COVER NOTE

From:	Secretary-General of the European Commission, signed by Mr Jordi AYET PUIGARNAU, Director
date of receipt:	17 January 2018
То:	Mr Jeppe TRANHOLM-MIKKELSEN, Secretary-General of the Council of the European Union
No. Cion doc.:	COM(2018) 28 final - ANNEXES 1 to 3
Subject:	ANNEXES to the Communication from the Commission to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions
	A European Strategy for Plastics in a Circular Economy

Delegations will find attached document COM(2018) 28 final - ANNEXES 1 to 3.

Encl.: COM(2018) 28 final - ANNEXES 1 to 3

DG E 1A

ANNEXES 1 to 3

ANNEXES

to the

Communication from the Commission to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions

A European Strategy for Plastics in a Circular Economy

{SWD(2018) 16 final}

ANNEX I

List of future EU measures to implement the Strategy

Measu	res	Timeline
Improv	ving the economics and quality of plastics recycling	
	s to improve product design:	
_	Preparatory work for future revision of the Packaging and Packaging Waste	Q1 2018 onwards
	Directive: Commission to initiate work on new harmonised rules to ensure that by	C
	2030 all plastics packaging placed on the EU market can be reused or recycled in a	
	cost-effective manner.	
_	follow-up to COM (2018) 32 "Communication on the implementation of the	Q1 2018 onwards
	circular economy package: options to address the interface between chemical,	Q1 2010 011 and
	product and waste legislation": improve the traceability of chemicals and address	
	the issue of legacy substances in recycled streams	
_	new eco-design measures: consider requirements to support the recyclability of	
	plastics	ongoing
Action	s to boost recycled content:	ongoing
-	launching an EU-wide pledging campaign targeting industry and public authorities	Q1-Q3 2018
_	assessment of regulatory or economic incentives for the uptake of recycled content,	Q1 2018 onwards
_	in particular in the context of the:	Q1 2010 Oliwards
	 Revision of the Packaging and Packaging Waste Directive (see above) 	
	 – Keylston of the Packaging and Packaging waste Directive (see above) – Evaluation/review of the Construction Products Regulation 	
	 Evaluation/review of the Construction Floducts Regulation Evaluation/review of End-of-life Vehicles Directive 	
_	as regards food-contact materials: swift finalisation of pending authorisation	ongoing
	procedures for plastics recycling processes, better characterisation of contaminants	oligoing
	and introduction of monitoring system	2018
-	development of quality standards for sorted plastics waste and recycled plastics in	2018
	cooperation with the European Standardisation Committee	2018 onwards
-	Ecolabel and Green Public Procurement: Further incentivise the use of recycled	2018 oliwards
	plastics, including by developing adequate verification means	
Action	s to improve separate collection of plastic waste:	2010
_	issue new guidelines on separate collection and sorting of waste	2019
-	ensure better implementation of existing obligations on separate collection,	
~	including through ongoing review of waste legislation	ongoing
	ng plastic waste and littering	
Action	s to reduce single-use plastics:	
-	analytical work, including the launch of a public consultation, to determine the	ongoing
	scope of a legislative initiative on single-use plastics	
Action	s to tackle sea-based sources of marine litter:	
-	adoption of a legislative proposal on port reception facilities for the delivery of	Q1 2018
	waste from ships	
_	development of measures to reduce loss or abandonment at sea of fishing gear (e.g.	2018 onwards
	including recycling targets, EPR schemes, recycling funds or deposit schemes)	
-	development of measures to limit plastic loss from aquaculture (e.g. possible Best	
	Available Techniques Reference Document)	
Action	s to monitor and curb marine litter more effectively:	
-	improved monitoring and mapping of marine litter, including microplastics, on the	2018 onwards
	basis of EU harmonised methods	
-	support to Member States on the implementation of their programmes of measures	
	on marine litter under the Marine Strategy Framework Directive, including the link	
	with their waste/litter management plans under the Waste Framework Directive	
Action	s on compostable and biodegradable plastics:	
-	start work to develop harmonised rules on defining and labelling compostable and	Q1 2018 onwards
	biodegradable plastics	-
_	conduct a lifecycle assessment to identify conditions where their use is beneficial,	Q1 2018 onwards
	and criteria for such application	
	start the process to restrict the use of oxo-plastics via REACH	ongoing

