Where the actual price paid does not reflect all costs related to the manufacturing of the product which are actually incurred in the beneficiary country, the ex-works price means the sum of those costs, minus any internal taxes which are, or may be, repaid when the product obtained is exported.

For the purpose of the previous paragraphs, where the last working or processing has been subcontracted to a manufacturer, the term "manufacturer" refers to the enterprise that has employed the sub-contractor.

1. For the purpose of this Agreement, the following products shall be considered as originating in the European Union:
 - (a) products wholly obtained in the EU within the meaning of Article 7 of this Protocol;
 - (b) products obtained in the EU incorporating materials which have not been wholly obtained there, provided that such materials have undergone sufficient working or processing in the EU within the meaning of Article 8.
2. For the purpose of this Agreement, the following products shall be considered as originating in an EAC Partner State:
 - (a) products wholly obtained in an EAC Partner State within the meaning of Article 7 of this Protocol;
 - (b) products obtained in an EAC Partner State incorporating materials which have not been wholly obtained there, provided that such materials have undergone sufficient working or processing in that EAC Partner State within the meaning of Article 8.

ARTICLE 3

Working or processing of materials whose import into the European Union is MFN duty free and quota free

1. Without prejudice to the provisions of Article 2(2), non-originating materials which at importation to the EU are free of customs duties by means of application of conventional duties of the most-favoured nation tariff in accordance with its Common Customs Tariff shall be considered as materials originating in an EAC State when incorporated into a product obtained there. It shall not be necessary that such materials have undergone sufficient working or processing, provided they have undergone working or processing going beyond that referred to in Article 9(1).
2. Movement certificates EUR 1 (in Box/Field 7) or origin declarations issued by application of paragraph 1 shall bear the following entry: 'Application of Article 3.1 of Protocol 1 to the EU-EAC EPA'.

ARTICLE 4

Cumulation in the EAC Partner States

1. Without prejudice to the provisions of Article 2(2), products shall be considered as originating in an EAC Partner State if they are produced there, incorporating materials originating in the EU, materials originating in another ACP State which are entitled to duty free quota free treatment upon importation in the EU, materials originating in the OCTs or in the other EAC Partner States, provided the working or processing carried out in that EAC Partner State goes beyond the operations referred to in Article 9(1). It shall not be necessary for such materials to have undergone sufficient working or processing.
2. Where the working or processing carried out in the EAC Partner States does not go beyond the operations referred to in Article 9(1), the product obtained shall be considered as originating in that EAC Partner States only where the value added there is greater than the value of the materials used originating in any of the other countries or territories. If this is not so, the product obtained shall be considered as originating in the country or territory which accounts for the highest value of originating materials used in the manufacture of the final product.

The origin of the materials originating in other ACP State and in the OCTs shall be determined according to the rules of origin applicable in the framework of the EU's preferential arrangements with these countries and territories and in accordance with Article 28.

3. For materials as defined in paragraph 1 and notwithstanding Article 2(2)(b), working or processing carried out in the EU, in the other EAC Partner States, in the other ACP States or in the OCTs shall be considered as having been carried out in an EAC Partner State when the products produced undergo subsequent working or processing in this EAC Partner State.

Where the working or processing carried out in an EAC State does not go beyond the operations referred to in Article 9(1), the product obtained shall be considered as originating in that EAC State only where the value added there is greater than the value of the materials used in any one of the other countries or territories. After the notification, each Party shall make the list public, according to its internal procedures.
5. For the purpose of implementing cumulation between the EAC Partner States, other EPA States and the OCTs, as provided for in the other EPAs and in the OCT Decision, the EU and the EAC Partner States supplying the materials shall provide administrative cooperation to the other countries or territories referred to in this Article according to the terms set out in Title V of this Protocol.
6. The cumulation provided in this Article may only be applied provided that all the countries and territories involved in the acquisition of the originating status have entered into an undertaking with each other, using the template in Annex X, which ensures the correct implementation of this Article and includes a reference to the use of appropriate proofs of origin:
 - (i) to comply and ensure compliance with this Article;
 - (ii) to provide the administrative cooperation necessary to ensure the correct implementation of this Article and its provisions on cumulation both with regard to the EU and between themselves;

1. Without prejudice to the provisions of Article 2(1), products shall be considered as originating in the EU if they are produced there, incorporating materials originating in an EAC Partner State, in the other ACP States with which the EU applies an Economic Partnership Agreement or in the OCTs, provided the working or processing carried out in the European Union goes beyond the operations referred to in Article 9(1). It shall not be necessary for such materials to have undergone sufficient working or processing.

Where the working or processing carried out in the European Union does not go beyond the operations referred to in Article 9(1), the product produced shall be considered as originating in the EU only where the value added there is greater than the value of the materials used originating in any one of the other countries or territories referred to in paragraph 1. If this is not so, the product obtained shall be considered as originating in the country or territory which accounts for the highest value of originating materials used in the manufacture in the EU.

The origin of the materials originating in other ACP States with which the EU applies an Economic Partnership Agreement or in the OCTs shall be determined according to the rules of origin applicable in the framework of the EU's preferential arrangements with these countries and territories and in accordance with Article 28.

2. Without prejudice to the provisions to Article 2(1)(b), working or processing carried out in an EAC Partner State, in the other ACP States with which the EU applies an Economic Partnership Agreement or in the OCTs shall be considered as having been carried out in the EU when the products obtained there have undergone subsequent working or processing.
3. Where the working or processing carried out in the EU does not go beyond the operations referred to in Article 9(1), the product obtained shall be considered as originating in the EU only where the value added there is greater than the value of the materials used in any one of the other countries or territories. If this is not so, the product obtained shall be considered as originating in the country or territory which accounts for the highest value of materials used in the manufacture.
4. The origin of the final product shall be determined according to the rules of origin of this Protocol and in accordance with Article 28. The cumulation provided in this Article may only be applied provided that:
 - (a) all the countries and territories involved in the acquisition of the originating status and the country of destination have concluded an arrangement or agreement on

administrative co-operation which ensures a correct implementation of this Article and includes a reference to the use of appropriate proofs of origin;

- (b) the EU shall provide the EAC Partner States, through the EAC Secretariat, details of agreements on administrative co-operation with the other countries or territories referred to in this Article. The European Commission shall publish in the *Official Journal of the European Union* (C series) and the EAC Partner States shall publish according to their own procedures the date on which the cumulation provided for in this Article may be applied with those countries or territories listed in this Article which have fulfilled the necessary requirements.

5. The cumulation provided for in this Article shall not apply to materials:

³ Council Decision of 13 July 2009 (EC) 729/2009.

⁴ Cf. Articles 11 and 12 of Council regulation (EC) N°732/2008 of 22 July 2008 applying a scheme of generalised tariff preferences for the period from 1 January 2009 to 31 December 2011 and subsequent amending and corresponding legal acts.

⁵ Cf. Article 6 of Council regulation (EC) N°732/2008 of 22 July 2008 applying a scheme of generalised tariff preferences for the period from 1 January 2009 to 31 December 2011, and subsequent amending and corresponding legal acts; materials that benefit from duty free treatment by virtue of the special incentive arrangement for sustainable development and good governance of Article 7 to 10 of the same Council Regulation, but not under the general arrangement of Article 6 of the same Council Regulation, are not covered by this provision.

It shall not be necessary that such materials have undergone sufficient working or processing, provided they have undergone working or processing going beyond that referred to in Article 9(1). A product, in which these materials are incorporated, in case it also includes non-originating materials, will have to undergo sufficient working or processing in accordance with Article 8 to be considered as originating in an EAC Partner State.

- 1.1. The origin of the materials of the countries or territories concerned shall be determined according to the rules of origin applicable in the framework of the EU's preferential arrangements with those countries and territories and in accordance with Article 28.
- 1.2. The cumulation provided for in this paragraph shall not apply to:
 - (a) materials which at importation to the EU are subject to antidumping or countervailing duties when originating from the country which is subject to these antidumping or countervailing duties⁶;
 - (b) materials classified in tariff subheadings of the Harmonized system which include also other tariff lines at 8 digits which are not free of customs duties by means of application of the arrangements of paragraph 1;
 - (c) tuna products classified under HS Chapter 3 for which the duties are suspended in accordance with general arrangements of the Generalized System of Preferences of the EU;
 - (d) products for which the tariff preferences are removed as a result of graduation, a temporary withdrawal or of safeguard clauses in accordance with general arrangements of the Generalized System of Preferences of the EU.
2. At the request of an EAC Partner State, without prejudice to the provisions of Article 2 and provided that the conditions of Paragraphs 2.1, 2.2 and 5 are met, materials originating in countries and territories which benefit from agreements or arrangements that provide for duty-free quota-free access to the market of the European Union shall be considered as materials originating in an EAC Partner State. The request shall be submitted by the EAC Partner State to the EU which shall grant the request in accordance with its internal procedures. The cumulation will remain in place as long as the aforementioned conditions are fulfilled.

It shall not be necessary that such materials have undergone sufficient working or processing, provided they have undergone working or processing going beyond that referred to in Article 9(1).

- 2.1. The origin of the materials of the countries or territories concerned shall be determined according to the rules of origin applicable in the framework of the EU's preferential agreements or arrangements with those countries and territories and in accordance with Article 28.

⁶ For the purpose of the implementation of this specific exclusion, non preferential rules of origin applicable at the EU border should apply.

- 2.2. The cumulation provided for in this paragraph shall not apply to materials:
- (a) falling within Harmonised System Chapters 1 to 24 and the products listed in the Annex 1 - paragraph 1.(ii) of the Agreement on Agriculture belonging to the GATT Agreement of 1994;

 - (c) classified in tariff subheadings of the Harmonized system which include also other tariff lines at 8 digits which are not free of customs duties by means of application of agreements or arrangements referred to in paragraph 2;
 - (d) which under any concluded free trade agreement between the EU and a third country are subject to trade remedies and safeguards or any other measure that deny such products duty free quota free market access into the EU.
3. The EU shall notify yearly to the Committee the list of materials and countries to which paragraphs 1 and 2 shall apply. The EAC Partner States shall notify the European Commission, on a quarterly basis, the materials to which cumulation under paragraphs 1 and 2 has been applied⁸.
4. Movement certificates EUR 1 or origin declarations issued by application of paragraph 1 and 2 shall bear the following entry (in Box/Field 7): 'Application of Article 6.1 or 6.2 of Protocol 1 to the EU-EAC EPA'.
5. The cumulation provided for in paragraph 1 and 2 of this Article may only be applied provided that:
- (a) all the countries and territories involved in the acquisition of the originating status have entered into an arrangement or agreement on administrative cooperation with each other using the template in Annex X, which ensures a correct implementation of this Article and includes a reference to the use of appropriate proofs of origin;
 - (b) the EAC Partner State or States will provide the EU, through the European Commission, with details of arrangements or agreements on administrative cooperation with the other countries or territories referred to in this Article. The European Commission shall publish in the *Official Journal of the European Union* (C series) the date on which the cumulation provided for in this Article may be applied with those countries and territories listed in this Article which have fulfilled the necessary requirements.

⁷ For the purpose of the implementation of this specific exclusion, non preferential rules of origin applicable at the EU border should apply.

⁸ The European Commission will provide for a form to be used by ACP States for the purposes of the notification. The form will at least cover the following elements: the description of materials used for cumulation and the origin of materials.

ARTICLE 7

Wholly obtained products

1. The following shall be considered as wholly obtained in an EAC Partner State or in the EU:
 - (a) mineral products extracted from their soil or from their seabed;
 - (b) plants and vegetable products grown, harvested or gathered there;
 - (c) live animals born and raised there;
 - (d) products from live animals raised there;
 - (e) products from slaughtered animals born and raised there;
 - (f)
 - (i) products obtained by hunting or fishing conducted there;
 - (ii) products of aquaculture, including mariculture, where the fish are born and raised there;
 - (g) products of sea fishing and other products taken from the sea outside any territorial sea of the EAC partners states or of the EU by their vessels
 - (h) products made aboard their factory ships exclusively from products referred to in (f);
 - (i) used articles collected there provided that such goods are fit only for the recovery of raw materials;
 - (j) waste and scrap resulting from manufacturing operations conducted there;
 - (k) products extracted from marine soil or subsoil outside their territorial waters provided that they have sole rights to work that soil or subsoil;
 - (l) goods produced there exclusively from the products specified in (a) to (j).
2. The terms "their vessels" and "their factory ships" in paragraph 1(g) and (h) shall apply only to vessels and factory ships:
 - (a) which are registered in an EU Member State, in an EAC Partner State or in an OCT;
 - (b) which sail under the flag of an EU Member State, of an EAC Partner State or of an OCT;
 - (c) which meet one of the following conditions:
 - (i) they are at least 50 percent owned by nationals of an EU Member State, of an EAC Partner State or of an OCT;

or

- (ii) they are owned by companies
 - which have their office and their main place of business in an EU Member State, in an EAC Partner State or in an OCT; and
 - which are at least 50 percent owned by an EU Member State, by an EAC Partner State or by an OCT, public entities or nationals of that State.

3. Notwithstanding the provisions of paragraph 2, the EU shall recognise, upon request of an EAC Partner State, that vessels chartered or leased by the EAC Partner State be treated as "their vessels" to undertake fisheries activities under the following conditions:

- (a) they operate under the flag of the EAC Partner State; and
- (b) the EAC Partner State offered the EU the opportunity to negotiate a fishery agreement and the EU did not accept this offer; and
- (c) at least 50% of crew, master and officers included are nationals of States party to the Agreement, or of an OCT; and
- (d) the fish is landed and processed in the EAC Partner State; and
- (e) the activities undertaken under this paragraph target a surplus identified by means of scientific advice made available in the context of the IOTC by relevant international, regional or national authorities; and
- (f) the charter or lease contract has been accepted by the Committee as providing adequate opportunities for developing the capacity of the EAC Partner State to fish in its own account and in particular as conferring on the EAC Partner State the responsibility for the nautical and commercial management of the vessel placed at its disposal for a significant period of time.

4. The conditions of paragraph 2 may each be fulfilled in the EU, in different EAC Partner States, in the OCTs or States belonging to other EPAs insofar as the countries involved benefit from cumulation in accordance with Articles 4 and 5. In this case, the products shall be deemed to have the origin of the country under which flag the vessel or factory ship sails in accordance with paragraph 2(b).

These conditions shall only apply with regard to the OCTs and States belonging to other EPAs provided that the provisions of Article 4(3) have been fulfilled.

ARTICLE 8

Sufficiently worked or processed products

1. For the purposes of Article 2, products which are not wholly obtained are considered to be sufficiently worked or processed, when the conditions set out in Annex II are fulfilled.

2. The conditions referred to in paragraph 1 above indicate, for all products covered by this Agreement, the working or processing which must be carried out on non-originating materials used in manufacturing and apply only in relation to such materials. Accordingly, it follows that if a product, which has acquired originating status by fulfilling the conditions set out in Annex II is used in the manufacture of another product, the conditions applicable to the product in which it is incorporated do not apply to it, and no account shall be taken of the non-originating materials which may have been used in its manufacture.
3. Notwithstanding paragraphs 1 and 2, non-originating materials which, according to the conditions set out in Annex II should not be used in the manufacture of a given product may nevertheless be used, provided that their total value or net weight assessed for the product does not exceed:
 - (a) 15 % of the weight of the product for products falling within Chapters 2 and 4 to 24 of the Harmonized System, other than processed fishery products of Chapter 16;
 - (b) 15 % of the ex-works price of the product for other products, except for products falling within Chapters 50 to 63 of the Harmonized System, for which the tolerances mentioned in Notes 6 and 7 of Part I of Annex II, shall apply.
4. Paragraph 3 shall not allow exceeding any of the percentages for the maximum content of non-originating materials as specified in the rules laid down in the list in Annex II.
5. Paragraphs 3 and 4 shall not apply to products wholly obtained within the meaning of Article 7. However, without prejudice to Article 9 and 10(1), the tolerance provided for in those paragraphs shall nevertheless apply to the sum of all the materials which are used in the manufacture of a product and for which the rule laid down in the list in Annex II for that product requires that such materials be wholly obtained.

ARTICLE 9

Insufficient working or processing

1. Without prejudice to paragraph 2, the following operations shall be considered as insufficient working or processing to confer the status of originating products, whether or not the requirements of Article 8 are satisfied:
 - (a) preserving operations to ensure that the products remain in good condition during transport and storage;
 - (b) breaking-up and assembly of packages;
 - (c) washing, cleaning; removal of dust, oxide, oil, paint or other coverings;

 - (l) affixing or printing marks, labels, logos and other like distinguishing signs on products or their packaging;
 - (m) simple mixing of products, whether or not of different kinds; mixing of sugar with any material;
 - (n) simple addition of water or dilution or dehydration or denaturation of products;
 - (o) simple assembly of parts of articles to constitute a complete article or disassembly of products into parts;

The national currency equivalent may be retained unchanged if the conversion would result in a decrease in that equivalent value.
5. The amounts expressed in euro shall be reviewed by the Committee at the request of the EU or of the EAC Partner States. - (b) nature and quantity of materials originating in a third country;
- (c) nature and quantity of materials originating in the EAC Partner States or the countries or territories referred to in Articles 4 and 5 or the materials which have been processed there;
- (d) manufacturing processes;
- (e) value added;
- (f) number of employees in the enterprise concerned;
- (g) anticipated volume of exports to the EU;
- (h) other possible sources of supply for raw materials;
- (i) reasons for the duration requested in the light of efforts made to find new sources of supply;
- (j) other observations.

The same rules shall apply to any requests for extension.

The Committee may modify the form.

