SECTION B

ADMINISTRATION OF TARIFF RATE QUOTAS

7. This Section sets out the Tariff Rate Quotas (hereinafter referred to as "TRQs") established under this Agreement that the importing Party shall apply from the date of entry into force of this Agreement to specified originating goods of the exporting Party.
8. Each Party shall administer TRQs established under this Agreement in a transparent, objective and non-discriminatory manner.
9. The goods covered by each TRQ are generically identified in the title to the paragraph setting out the TRQ in Section C (Tariff rate quotas of the Union). Those titles are included solely to assist in understanding this Annex and shall not alter or supersede the coverage established through the identification of tariff lines specified for each TRQ in Section C (Tariff rate quotas of the Union).

10. If the date of entry into force of this Agreement is a date other than 1 January, the TRQ quantity for that year shall be calculated as a proportion of the annual TRQ quantity equal to the number of days remaining in that year divided by the number of days in that year. In all subsequent years thereafter while the TRQ is in operation, the full annual TRQ quantities shall be available from 1 January.
11. Any quantity of originating goods imported under a TRQ established under this Agreement shall not be counted toward the in-quota quantity of any TRQ provided for those goods under the importing Party's WTO Tariff Schedule or any other trade agreement.
12. A Party shall not apply or maintain a bilateral safeguard measure on any good imported under a TRQ established under this Agreement.
13. To access a TRQ established under this Agreement, with the exception of TRQs specified in point (b) of paragraph 14, the importer must present a valid certificate of eligibility issued by the exporting Party or a delegated authority of that Party that is in effect for the goods. The exporting Party shall ensure that certificates of eligibility are issued only up to the relevant quantity for each TRQ.

14. The following import requirements apply:
- (a) imports under TRQ-2 Fresh/Chilled Sheep and Goat Meat, TRQ-3 Frozen Sheep and Goat Meat, and TRQ-7 Dairy Processed Agricultural Products (hereinafter referred to as "PAPs") and High Protein Whey shall be on a first-come first-served basis upon presentation by the importer of a valid certificate of eligibility as set out in paragraph 19. No import licences shall be required;
 - (b) imports under TRQ-8 Sweetcorn and TRQ-9 Ethanol shall be administered by the importing Party, which shall make publicly available in a timely and continuous manner all relevant information concerning quota administration, including the volume available; and
 - (c) imports under all other TRQs established under this Agreement shall be on the basis of an import licence, issued on demand, conditional only on presentation by the importer of a valid certificate of eligibility as set out in paragraph 19. Import licences shall be issued without delay as soon as possible after presentation of the certificate of eligibility and shall be valid until the end of the quota year.
15. Imports under TRQs established under this Agreement shall not be subject to any additional requirements, conditions or restrictions than those set out in paragraph 14, unless mutually agreed.

16. With the exception of TRQs specified in point (a) of paragraph 14, the importing Party shall provide a mechanism for the return and reissue, until the end of the quota year, of unused import licences in a timely and transparent manner.

17. The exporting Party shall promptly notify the importing Party of the identity of any delegated authority authorised to issue certificates of eligibility and the format of the certificate used.

18. The issuing authorities of the exporting Party shall send to the importing Party, without delay, a copy of each authenticated certificate of eligibility including a description of the goods, total quantity of goods covered, and period of validity (until the end of the applicable quota year). Where appropriate, the issuing authorities of the exporting Party shall notify of any cancellation of a certificate of eligibility, or any corrections or amendments to that certificate of eligibility.

19. Each certificate of eligibility shall:

(a) bear an individual serial number allocated by the issuing authority;

(b) be valid only if they are duly completed and endorsed by the issuing authority, specifying the order number or order numbers of the TRQ or TRQs concerned; and

- (c) be considered to have been duly endorsed if they state the date and place of issue and bear a printed seal or the stamp of the issuing authority and the signature of the person or persons empowered to sign them.

Any additional requirements of the certificate of eligibility shall be subject to mutual agreement.

20. If a matter arises concerning TRQs or any related matter, a Party may make a written request to the other Party to:

- (a) hold a meeting of the Committee on Trade in Goods;
- (b) promptly respond to specific questions; and
- (c) promptly provide information relating to the TRQ or TRQs concerned.

INTRODUCTORY NOTES TO PRODUCT-SPECIFIC RULES OF ORIGIN

NOTE 1

General principles

1. This Annex sets out the general rules for the applicable requirements of Annex 3-B (Product-specific rules of origin) as provided for in point (c) of Article 3.2(1) (General requirements for originating products).
2. For the purposes of this Annex and Annex 3-B (Product-specific rules of origin), the requirements for a product to have originating status in accordance with point (c) of Article 3.2(1) (General requirements for originating products) are a change in tariff classification, a production process, a maximum value or weight of non-originating materials, or any other requirement specified in this Annex and Annex 3-B (Product-specific rules of origin).
3. Reference to weight in a product-specific rule of origin means the net weight, which is the weight of a material or a product, not including the weight of any packaging.
4. This Annex and Annex 3-B (Product-specific rules of origin) are based on the HS, as amended on 1 January 2022.

NOTE 2

The structure of the list of product-specific rules of origin

1. Notes on Sections or Chapters, where applicable, are read in conjunction with the product-specific rules of origin for the relevant Section, Chapter, heading or subheading.
2. Each product-specific rule of origin set out in Column 2 of Annex 3-B (Product-specific rules of origin) applies to the corresponding product indicated in Column 1 of Annex 3-B (Product-specific rules of origin).
3. If a product is subject to alternative product-specific rules of origin, that product shall be originating in a Party if it satisfies one of the alternatives. In such cases, alternative product-specific rules are separated by a semi-colon (;), the last semi-colon being followed by "or".
4. If a product is subject to a product-specific rule of origin that includes multiple requirements, that product shall be originating in a Party only if it satisfies all of the requirements. In such cases, cumulative product-specific rules with multiple requirements are separated by a semi-colon (;), the last semi-colon being followed by "and".
5. For the purposes of this Annex and Annex 3-B (Product-specific rules of origin), the following definitions apply:
 - (a) "Section" means a section of the HS;

- (b) "Chapter" means the first two-digits in the tariff classification number under the HS;
- (c) "heading" means the first four-digits in the tariff classification number under the HS; and
- (d) "subheading" means the first six-digits in the tariff classification number under the HS.

6. For the purposes of the product-specific rules of origin based on a change in tariff classification⁵, the following abbreviations apply:

- (a) "CC" means production from non-originating materials of any Chapter except that of the product; this means that all non-originating materials used in the production of the product must undergo a change in tariff classification at the 2-digit level (i.e. a change in Chapter) of the HS;
- (b) "CTH" means production from non-originating materials of any heading, except that of the product; this means that all non-originating materials used in the production of the product must undergo a change in tariff classification at the 4-digit level (i.e. a change in heading) of the HS; and
- (c) "CTSH" means production from non-originating materials of any subheading, except that of the product; this means that all non-originating materials used in the production of the product must undergo a change in tariff classification at the 6-digit level (i.e. a change in subheading) of the HS.

⁵ For greater certainty, if a single product-specific rule of origin applies to a group of headings or subheadings and that rule of origin specifies a change of heading or subheading, it shall be understood that the change in heading or subheading may occur from any other heading or subheading, as the case may be, including from any other heading or subheading within the group.

NOTE 3

Application of the product-specific rules of origin

1. Article 3.2(2) (General requirements for originating products), concerning a product having acquired originating status which is used in the production of another product, applies whether or not originating status has been acquired inside the same factory in a Party where the product is used.
2. If a product-specific rule of origin specifically excludes certain non-originating materials or provides that the value or weight of a specified non-originating material shall not exceed a specific threshold, these conditions do not apply to non-originating materials classified elsewhere in the HS.

Example 1: when the rule for bulldozers (subheading 8429.11) requires: "CTH except from non-originating materials of heading 84.31", the use of non-originating materials classified elsewhere than 84.29 and 84.31 – such as screws (HS heading 73.18), insulated wires and electric conductors (heading 85.44) and various electronics (Chapter 85) – is not limited.

Example 2: When the rule for Chapter 19 requires that "the total weight of non-originating materials of headings 10.06, 11.01 to 11.08 used does not exceed 20 % of the weight of the product", the use of non-originating cereals of Chapter 10, other than rice of heading 10.06, is not limited.

3. If a product-specific rule of origin uses the expression "Production from (a) particular (non-originating) material(s)" (e.g. the rule for heading 71.06 "production from non-originating unwrought precious metals"), then the use of those non-originating material(s) is allowed. The use of such non-originating materials at an earlier stage of processing (e.g. ore) is allowed but the use of such non-originating materials that have been further processed (e.g. semi-finished plates) is not. However, this does not prevent the use of other materials which are unable to satisfy that rule because of their inherent nature.

4. If a product-specific rule of origin uses the expression "production from non-originating materials of any heading" this means the use of non-originating materials also classified within the same heading is allowed, provided the production goes beyond the insufficient production in Article 3.6 (Insufficient working or processing).

Example: The rule for 09.01 (coffee) is "production from non-originating materials of any heading" and means that processes such as decaffeination, or roasting, undertaken either on their own or in combination on non-originating coffee beans will confer origin. However, a process such as simple blending would not be enough to confer origin since it is considered as insufficient production in Article 3.6 (Insufficient working or processing).

5. For the purposes of product-specific rules for a product in Chapters 1 to 24, and in accordance with Article 3.3 (Cumulation of origin) wholly obtained materials from one or both Parties may be combined to meet a rule based on a "wholly obtained" requirement.

Example: A packet of dried fruit and nuts classified in heading 08.13 is made from a combination of fruit and nuts grown in the Union and New Zealand and thus fulfils the product-specific rule "production in which all the materials of Chapter 8 used are wholly obtained".

6. For the purposes of product-specific rules for a product in Chapters 1 to 24, a product fulfilling the rule "production in which all materials of Chapter [X] are wholly obtained" shall be considered as wholly obtained when used as a material in further production.

Example: A milk powder is made using 9 % by value non-originating milk permeate (0404.90) and thus fulfils the product-specific rule "production from wholly obtained materials of Chapter 4" using the tolerance rule of Article 3.5 (Tolerances). When this milk powder is used as a material in the production of nutritional powder of subheading 1901.10 it is considered as wholly obtained for the purposes of the product-specific rule of heading 19.01.

NOTE 4

Application of rules based on a maximum value of non-originating materials

1. For the purposes of the product-specific rules of origin, the following definitions apply:
 - (a) "customs value" means the value as determined in accordance with the Agreement on Implementation of Article VII of GATT 1994;

(b) "EXW" or "ex-works price" means:

- (i) the price of the product paid or payable to the producer in whose undertaking the last working or processing is carried out, provided that the price includes the value of all the materials used and all other costs incurred in the production of the product, minus any internal taxes which are, or may be, repaid when the product obtained is exported; or
- (ii) if there is no price paid or payable or if the actual price paid does not reflect all costs related to the production of the product which are actually incurred in the production of the product, the value of all the materials used and all other costs incurred in the production of the product in the exporting Party:
 - (A) including selling, general and administrative expenses, as well as profit, that can reasonably be allocated to the product; and
 - (B) excluding the cost of freight, insurance, all other costs incurred in transporting the product and any internal taxes of the exporting Party which are, or may be, repaid when the product obtained is exported;
- (iii) for the purposes of point (i), where the last production has been contracted to a producer, the term "producer" in point (i) refers to the person who has employed the subcontractor;

- (c) "VNM" means the value of the non-originating materials used in the production of the product which is its customs value at the time of importation including freight, insurance if appropriate, packing and all other costs incurred in transporting the materials to the importation port in the Party where the producer of the product is located. If the value of the non-originating materials is not known and cannot be ascertained, the first ascertainable price paid for the non-originating materials in the Union or in New Zealand shall be used. The value of the non-originating materials used in the production of the product may be calculated on the basis of the weighted average cost formula or other inventory valuation method under accounting principles which are generally accepted in the Party; and
- (d) "MaxNOM" means the maximum value of non-originating materials that may be used in the production of a product, expressed as a percentage of the ex-works price of the final product.

2. A product complies with a rule based on a maximum value of non-originating materials if the VNM, expressed as a percentage of the ex-works price (EXW) of the product is less than or equal to the MaxNOM (%) specified for that product in Annex 3-B (Product-specific rules of origin), according to the following formula:

$$\frac{\text{VNM}}{\text{EXW}} * 100 \leq \text{MaxNOM (\%)}$$

NOTE 5

Definitions of processes referred to in Sections V to VII of Annex 3-B (Product-specific rules of origin)

For the purposes of the product-specific rules of origin, the following definitions apply:

- (a) "biotechnological processing" means:
 - (i) biological or biotechnological culturing (including cell culture), hybridisation or genetic modification of micro-organisms (bacteria, viruses (including bacteriophage,) etc.) or human, animal or plant cells; and
 - (ii) production, isolation or purification of cellular or intercellular structures (such as isolated genes, gene fragments and plasmids), or fermentation;
- (b) "change in particle size" means the deliberate and controlled modification in particle size of a product, other than by merely crushing or pressing, resulting in a product with a defined particle size, defined particle size distribution or defined surface area, which is relevant to the purposes of the resulting product and with physical or chemical characteristics different from those of the input materials;

- (c) "chemical reaction" means a process (including a biochemical processing) which results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule, with the exception of the following, which are not considered to be chemical reactions for the purpose of this definition:
- (i) dissolving in water or other solvents;
 - (ii) the elimination of solvents including solvent water; or
 - (iii) the addition or elimination of water of crystallisation;
- (d) "distillation" means:
- (i) atmospheric distillation: a separation process in which petroleum oils are converted, in a distillation tower, into fractions according to boiling point and the vapour then condensed into different liquefied fractions; products produced from petroleum distillation may include liquefied petroleum gas, naphtha, gasoline, kerosene, diesel or heating oil, light gas oils and lubricating oil; and
 - (ii) vacuum distillation: distillation at a pressure below atmospheric but not so low that it would be classed as molecular distillation; vacuum distillation is used for distilling high-boiling and heat-sensitive materials such as heavy distillates in petroleum oils to produce light to heavy vacuum gas oils and residuum;

- (e) "isomer separation" means the isolation or separation of isomers from a mixture of isomers;
- (f) "mixing and blending" means the deliberate and proportionally controlled mixing or blending (including dispersing) of materials, other than the addition of diluents, only to conform to predetermined specifications which results in the production of a product having physical or chemical characteristics that are relevant to the purposes or uses of the product and are different from the input materials;
- (g) "production of standard materials" (including standard solutions) means a production of a preparation suitable for analytical, calibrating or referencing uses with precise degrees of purity or proportions certified by the producer; and
- (h) "purification" means a process that results in the elimination of at least 80 % of the content of existing impurities or the reduction or elimination of impurities resulting in a product suitable for one or more of the following applications:
 - (i) pharmaceutical, medical, cosmetic, veterinary or food grade substances;
 - (ii) chemical products and reagents for analytical, diagnostic or laboratory uses;
 - (iii) elements and components for use in micro-electronics;
 - (iv) specialised optical uses;

- (v) biotechnical use, for example, in cell culturing, in genetic technology or as a catalyst;
- (vi) carriers used in a separation process; or
- (vii) nuclear grade uses.

NOTE 6

Definitions of terms used in Section XI of Annex 3-B (Product-specific rules of origin)

For the purposes of the product-specific rules of origin, the following definitions apply:

- (a) "man-made staple fibres" means synthetic or artificial filament tow, staple fibres or waste, of headings 55.01 to 55.07;
- (b) "natural fibres" means fibres other than synthetic or artificial fibres, the use of which is restricted to the stages before spinning takes place, including waste, and, unless otherwise specified, includes fibres which have been carded, combed or otherwise processed, but not spun; "natural fibres" includes horsehair of heading 05.11, silk of headings 50.02 and 50.03, wool-fibres and fine or coarse animal hair of headings 51.01 to 51.05, cotton fibres of headings 52.01 to 52.03, and other vegetable fibres of headings 53.01 to 53.05;

- (c) "printing" means a technique by which an objectively assessed function, such as colour, design, or technical performance, is given to a textile substrate with a permanent character, using screen, roller, digital or transfer techniques; and
- (d) "printing (as standalone operation)" means a technique by which an objectively assessed function, such as colour, design, or technical performance, is given to a textile substrate with a permanent character, using screen, roller, digital or transfer techniques combined with at least two preparatory or finishing operations (such as scouring, bleaching, mercerizing, heat setting, raising, calendaring, shrink resistance processing, permanent finishing, decatizing, impregnating, mending and burling, shearing, singeing, process of air-tumbler, process of stenter, milling, steam and shrinking, and wet decatizing), provided that the value of all the non-originating materials used does not exceed 50 % of the ex-works price of the product.

NOTE 7

Tolerances applicable to products containing two or more basic textile materials

1. For the purposes of this Note, basic textile materials are the following:
 - (a) silk;
 - (b) wool;

- (c) coarse animal hair;
- (d) fine animal hair;
- (e) horsehair;
- (f) cotton;
- (g) paper-making materials and paper;
- (h) flax;
- (i) true hemp;
- (j) jute and other textile bast fibres;
- (k) sisal and other textile fibres of the genus *Agave*;
- (l) coconut, abaca, ramie and other vegetable textile fibres;
- (m) synthetic man-made filaments;
- (n) artificial man-made filaments;

- (o) current-conducting filaments;
- (p) synthetic man-made staple fibres of polypropylene;
- (q) synthetic man-made staple fibres of polyester;
- (r) synthetic man-made staple fibres of polyamide;
- (s) synthetic man-made staple fibres of polyacrylonitrile;
- (t) synthetic man-made staple fibres of polyimide;
- (u) synthetic man-made staple fibres of polytetrafluoroethylene;
- (v) synthetic man-made staple fibres of poly (phenylene sulphide);
- (w) synthetic man-made staple fibres of poly (vinyl chloride);
- (x) other synthetic man-made staple fibres;
- (y) artificial man-made staple fibres of viscose;
- (z) other artificial man-made staple fibres;

- (aa) yarn made of polyurethane segmented with flexible segments of polyether, whether or not gimped;
- (bb) yarn made of polyurethane segmented with flexible segments of polyester whether or not gimped;
- (cc) products of heading 56.05 (metallised yarn) incorporating strip consisting of a core of aluminium foil or of a core of plastic film irrespective of whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of a transparent or coloured adhesive between two layers of plastic film;
- (dd) other products of heading 56.05;
- (ee) glass fibres; and
- (ff) metal fibres.

2. When a reference to this Note is made in Annex 3-B (Product-specific rules of origin), the requirements set out in Column 2 of Annex 3-B (Product-specific rules of origin) shall not apply, as a tolerance, to non-originating basic textile materials that are used in the production of a product, provided that:

- (a) the product contains two or more basic textile materials; and

- (b) the weight of the non-originating basic textile materials, taken together, does not exceed 10 % of the total weight of all the basic textile materials used.

Example: For a woollen fabric of heading 51.12 containing woollen yarn of heading 51.07 and cotton yarn of heading 52.05, non-originating woollen yarn which does not satisfy the requirement set out in Annex 3-B (Product-specific rules of origin), or non-originating cotton yarn which does not satisfy the requirement set out in Annex 3-B (Product-specific rules of origin), or a combination of both, may be used, provided that their total weight does not exceed 10 % of the weight of all the basic textile materials.

Note: for this tolerance rule to be applicable, the fabric must contain two or more basic textile materials.

3. Notwithstanding point (b) of paragraph 2, for products containing "yarn made of polyurethane segmented with flexible segments of polyether, whether or not gimped", the maximum tolerance is 20 %. However, the percentage of the other non-originating basic textile materials shall not exceed 10 %.

