19a				<p><u>(11a) In light of the European Green Deal, the CAP and the objective of reducing dependence on pesticides, it is important to provide for high-quality annual statistics on the use of plant protection products in relation to the environmental, health and economic issues. The lack of electronic records of the professional use of plant protection products, which could be used for statistical purposes, at the Union level is a major obstacle to increasing the periodicity of data collection on the use of plant protection products in agriculture from once every five years to once per year. In order to give the national statistical institutes time to prepare for the production of annual statistics on a permanent basis, provision should be made for a transitional solution.</u></p>