3. The examination of requests shall in particular take into account:
 - (a) the level of development or the geographical situation of the EAC Partner State or States concerned;

- (b) cases where the application of the existing rules of origin would significantly affect the ability of an existing industry in an EAC Partner State to continue its exports to the EU, with particular reference to cases where this could lead to cessation of its activities;
 - (c) specific cases where it can be clearly demonstrated that significant investment in an industry could be deterred by the rules of origin and where a derogation favouring the realization of the investment program would enable these rules to be satisfied by stages.
- 4. In every case an examination shall be made to ascertain whether the rules relating to cumulation of origin do not provide a solution to the problem.
- 5. In the examination of requests, special account shall be taken, case by case, of the possibility of conferring originating status on products which include in their composition materials originating in neighbouring developing countries, least-developed countries or developing countries with which one or more EAC Partner States have special relations, provided that satisfactory administrative cooperation can be established.
- 6. Without prejudice to paragraphs 1 to 5, the derogation shall be granted provided that the derogation is not such as to cause serious injury to an economic sector of the EU or of one or more Member States.
- 7. Without prejudice to and in addition to paragraphs 1 to 6, derogations concerning tuna loins of heading 1604 made from non-originating tuna of headings 0302 or 0303 shall be granted within an annual quota of 5,000 tonnes. Applications for such derogations shall be submitted by the EAC Partner States in accordance with the abovementioned quota to the Committee, which shall grant them automatically and put them into force by means of a decision.
- 8. The Committee shall take steps necessary to ensure that a decision is reached as soon as possible and in any case not later than seventy-five (75) working days after the request is received by the EU Co-chairman of the Committee. If the EU does not inform an EAC Partner State of its position on the request within this period, the request shall be deemed to have been accepted.
- 9.
 - (a) The derogation shall be valid for a period, generally of five (5) years, to be determined by the Committee.
 - (b) The derogation decision may provide for renewals without a new decision of the Committee being necessary, provided that the EAC Partner State concerned submits, three (3) months before the end of each period, a proof that it is still unable to meet the conditions of this Protocol which have been derogated from.

If any objection is made to the extension, the Committee shall examine it as soon as possible and decide whether to prolong the derogation. The Committee shall proceed as provided for in paragraph 8. All necessary measures shall be taken to avoid interruptions in the application of the derogation.

- (c) In the periods referred to in subparagraphs (a) and (b), the Committee may review the terms for implementing the derogation should a significant change be found to have taken place in the substantive factors governing the decision to grant the derogation. On conclusion of its review the Committee may decide to amend the terms of its decision as regards the scope of derogation or any other condition previously laid down.

TITLE VI

CEUTA AND MELILLA

ARTICLE 41

Special conditions

1. The term "EU" used in this Protocol does not cover Ceuta and Melilla. The term "products originating in the EU" does not cover products originating in Ceuta and Melilla.
2. The provisions of this Protocol shall apply *mutatis mutandis* in determining whether products may be deemed as originating in an EAC Partner State when imported into Ceuta and Melilla.
3. Where products wholly obtained in Ceuta, Melilla or in the EU undergo working and processing in an EAC Partner State, they shall be considered as having been wholly obtained in an EAC Partner State.
4. Working or processing carried out in Ceuta, Melilla or in the EU shall be considered as having been carried out in an EAC Partner State, when materials undergo further working or processing in an EAC Partner State.
5. For the purpose of implementing paragraphs 3 and 4, the insufficient operations listed in Article 9 of this Protocol shall not be considered as working or processing.
6. Ceuta and Melilla shall be considered as a single territory.

TITLE VII

FINAL PROVISIONS

ARTICLE 42

Revision and application of rules of origin

1. In accordance with Articles 9 and 142 of this Agreement, this Protocol including its Annexes shall be reviewed every five (5) years after entry into force of this Agreement, or whenever the EAC Partner States or the EU so request, with a view to making any necessary amendments or adaptations, in particular having regard to the principle that wherever possible and upon agreement by both Parties, for each product specific rule of

Annex II the same rule of origin applies to the exports of both Parties. In such review, the Parties shall also take into account the development needs of the EAC Partner States such as development of technologies, production processes and all other factors.

The decisions taken shall be implemented as soon as possible.

2. In accordance with Article 29 of this Agreement, the Committee shall, *inter alia*:
 - (a) take decisions on cumulation under the conditions laid down in Article 6;
 - (b) take decisions on derogations from this Protocol, under the conditions laid down in Article 40.
 - (c) recommend amendments of this Protocol to the EPA Council.

ARTICLE 43

Amendment of the Protocol

The EPA Council may decide to amend the provisions of this Protocol.

ARTICLE 44

Annexes

The Annexes to this Protocol shall form an integral part thereof.

ARTICLE 45

Implementation of the Protocol

The EU and the EAC Partner States shall each take the steps necessary to implement this Protocol.