4. Notwithstanding point (b) of paragraph 2, for products containing "strip consisting of a core of aluminium foil or of a core of plastic film irrespective of whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of a transparent or coloured adhesive between two layers of plastic film", the maximum tolerance is 30 %. However, the percentage of the other non-originating basic textile materials shall not exceed 10 %.

NOTE 8

Other tolerances applicable to certain textile products

1. Where reference to this Note is made in Annex 3-B (Product-specific rules of origin), non-originating textile materials (with the exception of linings and interlinings) which do not satisfy the requirements set out in Column 2 of Annex 3-B (Product-specific rules of origin) for a made-up textile product may be used, provided that they are classified in a heading other than that of the product and that their value does not exceed 8 % of the ex-works price of the product.
2. If a requirement set out in Column 2 of Annex 3-B (Product-specific rules of origin) specifies a certain process, non-originating materials which are not classified under Chapters 50 to 63 may be used without restriction in the production of textile products classified under Chapters 50 to 63, whether or not they contain a textile.

Example: If a requirement set out in Annex 3-B (Product-specific rules of origin) provides that yarn shall be used for a certain textile item (such as trousers), this does not prevent the use of non-originating metal items (such as buttons), because metal items are not classified under Chapters 50 to 63. For the same reasons, it does not prevent the use of non-originating slide fasteners, even though slide-fasteners normally contain a textile.

3. Where a requirement set out in Annex 3-B (Product-specific rules of origin) consists in a maximum value of non-originating materials, the value of the non-originating materials which are not classified under Chapters 50 to 63 shall be taken into account in the calculation of the value of the non-originating materials.

NOTE 9

Agricultural products

Agricultural products falling within Chapters 6, 7, 8, 9, 10, 12 and heading 24.01, which are grown or harvested in the territory of a Party, shall be treated as originating in that Party, even if grown from seeds, bulbs, rhizomes, rootstock, cuttings, slips, grafts, shoots, buds, or other live parts of plants imported from a third country.

2. Insofar as a Party has introduced or maintains technical regulations, markings or conformity assessment procedures that diverge from UN Regulations or GTRs, as permitted by paragraph 1, that Party shall endeavour to review those technical regulations, markings or conformity assessment procedures whenever necessary, with a view to increasing their convergence with the relevant UN Regulations or GTRs. When reviewing their technical regulations, markings or conformity assessment procedures, each Party shall take into account, *inter alia*, any new developments in the UN Regulations or GTRs and any change in the circumstances that have given rise to divergences from any relevant UN Regulations or GTRs. The Party undertaking the review shall notify the outcome of that review, including scientific and technical information used, to the other Party upon request.

3. Each Party shall refrain from introducing or maintaining technical regulations, markings or conformity assessment procedures that have the effect of prohibiting, restricting or increasing the burden for the importation, and the putting into service on their domestic market, of products type-approved under UN Regulations for the areas covered by those UN Regulations, unless such technical regulations, markings or conformity assessment procedures are explicitly foreseen by those UN Regulations.

ARTICLE 6

Market access

1. Each Party shall accept, on its market, products that are covered by a valid UN type-approval certificate issued by the Union or New Zealand, as contracting parties to the 1958 Agreement, or a valid EU type-approval certificate¹⁵, as compliant with their domestic technical regulations, markings and conformity assessment procedures, without requiring any further testing, documentation, certification or marking concerning such type-approval certificates. In the case of vehicle approvals, both the EU whole vehicle type approvals (EUWVTA) and the UN's Universal International Whole Vehicle Type Approval (U-IWVTA) shall be considered valid. Only those UN type-approval certificates issued by a Party that has acceded to the relevant UN Regulations and which have been granted pursuant to the 1958 Agreement can be considered valid.
2. A Party shall only be obliged to accept valid UN type-approval certificates issued pursuant to the latest version of the UN Regulations, if it applies those UN Regulations. A Party may also consider accepting valid UN type-approval certificates if it does not apply those UN Regulations, provided the type-approved products meet all their applicable domestic requirements.

¹⁵ Including EEC, EC and EU type-approval certificates.

3. For the purposes of paragraph 1, the following shall be considered sufficient proof of the existence of a valid EU or UN type-approval:

- (a) for whole vehicles, a valid EU Certificate of Conformity¹⁶ or UN Declaration of Conformance¹⁷ certifying compliance with a U-IWVTA;
- (b) for equipment and parts, a valid EU or UN type-approval mark affixed to the product; and
- (c) for equipment and parts to which a type-approval mark¹⁸ cannot be affixed, a valid EU or UN type-approval certificate.

4. A Party may allow its competent authorities to verify that the products covered comply, as appropriate, with either:

- (a) all the domestic technical regulations of the Party; or

¹⁶ Including EC and EU Certificates of Conformity.

¹⁷ In the case of a Declaration of Conformance, the obligation in this provision will enter into application when UN Regulation No. 0 on the International Whole Vehicle Type Approval has entered into force.

¹⁸ Including EEC, EC and EU type-approval marks.

- (b) the EU or UN technical regulations with respect to which compliance has been attested, in application of this Article, by a valid EU Certificate of Conformity or UN Declaration of Conformance certifying compliance with a U-IWVTA, in the case of whole vehicles, or by a valid EU or UN type-approval mark affixed to the product or a valid EU or UN type-approval certificate, in the case of equipment and parts.

Such verification shall be carried out by random sampling in the market and in accordance with the technical regulations under points (a) or (b), as the case may be.

5. A Party may require a supplier to withdraw a product from its market if the product concerned does not comply with those technical regulations.

ARTICLE 7

Products with new technologies or new features

1. Neither Party shall prevent or restrict access to its market of a product covered by this Annex and approved by the exporting Party on the grounds that the product incorporates a new technology or a new feature that the importing Party has not yet regulated.

2. Notwithstanding paragraph 1, an importing Party may restrict access to its market or require the withdrawal from its market of such a non-regulated product incorporating a new technology or a new feature if that new technology or new feature would:

- (a) create a risk for human health, safety, the environment or the transport infrastructure; or
- (b) be inconsistent with existing domestic environmental standards or infrastructure.

3. An importing Party restricting access to or requiring withdrawal from its market pursuant to paragraph 2 shall immediately notify its decision to the other Party. The Party shall include in the notification all relevant scientific or technical information considered in the Party's decision.

ARTICLE 8

Remanufactured equipment or parts

1. A Party shall not accord to remanufactured equipment or parts of the other Party treatment that is less favourable than the Party accords to equivalent equipment or parts in new condition.

2. For greater certainty, Article 2.11 (Import and export restrictions) applies to import or export prohibitions or restrictions on the importation or exportation of remanufactured equipment or parts. If a Party adopts or maintains import or export prohibitions or restrictions on used equipment or parts, it shall not apply such measures to remanufactured equipment or parts.

3. A Party may require that remanufactured equipment or parts be identified as such for distribution or sale in its territory and that the remanufactured equipment or parts meet similar performance requirements to those that apply to equivalent equipment or parts in new condition.

ARTICLE 9

Other measures restricting trade

Each Party shall refrain from nullifying or impairing the benefits accruing to the other Party under this Annex through regulatory measures specific to the products covered. This is without prejudice to the right to adopt measures necessary for road safety, protections for health, the environment and the transport infrastructure, and the prevention of deceptive practices.

ARTICLE 10

Cooperation

1. The Parties shall cooperate and exchange information on any matter relevant for the implementation of this Annex in the Committee on Trade in Goods.
2. The Parties shall work together, as appropriate, to progress areas of mutual interest in relevant international standardising bodies.

WINE AND SPIRITS

ARTICLE 1

Objective

The objective of this Annex is, on the basis of non-discrimination and reciprocity, to facilitate trade in wine and spirits produced in each Party's territory.

ARTICLE 2

Scope and coverage

This Annex applies to wines classified in heading HS 22.04, and spirits classified in heading HS 22.08, of the HS.

ARTICLE 3

General exception

Nothing in this Annex shall be construed to prevent the adoption or enforcement by either Party of measures necessary to protect human or plant life or health subject to the requirement that such measures are not applied in a manner that would constitute a means of arbitrary or unjustifiable discrimination between countries where the same conditions prevail, or a disguised restriction on international trade.

ARTICLE 4

Definitions

For the purposes of this Annex, the following definitions apply:

- (a) "label" means any brand, mark, pictorial or other descriptive matter that is written, printed, stencilled, marked, embossed or impressed on, or firmly affixed to, a container of wine;
- (b) "oenological practices" mean wine-making processes, treatments and techniques such as wine additives and processing aids, but do not include labelling, bottling or packaging for final sale;

- (c) "single field of vision" means any part of the surface of a container, excluding its base and cap, that can be seen without having to turn the container;
- (d) "variety" means the cultivar of grape from which a wine is made, as expressed in commonly understood and accepted terms that are permitted for use in the exporting Party;
- (e) "vintage" means the year of harvest of the grapes used to make a wine; and
- (f) "wine" means the product obtained exclusively from the total or partial alcoholic fermentation of fresh grapes, whether or not crushed, or of grape must.²¹

ARTICLE 5

General rule

Unless otherwise specified in this Annex, importation and marketing²² of wine and spirits shall be conducted in compliance with the law of the importing Party.

²¹ For greater certainty, this definition includes concentrated grape must and rectified concentrated grape must that are permitted for enrichment and sweetening purposes as well as fractions of wine that may result from permitted separative techniques.

²² For greater certainty, for the purposes of this Annex the term "marketing" means "to place on the market for sale".

ARTICLE 6

Product definitions and oenological practices and processes

1. The Union shall authorise the importation and marketing in its territory for human consumption of wine produced in New Zealand in accordance with:
 - (a) product definitions authorised in New Zealand by its law referred to in Appendix 9-E-1 (New Zealand law as referred to in point (a) of Article 6(1))²³;
 - (b) oenological practices authorised in New Zealand by its law as referred to in Appendix 9-E-2 (New Zealand law as referred to in point (b) of Article 6(1)), in so far as those oenological practices are recommended and published by the International Organisation of Vine and Wine (OIV)²⁴; and
 - (c) oenological practices and restrictions that are otherwise jointly accepted by the Parties as provided for in Appendix 9-E-3 (New Zealand oenological practices).²⁵

²³ This provision is without prejudice to the specific requirements concerning the product name "wine" in Article 9(1) (Mandatory labelling information specifications – product name, actual alcohol strength by volume, lot identification) of this Annex.

