15	(5) All sectors of the economy are expected to contribute to achieving those emission reductions, including the road transport sector.	(5) All sectors of the economy are expected to contribute to achieving those emission reductions, including the road transport sector. <u>Heavy-duty vehicles are currently responsible for more than a quarter of greenhouse gas emissions from road transport in the Union and for over 6% of Union's total greenhouse gas emissions, more than those from aviation or maritime transport. The EU's Sustainable and Smart Mobility Strategy aims for a 90% reduction in the transport sector's emissions by 2050, including hard-to-abate sectors like aviation and maritime transport. This requires additional reduction targets for sectors fit for decarbonisation, such as road transport before 2050. That transition should take into account the industrial and social challenges of that process to ensure employment and accessible mobility for all.</u>	(5) All sectors of the economy are expected to contribute to achieving those emission reductions, including the road transport sector.

		<u>preparation of the first review referred to in Article 22(2) of Regulation (EU) .../... of the European Parliament and of the Council on the deployment of alternative fuels infrastructure (AFIR) in order to ensure that the targets set out in that Regulation are aligned with the ambition of this Regulation.</u>		
Recital 13				
24	(13) The transition to climate neutrality requires significant investments in the electricity grids including enhanced capacity, resilience and storage, as well as additional connections. Concerning the heavy-duty vehicles, with the target levels proposed in Article 3a for the year 2030 the share of zero emission vehicles in the total fleet of vehicles circulating on the road as well as the electricity consumption in the sector will remain limited. Therefore the related impact on the electricity grid will remain limited as well.		(13) The transition to climate neutrality requires significant investments investment in the electricity grids grid including enhanced capacity, resilience and storage, as well as additional connections. In view of the CO₂ emissions reduction targets for heavy-duty vehicles Concerning the heavy-duty vehicles, with the target levels proposed in Article 3a for the year 2030 established under this Regulation, the share of zero-emission zero-emission heavy-duty vehicles in the total fleet of heavy-duty vehicles circulating on the road as well as and electricity consumption in the sector will remain limited. Therefore the related impact on the	

Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		electricity grid will remain limited as well.	
Recital 13a			
24a	<u>(13a) While the strengthened CO₂ reduction targets will accelerate the uptake of zero-emission vehicles, a significant part of the stock of heavy-duty vehicles on the roads will remain internal combustion engine vehicles for a long time. With an emission reduction target of 90%, the share of new heavy-duty vehicles placed on the market that are not zero-emission is projected to be around 15% in 2040, while the total fleet on the roads in 2040 is projected to consist of 65% internal combustion engine vehicles. In order for this part of the fleet to contribute to the achievement of the Union's climate targets, further innovation and an accelerated uptake of sustainable renewable fuels is essential. Existing Union policies and legal instruments, in particular the Renewable Energy Directive and the EU Emission Trading System, will promote the decarbonisation of transport fuels, with the aim of</u>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<u>phasing out fossil fuels. The Commission should further develop a coherent framework of incentives for advanced biofuels and bioogas and renewable fuels of non-biological origin in all relevant sectors including this part of the heavy-duty vehicles fleet. That framework should address barriers to the uptake and supply in a comprehensive way, taking into account the demand across economic sectors, in the context of the overall efforts to reach the Union's climate targets. Building on the objectives for biomethane in the RePowerEU plan, the Commission should also address how the scale-up of the production of biomethane in the Union can contribute to the decarbonisation of the economy including the transport sector.</u>		
Recital 14				
25	(14) Manufacturers should be provided with sufficient flexibility in adapting their fleets over time in order to manage the transition towards zero-emission vehicles in a cost-efficient manner, and it is therefore appropriate to maintain		(14) Manufacturers– should be provided with sufficient flexibility in adapting their heavy-duty vehicle fleets over time in order to manage the transition towards zero-emission heavy-duty vehicles in a cost-efficient manner, and . It is	

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
	the approach of decreasing target levels in five-year steps.		therefore appropriate to maintain the approach of decreasing strengthening target levels in five-year steps.	
Recital 14a				
25a		<u>(14a) Access to training and reskilling in numerous sectors, including the heavy-duty vehicles sector that needs to undergo fundamental changes, is crucial for a socially just transition. The heavy-duty vehicles industry needs to make sure employees have access to reskilling opportunities, and are encouraged to take these, at no cost of their own. To ensure a fair and effective transition, mapping and analysing the predicted changes to the job market of the heavy duty vehicles industry is crucial.</u>