Actions to curb microplastics pollution: ongoing - start the process to restrict the intentional addition of microplastics to products via REACH ongoing - examination of policy options for reducing unintentional release of microplastics from tyres, textiles and paint (e.g. including minimum requirements for tyre design (tyre adrasion and durability if appropriate) and/or information requirement (including labelling/ininimum requirements, targeted research and development funding) ongoing - development of measures to reduce plastic pellet spillage (e.g. certification scheme along the plastic supply chain and/or Best Available Techniques reference document under the Industrial Emissions Directive) Q1 2018 onwards - evaluation of the Urban Waste Water Treatment Directive: assessing effectiveness as regards microplastics capture and removal ongoing Driving investment and innovation towards circular solutions 2019 Actions to promote investment and innovation in the value chain: 2019 - Commission guidance on the eco-modulation of EPR fees 2019 - Recommendations by the recently launched 'Crucular Economy Finance Support Platform' 2019 - examine the feasibility of a private-led investment fund to finance investments in innovative solutions and new technologies aimed at reducing the environmental impacts of primary plastic production 2019 - fund for Strategic Research Innovation Agenda on plastics to guide future funding decisions 2018 onwards - project to redu
REACH examination of policy options for reducing unintentional release of microplastics from tyres, textiles and paint (e.g. including minimum requirements for tyre design (tyre abrasion and durability if appropriate) and/or information requirement (including labelling if appropriate), methods to assess microplastic losses from textiles and tyres, combined with information (including possibly labelling)/minimum requirements, targeted research and development funding) Q1 2018 onwards - development of measures to reduce plastic pellet spillage (e.g. certification scheme along the plastic supply chain and/or Best Available Techniques reference document under the Industrial Emissions Directive) ongoing - evaluation of the Urban Waste Water Treatment Directive: assessing effectiveness as regards microplastics capture and removal ongoing Priving investment and innovation towards circular solutions 2019 in mid-2018 Nettors to promote investment and innovation in the value chain: 2019 in mid-2018 - commission guidance on the eco-modulation of EPR fees 2019 in mid-2018 - Recommendations by the recently launched 'Circular Economy Finance Support Platform' 2018 ongoing - examine the feasibility of a private-led investment fund to finance investments in innovative solutions and new technologies aimed at reducing the environmental impacts of primary plastic production 2018 onwards - purpict to reduce plastic waste and marine litter in East and Sou
from tyres, textiles and paint (e.g. including minimum requirements for tyre design (tyre abrasion and durability if appropriate) and/or information requirement (including labelling) if appropriate), and/or information requirement (including labelling)/innimum requirements, targeted research and development funding) Q1 2018 onwards - development of measures to reduce plastic pellet spillage (e.g. certification scheme along the plastic supply chain and/or Best Available Techniques reference document under the Industrial Emissions Directive) Q1 2018 onwards - evaluation of the Urban Waste Water Treatment Directive: assessing effectiveness as regards microplastics capture and removal ongoing Driving investment and innovation in the value chain: 0 - Commission guidance on the eco-modulation of EPR fees 2019 - Recommendations by the recently launched 'Circular Economy Finance Support Platform' 2019 - examine the feasibility of a private-led investment fund to finance investments in innovative solutions and new technologies aimed at reducing the environmental impacts of primary plastic production By mid-2018 - development of a Strategic Research Innovation Agenda on plastics to guide future funding decisions 2018 onwards - project to reduce plastic waste and marine litter in East and South-East Asia to support sustainable consumption and production, the promotion of the waste hierarchy and extended producer responsibility, and improve recovery of fishing gear 2018 onwards - examining options for specific action to reduce plastic pollution in the Mediterr
(tyre abrasion and durability if appropriate) and/or information requirement (including labelling if appropriate), methods to assess microplastic losses from textiles and tyres, combined with information (including possibly labelling)/minium requirements, targeted research and development funding)Q1 2018 onwards-development of measures to reduce plastic pellet spillage (e.g. certification scheme along the plastic supply chain and/or Best Available Techniques reference document under the Industrial Emissions Directive)Q1 2018 onwards-evaluation of the Urban Waste Water Treatment Directive: assessing effectiveness as regards microplastics capture and removalongoingDriving investment and innovation towards circular solutions2019Kotions to promote investment and innovation of EPR fees2019-Recommendations by the recently launched 'Circular Economy Finance Support Platform'2019-examine the feasibility of a private-led investment fund to finance investments in innovative solutions and new technologies aimed at reducing the environmental impacts of primary plastic production8y mid-2018-gu uidance on the eco-modulation of EPR fees2019-gu uidance on the eco-modulation through the European Fund for Strategic Investment and other EU funding instruments (e.g. structural funds and smart specialisation strategies, Horizon 2020)9y mid-2019-pursue work on life-cycle impacts of alternative feedstocks for plastics production development of a Strategic Research Innovation Agenda on plastics to guide future funding decisions2018 onwardsImages of primary plastic waste and marine litter in East and South-East Asia to support
