<sup>2</sup> OJ C 94, 31.3.2014, p. 1

<sup>3</sup> Position of the European Parliament of 15 April 2014

Whereas:

- (1) In order to ensure that Council Regulation (EC) No 515/97<sup>4</sup> covers all possible movements of goods in relation to the customs territory of the Union, it is appropriate to clarify the definition of customs legislation and carriers with regard to the concepts of entry and exit of goods.
- (2) With a view to further enhancing administrative and criminal procedures for dealing with irregularities, it is necessary to ensure that evidence obtained through mutual assistance can be considered as admissible in proceedings before the administrative and judicial authorities of the Member State of the applicant authority.
- (3) With a view to increasing clarity, consistency and transparency, it is necessary to define in more concrete terms the authorities which should have access to the directories established on the basis of this Regulation; for that purpose a uniform reference to competent authorities will be established. Direct access for these authorities is considered to be an important condition for the effective implementation of the mutual assistance between the administrative authorities of the Member States and cooperation between the latter and the Commission to ensure the correct application of the law on customs and agricultural matters.

<sup>4</sup> Council Regulation (EC) No 515/97 of 13 March 1997 on mutual assistance between the administrative authorities of the Member States and cooperation between the latter and the Commission to ensure the correct application of the law on customs and agricultural matters (OJ L 82, 22.3.1997, p. 1)

- (4) Data concerning container movements make it possible to identify fraud with regard to goods that are moved in and out of the customs territory of the Union. Such data serve to assist in preventing, investigating and prosecuting operations which are or appear to constitute breaches of customs legislation. In order to collect and use a set of data as complete as possible, while avoiding potential negative impacts on small and medium sized enterprises in freight forwarding sector, it is necessary that carriers submit to the Member States data concerning container movements in so far as they collect such data in electronic formats via their equipment tracking systems or have such data stored on their behalf. Such data should be directly transmitted to a single directory established by the Commission for that purpose.
- (5) In order to ensure a high level of consumer protection, the Union has a duty to combat customs fraud and thus contribute to the internal market's objective of having safe products with genuine certificates of origin.
- (6) The detection of fraud depends significantly on the identification and cross-analysis of relevant operational data sets. It is necessary therefore to establish, at European Union level, a directory containing data on import, export and transit of goods including transit of goods within the Member States and direct export. For that purpose, Member States should allow systematic replication of data on import, export and transit of goods from the systems operated by the Commission and may supply to the Commission data relating to transit of goods within a Member State and direct export, depending on the availability of data and Member States IT infrastructure.

- (7) The introduction of the e-Customs in 2011, by which documents supporting imports and exports are no longer kept by the customs administrations but by the economic operators, has led to delays in the conduct of European Anti-fraud Office (OLAF) investigations in the customs area, as OLAF needs the intermediation of these administrations to obtain such documents. Moreover, the 3-year limitation period applicable to customs documents held by the administration, puts additional constraints to the successful conduct of investigations. In order to accelerate the conduct of investigations in the area of customs, in addition to the other possibilities for the Commission to obtain information concerning declarations, the procedure according to which the Commission may request from Member States documents supporting import and export declarations should be specified.
- (8) In order to ensure confidentiality and greater security of the inserted data, provision should be made for limiting access to inserted data to specific users and for defined purposes only.

- (9) Regulation (EC) No 515/1997, as amended by this Regulation, provides for the processing of data. Such processing may also cover personal data and should be carried out in accordance with Union law. In particular, the processing of personal data should be carried out in a manner compatible with the purpose of that Regulation and in accordance with Directive 95/46/EC<sup>5</sup> of the European Parliament and of the Council and Regulation (EC) No 45/2001<sup>6</sup> of the European Parliament and of the Council and, in particular, with Union requirements relating to data quality, proportionality, purpose limitation, and rights to information, access, rectification of data, erasure and blocking, organisational and technical measures and international transfers of personal data. Specific provision should be made for limiting access to inserted data to specific users only, in order also to ensure confidentiality of the inserted data.
- (10) The Commission and Member States should respect confidential business information and they should ensure the confidential treatment of information exchanged by means of the data directory.
- (11) In order to ensure up-to-date information and to secure the transparency and information right of data subjects as enshrined in Regulation (EC) No 45/2001 and Directive 95/46/EC, the possibility of publishing on the internet updates of the lists of competent authorities designated by the Member States and the Commission departments to have access to the Customs Information System (CIS) should be introduced.

<sup>6</sup> Directive 95/46/EC of the European Parliament and of the Council of 24 October 1995 on the protection of individuals with regard to the processing of personal data and on the free movement of such data, OJ L 281, 23/11/1995, p. 31.