ANNEX I

Protocol 1

Introductory notes to the list in Annex II

Note 1:

The list sets out the conditions required for all products to be considered as sufficiently worked or processed within the meaning of Article 8 of the Protocol.

Note 2:

1. The first two columns in the list describe the product obtained. The first column gives the heading number or chapter number used in the Harmonized System and the second column gives the description of goods used in that system for that heading or chapter. For each entry in the first two columns a rule is specified in columns 3 or 4 and 5 or 6. Where, in some cases, the entry in the first column is preceded by an "ex", this signifies that the rules in columns 3 or 4 and 5 or 6 apply only to the part of that heading as described in column 2.
2. Where several heading numbers are grouped together in column 1 or a chapter number is given and the description of products in column 2 is therefore given in general terms, the adjacent rules in columns 3 or 4 and 5 or 6 apply to all products which, under the Harmonized System, are classified in headings of the chapter or in any of the headings grouped together in column 1.
3. Where there are different rules in the list applying to different products within a heading, each indent contains the description of that part of the heading covered by the adjacent rules in columns 3 or 4 and 5 or 6.
4. Where, for an entry in the first two columns, a rule is specified in both columns 3 or 4 and 5 or 6, the exporter may opt, as an alternative, to apply either the rule set out in column 3 or that set out in column 4 or the rule set out in column 5 or that set out in column 6. If no origin rule is given in column 4 or 6, the rule set out in column 3 or 5 has to be applied.

Note 3:

1. The provisions of Article 8 of the Protocol concerning products having acquired originating status which are used in the manufacture of other products apply regardless of whether this status has been acquired inside the factory where these products are used or in another factory in the European Union or in the EAC Partner States.

Example:

An engine of heading No 8407, for which the rule states that the value of the non-originating materials which may be incorporated may not exceed 40 per cent of the ex-works price, is made from "other alloy steel roughly shaped by forging" of heading No ex 7224.

If this forging has been forged in the EU from a non-originating ingot, it has already acquired originating status by virtue of the rule for heading No ex 7224 in the list. The forging can then count as originating in the value calculation for the engine regardless of whether it was produced in the same factory or in another factory in the European Union. The value of the non-originating ingot is thus not taken into account when adding up the value of the non-originating materials used.

2. The rule in the list represents the minimum amount of working or processing required and the carrying out of more working or processing also confers originating status; conversely, the carrying out of less working or processing cannot confer originating status. Therefore, if a rule provides that non-originating material at a certain level of manufacture may be used, the use of such material at an earlier stage of manufacture is allowed and the use of such material at a later stage is not.
3. Without prejudice to Note 3.2 where a rule states that "materials of any heading" may be used, materials of the same heading as the product may also be used, subject, however, to any specific limitations which may also be contained in the rule. However, the expression "manufacture from materials of any heading, including other materials of heading No ..." means that only materials classified in the same heading as the product of a different description than that of the product as given in column 2 of the list may be used.
4. When a rule in the list specifies that a product may be manufactured from more than one material, this means that any one or more materials may be used. It does not require that all be used.

Example:

The rule for fabrics of heading Nos 5208 to 5212 provides that natural fibres may be used and that chemical materials, among other materials, may also be used. This does not mean that both have to be used; it is possible to use one or the other or both.

5. Where a rule in the list specifies that a product must be manufactured from a particular material, the condition obviously does not prevent the use of other materials which, because of their inherent nature, cannot satisfy the rule. (See also Note 6.3 below in relation to textiles).

Example:

The rule for prepared foods of heading No 1904 which specifically excludes the use of cereals and their derivatives does not prevent the use of mineral salts, chemicals and other additives which are not products from cereals.

However, this does not apply to products which, although they cannot be manufactured from the particular materials specified in the list, can be produced from a material of the same nature at an earlier stage of manufacture.

Example:

In the case of an article of apparel of ex Chapter 62 made from non-woven materials, if the use of only non-originating yarn is allowed for this class of article, it is not possible to start from non-woven cloth – even if non-woven cloths cannot normally be made from yarn. In such cases, the starting material would normally be at the stage before yarn – that is the fibre stage.

6. Where, in a rule in the list, two percentages are given for the maximum value of non-originating materials that can be used, then these percentages may not be added together. In other words, the maximum value of all the non-originating materials used may never exceed the highest of the percentages given. Furthermore, the individual percentages must not be exceeded in relation to the particular materials they apply to.