(including labelling if appropriate), methods to assess microplastic losses from textiles and tyres, combined with information (including possibly labelling)/minimum requirements, targeted research and development funding)Q1 2018 onwards- development of measures to reduce plastic pellet spillage (e.g. certification scheme along the plastic supply chain and/or Best Available Techniques reference document under the Industrial Emissions Directive)Q1 2018 onwards- evaluation of the Urban Waste Water Treatment Directive: assessing effectiveness as regards microplastics capture and removalongoingDriving investment and innovation towards circular solutionsU19Ketions to promote investment and innovation in the value chain: - Commission guidance on the eco-modulation of EPR fees2019- Recommendations by the recently launched 'Circular Economy Finance Support Platform'By mid-2018- examine the feasibility of a private-led investment fund to finance investments in innovative solutions and new technologies aimed at reducing the environmental impacts of primary plastic productionBy mid-2019- direct financial support for infrastructure and innovation through the European Fund for Strategic Investment and other EU funding instruments (e.g. structural funding decisions2018 onwardsHarnessing global actionCVettoms focusing on key regions: - project to reduce plastic waste and marine litter in East and South-East Asia to support sustainable consumption and production, the promotion of the waste hierarchy and extended producer responsibility, and improve recovery of fishing gear2018 onwards- examining options for specific action to reduce plastic pollution in the Mediterranen, in support o
textiles and tyres, combined with information (including possibly labelling)/minimum requirements, targeted research and development funding) Q1 2018 onwards - development of measures to reduce plastic pellet spillage (e.g. certification scheme along the plastic supply chain and/or Best Available Techniques reference document under the Industrial Emissions Directive) ongoing - evaluation of the Urban Waste Water Treatment Directive: assessing effectiveness as regards microplastics capture and removal ongoing Driving investment and innovation towards circular solutions 2019 Commission guidance on the eco-modulation of EPR fees 2019 - Recommendations by the recently launched 'Circular Economy Finance Support Platform' 8y mid-2018 - examine the feasibility of a private-led investment fund to finance investments in innovative solutions and new technologies aimed at reducing the environmental impacts of primary plastic production By mid-2019 - pursue work on life-cycle impacts of alternative feedstocks for plastics production ongoing - pursue work on life-cycle impacts on alternative feedstocks for plastics production 2018 onwards - project to reduce plastic waste and marine litter in East and South-East Asia to support sustainable consumption and production, the promotion of the waste hierarchy and extended producer responsibility, and improve recovery of fishing gear 2018 onwards - examining options for specific action to reduce plastic proluction of the Barcelona Convention 2018 onwards<
labelling/minimum requirements, targeted research and development funding) Q1 2018 onwards - development of measures to reduce plastic pellet spillage (e.g. certification scheme along the plastic supply chain and/or Best Available Techniques reference document under the Industrial Emissions Directive) Q1 2018 onwards - evaluation of the Urban Waste Water Treatment Directive: assessing effectiveness as regards microplastics capture and removal ongoing Driving investment and innovation in the value chain: - - Commission guidance on the eco-modulation of EPR fees 2019 - Recommendations by the recently launched 'Circular Economy Finance Support Platform' By mid-2018 - examine the feasibility of a private-led investment fund to finance investments in innovative solutions and new technologies aimed at reducing the environmental impacts of primary plastic production By mid-2019 - pursue work on life-cycle impacts of alternative feedstocks for plastics production ongoing - development of a Strategic Research Innovation Agenda on plastics to guide future funding decisions 2018 onwards Immessing global action 2018 onwards Actions focusing on key regions: 2018 onwards - project to reduce plastic waste and marine litter in East and South-East Asia to support sustainable consumption and production, the promotion of the waste heirarchy and extended producer responsibility, and improve recovery of fishing gear 2018 onwards
- development of measures to reduce plastic pellet spillage (e.g. certification scheme along the plastic supply chain and/or Best Available Techniques reference document under the Industrial Emissions Directive) Q1 2018 onwards - evaluation of the Urban Waste Water Treatment Directive: assessing effectiveness as regards microplastics capture and removal ongoing Driving investment and innovation towards circular solutions 2019 in mid-2018 Actions to promote investment and innovation in the value chain: 2019 in mid-2018 - Commission guidance on the eco-modulation of EPR fees 2019 in mid-2018 - Recommendations by the recently launched 'Circular Economy Finance Support Platform' By mid-2018 - examine the feasibility of a private-led investment fund to finance investments in innovative solutions and new technologies aimed at reducing the environmental impacts of primary plastic production By mid-2019 ongoing - gurse work on life-cycle impacts of alternative feedstocks for plastics production 2018 onwards 2018 onwards - ger 2018 Extensing global action 2018 onwards 2018 onwards - project to reduce plastic waste and marine litter in East and South-East Asia to support sustainable consumption and production, the promotion of the waste hierarchy and extended producer responsibility, and improve recovery of fishing gear 20
