OUTCOME OF PROCEEDINGS

From: General Secretariat of the Council

To: Delegations

No. prev. doc.: 5593/15 ADD 1

Subject: Sixteenth Annual Report according to article 8(2) of Council Common Position 2008/944/CFSP defining common rules governing control of exports of military technology and equipment.

Delegations will find attached Table A1, part 1 (Afghanistan - Ecuador)

TABLE A.I

Figures of Table A.I are broken down per Member State, and where possible per EU Common Military List category where (a) = number of licences issued; (b) = value of licences issued in euros; (c) = value of arms exports in euros (if available).¹

Total EU licence refusals to each destination, region and worldwide are provided, broken down by EU Common Military List category; (d) = number of licence refusals (small discrepancies may appear between breakdowns and totals due to refusals concerning more than one ML item or refusals for items other than those appearing in the ML²); (e) = criteria numbers on which refusals are based (the approximate number of times each criterion is invoked is indicated in brackets).

NB:

Statistics are compiled differently by each Member State: no uniform standard is used. Consequently, owing to current procedures regarding arms export reporting or data protection legislation, not all countries have been able to submit the same information³:

¹ To make the table more readable, nil values and/or the mention ‘not available’ are omitted, and empty rows deleted.

² Concerning refusals (row (d)), totals do not always correspond to the sum of the refusals shown per military list item; this is because in some instances one refusal concerns more than one military list item, and in some instances refusals which have been issued in accordance with the Common Position for items which do not appear on the military list (for example dual use items for military end-use) are included in the total.

³ (i) Concerning Austria: With regard to items covered by the EU Common Military List, the Austrian law distinguishes between ‘war material’ (as stipulated in the Austrian War Material Act and Regulation) and ‘equipment on the Common Military List not listed as war material’ covered by the Austrian Foreign Trade Act. As to category c) value of actual exports by Military List Category, figures may be inaccurate in particular as such data regarding equipment of the Common Military List not listed as war material is available to the competent authorities only after expiration or full utilization of the individual export license.

(ii) Concerning the Czech Republic: In rows a) and b) are not included General transfer licences and Global transfer licences pursuant to Directive 2009/43/EC, which could cover goods of more than only one ML Category and allow exports to more than only one Member State. In addition to that, some other licenses issued cover goods of more than only one ML Category and their value is the total value of all covered goods. Due to this fact, in rows b) are not included these types of licences. The sums in rows c) are based on information provided by exporters and also contain actual exports made in 2013 based on licences issued in a previous year.

(iii) Concerning Estonia: exports to UK and UAE were for participation in international military exhibitions and the goods were subsequently returned to Estonia. Exports were therefore reported with no monetary value.

(iv) Concerning Germany: some licenses issued cover goods of more than one ML Category (e.g. one license for the export of rifles and their ammunition). In reporting in table A.I., each time a license concerns a ML category, it is counted as one single license, so the sums in rows a) and column "Total per destination" do not always reflect the actual numbers of licenses granted, but a slightly higher figure (i.e. the number of times a ML category has been affected by a license for that destination). Because table AI of the EU annual report does not report "Western Sahara" as a destination, the export to MINURSO HQ United Nations Mission for the Referendum in Western Sahara reported in table AII has not been reported in table AI under exports per destination. However, it has been reported under exports per region and under exports worldwide.

(v) Concerning Greece: arms export data for 2013 were not available at time of data collection at EU level.

(vi) Concerning France: exports to Hong Kong are included in the figures for China (Mainland). Exports to Greenland, the Faeroe Islands, Aruba, the Netherlands Antilles and the islands associated to the United Kingdom are considered without object; exports to New Caledonia are not included (but can be found in the national report).

(vii) Concerning the Netherlands:

- *As values of global licences cannot always be attributed to individual military list categories or individual countries, quoted total values indicated under the worldwide total are higher than the sum of the values per ML category or per destination.*
- *The figures on actual exports reported by the Netherlands are based on information provided by exporters in 2013, and may reflect exports based on a licence issued in a previous year. Although much care has been given to the collection of the data on actual exports, the actual export figures for 2013 may be higher than the values quoted in this report.*

(viii): concerning Hungary: data provided includes figures of general, global and individual export licences. Transfers of military equipment to the Hungarian Forces deployed in various missions (table AII) are not considered regular foreign trade transactions, because there is no actual payment taking place.

(ix): Concerning the United Kingdom: the statistics were first published in the UK Strategic Export Controls Annual Report 2013(the National Report), that was presented to UK Parliament on 17 July 2014. The number and value of licences per ML category per destination are consistent in both the National Report and the EU Annual Report. However the total value of licences for some destinations in the National Report differs by +/- 5 Euros to the value shown in the EU Annual Report. This is because the reports were compiled using different procedures (the National Report was done via a spreadsheet, the EU Report was done via an online system) and this caused variations in how data was rounded up/down. In addition, the EU Annual Report has statistics for four destinations not covered in the National Report: Curacao, French Polynesia, Guernsey, Jersey. The National Report in turn has statistics for one destination not covered in the EU Annual Report: British Virgin Islands. The UK listed Croatia under Other European Countries in its National Report for 2013 whereas Croatia is listed under EU in the EU report.

- With regard to actual exports authorised by EU Member States (row c)), it is important to note that Belgium, Denmark, Germany, Poland, Greece, Ireland and the United Kingdom could not provide these data while France and Italy have reported total values only. No aggregation is therefore reported at the EU level.
- With regard to the use of global and general licences notably applied to intraEU transfers pursuant to Directive 2009/43/EC, it is important to note that the actual value of arms transfers and exports under global and general licences is generally reported by EU Member States. This is however dependant on the Member States' ability to report on actual values (row c)) as described above and on possible additional national specificities as explained in footnote n°3.
- data are reported in Euros and accordingly converted from national currencies for Member States not having the Euro as national currency. Please bear in mind the possible exchange rate fluctuations between the data collection at national level, the date of reporting to the EU level and the date of consultation of the data.

It is important to bear in mind that exports to destinations subject to EU arms embargoes comply with the terms, conditions and possible exceptions set out in the decisions imposing such embargoes. The full list and details of embargoes are available at:
