Statement by Italy

"On September 13, 2017, the European Commission presented the draft Regulation, (COM (2017) 487 final - 2017/2204 (COD)). This draft was amended and integrated by the Council and the European Parliament, following which Trilogue consultations were initiated and ended on November 20, 2018.

The Italian Government takes note of the outcome of the negotiations, based on texts already concluded at the time when it took office. While sharing the initial objective of the proposal, aimed at protecting Member States and the European Union against potentially predatory foreign investments, Italy intends to abstain and wishes to highlight the following:

- The Italian government considers that the proposed Regulation raises doubts on the correct division of powers between EU and its Member States and overlaps with national screening procedures already in place. In light of the Italian legislation, the Government is constantly committed to a rigorous control on foreign investments and to a loyal cooperation, in order to prevent "predatory investments" from harming or endangering the strategic interests of Italy and the European Union as a whole.
- The system under approval today, and defined as a "control mechanism", is actually a mere exchange of information that does not guarantee that all Member States acquire the capacity to block predatory acquisitions.
- Furthermore, due to the circulation of information on a "suspect" acquisition without useful and homogeneous protection instruments, it is likely to attract new potential buyers who might find out the existence of a company subject to a hostile offer, despite the confidential nature of the exchange of information.

- Once this Regulation is approved, the issue of FDI screening is likely to be considered as solved and erased for a long time from the work agenda in Brussels: this would continue to expose those Member States that lack a national screening mechanism ('Golden Power') to the concrete danger of predatory acquisitions. Priority should be given to a regulatory instrument that creates homogeneity between Member States in terms of control functions on foreign direct investments aimed at strategic assets, through the creation of national screenings and by setting minimum standards, where necessary.

The Italian Government reserves the right to promote any useful initiative in the future aimed at adequately opposing unfair practices and protecting the European Union from predatory acquisitions of third countries.

Furthermore, also with the involvement of the National Parliament, it will carry out constant and timely monitoring of the Regulation implementation, once it enters into force, and invites the Commission to do the same."

IMO - Union submission to be submitted to the 6th session of the Sub-Committee on Pollution Prevention and Response (PPR 6) of the IMO (London from 18 – 22 February 2019) concerning consideration of a comprehensive proposal to amend Annex 1 to the Anti-Fouling Systems Convention (AFS 2001) to include controls on cybutryne
Endorsement

14803/18
MAR

Statement by the Commission

"The Commission considers that the above mentioned "Union submission" to be submitted to the IMO is covered by EU exclusive competence. Submission of proposals to the IMO on issues of EU competence is an act of external representation and should be made by the Commission on behalf of the EU to IMO and should therefore be sent to the IMO by the Commission.

In the view of the Commission, the procedural arguments against presenting submissions to the IMO by the Commission on behalf of the EU are not convincing as there is no evidence to suggest that the IMO, as a specialized agency of the United Nations, would be in a position to reject such a submission.

The Commission thus maintains its position that the Treaty provisions on external representation of the Union should be applied and, consequently, that the only legally correct way forward is to present the submission in question to the IMO by the European Commission on behalf of the European Union. The Commission reserves all its rights in this regard."

22. IMO - Union submission to be submitted to the 6th session of the Sub-Committee on Pollution Prevention and Response (PPR 6) of the IMO (London from 18 – 22 February 2019) concerning information presenting scientific evidence for the adverse effects of cybutryne to the environment

Statements by the Commission

"The Commission fully adheres to the principles of Better Regulation and to the commitments laid down in the Interinstitutional Agreement of 13 April 2016 on Better Law-Making. It will therefore endeavour to put forward a legislative proposal to the Council and to the European Parliament at the earliest opportunity, with a view to aligning Regulation (EC) No 32/2000 to the legal framework introduced by the Lisbon Treaty."

"The Commission notes that the co-legislators have inserted in the chapeau of Article 3 of Regulation [] wording requiring the Commission, when adopting delegated acts in order to take into account international agreements concluded by the Union under Article XXVIII of the GATT, to ensure consistency with certain conditions relating to the content of the agreement. The Commission considers that the insertion of such conditions in the present Regulation does not limit the power of the Commission to recommend and negotiate agreements under Articles 207 and 218 TFEU. The Commission reserves its right to propose amendments to Regulation [] as appropriate to take into account the final international agreements to be concluded.

However, in view of the extreme urgency of adopting Regulation [] as part of its Brexit preparedness policy, the Commission would not stand in the way of its adoption. The Commission underlines that this should not be regarded as a precedent."