along the plastic supply chain and/or Best Available Techniques reference document under the Industrial Emissions Directive) ongoing - evaluation of the Urban Waste Water Treatment Directive: assessing effectiveness as regards microplastics capture and removal ongoing Driving investment and innovation towards circular solutions 2019 Actions to promote investment and innovation in the value chain: 2019 - Commission guidance on the eco-modulation of EPR fees 2019 - Recommendations by the recently launched 'Circular Economy Finance Support Platform' By mid-2018 - examine the feasibility of a private-led investment fund to finance investments in innovative solutions and new technologies aimed at reducing the environmental impacts of primary plastic production By mid-2019 - direct financial support for infrastructure and innovation through the European Fund for Strategic Investment and other EU funding instruments (e.g. structural funds and smart specialisation strategies, Horizon 2020) 2018 onwards - project to reduce plastic Research Innovation Agenda on plastics to guide future funding decisions 2018 onwards - project to reduce plastic waste and marine litter in East and South-East Asia to support sustainable consumption and production, the promotion of the waste hierarchy and extended producer responsibility, and improve recovery of fishing gear 2018 onwards - examining options for specific action to reduce plastic pollution in the Mediterranean, in support of the implementation of the Barcelona Conve
document under the Industrial Emissions Directive) ongoing - evaluation of the Urban Waste Water Treatment Directive: assessing effectiveness as regards microplastics capture and removal ongoing Driving investment and innovation towards circular solutions Xections to promote investment and innovation in the value chain: 2019 - Commission guidance on the eco-modulation of EPR fees 2019 in mid-2018 Platform' examine the feasibility of a private-led investment fund to finance investments in innovative solutions and new technologies aimed at reducing the environmental impacts of primary plastic production By mid-2019 - direct financial support for infrastructure and innovation through the European Fund for Strategic Investment and other EU funding instruments (e.g. structural funds and smart specialisation strategies, Horizon 2020) 2018 onwards - pursue work on life-cycle impacts of alternative feedstocks for plastics production 2018 onwards - project to reduce plastic waste and marine litter in East and South-East Asia to support sustainable consumption and production, the promotion of the waste hierarchy and extended producer responsibility, and improve recovery of fishing gear 2018 onwards - examining options for specific action to reduce plastic pollution in the Mediterranean, in support of the implementation of the Barcelona Convention 2018 onwards - cooperation on plastic waste prevention in major world river basins 2018 onwards
- evaluation of the Urban Waste Water Treatment Directive: assessing effectiveness as regards microplastics capture and removal ongoing Driving investment and innovation towards circular solutions Actions to promote investment and innovation in the value chain: Commission guidance on the eco-modulation of EPR fees Recommendations by the recently launched 'Circular Economy Finance Support Platform' examine the feasibility of a private-led investment fund to finance investments in innovative solutions and new technologies aimed at reducing the environmental impacts of primary plastic production direct financial support for infrastructure and innovation through the European Fund for Strategic Investment and other EU funding instruments (e.g. structural funds and smart specialisation strategies, Horizon 2020) pursue work on life-cycle impacts of alternative feedstocks for plastics production development of a Strategic Research Innovation Agenda on plastics to guide future funding decisions 2018 onwards Harnessing global action 2018 onwards Actions focusing on key regions: 2018 onwards - project to reduce plastic waste and marine litter in East and South-East Asia to support sustainable consumption and production, the promotion of the waste hierarchy and extended producer responsibility, and improve recovery of fishing gear 2018 onwards - examining options for specific action to reduce plastic pollution in the Mediterranean, in support of the implementation of the Barcelona Convention <td< td=""></td<>
as regards microplastics capture and removal Driving investment and innovation towards circular solutions Actions to promote investment and innovation in the value chain: Commission guidance on the eco-modulation of EPR fees Recommendations by the recently launched 'Circular Economy Finance Support Platform' examine the feasibility of a private-led investment fund to finance investments in innovative solutions and new technologies aimed at reducing the environmental impacts of primary plastic production direct financial support for infrastructure and innovation through the European Fund for Strategic Investment and other EU funding instruments (e.g. structural funds and smart specialisation strategies, Horizon 2020) pursue work on life-cycle impacts of alternative feedstocks for plastics production development of a Strategic Research Innovation Agenda on plastics to guide future funding decisions 2018 onwards Itarnessing global action 2018 onwards Actions focusing on key regions: 2018 onwards project to reduce plastic waste and marine litter in East and South-East Asia to support sustainable consumption and production, the promotion of the waste hierarchy and extended producer responsibility, and improve recovery of fishing gear examining options for specific action to reduce plastic pollution in the Mediterranean, in support of the implementation of the Barcelona Convention cooperation on plastic waste prevention in major world river basins 2018 onwards