²⁴ Notwithstanding point (b), the Union shall authorise the importation and marketing in its territory of wine produced in New Zealand using physical winemaking processes in accordance with New Zealand law set out in Appendix 9-E-2 (New Zealand law as referred to in point (b) of Article 6(1)).

²⁵ For greater certainty, points (b) and (c) of Article 6(1) (Product definitions and oenological practices and processes) shall apply individually or cumulatively, depending on the oenological practices applied in wine produced in New Zealand.

2. New Zealand shall authorise the importation and marketing in its territory for human consumption of wine produced in the Union in accordance with:
- (a) product definitions authorised in the Union by its law referred to in Appendix 9-E-4 (Union law as referred to in point (a) of Article 6(2));
 - (b) oenological practices and restrictions authorised in the Union by its law as referred to in Appendix 9-E-5 (Union law as referred to in point (b) of Article 6(2)), in so far as those oenological practices are recommended and published by the OIV^{26 27}; and
 - (c) oenological practices and restrictions that are otherwise jointly accepted by the Parties as provided for in Appendix 9-E-6 (Union oenological practices).²⁸

²⁶ By way of derogation from point (b), wine produced in the Union using yeast mannoproteins or potassium ferrocyanide may be imported and marketed in the territory of New Zealand provided such wine meets the prescribed limits laid down in the Australia New Zealand Food Standards Code for these substances for as long as the prescribed limits laid down in the Australia New Zealand Food Standards Code differ from the established OIV recommendations as published.

²⁷ Notwithstanding point (b), New Zealand shall authorise the importation and marketing in its territory of wine produced in the Union in accordance with physical winemaking processes and the conditions and limits of their use as laid down in Article 3(1) and Annex I, Part A, Table 1, of Commission Delegated Regulation (EU) 2019/934.

²⁸ For greater certainty, points (b) and (c) of Article 6(2) (Product definitions and oenological practices and processes) shall apply individually or cumulatively, depending on the oenological practices applied in wine produced in the Union.

3. A Party (the requesting Party) may propose to the other Party (the requested Party) a modification to the requesting Party's oenological practices list in Appendix 9-E-3 (New Zealand oenological practices) or Appendix 9-E-6 (Union oenological practices) by delivering a written request, supported by a technical file, to the requested Party through its contact point for this Annex.
4. The Parties shall discuss the proposed modification referred to in paragraph 3 in the Committee on Wine and Spirits and the Trade Committee shall have the power to adopt a decision to amend Appendix 9-E-3 (New Zealand oenological practices) or Appendix 9-E-6 (Union oenological practices) accordingly.
5. If any matter arises regarding the implementation or application of Article 6 (Product definitions and oenological practices and processes) as a result of developments at an international organisation of which the Union, Member States or New Zealand are a member, the Parties shall discuss the matter in the Committee on Wine and Spirits with a view to finding a mutually satisfactory solution.
6. The Committee on Wine and Spirits shall undertake a general review of the operation of Article 6 (Product definitions and oenological practices and processes) and relevant Appendices within five years after the date of entry into force of this Agreement and at least once every five years thereafter, unless the co-chairs of the Committee agree otherwise.

ARTICLE 7

General requirements regarding labelling

1. An importing Party may require that all information on a label shall be clear, accurate, truthful, able to be substantiated and not misleading to the consumer.
2. An importing Party may require that labelling information appears in one of the languages in official use in the territory of that Party as provided for in its law.
3. An importing Party may require that mandatory information be presented in indelible characters and written or set out legibly and clearly, including so that the information contrasts distinctly with the background and surrounding text or graphics.
4. An importing Party shall permit information on a label to be repeated on the container, whether or not in the same form.
5. An importing Party may prohibit the use of certain label claims where such prohibition serves a legitimate human health and safety objective.
6. Each Party shall permit mandatory information to be displayed on a supplementary label affixed to a container. Supplementary labels may be affixed to a container after importation but prior to the product being offered for sale in the territory of the importing Party, provided that the mandatory information required by the importing Party is fully and accurately displayed.

ARTICLE 8

Placement of mandatory labelling information

1. Nothing in this Annex shall prevent an importing Party from requiring mandatory labelling information to be specified on a container.
2. An importing Party shall not impose new precise location requirements for mandatory labelling information on wine produced in the other Party.
3. Notwithstanding paragraph 2:
 - (a) an importing Party may require that one or more items of mandatory labelling information or optional labelling information, or both, appear in the same field of vision as, or in conjunction with, or in a certain proximity to, one another; and
 - (b) an importing Party may require that mandatory labelling information is not displayed on the base or cap, or other part of a container not visible to the consumer.

ARTICLE 9

Mandatory labelling information specifications – product name, actual alcohol strength by volume, lot identification

1. The Union shall permit use of the term "wine" as the product name for wine produced in New Zealand and imported and marketed in the Union provided the wine has an actual alcoholic strength of not less than 7 % volume and a total alcoholic strength of not more than 20 % volume.
2. An importing Party shall permit the actual alcohol content by volume to be indicated on the label in percentage terms to a maximum of one decimal point (for example, 12 %, 12,0 %, 12,1 %, 12,2 %).
3. An importing Party shall permit the actual alcohol content by volume to be expressed by alc/vol (for example, 12 % alc/vol, alc 12 % vol, 12 % vol).
4. Without prejudice to the tolerances set for the reference analysis method used, an importing Party shall permit the actual alcohol strength by volume of wines imported from the exporting Party and indicated on the label to vary from that given by analysis by up to 0,8 % vol or by up to 0,5 % vol for fortified wines.
5. An importing Party may require the provision of lot identification on wine labels.

6. An importing Party shall prohibit the defacement²⁹ of lot identification information, unless the relevant authority of the importing Party permits otherwise.

7. A Party shall not allow packaged products to be placed on the market for sale in its territory which are not compliant with the requirement in paragraph 6.

ARTICLE 10

Optional labelling information

1. Subject to Article 7 (General requirements regarding labelling), an importing Party shall permit labels to contain information other than mandatory information in accordance with its law.

2. Notwithstanding point (a) of Article 8(3) (Placement of mandatory labelling information), an importing Party shall not restrict the placement of optional information.

²⁹ For greater certainty, the term "defacement" includes the following actions: alter; remove; erase; obliterate; and obscure.

ARTICLE 11

Optional information – vintage and variety

1. An importing Party shall permit the importation and sale of wine that is labelled with a vintage if:

(a) the wine conforms to the exporting Party's law in respect of a vintage; and

(b) at least 85 % of the wine is derived from grapes of that vintage.

2. For wines produced in the Union that are traditionally obtained from grapes harvested in January or February, the vintage year to appear on the label may be that of the previous calendar year.

3. An importing Party shall permit the importation and sale of wine that is labelled as being of a single grape variety if:

(a) the wine conforms to the exporting Party's law in respect of varietal composition; and

(b) at least 85 % of the wine so labelled is obtained from grapes of that variety.

4. An importing Party shall permit the importation and sale of wine that is labelled as being of multiple grape varieties if:

- (a) the wine conforms to the exporting Party's law in respect of varietal composition;
- (b) at least 85 % of the wine so labelled is obtained from grapes of those varieties;
- (c) each variety listed is in greater proportion in the wine than any variety that is not listed; and
- (d) the varieties listed are in descending order of their proportions in the wine and, if required by the importing Party, in characters of the same size.

ARTICLE 12

Certification

1. Unless necessary to protect human health and safety, a Party shall not submit imports of wine produced in the other Party to a more restrictive system of certification or more far-reaching certification requirements than those provided for in its law in force at the date of entry into force of this Agreement.

2. The Union shall authorise imports of wine produced in New Zealand in accordance with the Simplified VI-1 Document, the format and required information of which are specified in Appendix 9-E-7 (Simplified VI-1 document), or in accordance with the Simplified Certificate specified in Appendix 9-E-8 (Simplified certificate).

3. In the event of a question in relation to test results, each Party shall apply the reference methods of analysis recommended and published by the OIV or, in case those methods do not exist, a method of analysis complying with the standards recommended by the International Organisation for Standardisation, unless the relevant competent authorities of each Party jointly agree otherwise.

ARTICLE 13

Food information

1. A Party shall not require any of the following to appear on the container, label, or packaging of wine:

- (a) date of packaging;
- (b) date of bottling;
- (c) date of production or manufacture;

- (d) date of expiration;
- (e) date of minimum durability; or
- (f) sell-by-date.

2. Notwithstanding points (d) and (e), a Party may require the display of a date of expiration or minimum durability on products that, on account of the packaging or the addition of perishable ingredients, may have a shorter date of expiration or minimum durability than would normally be expected by the consumer.

3. A Party may also require the display of a date of minimum durability on wine that has undergone a de-alcoholisation treatment and has an actual alcoholic strength by volume of less than 10 %.

ARTICLE 14

Presentation and description of spirits

Article 7 (General requirements regarding labelling), Article 9(5), (6) and (7) (Mandatory labelling information specifications – product name, actual alcohol strength by volume, lot identification), and Article 13(1) and (2) (Food information) of this Annex shall apply *mutatis mutandis* to the presentation and description of spirits.

ARTICLE 15

Existing stocks

Products that, at the date of entry into force of this Agreement, have been produced or labelled in accordance with the law of a Party and Parties' obligations to each other, but in a manner not compliant with this Annex, may be placed on the market in the other Party for sale until stocks are exhausted.