Note 4:

1. The term "natural fibres" is used in the list to refer to fibres other than artificial or synthetic fibres. It is restricted to the stages before spinning takes place, including waste, and, unless otherwise specified, includes fibres that have been carded, combed or otherwise processed but not spun.
2. The term "natural fibres" includes horsehair of heading No 0503, silk of heading Nos 5002 and 5003 as well as the wool fibres, fine or coarse animal hair of heading Nos 5101 to 5105, the cotton fibres of heading Nos 5201 to 5203 and the other vegetable fibres of heading Nos 5301 to 5305.
3. The terms "textile pulp", "chemical materials" and "paper-making materials" are used in the list to describe the materials not classified in Chapters 50 to 63, which can be used to manufacture artificial, synthetic or paper fibres or yarns.
4. The term "man-made staple fibres" is used in the list to refer to synthetic or artificial filament tow, staple fibres or waste, of heading Nos 5501 to 5507.

Note 5:

1. Where for a given product in the list a reference is made to this note, the conditions set out in column 3 shall not be applied to any basic textile materials, used in the manufacture of this product, which, taken together, represent 10 per cent or less of the total weight of all the basic textile materials used. (See also Notes 5.3 and 5.4 below).
2. However, the tolerance mentioned in Note 5.1 may only be applied to mixed products which have been made from two or more basic textile materials.

The following are the basic textile materials:

- silk,
- wool,
- coarse animal hair,

- fine animal hair,
- horsehair,
- cotton,
- paper-making materials and paper,
- flax,
- true hemp,
- jute and other textile bast fibres,
- sisal and other textile fibres of the genus Agave,
- coconut, abaca, ramie and other vegetable textile fibres,
- synthetic man-made filaments,
- artificial man-made filaments,
- current conducting filaments,
- synthetic man-made staple fibres of polypropylene,
- synthetic man-made staple fibres of polyester,
- synthetic man-made staple fibres of polyamide,
- synthetic man-made staple fibres of polyacrylonitrile,
- synthetic man-made staple fibres of polyimide,
- synthetic man-made staple fibres of polytetrafluoroethylene,
- synthetic man-made staple fibres of polyphenylene sulphide,
- synthetic man-made staple fibres of polyvinyl chloride,
- other synthetic man-made staple fibres,
- artificial man-made staple fibres of viscose,
- other artificial man-made staple fibres,
- yarn made of polyurethane segmented with flexible segments of polyether whether or not gimped,
- yarn made of polyurethane segmented with flexible segments of polyester whether or not gimped,

- products of heading No 5605 (metallized yarn) incorporating strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of a transparent or coloured adhesive between two layers of plastic film,
- other products of heading No 5605.

Example:

A yarn of heading No 5205 made from cotton fibres of heading No 5203 and synthetic staple fibres of heading No 5506 is a mixed yarn. Therefore, non-originating synthetic staple fibres that do not satisfy the origin rules (which require manufacture from chemical materials or textile pulp) may be used up to a weight of 10 per cent of the yarn.

Example:

A woollen fabric of heading No 5112 made from woollen yarn of heading No 5107 and synthetic yarn of staple fibres of heading No 5509 is a mixed fabric. Therefore synthetic yarn which does not satisfy the origin rules (which require manufacture from chemical materials or textile pulp) or woollen yarn that does not satisfy the origin rules (which require manufacture from natural fibres, not carded or combed or otherwise prepared for spinning) or a combination of the two may be used provided their total weight does not exceed 10 per cent of the weight of the fabric.

Example:

Tufted textile fabric of heading No 5802 made from cotton yarn of heading No 5205 and cotton fabric of heading No 5210 is only a mixed product if the cotton fabric is itself a mixed fabric being made from yarns classified in two separate headings or if the cotton yarns used are themselves mixtures.

Example:

If the tufted textile fabric concerned had been made from cotton yarn of heading No 5205 and synthetic fabric of heading No 5407, then, obviously, the yarns used are two separate basic textile materials and the tufted textile fabric is accordingly a mixed product.

3. In the case of products incorporating "yarn made of polyurethane segmented with flexible segments of polyether whether or not gimped" this tolerance is 20 per cent in respect of this yarn.
4. In the case of products incorporating "strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of an adhesive between two layers of plastic film", this tolerance is 30 per cent in respect of this strip.

Note 6:

1. In the case of those textile products, which are marked in the list by a footnote referring to this Introductory Note, textile trimmings and accessories which do not satisfy the rule set out in the list in column 3 for the made up products concerned may be used provided that their weight does not exceed 10 % of the total weight of all the textile materials incorporated.

Textile trimmings and accessories are those classified in Chapters 50 to 63. Linings and interlinings are not be regarded as trimmings or accessories.

2. Any non-textile trimmings and accessories or other materials used which contain textiles do not have to satisfy the conditions set out in column 3 even though they fall outside the scope of Note 3.5.
3. In accordance with Note 3.5, any non-originating non-textile trimmings and accessories or other product, which do not contain any textiles, may, anyway, be used freely where they cannot be made from the materials listed in column 3.