Driving investment and innovation towards circular solutions Actions to promote investment and innovation in the value chain: - Commission guidance on the eco-modulation of EPR fees - Recommendations by the recently launched 'Circular Economy Finance Support Platform' - examine the feasibility of a private-led investment fund to finance investments in innovative solutions and new technologies aimed at reducing the environmental impacts of primary plastic production By mid-2018 - direct financial support for infrastructure and innovation through the European Fund for Strategic Investment and other EU funding instruments (e.g. structural funds and smart specialisation strategies, Horizon 2020) ongoing - pursue work on life-cycle impacts of alternative feedstocks for plastics production 2018 onwards - development of a Strategic Research Innovation Agenda on plastics to guide future funding decisions 2018 onwards - project to reduce plastic waste and marine litter in East and South-East Asia to support sustainable consumption and production, the promotion of the waste hierarchy and extended producer responsibility, and improve recovery of fishing gear 2018 onwards - examining options for specific action to reduce plastic pollution in the Mediterranean, in support of the implementation of the Barcelona Convention 2018 onwards - cooperation on plastic waste prevention in major wordl river basins 2018 onwards
Actions to promote investment and innovation in the value chain: 2019 - Commission guidance on the eco-modulation of EPR fees 2019 - Recommendations by the recently launched 'Circular Economy Finance Support Platform' by mid-2018 - examine the feasibility of a private-led investment fund to finance investments in innovative solutions and new technologies aimed at reducing the environmental impacts of primary plastic production by mid-2019 - direct financial support for infrastructure and innovation through the European Fund for Strategic Investment and other EU funding instruments (e.g. structural funds and smart specialisation strategies, Horizon 2020) ongoing - pursue work on life-cycle impacts of alternative feedstocks for plastics production 2018 onwards - ge 2 2018 Harnessing global action 2018 onwards - project to reduce plastic waste and marine litter in East and South-East Asia to support sustainable consumption and production, the promotion of the waste hierarchy and extended producer responsibility, and improve recovery of fishing gear 2018 onwards - examining options for specific action to reduce plastic pollution in the Mediterranean, in support of the implementation of the Barcelona Convention 2018 onwards
 Commission guidance on the eco-modulation of EPR fees Recommendations by the recently launched '<i>Circular Economy Finance Support Platform</i>' examine the feasibility of a private-led investment fund to finance investments in innovative solutions and new technologies aimed at reducing the environmental impacts of primary plastic production direct financial support for infrastructure and innovation through the European Fund for Strategic Investment and other EU funding instruments (e.g. structural funds and smart specialisation strategies, Horizon 2020) pursue work on life-cycle impacts of alternative feedstocks for plastics production development of a Strategic Research Innovation Agenda on plastics to guide future funding decisions Harnessing global action Actions focusing on key regions: project to reduce plastic waste and marine litter in East and South-East Asia to support sustainable consumption and production, the promotion of the waste hierarchy and extended producer responsibility, and improve recovery of fishing gear examining options for specific action to reduce plastic pollution in the Mediterranean, in support of the implementation of the Barcelona Convention cooperation on plastic waste prevention in major world river basins
Platform' By mid-2019 - examine the feasibility of a private-led investment fund to finance investments in innovative solutions and new technologies aimed at reducing the environmental impacts of primary plastic production By mid-2019 - direct financial support for infrastructure and innovation through the European Fund for Strategic Investment and other EU funding instruments (e.g. structural funds and smart specialisation strategies, Horizon 2020) ongoing - pursue work on life-cycle impacts of alternative feedstocks for plastics production 2018 onwards - development of a Strategic Research Innovation Agenda on plastics to guide future funding decisions Q2 2018 Harnessing global action 2018 onwards Actions focusing on key regions: 2018 onwards - project to reduce plastic waste and marine litter in East and South-East Asia to support sustainable consumption and production, the promotion of the waste hierarchy and extended producer responsibility, and improve recovery of fishing gear 2018 onwards - examining options for specific action to reduce plastic pollution in the Mediterranean, in support of the implementation of the Barcelona Convention 2018 onwards - cooperation on plastic waste prevention in major world river basins 2018 onwards
 examine the feasibility of a private-led investment fund to finance investments in innovative solutions and new technologies aimed at reducing the environmental impacts of primary plastic production direct financial support for infrastructure and innovation through the European Fund for Strategic Investment and other EU funding instruments (e.g. structural funds and smart specialisation strategies, Horizon 2020) pursue work on life-cycle impacts of alternative feedstocks for plastics production development of a Strategic Research Innovation Agenda on plastics to guide future funding decisions development of a Strategions: project to reduce plastic waste and marine litter in East and South-East Asia to support sustainable consumption and production, the promotion of the waste hierarchy and extended producer responsibility, and improve recovery of fishing gear examining options for specific action to reduce plastic pollution in the Mediterranean, in support of the implementation of the Barcelona Convention cooperation on plastic waste prevention in major world river basins Actions in support of multilateral initiatives on plastic:
 examine the feasibility of a private-led investment fund to finance investments in innovative solutions and new technologies aimed at reducing the environmental impacts of primary plastic production direct financial support for infrastructure and innovation through the European Fund for Strategic Investment and other EU funding instruments (e.g. structural funds and smart specialisation strategies, Horizon 2020) pursue work on life-cycle impacts of alternative feedstocks for plastics production development of a Strategic Research Innovation Agenda on plastics to guide future funding decisions development of a Strategions: project to reduce plastic waste and marine litter in East and South-East Asia to support sustainable consumption and production, the promotion of the waste hierarchy and extended producer responsibility, and improve recovery of fishing gear examining options for specific action to reduce plastic pollution in the Mediterranean, in support of the implementation of the Barcelona Convention cooperation on plastic waste prevention in major world river basins Actions in support of multilateral initiatives on plastic:
 innovative solutions and new technologies aimed at reducing the environmental impacts of primary plastic production direct financial support for infrastructure and innovation through the European Fund for Strategic Investment and other EU funding instruments (e.g. structural funds and smart specialisation strategies, Horizon 2020) pursue work on life-cycle impacts of alternative feedstocks for plastics production development of a Strategic Research Innovation Agenda on plastics to guide future funding decisions development of a Strategic Research Innovation Agenda on plastics to guide future funding decisions actions focusing on key regions: project to reduce plastic waste and marine litter in East and South-East Asia to support sustainable consumption and production, the promotion of the waste hierarchy and extended producer responsibility, and improve recovery of fishing gear examining options for specific action to reduce plastic pollution in the Mediterranean, in support of the implementation of the Barcelona Convention cooperation on plastic waste prevention in major world river basins Actions in support of multilateral initiatives on plastic:
 impacts of primary plastic production direct financial support for infrastructure and innovation through the European Fund for Strategic Investment and other EU funding instruments (e.g. structural funds and smart specialisation strategies, Horizon 2020) pursue work on life-cycle impacts of alternative feedstocks for plastics production development of a Strategic Research Innovation Agenda on plastics to guide future funding decisions development of a Strategic Research Innovation Agenda on plastics to guide future funding decisions actions focusing on key regions: project to reduce plastic waste and marine litter in East and South-East Asia to support sustainable consumption and production, the promotion of the waste hierarchy and extended producer responsibility, and improve recovery of fishing gear examining options for specific action to reduce plastic pollution in the Mediterranean, in support of the implementation of the Barcelona Convention cooperation on plastic waste prevention in major world river basins Actions in support of multilateral initiatives on plastic:
Fund for Strategic Investment and other EU funding instruments (e.g. structural funds and smart specialisation strategies, Horizon 2020) 2018 onwards - pursue work on life-cycle impacts of alternative feedstocks for plastics production development of a Strategic Research Innovation Agenda on plastics to guide future funding decisions 2018 onwards Harnessing global action 2018 onwards Actions focusing on key regions: - - project to reduce plastic waste and marine litter in East and South-East Asia to support sustainable consumption and production, the promotion of the waste hierarchy and extended producer responsibility, and improve recovery of fishing gear 2018 onwards - examining options for specific action to reduce plastic pollution in the Mediterranean, in support of the implementation of the Barcelona Convention 2018 onwards - cooperation on plastic waste prevention in major world river basins 2018 onwards
funds and smart specialisation strategies, Horizon 2020) 2018 onwards - pursue work on life-cycle impacts of alternative feedstocks for plastics production 2018 onwards - development of a Strategic Research Innovation Agenda on plastics to guide future Q2 2018 Harnessing global action 2018 onwards Q2 2018 Actions focusing on key regions: 2018 onwards 2018 onwards - project to reduce plastic waste and marine litter in East and South-East Asia to support sustainable consumption and production, the promotion of the waste hierarchy and extended producer responsibility, and improve recovery of fishing gear 2018 onwards - examining options for specific action to reduce plastic pollution in the Mediterranean, in support of the implementation of the Barcelona Convention 2018 onwards - cooperation on plastic waste prevention in major world river basins 2018 onwards
 pursue work on life-cycle impacts of alternative feedstocks for plastics production development of a Strategic Research Innovation Agenda on plastics to guide future funding decisions development of a Strategic Research Innovation Agenda on plastics to guide future funding decisions development of a Strategic Research Innovation Agenda on plastics to guide future funding decisions development of a Strategic Research Innovation Agenda on plastics to guide future funding decisions development of a Strategic Research Innovation Agenda on plastics to guide future funding decisions development of a Strategic Research Innovation Agenda on plastics to guide future development of the regions: project to reduce plastic waste and marine litter in East and South-East Asia to support sustainable consumption and production, the promotion of the waste hierarchy and extended producer responsibility, and improve recovery of fishing gear