ARTICLE 16

Committee on Wine and Spirits

1. This Article complements and further specifies Article 24(4) (Specialised committees).
2. The Committee on Wine and Spirits shall meet within one year after the date of entry into force of this Agreement and thereafter at the request of either Party. Meetings shall be held at a date and time agreed by the co-chairs of the Committee, but no later than 90 days after the request.
3. The Committee on Wine and Spirits shall, with respect to this Annex, have the following functions, whenever necessary:
 - (a) serve as a platform for the exchange of information between the Parties to optimise the operation of this Annex;
 - (b) serve as a forum for the Parties to discuss the matters referred to in Article 6(3) and (6) as well as any matter of mutual interest in the wine and spirits sector; and
 - (c) undertake a general review of the operation of Article 6 (Product definitions and oenological practices and processes) and relevant Appendices in accordance with Article 6(7); and

4. The Committee on Wine and Spirits may decide on specific modalities such as procedures and criteria for assessment of any proposed modification to Appendix 9-E-3 (New Zealand oenological practices) or Appendix 9-E-6 (Union oenological practices).

ARTICLE 17

Contact points

Within 60 days after the date of entry into force of this Agreement, each Party shall designate a contact point responsible to facilitate the communication between the Parties on matters covered by this Annex and notify the other Party of the contact details for the contact point. Each Party shall notify the other Party promptly in the event of any change of those contact details.

DECLARATIONS

Declaration on yeast mannoproteins and potassium ferrocyanide

1. Footnote 6 to Article 6.2(b) (Product definitions and oenological practices and processes) provides that wine produced in the Union and imported into New Zealand shall meet limits prescribed in New Zealand law for the use of yeast mannoproteins and potassium ferrocyanide for as long as such limits differ from those recommended in OIV resolutions as published. Subject to paragraph 2, New Zealand will endeavour to seek the removal of the prescribed limits for yeast mannoproteins and potassium ferrocyanide in the Australia New Zealand Food Standards Code.
2. New Zealand cannot pre-empt the outcome or timeframes of the process referred to in paragraph 1, because the prescribed limits are set by Food Standards Australia New Zealand as part of the joint Food System with Australia.

Joint declaration concerning allergen labelling on wine and spirits

1. Each Party acknowledges the other Party's right to regulate labelling information for wine and spirits relating to allergens.
2. Without prejudice to Article 8 (Placement of mandatory labelling information) of Annex 9-E, the Parties acknowledge that:
 - (a) the Union may require mandatory particulars relating to allergens as foreseen in Regulation (EU) No 1169/2011³³ or Commission Delegated Regulation (EU) 2019/33 to be included in the description and presentation of wine and spirits; and
 - (b) for New Zealand, allergen labelling is subject to New Zealand's joint regulatory regime with Australia under Food Standard 1.2.3, Australia New Zealand Food Standards Code.
3. The Parties will work cooperatively with the aim of reaching, if possible, a mutually acceptable outcome on allergen labelling requirements.

³³ Regulation (EU) No 1169/2011 of the European Parliament and of the Council of 25 October 2011 on the provision of food information to consumers, amending Regulations (EC) No 1924/2006 and (EC) No 1925/2006 of the European Parliament and of the Council, and repealing Commission Directive 87/250/EEC, Council Directive 90/496/EEC, Commission Directive 1999/10/EC, Directive 2000/13/EC of the European Parliament and of the Council, Commission Directives 2002/67/EC and 2008/5/EC and Commission Regulation (EC) No 608/2004 (OJ EU L 304, 22.11.2011, p. 18).

Declaration concerning the use of brut nature and extra brut

EXISTING MEASURES

Headnotes

1. The Schedules of New Zealand and the Union set out, under Articles 10.10 (Non-conforming measures) and 10.18 (Non-conforming measures), the existing measures of New Zealand and the Union that do not conform with obligations imposed by:

- (a) Article 10.5 (Market access) or 10.14 (Market access);
- (b) Article 10.15 (Local presence);
- (c) Article 10.6 (National treatment) or 10.16 (National treatment);
- (d) Article 10.7 (Most-favoured-nation treatment) or 10.17 (Most-favoured-nation treatment);
- (e) Article 10.8 (Senior management and boards of directors); or
- (f) Article 10.9 (Performance requirements).

2. The reservations of a Party are without prejudice to the rights and obligations of the Parties under GATS.

3. Each entry sets out the following elements:

- (a) "sector" refers to the general sector in which the entry is made;
- (b) "sub-sector" refers to the specific sector in which the entry is made;
- (c) "industry classification" refers, where applicable, to the activity covered by the entry according to the CPC, ISIC Rev. 3.1, or as expressly otherwise described in the entry;
- (d) "obligations concerned" specifies the obligation referred to in paragraph 1 for which an entry is made;
- (e) "level of government" indicates the level of government maintaining the listed measure;

- (f) "measures" identifies the law, regulation or other measure for which the entry is made. A "measure" cited in the "measures" element:
- (i) means the measure as amended, continued or renewed as of the date of entry into force of this Agreement;
 - (ii) includes any subordinate measure adopted or maintained under the authority of and consistent with the measure; and
 - (iii) in respect of the Schedule of the Union, includes any law, regulation or other measure which implements a directive at Member State level; and
- (g) "description" sets out the non-conforming aspects of the existing measure for which the entry is made.

4. In the interpretation of an entry, all elements of the entry shall be considered. An entry shall be interpreted in light of the relevant obligations of the Sections or Sub-Sections against which the entry is made. In the event of an inconsistency between the "measures" element and the other elements of an entry, the "measures" element shall prevail.

5. For the purposes of the Schedules of New Zealand and the Union:

- (a) "ISIC Rev. 3.1" means the International Standard Industrial Classification of All Economic Activities as set out in Statistical Office of the United Nations, Statistical Papers, Series M, No. 4, ISIC Rev. 3.1, 2002;
- (b) "CPC" means the Provisional Central Product Classification (Statistical Papers, Series M, No. 77, Department of International Economic and Social Affairs, Statistical Office of the United Nations, New York, 1991).

6. For the purposes of the Schedules of New Zealand and the Union, an entry for a requirement to have a local presence in the territory of the Union or New Zealand is made against Article 10.15 (Local presence), and not against Article 10.14 (Market access) or 10.16 (National treatment). Furthermore, such a requirement is not made as an entry against Article 10.56 (Access to major suppliers' essential facilities).

7. An entry made at the level of the Union applies to a measure of the Union, to a measure of a Member State at the central level or to a measure of a government within a Member State, unless the entry excludes a Member State. An entry for a Member State applies to a measure of a government at the central, regional or local level within that Member State. For the purposes of the entries of Belgium, the central level of government covers the federal government and the governments of the regions and the communities as each of them holds equipollent legislative powers. For the purposes of the entries of the Union and its Member States, a regional level of government in Finland means the Åland Islands. An entry made at the level of New Zealand applies to a measure of the central government or a local government.

8. The list of entries in this Annex does not include measures relating to qualification requirements and procedures, technical standards and licensing requirements and procedures where they do not constitute a limitation within the meaning of Article 10.5 (Market access), 10.14 (Market access), 10.6 (National treatment), 10.16 (National treatment) or Article 10.15 (Local presence). Such measures may include, in particular, the need to obtain a licence, to satisfy a universal service obligation, to have a recognised qualification in a regulated sector, to pass a specific examination, including a language examination, to fulfil a membership requirement of a particular profession, such as membership in a professional organisation, to have a local agent for service, or to maintain a local address, or any other non-discriminatory requirements that certain activities may not be carried out in protected zones or areas. While not listed, such measures continue to apply.

9. For greater certainty, for the Union, the obligation to grant national treatment does not entail the requirement to extend to persons of New Zealand the treatment granted in a Member State, pursuant to the TFEU, or any measure adopted pursuant to that Treaty, including their implementation in the Member States, to:

- (a) natural persons or residents of another Member State; or
- (b) juridical persons constituted or organised under the law of another Member State or of the Union and having their registered office, central administration or principal place of business in the Union.

10. Treatment granted to juridical persons established by investors of a Party in accordance with the law of the other Party (including, in the case of the Union, the law of a Member State) and having their registered office, central administration or principal place of business within that other Party, is without prejudice to any condition or obligation, consistent with Section B (Investment liberalisation) of Chapter 10 (Investment liberalisation and trade in services), which may have been imposed on such juridical person when it was established in that other Party, and which shall continue to apply.

11. The Schedules apply only to the territories of New Zealand and the Union in accordance with Article 1.4 (Territorial application) and are only relevant in the context of trade relations between the Union and its Member States with New Zealand. They do not affect the rights and obligations of the Member States under Union law.

12. For greater certainty, non-discriminatory measures do not constitute a market access limitation within the meaning of Article 10.5 (Market access) or Article 10.14 (Market access) for any measure:

- (a) requiring the separation of the ownership of infrastructure from the ownership of the goods or services provided through that infrastructure to ensure fair competition, for example in the fields of energy, transportation and telecommunications;
- (b) restricting the concentration of ownership to ensure fair competition;
- (c) seeking to ensure the conservation and protection of natural resources and the environment, including a limitation on the availability, number and scope of concessions granted, and the imposition of a moratorium or ban;

- (d) limiting the number of authorisations granted because of technical or physical constraints, for example telecommunications spectra and frequencies; or
- (e) requiring that a certain percentage of the shareholders, owners, partners, or directors of an enterprise be qualified or practice a certain profession such as lawyers or accountants.

13. With respect to computer services, any of the following services shall be considered as computer and related services, regardless of whether they are delivered via a network, including the Internet:

- (a) consulting, adaptation, strategy, analysis, planning, specification, design, development, installation, implementation, integration, testing, debugging, updating, support, technical assistance or management of or for computers or computer systems;
- (b) computer programmes defined as the sets of instructions required to make computers work and communicate (in and of themselves), as well as consulting, strategy, analysis, planning, specification, design, development, installation, implementation, integration, testing, debugging, updating, adaptation, maintenance, support, technical assistance, management or use of or for computer programmes;
- (c) data processing, data storage, data hosting or database services;

- (d) maintenance and repair services for office machinery and equipment, including computers;
and
- (e) training services for staff of clients, related to computer programmes, computers or computer systems, and not elsewhere classified.

