the method of analysis used for official control has to comply. Furthermore rules should be laid down concerning the method of sampling.
- (4) The measures provided for in this Regulation are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,