 pursue work on me-cycle impacts of alternative redistocks for plastics production development of a Strategic Research Innovation Agenda on plastics to guide future funding decisions Q2 2018 Parnessing global action Actions focusing on key regions: project to reduce plastic waste and marine litter in East and South-East Asia to support sustainable consumption and production, the promotion of the waste hierarchy and extended producer responsibility, and improve recovery of fishing gear examining options for specific action to reduce plastic pollution in the Mediterranean, in support of the implementation of the Barcelona Convention
funding decisions Q2 2018 Harnessing global action 2018 Actions focusing on key regions: 2018 onwards - project to reduce plastic waste and marine litter in East and South-East Asia to support sustainable consumption and production, the promotion of the waste hierarchy and extended producer responsibility, and improve recovery of fishing gear 2018 onwards - examining options for specific action to reduce plastic pollution in the Mediterranean, in support of the implementation of the Barcelona Convention 2018 onwards - cooperation on plastic waste prevention in major world river basins 2018 onwards
Harnessing global action 2018 onwards Actions focusing on key regions: 2018 onwards - project to reduce plastic waste and marine litter in East and South-East Asia to support sustainable consumption and production, the promotion of the waste hierarchy and extended producer responsibility, and improve recovery of fishing gear 2018 onwards - examining options for specific action to reduce plastic pollution in the Mediterranean, in support of the implementation of the Barcelona Convention - - cooperation on plastic waste prevention in major world river basins 2018 onwards
Actions focusing on key regions: 2018 onwards - project to reduce plastic waste and marine litter in East and South-East Asia to support sustainable consumption and production, the promotion of the waste hierarchy and extended producer responsibility, and improve recovery of fishing gear 2018 onwards - examining options for specific action to reduce plastic pollution in the Mediterranean, in support of the implementation of the Barcelona Convention - 2018 onwards - cooperation on plastic waste prevention in major world river basins 2018 onwards -
 project to reduce plastic waste and marine litter in East and South-East Asia to support sustainable consumption and production, the promotion of the waste hierarchy and extended producer responsibility, and improve recovery of fishing gear examining options for specific action to reduce plastic pollution in the Mediterranean, in support of the implementation of the Barcelona Convention cooperation on plastic waste prevention in major world river basins Actions in support of multilateral initiatives on plastic:
 support sustainable consumption and production, the promotion of the waste hierarchy and extended producer responsibility, and improve recovery of fishing gear examining options for specific action to reduce plastic pollution in the Mediterranean, in support of the implementation of the Barcelona Convention cooperation on plastic waste prevention in major world river basins Actions in support of multilateral initiatives on plastic:
hierarchy and extended producer responsibility, and improve recovery of fishing gear - - examining options for specific action to reduce plastic pollution in the Mediterranean, in support of the implementation of the Barcelona Convention - cooperation on plastic waste prevention in major world river basins Actions in support of multilateral initiatives on plastic: 2018 onwards
gear - examining options for specific action to reduce plastic pollution in the Mediterranean, in support of the implementation of the Barcelona Convention - - cooperation on plastic waste prevention in major world river basins 2018 onwards
 examining options for specific action to reduce plastic pollution in the Mediterranean, in support of the implementation of the Barcelona Convention cooperation on plastic waste prevention in major world river basins Actions in support of multilateral initiatives on plastic: 2018 onwards
Mediterranean, in support of the implementation of the Barcelona Convention - cooperation on plastic waste prevention in major world river basins Actions in support of multilateral initiatives on plastic: 2018 onwards
- cooperation on plastic waste prevention in major world river basins Actions in support of multilateral initiatives on plastic: 2018 onwards
Actions in support of multilateral initiatives on plastic: 2018 onwards
the MARPOL convention and regional sea conventions, including the development
of practical tools and specific action on fishing and aquaculture.
- support to action under the Basel Convention, particularly for the implementation
of the toolkit on environmentally sound waste management
Actions relating to bilateral cooperation with non-EU countries: 2018 onwards
 promote a circular plastics economy in non-EU countries through policy dialogues on trade, industry and environment, as well as accompanie dialogues
on trade, industry and environment, as well as economic diplomacy
 use bilateral, regional and thematic funding in EU development, neighbourhood and enlargement policies to support the plastics strategy by preventing and
appropriately managing waste and supporting the circular economy; through
programmes and instruments including 'Switch to Green' and the External
Investment Plan
Actions relating to international trade: 2018 onwards
- support the development of international industry standards on sorted plastic waste
and recycled plastics
- ensure that exported plastic waste is dealt with appropriately in line with the EU
Waste Shipment Regulation
 support the development of a certification scheme for recycling plants in the EU and in third countries