For greater certainty, services enabled by computer and related services, other than those listed in points (a) to (e), shall not be regarded as computer and related services in themselves.

14. With respect to financial services, unlike foreign subsidiaries, branches established directly in a Member State by a non-European Union financial institution are not, with certain limited exceptions, subject to prudential regulations harmonised at Union level which enable such subsidiaries to benefit from enhanced facilities to set up new establishments and to provide Cross-border services throughout the Union. Therefore, such branches receive an authorisation to operate in the territory of a Member State under conditions equivalent to those applied to domestic financial institutions of that Member State, and may be required to satisfy a number of specific prudential requirements such as, in the case of banking and securities, separate capitalisation and other solvency requirements, and reporting and publication of accounts requirements or, in the case of insurance, specific guarantee and deposit requirements, a separate capitalisation, and the localisation in the Member State concerned of the assets representing the technical reserves and at least one third of the solvency margin.

15. With respect to Article 10.5 (Market access), juridical persons supplying financial services and constituted under the law of New Zealand or the law of the Union or of at least one of its Member States, are subject to non-discriminatory limitations on legal form.³⁴

In EE: If the residence of at least half of the members of the management board of a private limited company, a public limited company or the branch of a foreign company is not in Estonia, in another Member State of the EEA or in the Swiss Confederation, the private limited company, the public limited company or the branch of the foreign company shall designate a point of contact whose Estonian address can be used for the delivery of the procedural documents of the undertaking and the declarations of intent addressed to the undertaking (i.e. the branch of a foreign company).

For all sectors except legal services, establishment by non-European Union investors and their enterprises may only be in the form of a limited partnership, limited joint-stock partnership, limited liability company, and joint-stock company, while domestic investors and enterprises also have access to the forms of non-commercial partnership companies (general partnership and unlimited liability partnership).

Measures:

PL:

(b) Acquisition of real estate

With respect to Investment liberalisation – National treatment:

In AT (applies to the regional level of government): The acquisition, purchase and rental or leasing of real estate by non-European Union natural persons and enterprises requires authorisation by the competent regional authorities (Länder). Authorisation will only be granted if the acquisition is considered to be in the public (in particular economic, social and cultural) interest.

In CY: Cypriots or persons of Cypriot origin, as well as nationals of a Member State, may acquire any property in Cyprus without restrictions. A foreigner may not acquire, otherwise than mortis causa, any immovable property without obtaining a permit from the Council of Ministers. For foreigners, where the acquisition of immovable property exceeds the extent necessary for the erection of premises for a house or professional roof, or otherwise exceeds the extent of two donums (2,676 square meters), any permit granted by the Council of Ministers shall be subject to such terms, limitations, conditions and criteria which are set by Regulations made by the Council of Ministers and approved by the House of Representatives. A foreigner is any person who is not a citizen of the Republic of Cyprus, including a foreign-controlled company. The term does not include foreigners of Cypriot origin or non-Cypriot spouses of citizens of the Republic of Cyprus.

In CZ: Specific rules apply to agricultural land under state ownership. State agricultural land may be acquired only by Czech nationals, nationals of another Member State, or States party to the Agreement on the EEA or the Swiss Confederation. Juridical persons may acquire state agricultural land from the state only if they are agricultural entrepreneurs in the Czech Republic or persons with similar status in other Member States of the European Union, or States party to the Agreement on the EEA or the Swiss Confederation.

In DK: Natural persons who are not resident in Denmark, and who have not previously been resident in Denmark for a total period of five years, must in accordance with the Danish Acquisition Act obtain permission from the Ministry of Justice to acquire title to real property in Denmark. This also applies for juridical persons that are not registered in Denmark. For natural persons, acquisition of real property will be permitted if the applicant is going to use the real property as their primary residence.

For juridical persons that are not registered in Denmark, acquisition of real property will in general be permitted, if the acquisition is a prerequisite for the business activities of the purchaser. Permission is also required if the applicant is going to use the real property as a secondary dwelling. Such permission will only be granted if, following an overall and concrete assessment, the applicant is regarded to have particularly strong ties to Denmark.

Permission under the Acquisition Act is only granted for the acquisition of specific real property. The acquisition of agricultural land is in addition governed by the Danish Agricultural Holdings Act, which imposes restrictions on all persons, Danish or foreign, when acquiring agricultural property. Accordingly, any person who wishes to acquire agricultural real property, must fulfil the requirements in this Act. This generally means a limited residence requirement on the agricultural holding applies. The residence requirement is not personal. Juridical entities must be of the types listed in §20 and §21 of the Act and must be registered in the Union or EEA.

In EE: A juridical person from an OECD Member State has the right to acquire immovable property which contains:

- (i) less than 10 hectares of agricultural land, forest land or agricultural and forest land in total without restrictions;
- (ii) 10 hectares or more of agricultural land if the juridical person has been engaged, for three years immediately preceding the year of making the transaction of acquisition of immovable property, in production of agricultural products listed in Annex I to the TFEU, except fishery products and cotton (hereinafter referred to as "agricultural products");

- (iii) 10 hectares or more of forest land if the juridical person has been engaged, for three years immediately preceding the year of making the transaction of acquisition of immovable property, in forest management within the meaning of the Forest Act (hereinafter referred to as "forest management") or production of agricultural products; and
- (iv) less than 10 hectares of agricultural land and less than 10 hectares of forest land, but 10 hectares or more of agricultural and forest land in total, if the juridical person has been engaged, for three years immediately preceding the year of making the transaction of acquisition of immovable property, in the production of agricultural products or forest management.

If a juridical person does not meet the requirements in points (ii) to (iv), the juridical person may acquire immovable property which contains 10 hectares or more of agricultural land, forest land or agricultural and forest land in total only with the authorisation of the council of the local government of the location of immovable property to be acquired.

Restrictions on acquiring immovable property apply in certain geographical areas for non-EEA nationals.

In EL: Real estate acquisition or tenancy in the border regions is prohibited for persons whose nationality or base is outside the Member States and the European Free Trade Association. The ban may be lifted by a discretionary decision taken by a committee of the appropriate Decentralized Administration (or the Minister of National Defense in case the properties to be exploited belong to the Fund for the Exploitation of Private Public Property).

In HR: Foreign companies are only allowed to acquire real estate for the supply of services if they are established and incorporated in Croatia as juridical persons. Acquisition of real estate necessary for the supply of services by branches requires the approval of the Ministry of Justice. Agricultural land cannot be acquired by foreigners.

In MT: Non-nationals of a Member State may not acquire immovable property for commercial purposes. Companies with a 25 % (or more) non-European Union shareholding must obtain authorisation from the competent authority (Minister responsible for Finance) to buy immovable property for commercial or business purposes. The competent authority will determine whether the proposed acquisition represents a net benefit to the Maltese economy.

In PL: The acquisition of real estate, direct and indirect, by foreigners requires a permit. A permit is issued through an administrative decision by a minister competent in internal affairs, with the consent of the Minister of National Defence, and in the case of agricultural real estate, also with the consent of the Minister of Agriculture and Rural Development.

Description:

(a) Legal services (part of CPC 861)³⁵

For greater certainty, consistent with the Headnotes, in particular paragraph 8 requirements to register with a Bar may include a requirement to have obtained a law degree in the host country or its equivalent, or to have completed some training under the supervision of a licensed lawyer, or to have an office or a postal address within the jurisdiction of a specific Bar in order to be eligible to apply for membership in that Bar. Some Member States may impose a requirement of having the right to practise host-jurisdiction law on natural persons holding certain positions within a law firm, company, enterprise or for shareholders.

³⁵ For the purposes of this reservation:

- (a) "domestic law" means the law of the specific Member State and Union law;
- (b) "public international law" excludes European Union law and includes law established by international treaties and conventions, as well as international customary law;
- (c) "legal advice" includes provision of advice to and consultation with clients in matters including transactions, relationships and disputes, involving the application or interpretation of law; participation with or on behalf of clients in negotiations and other dealings with third parties in such matters; and preparation of documents governed in whole or in part by law; and the verification of documents of any kind for purposes of and in accordance with the requirements of law;
- (d) "legal representation" includes preparation of documents intended to be submitted to administrative agencies, the courts or other duly constituted official tribunals; and appearances before administrative agencies, the courts or other duly constituted official tribunals; and
- (e) "legal arbitration, conciliation and mediation" means the preparation of documents to be submitted to, the preparation for and appearance before, an arbitrator, conciliator or mediator in any dispute involving the application and interpretation of law. It does not include arbitration, conciliation and mediation services in disputes not involving the application and interpretation of law, which fall under services incidental to management consulting. It also does not include acting as an arbitrator, conciliator or mediator. As a sub-category, international legal arbitration, conciliation or mediation services refers to the same services when the dispute involves parties from two or more countries.

(Part of CPC 861)

In AT: EEA or Swiss nationality as well as residency (commercial presence) is required for the practice of legal services in respect of domestic (Union and Member State) law, including representation before courts. Only lawyers of EEA or Swiss nationality may provide legal services through commercial presence. The practice of legal services in respect of public international law and home country law is only allowed on a Cross-border basis. Equity participation and shares in the operating result of any law firm by foreign lawyers (who must be fully qualified in their home country) is allowed up to 25 %; the rest must be held by fully qualified EEA or Swiss lawyers and only the latter may exercise decisive influence in the decision making of the law firm.

In BE (with respect also to most-favoured-nation treatment): Residency is required for full admission to the Bar, and is necessary for the practice of legal services in respect of Belgian domestic law, including representation before courts. The residency requirement for a foreign lawyer to obtain full admission to the Bar is at least six years from the date of application for registration, or three years under certain conditions. Reciprocity is required.

A foreign lawyer may practise as a legal consultant. A lawyer who is a member of a foreign (non-EU) Bar and wants to establish in Belgium but who does not meet the conditions for registration on the Tableau of fully qualified lawyers, on the EU-list or on the List of Trainee Lawyers, may request registration on the so-called "B-List". A B-List only exists at the Brussels Bar. A lawyer on the B-list may give advice. Representation before "the Cour de Cassation" is subject to nomination on a specific list.