For example¹⁰, if a rule in the list says that for a particular textile item, such as a blouse, yarn must be used, this does not prevent the use of metal items, such as buttons, because they cannot be made from textile materials.

4. Where a percentage rule applies, the value of trimmings and accessories must be taken into account when calculating the value of the non-originating materials incorporated.

Note 7:

1. For the purposes of heading Nos ex 2707, 2713 to 2715, ex 2901, ex 2902 and ex 3403, the "specific processes" are the following:
 - (a) vacuum distillation;
 - (b) redistillation by a very thorough fractionation process¹¹;
 - (c) cracking;
 - (d) reforming;
 - (e) extraction by means of selective solvents;
 - (f) the process comprising all the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralization with alkaline agents; decolorization and purification with naturally active earth, activated earth, activated charcoal or bauxite;
 - (g) polymerization;
 - (h) alkylation;

¹⁰ This example is given for the purpose of explanation only. It is not legally binding.

¹¹ See additional Explanatory Note 5(b) to Chapter 27 of the Combined Nomenclature.

- (i) isomerization.
2. For the purposes of heading Nos 2710, 2711 and 2712, the "specific processes" are the following:
- (a) vacuum distillation;
 - (b) redistillation by a very thorough fractionation process¹²;
 - (c) cracking;
 - (d) reforming;
 - (e) extraction by means of selective solvents;
 - (f) the process comprising all the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralization with alkaline agents; decolourization and purification with naturally active earth, activated earth, activated charcoal or bauxite;
 - (g) polymerization;
 - (h) alkylation;
 - (i) isomerization;
 - (j) in respect of heavy oils falling within heading No ex 2710 only, desulphurization with hydrogen resulting in a reduction of at least 85 per cent of the sulphur content of the products processed (ASTM D 1266-59 T method);
 - (k) in respect of products falling within heading No 2710 only, deparaffining by a process other than filtering;
 - (l) in respect of heavy oils falling within heading No ex 2710 only, treatment with hydrogen at a pressure of more than 20 bar and a temperature of more than 250°C with the use of a catalyst, other than to effect desulphurization, when the hydrogen constitutes an active element in a chemical reaction. The further treatment with hydrogen of lubricating oils of heading No ex 2710 (e.g. hydrofinishing or decolorization) in order, more especially, to improve colour or stability shall not, however, be deemed to be a specific process;
 - (m) in respect of fuel oils falling within heading No ex 2710 only, atmospheric distillation, on condition that less than 30 per cent of these products distils, by volume, including losses, at 300°C by the ASTM D 86 method;
 - (n) in respect of heavy oils other than gas oils and fuel oils falling within heading No ex 2710 only, treatment by means of a high-frequency electrical brush-discharge.

¹² See additional Explanatory Note 5(b) to Chapter 27 of the Combined Nomenclature.

3. For the purposes of heading Nos ex 2707, 2713 to 2715, ex 2901, ex 2902 and ex 3403, simple operations such as cleaning, decanting, desalting, water separation, filtering, colouring, marking, obtaining a sulphur content as a result of mixing products with different sulphur contents, any combination of these operations or like operations do not confer origin.

Note 8

General Provisions concerning certain agricultural goods

1. All goods falling agricultural goods within Chapters 6, 7, 8, 9, 10, 12 and heading 2401 which are grown or harvested in the territory of the beneficiary country shall be treated as originating in the territory of that country, even if grown from seeds, bulbs, rootstock, cuttings, grafts, shoots, buds, or other live parts of plants imported from another country.
2. In cases where the content of non-originating sugar in a given product is subject to limitations, the weight of sugars of headings 1701 (sucrose) and 1702 (e.g., fructose, glucose, lactose, maltose, isoglucose or invert sugar) used in the manufacture of the final product and used in the manufacture of the non –originating products incorporated in the final product is taken into account for calculation of such limitations.

3. Where the Applicant Authority seeks assistance which it would itself be unable to provide if so requested, it shall draw attention to that fact in its request. It shall then be for the Requested Authority to decide how to respond to such a request.

Therefore, the Parties may, in their records of evidence, reports and testimonies and in proceedings and charges brought before the courts, use as evidence information obtained and documents consulted in accordance with the provisions of this Protocol. The competent authority which supplied that information or gave access to those documents shall be notified of such use.
4. Information obtained shall be used solely for the purposes of this Protocol. Where one of the Parties wishes to use such information for other purposes, it shall obtain the prior written consent of the authority which provided the information.