ANNEX II

List of measures recommended to national authorities and industry

Key measures to improve the economics and quality of plastics recycling

National and regional authorities are encouraged to:

- favour reusable and recycled plastics in public procurement;
- > make better use of taxation and other economic instruments to:
 - reward the uptake of recycled plastics and favour reuse and recycling over landfilling and incineration
 - step up separate collection of plastics waste and improve the way in which this is done
- > put in place well-designed EPR schemes and/or deposit systems, in consultation with the relevant sectors
- make voluntary commitments in support of the strategy's objectives, in particular as regards the uptake of recycled plastics

Industry is encouraged to:

- take concrete steps to improve dialogue and cooperation across the value chain, in particular on material and product design aspects
- make voluntary commitments in support of the strategy's objectives, in particular as regards the uptake of recycled plastic

Key measures to curb plastic waste and littering

National and regional authorities are encouraged to:

- raise awareness of littering and consider fines, where they do not exist already; promote beach clean-up activities
- step up waste collection, particularly near the coasts, and improve coordination between the authorities responsible for waste management, water and the marine environment
- > step up efforts to eradicate illegal and non-compliant landfills
- > develop national monitoring of marine litter on the basis of harmonised EU methods
- > engage in regional seas conventions, in particular to develop regional plans against marine litter
- consider introducing EPR, in particular to provide incentives for collecting discarded fishing gear and recycling agricultural plastics
- > consider introducing deposit refund schemes, in particular for beverage containers

Industry is encouraged to:

- promote existing alternatives to single-use plastic items (e.g. in catering and take-aways), where these are more environmentally beneficial
- > pursue and implement cross-industry agreements to reduce the release of microplastics in the environment
- put in place measures to avoid spillage of plastic pellets

Key measures to drive investments and innovation towards circular solutions

National, regional and local authorities are encouraged to:

- make better use of economic instruments, especially to raise the cost of landfilling and incineration and promote plastic waste recycling and prevention
- make greater use of public procurement and funding to support plastic waste prevention and recycling of plastics

Industry is encouraged to:

- increase infrastructure and R&D investment in areas of direct relevance to achieving the strategy's objectives
- contribute to work on setting up a private investment fund to offset the environmental externalities of plastic production

Key measures to harness global action

National and regional authorities, including in non-EU countries, are encouraged to:

- > engage in international fora to develop a global response to the increase in marine litter
- take domestic action to reduce the leakage of plastics in the environment, prevent plastic waste and increase recycling

Industry is encouraged to:

> Play an active part in supporting an integrated, cross-border circular plastics economy, including through

ANNEX III

Pledging Campaign

- 1. The European Commission calls on stakeholders to come forward with voluntary pledges to boost the uptake of recycled plastics. The objective is to ensure that by 2025 ten million tonnes of recycled plastics find their way into new products on the EU market.
- 2. Interested companies and/or industry associations have until 30 June 2018 to submit their pledges to the following email address: *GROW-ENV-RPLASTICS-PLEDGE@ec.europa.eu*
- 3. When sending in their pledges, stakeholders are asked to provide the European Commission with data illustrating how their pledge contributes to achieving the quantitative objective set in paragraph 1. Such data will be treated confidentially and will be used exclusively for the purpose of monitoring overall progress towards the quantitative objective. Pledges will be put under quality check, and assessed against their reliability and ability to meet declared deadlines.
- 4. When sending in their pledges on recycled content, stakeholders are welcome to make pledges covering other aspects which are relevant to the strategy, such as design for recyclability.
- 5. The pledges received will be made public through a dedicated webpage.
- 6. By 31 October 2018, the Commission will present an assessment of the pledges received and their overall contribution to the quantitative objective set in paragraph 1. Should the contribution be deemed insufficient, the Commission will start work on possible next steps, including regulatory action.