A country in respect of which mutuality exists shall be designated by the Minister of Justice, upon request of the Chairperson of the Supreme Bar Council. In order to provide legal mediation, a foreign national must have a permit for long-term or permanent residence in the Republic of Bulgaria and have been entered in the Uniform Register of Mediators with the Minister of Justice. In Bulgaria, full national treatment with respect to the establishment and operation of companies, as well as with respect to the supply of services, may be extended only to companies established in, and citizens of, countries with which a bilateral agreement on mutual legal assistance has been or will be concluded

Other employees in the firm may collectively only own less than 10 % of the shares and voting rights, and in order to be shareholders they must pass an exam on the rules of particular importance for the practice of law.

Only advocates who actively practice law in a law firm, its parent company or its subsidiary company, as well as other shareholders, and representatives of employees, may be members of the board of a firm. Only law firms where the shares belong exclusively to lawyers admitted to the Portuguese Bar may practise in Portugal.

In BG: The activities of prospecting or exploration of underground natural resources in the territory of the Republic of Bulgaria, in the continental shelf and in the exclusive economic zone in the Black Sea are subject to permission, while the activities of extraction and exploitation are subject to concession granted under the Underground Natural Resources Act.

It is forbidden for companies registered in preferential tax treatment jurisdictions (that is, offshore zones) or related, directly or indirectly, to such companies to participate in open procedures for granting permits or concessions for prospecting, exploration or extraction of natural resources, including uranium and thorium ores, as well as to operate an existing permit or concession which has been granted, as such operations are precluded, including the possibility to register the geological or commercial discovery of a deposit as a result of exploration.

The mining of uranium ore is closed by Decree of the Council of Ministers No. 163 of 20.08.1992.

With regard to exploration and mining of thorium ore, the general regime of permits and concessions applies. Decisions to allow the exploration or mining of thorium ore are taken on a non-discriminatory individual case-by-case basis.

According to the Decision of the National Assembly of the Republic of Bulgaria of 18 Jan 2012 (ch. 14 June 2012) any usage of hydraulic fracturing technology (that is, fracking) for activities of prospecting, exploration or extraction of oil and gas is forbidden.

- b) group financial statements under the Companies Act 1993, and if the group's New Zealand business meets the asset and revenue thresholds that apply in respect of "large" overseas companies, the group financial statements that are prepared must include, in addition to the financial statements of the group, financial statements for the group's New Zealand business prepared as if the members of the group were companies formed and registered in New Zealand.

Headnotes

1. The Schedules of New Zealand and the Union set out, under Article 10.10 (Non-conforming measures) or Article 10.18 (Non-conforming measures), the entries made by New Zealand and the Union with respect to existing, or more restrictive or new measures that do not conform with obligations imposed by:

- (a) Article 10.5 (Market access) or 10.14 (Market access);
- (b) Article 10.15 (Local presence);
- (c) Article 10.6 (National treatment) or 10.16 (National treatment);
- (d) Article 10.7 (Most-favoured-nation treatment) or 10.17 (Most-favoured-nation treatment);
- (e) Article 10.8 (Senior management and boards of directors); or
- (f) Article 10.9 (Performance requirements).

2. The reservations of a Party are without prejudice to the rights and obligations of the Parties under GATS.

3. Each entry sets out the following elements:
 - (a) "sector" refers to the general sector in which the entry is made;
 - (b) "sub-sector" refers to the specific sector in which the entry is made;
 - (c) "industry classification" refers, where applicable, to the activity covered by the entry according to the CPC, ISIC Rev. 3.1, or as otherwise expressly described in that entry;
 - (d) "obligations concerned" specifies the obligation referred to in paragraph 1 for which an entry is made;
 - (e) "description" sets out the scope of the sector, sub-sector or activities covered by the entry; and
 - (f) "existing measures" identifies, for transparency purposes, existing measures that apply to the sector, sub-sector or activities covered by the entry.

4. In the interpretation of an entry, all elements of the entry shall be considered. Where an inconsistency arises in relation to the interpretation of an entry, the "description" element of the entry shall prevail.

5. For the purposes of the Schedules of New Zealand and the Union:

- (a) "ISIC Rev. 3.1" means the International Standard Industrial Classification of All Economic Activities as set out in Statistical Office of the United Nations, Statistical Papers, Series M, No.4, ISIC Rev. 3.1, 2002; and
- (b) "CPC" means the Provisional Central Product Classification (Statistical Papers, Series M No. 77, Department of International Economic and Social Affairs, Statistical Office of the United Nations, New York, 1991).

6. For the purposes of the Schedules of New Zealand and the Union, an entry for a requirement to have a local presence in the territory of the Union or New Zealand is made against Article 10.15 (Local presence), and not against Article 10.14 (Market access) or 10.16 (National treatment). Furthermore, such a requirement is not made as a reservation against Article 10.6 (National treatment).

7. An entry made at the level of the Union applies to a measure of the Union, to a measure of a Member State at the central level or to a measure of a government within a Member State, unless the entry excludes a Member State. An entry for a Member State applies to a measure of a government at the central, regional or local level within that Member State. For the purposes of the entries of Belgium, the central level of government covers the federal government and the governments of the regions and the communities as each of them holds equipollent legislative powers. For the purposes of the entries of the Union and its Member States, a regional level of government in Finland means the Åland Islands. An entry made at the level of New Zealand applies to a measure of the central government or a local government.

8. The list of entries in this Annex (Future Measures) does not include measures relating to qualification requirements and procedures, technical standards and licensing requirements and procedures where they do not constitute a limitation within the meaning of Article 10.5 (Market access), 10.14 (Market access), 10.6 (National treatment), 10.16 (National treatment) or 10.15 (Local presence). These measures may include the need to obtain a licence, to satisfy a universal service obligation, to have a recognised qualification in regulated sectors, to pass a specific examination, including a language examination, to fulfil a membership requirement of a particular profession, such as membership in a professional organisation, to have a local agent for service, or to maintain a local address, or any other non-discriminatory requirements that certain activities may not be carried out in protected zones or areas. While not listed, such measures continue to apply.

9. For greater certainty, for the Union, the obligation to grant national treatment does not require the extension to natural or juridical persons of New Zealand of the treatment granted in a Member State, pursuant to the TFEU, or any measure adopted pursuant to that Treaty, including their implementation in the Member States, to:

- (a) natural persons or residents of another Member State; or
- (b) juridical persons constituted or organised under the law of another Member State or of the Union and having their registered office, central administration or principal place of business in the Union.

10. Treatment granted to juridical persons established by investors of a Party in accordance with the law of the other Party (including, in the case of the Union, the law of a Member State) and having their registered office, central administration or principal place of business within that other Party, is without prejudice to any condition or obligation, consistent with Section B (Investment liberalisation) of Chapter 10 (Investment liberalisation and trade in services), which may have been imposed on such juridical person when it was established in that other Party, and which shall continue to apply.

11. The Schedules apply only to the territories of New Zealand and the Union in accordance with Article 1.4 (Territorial application) and are only relevant in the context of trade relations between the Union and its Member States with New Zealand. They do not affect the rights and obligations of the Member States under Union law.

12. For greater certainty, non-discriminatory measures do not constitute a market access limitation within the meaning of Article 10.5 (Market access) or Article 10.14 (Market access) for any measure:

- (a) requiring the separation of the ownership of infrastructure from the ownership of the goods or services provided through that infrastructure to ensure fair competition, for example in the fields of energy, transportation and telecommunications;
- (b) restricting the concentration of ownership to ensure fair competition;
- (c) seeking to ensure the conservation and protection of natural resources and the environment, including a limitation on the availability, number and scope of concessions granted, and the imposition of a moratorium or ban;
- (d) limiting the number of authorisations granted because of technical or physical constraints, for example telecommunications spectra and frequencies; or
- (e) requiring that a certain percentage of the shareholders, owners, partners, or directors of an enterprise be qualified or practice a certain profession such as lawyers or accountants.

13. With respect to computer services, any of the following services shall be considered as computer and related services, regardless of whether they are delivered via a network, including the Internet:

- (a) consulting, adaptation, strategy, analysis, planning, specification, design, development, installation, implementation, integration, testing, debugging, updating, support, technical assistance or management of or for computers or computer systems;
- (b) computer programmes defined as the sets of instructions required to make computers work and communicate (in and of themselves), as well as consulting, strategy, analysis, planning, specification, design, development, installation, implementation, integration, testing, debugging, updating, adaptation, maintenance, support, technical assistance, management or use of or for computer programmes;
- (c) data processing, data storage, data hosting or database services;
- (d) maintenance and repair services for office machinery and equipment, including computers; and
- (e) training services for staff of clients, related to computer programmes, computers or computer systems, and not elsewhere classified.

For greater certainty, services enabled by computer and related services, other than those listed in points (a) to (e), shall not be regarded as computer and related services in themselves.

14. With respect to financial services, unlike foreign subsidiaries, branches established directly in a Member State by a non-European Union financial institution are not, with certain limited exceptions, subject to prudential regulations harmonised at Union level which enable such subsidiaries to benefit from enhanced facilities to set up new establishments and to provide Cross-border services throughout the Union. Therefore, such branches receive an authorisation to operate in the territory of a Member State under conditions equivalent to those applied to domestic financial institutions of that Member State, and may be required to satisfy a number of specific prudential requirements such as, in the case of banking and securities, separate capitalisation and other solvency requirements and reporting and publication of accounts requirements or, in the case of insurance, specific guarantee and deposit requirements, separate capitalisation, and the localisation in the Member State concerned of the assets representing the technical reserves and at least one third of the solvency margin.

15. With respect to Article 10.5 (Market access), juridical persons supplying financial services and constituted under the laws of New Zealand or the laws of the Union or of at least one of its Member States, are subject to non-discriminatory limitations on legal form.⁵³

⁵³ For example, partnerships and sole proprietorships are generally not acceptable legal forms for financial institutions in New Zealand and the Union. This headnote is not in itself intended to affect, or otherwise limit, a choice by a financial institution of the other Party between branches or subsidiaries.