- (12) The processing of personal data for the purposes of Regulation (EC) No 515/1997, as amended by this Regulation, and any delegated and implementing acts adopted pursuant thereto should respect the fundamental right to respect for private and family life recognised by Article 8 of the Convention for the Protection of Human Rights and Fundamental Freedoms as well as the rights to respect for private and family life, and the right to the protection of personal data recognised, respectively, by Articles 7 and 8 of the Charter of Fundamental Rights of the European Union. The delegated and implementing acts should also ensure that any processing of personal data takes place in accordance with Directive 95/46/EC and Regulation (EC) No 45/2001.
- (13) In order to improve consistency of data protection supervision, the European Data Protection Supervisor needs to cooperate closely with the Joint Supervisory Authority established under Council Decision 2009/917/JHA<sup>7</sup>, with a view to achieving coordination of the audits of the CIS.

---

<sup>7</sup> Council Decision 2009/917/JHA of 30 November 2009 on the use of information technology for customs purposes, OJ L 323, 10/12/2009, p. 20

- (14) The provisions governing the storage of data in the CIS frequently result in unjustifiable loss of information; this is because Member States do not systematically carry out the yearly reviews due to the administrative burden involved and the lack of appropriate resources. It is therefore necessary to simplify the procedure governing the storage of data in the CIS by removing the obligation to review data annually and by setting maximum retention period of five years increased, subject to justification, by an additional period of two years, corresponding to periods provided for the directories established on the basis of this Regulation. This period is necessary due to the long procedures for processing irregularities and because these data are needed for the conduct of joint customs operations and of investigations.
- (15) In order to further enhance the possibilities for analysis of fraud and facilitate the conduct of investigations, data concerning current investigation files stored in the Files Identification Database (FIDE) should be rendered anonymous, after one year since the last observation, and retained in a form in which identification of the data subject is no longer possible.
- (16) Since the objective of improving detection, investigation and prevention of customs-related fraud in the Union cannot be sufficiently achieved by the Member States themselves, the Union may act in accordance with the principle of subsidiarity as set out in Article 5 of the Treaty on European Union. In accordance with the principle of proportionality, as set out in that Article, this Regulation does not go beyond what is necessary to achieve the stated objective.

- (17) Carriers who, at the time of the entry into force of this Regulation, are bound by private contract obligations as regards the supply of data on container movements, should be entitled to benefit from a deferred application of Article 18a (4) in order to renegotiate their contracts and ensure that future contracts are compatible with the obligation to provide data to the Member States.
- (18) Regulation (EC) No 515/97 confers powers on the Commission to implement some of the provisions of that Regulation; as a consequence of the entry into force of the Treaty of Lisbon, the powers conferred on the Commission under that Regulation need to be aligned to Articles 290 and 291 of the Treaty. on the Functioning of the European Union (TFEU).
- (19) In order to supplement certain non-essential elements of Regulation (EC) No 515/97 and in particular to specify the information to be inserted into the CIS, the power to adopt acts in accordance with Article 290 of the Treaty should be delegated to the Commission in respect of the events for which CSMs should be reported, the minimum data elements to be reported in CSMs and the frequency of reporting determining the operations concerning the application of agricultural legislation for which information has to be introduced into the central database of the CIS.

- (20) It is of particular importance that the Commission carry out appropriate consultations during its preparatory work, including at expert level and, where appropriate with business representatives. The Commission, when preparing and drawing-up delegated acts, should ensure simultaneous, timely and appropriate transmission of relevant documents to the European Parliament and the Council.
- (21) In order to ensure uniform conditions for implementation of Regulation (EC) 515/97, implementing powers should be conferred on the Commission in respect of the frequency of reporting CSMs, the format of the CSM data and the method of transmission of the CSMs. Those powers should be exercised in accordance with Regulation (EU) No 182/2011<sup>8</sup> of the European Parliament and of the Council of 16 February 2011 laying down the rules and general principles concerning mechanisms for control by Member States of the Commission's exercise of implementing powers. The examination procedure should be used for the adoption of implementing acts.
- (22) In order to ensure uniform conditions for implementation of Regulation (EC) 515/97, implementing powers should be conferred on the Commission in respect of the specific elements to be included in the CIS under each of the categories referred to under items (a) to (h) in Article 24. Those powers should be exercised in accordance with Regulation (EU) No 182/2011. The examination procedure should be used for the adoption of implementing acts. The specific elements to be included in the CIS will be based on those listed in the Annex to the Commission Regulation (EC) No 696/98<sup>9</sup>.
