COMMISSION STAFF WORKING DOCUMENT
EXECUTIVE SUMMARY OF THE EVALUATION

Accompanying the document

Recommendation for a

COUNCIL DECISION

**authorising the opening of negotiations on behalf of the European Union for a new
Implementing Protocol to the Fisheries Partnership Agreement with the Republic of
Côte d'Ivoire**

{COM(2024) 48 final} - {SWD(2024) 22 final}

In the framework of the external dimension of the EU's Common Fishery Policy (CFP)¹, the Commission negotiates and implements the implementing protocols to Sustainable Fisheries Partnership Agreements (SFPAs) with third countries. The SFPAs create a legal, environmental economic and social governance framework for fishing activities carried out by Union fishing vessels in third country waters. In exchange, the EU provides a partner country with financial compensation for access to its waters and financial assistance to implement a national strategy for fisheries and blue economy. The EU contribution is complemented by fees payable by EU vessel owners.

According to Article 31(10) of the CFP Basic Regulation¹, the European Commission shall arrange for independent ex-ante and ex-post evaluations for each implementing protocol to a SFPA, before it submits to the Council of the EU a recommendation to authorise the opening of negotiations for a successor protocol.

This Staff Working Document (SWD) makes an ex-ante and an ex-post evaluation covering the application of the current implementing Protocol (hereinafter, the implementing Protocol) of the Fisheries Partnership Agreement concluded between the EU and the Republic of Côte d'Ivoire (hereinafter, the Agreement). These evaluations are primarily informed by an independent evaluation study conducted by an external consultant².

The ex-post evaluation covers most (up to June 2023) of the period of application of the current implementing Protocol of the Agreement, applying from the 1st August 2019 to 31 July 2024. It provides an overall assessment of the implementing Protocol, drawing conclusions in terms of its effectiveness, efficiency, relevance, coherence, acceptance, EU added value of the intervention. The detailed evaluation questions corresponding to these evaluation criteria can be found in Annex III and further addressed in section 4.

The ex-ante evaluation analyses the relevant objectives for the Agreement and its implementing protocol, considering the current and future needs for this intervention. It considers the lessons learned from previous implementing protocols and the results of the ex-post evaluation of the current implementing Protocol. Finally, it considers and draws conclusions on the possible impacts from the following two policy options:

- A negotiation of a new implementing Protocol for the Agreement;
- No negotiation of an implementing protocol for the Agreement.

The ex-ante evaluation identifies the following preferred policy option: the negotiation of a new implementing protocol for the Agreement, with some adjustments. In terms of the access and technical component, these adjustments would aim to ensure greater information sharing on the effective use of the fishing opportunities and dialogue on social conditions for Ivorians seafarers. In terms of the sectoral support component, adjustments should be sought to enable parties effectively implementing agreed priorities, in line with the National Development Policy for Livestock, Fisheries and Aquaculture of Côte d'Ivoire. It should in particular ensure continued cooperation on ocean governance, fisheries

science, monitoring and control, the fight against illegal, unreported and unregulated (IUU fishing). The implementation pace should be improved, through an improved planning and programme definition.