Chapter: Investment liberalisation and trade in services

Description:

The Union reserves the right to adopt or maintain any measure with respect to the following:

(a) Establishment

With respect to Investment liberalisation – Market access:

The EU: Services considered as public utilities at a national or local level may be subject to public monopolies or to exclusive rights granted to private operators.

Public utilities exist in sectors such as related scientific and technical consulting services, R&D services on social sciences and humanities, technical testing and analysis services, environmental services, health services, transport services and services auxiliary to all modes of transport. Exclusive rights with respect to such services are often granted to private operators, for instance operators with concessions from public authorities, subject to specific service obligations. Given that public utilities often also exist at the sub-central level, detailed and exhaustive sector-specific scheduling is not practical. This reservation does not apply to telecommunications and to computer and related services.

In FI: Restrictions on the right for natural persons, who do not enjoy regional citizenship in Åland, and for juridical persons, to acquire and hold real property on the Åland Islands without obtaining permission from the competent authorities of the Åland Islands.

1. Each Party shall ensure that its competent authorities adopt a decision on the application for entry or temporary stay of an intra-corporate transferee, or a renewal of it, and notify the decision to the applicant in writing, in accordance with the notification procedures under its law, as soon as possible but:

Each Party shall ensure that, if the information or documentation supplied in support of an application is incomplete, its competent authorities endeavour to notify the applicant within a reasonable period of time of the additional information that is required and set a reasonable deadline for providing it. The period referred to in paragraph 1 shall be suspended until the competent authorities have received the additional information required.

14. Parts II (Governing principles), III (Disclosure obligations), IV (Independence and impartiality of panellists), paragraph 11 of Part V (Duties of panellists), VI (Obligations of former panellists) and VII (Confidentiality) shall also apply to experts, assistants, and administrative staff.

VI. Obligations of former panellists

15. Each former panellist shall avoid actions that may create the appearance that he or she was biased in carrying out the duties or derived advantage from the decision of the panel.

16. Each former panellist shall comply with the obligations in Part VII (Confidentiality).

VII. Confidentiality

17. A panellist shall not, at any time, disclose any non-public information concerning the proceedings or acquired during the proceedings for which he or she has been appointed. A panellist shall not, in any case, disclose or use such information to gain personal advantage or advantage for others or to adversely affect the interest of others.

18. A panellist shall not disclose a decision of the panel or parts thereof prior to its publication in accordance with Article 26.23(3) (Reports and decisions of the panel).

19. A panellist shall not, at any time, disclose the deliberations of a panel, or any panellist's view, nor make any public statements on the proceedings for which he or she has been appointed or on the issues in dispute in the proceedings.

VIII. Expenses

20. Each panellist shall keep a record and render a final account of the time devoted to the proceedings and of his or her expenses, as well as the time and expenses of his or her assistants and administrative staff.

IX. Mediators

21. This Code of Conduct shall apply to mediators, *mutatis mutandis*.

RULES OF PROCEDURE FOR MEDIATION

I. Objective

1. Further to Article 26.25 (Mediation), the objective of this Annex is to facilitate the finding of a mutually agreed solution through a comprehensive and expeditious procedure with the assistance of a mediator.

II. Request for information

2. At any time before the initiation of the mediation procedure, a Party may deliver a written request for information regarding a measure allegedly adversely affecting trade or investment between the Parties. The Party to which such request is made shall, within 20 days after delivery of the request, deliver a written response containing its comments on the requested information.

3. When the responding Party considers it will not be able to deliver a response within 20 days after delivery of the request referred to in Rule 2, it shall promptly notify the requesting Party, stating the reasons for the delay and providing an estimate of the shortest period within which it will be able to deliver its response.

4. A Party is normally expected to avail itself of this provision before the initiation of the mediation procedure.

III. Initiation of the mediation procedure

5. A Party may at any time request to enter into a mediation procedure with respect to any measure by a Party allegedly adversely affecting trade or investment between the Parties.

6. The request shall be made by means of a written request delivered to the other Party. The request shall be sufficiently detailed to present the concerns of the requesting Party clearly and shall:

- (a) identify the specific measure at issue;
- (b) provide a statement of the adverse effects that the requesting Party considers the measure has, or will have, on trade or investment between the Parties; and
- (c) explain how the requesting Party considers that those adverse effects are linked to the measure.

7. The mediation procedure may only be initiated by mutual agreement of the Parties in order to explore mutually agreed solutions and consider any advice and proposed solutions by the mediator. The Party to which the request is made shall give sympathetic good faith consideration to the request and deliver its written acceptance or rejection to the requesting Party within 10 days after its delivery. Otherwise the request shall be regarded as rejected.

IV. Selection of the mediator

8. The Parties shall endeavour to agree on a mediator within 15 days of the initiation of the mediation procedure.

9. In the event that the Parties are unable to agree on the mediator within the time period set out in Rule 8, either Party may request the co-chair of the Trade Committee from the complaining Party to select the mediator by lot, within five days after the request, from the sub-list of chairpersons established under Article 26.6 (Lists of panellists). The co-chair of the Trade Committee from the complaining Party may delegate such selection by lot of the mediator.

10. Should the sub-list of chairpersons referred to in Article 26.6 (Lists of panellists) not be established at the time a request is made pursuant to Rules 5 to 7 (Initiation of the mediation procedure), the mediator shall be drawn by lot from the individuals formally proposed by one Party or both of the Parties for that sub-list.

11. A mediator shall not be a national of either Party or employed by either Party, unless the Parties agree otherwise.

12. A mediator shall comply with Annex 26–B (Code of conduct for panellists and mediators).

V. Mediation procedure

13. Within 10 days after the appointment of the mediator, the Party which invoked the mediation procedure shall deliver to the mediator and to the other Party a detailed written description of its concerns, in particular of the operation of the measure at issue and its possible adverse effects on trade or investment. Within 20 days after the delivery of such description, the other Party may deliver written comments on such description. Either Party may include any information that it deems relevant in its description or comments.

14. The mediator shall assist the Parties in a transparent manner in bringing clarity to the measure concerned and its possible adverse effects on trade or investment. In particular, the mediator may organise meetings between the Parties, consult the Parties jointly or individually, seek the assistance of, or consult with, relevant experts and stakeholders and provide any additional support requested by the Parties. The mediator shall consult with the Parties before seeking the assistance of, or consulting with, relevant experts and stakeholders.

15. The mediator may offer advice and propose a solution for the consideration of the Parties. The Parties may accept or reject the proposed solution, or agree on a different solution. The mediator shall not advise or comment on the consistency of the measure at issue with this Agreement.

16. The mediation procedure shall take place in the territory of the Party to which the request was addressed, or by mutual agreement in any other location or by any other means.

17. The Parties shall endeavour to reach a mutually agreed solution within 60 days after the appointment of the mediator. Pending a final agreement, the Parties may consider possible interim solutions, particularly if the measure relates to perishable goods, or seasonal goods or services that rapidly lose their trade value.

18. The solution may be adopted by means of a decision of the Trade Committee. Either Party may make the solution subject to the completion of any necessary internal procedures. Mutually agreed solutions shall be made publicly available. The version disclosed to the public shall not contain any information a Party has designated as confidential.

19. Upon request of either Party, the mediator shall deliver a draft factual report to the Parties, providing:

(a) a brief summary of the measure at issue;

- (b) the procedures followed; and
- (c) if applicable, any mutually agreed solution reached, including possible interim solutions.

The mediator shall allow the Parties 15 days to comment on the draft report. After considering the comments of the Parties received, the mediator shall, within 15 days after the delivery of the Parties' comments, deliver a final factual report to the Parties. The factual report shall not include any interpretation of this Agreement.

20. The procedure shall be terminated:

- (a) by the adoption of a mutually agreed solution by the Parties, on the date of the adoption thereof;
- (b) by mutual agreement of the Parties at any stage of the procedure, on the date of that agreement;
- (c) by a written declaration of the mediator, after consultation with the Parties, that further efforts at mediation would be to no avail, on the date of that declaration; or
- (d) by a written declaration of a Party after exploring mutually agreed solutions under the mediation procedure and after having considered any advice and proposed solutions by the mediator, on the date of that declaration.

VI. Confidentiality

21. Unless the Parties agree otherwise, all steps of the mediation procedure, including any advice or proposed solution, are confidential. A Party may disclose to the public the fact that a mediation procedure is taking place.

VII. Relationship to dispute settlement procedures

22. The mediation procedure is without prejudice to each Party's rights and obligations under Sections B (Consultations) and C (Panel procedures) of Chapter 26 (Dispute settlement) or under dispute settlement procedures under any other agreement.

23. A Party shall not rely on, or introduce as evidence, in other dispute settlement procedures under this Agreement or any other agreement, nor shall a panel take into consideration:

- (a) positions taken by the other Party in the course of the mediation procedure or information exclusively gathered under Rule 14 (Mediation procedure);

- (b) the fact that the other Party has indicated its willingness to accept a solution to the measure subject to mediation; or
- (c) advice given or proposals made by the mediator.

24. Unless the Parties agree otherwise, a mediator shall not serve as a member of a panel in dispute settlement procedures under this Agreement or under any other international trade agreement to which both Parties are party involving the same matter for which he or she has been a mediator.

JOINT DECLARATION ON CUSTOMS UNIONS

1. The Union recalls the obligation of those countries that have established a customs union with the Union to align their trade regime to that of the Union, and for certain of them to conclude preferential agreements with countries having preferential agreements with the Union.

2. In this context, New Zealand shall endeavour to start negotiations with those countries that:

(a) have established a customs union with the Union; and

(b) whose goods do not benefit from the tariff concessions under this Agreement,

with a view to concluding a comprehensive bilateral agreement establishing a free trade area in accordance with Article XXIV of GATT 1994.

New Zealand shall endeavour to start negotiations as soon as possible with a view to having a comprehensive bilateral agreement enter into force as quickly as possible after the entry into force of this Agreement.
