ANNEX 1

ANNEX

to the

COMMISSION REGULATION (EU) .../...

amending Regulation (EC) No 1881/2006 as regards maximum levels of tropane alkaloids in certain cereal-based foods for infants and young children

ANNEX

The Annex to Regulation (EC) No 1881/2006 is amended as follows:

(1) In section 8, the following entry is added:

"Foodstuffs ⁽¹⁾		Maximum level (µg/kg)	
"8.2	Tropane alkaloids(*)	Atropine	Scopolamine
8.2.1	Processed cereal-based foods and baby foods for infants and young children, containing millet, sorghum, buckwheat or their derived products ⁽²⁹⁾	1.0 µg/kg	1.0 µg/kg

(*) The tropane alkaloids referred to are atropine and scopolamine. Atropine is the racemic mixture of (-)-hyoscyamine and (+)-hyoscyamine of which only the (-)-hyoscyamine enantiomer exhibits anticholinergic activity. As for analytical reasons it is not always possible to distinguish between the enantiomers of hyoscyamine, the maximum levels are established for atropine and scopolamine."
