# EXPLANATORY MEMORANDUM

## 1. CONTEXT OF THE PROPOSAL

### • Reasons for and objectives of the proposal

On the basis of the negotiating directives adopted by the Council in December 2014, the Commission has negotiated a far-reaching association agreement with Andorra and San Marino providing for the participation of these countries in the European Unions's internal market and for the cooperation outside the four freedoms. In its conclusions adopted in June 2022, the Council called on the Commission to finalise the negotiations by the end of 2023. On 7 December 2023, the negotiations were completed and an Association Agreement was agreed at the level of the Chief Negotiators. The negotiations were conducted in consultation with the Council's EFTA Working Party. The European Parliament has been informed about the outcome of the negotiations.

The attached proposal constitutes the legal instrument for authorising the signing and provisional application of the Agreement establishing an association between the European Union ('EU') and the Principality of Andorra ('Andorra') and the Republic of San Marino ('San Marino'), respectively (hereinafter referred to as 'the Agreement').

The Agreement provides for the participation of Andorra and San Marino, respectively, to a homogenous extended internal market under equal conditions of competition and respect of the same rules, and related horizontal and flanking policies, while also replacing the current customs unions between the EU and each of these countries.

In addition, the Agreement includes a framework for possible cooperation in policy areas outside the four freedoms such as research and development, education, social policy, the environment, consumer protection, culture and regional cooperation.

To ensure the effective functioning of the internal market, the Agreement foresees dynamic regulatory alignment. It also provides for the Commission as the responsible authority in charge of applying EU law on State aid in Andorra and San Marino. The Agreement further includes provisions establishing a dispute settlement mechanism with the Court of Justice of the European Union as arbiter for disputes on the interpretation and application of the Agreement.

Finally, the situation of Andorra and San Marino as small-sized States is taken into account, in accordance with Declaration 3 on Article 8 of the Treaty on European Union (TEU) [1]. This is reflected in a number of adaptations to the provisions of EU legal acts included in the annexes to the Agreement, as well as in several transitional periods for the implementation and application of parts of the EU acquis. Sectoral adaptations concern in particular the area of free movement of persons where quantitative limits regarding certain types of residence inspired by those agreed with Liechtenstein in the Agreement on the European Economic Area[2] are foreseen. Transitional periods are also provided for in areas such as telecommunications, transport or energy. Specific adaptations are also included concerning the absence of a certain industrial sector such as parts of the transport sector.

The Agreement also allows for a staggered access to the EU's internal market for financial services, whereby Andorra and San Marino may decide not to seek access to the entire EU internal market for financial services. This possibility should not last longer than 15 years

[1] Declaration on Article 8 of the Treaty on European Union: "*The Union will take into account the particular situation of small-sized countries which maintain specific relations of proximity with it*."

after the entry into force of the Agreement. In light of the specificities of Andorra and San Marino and the related specific rules and provisions introduced to cater for orderly and sound market integration, it was necessary to subject market access in the area of financial services to specific additional safeguards to those that govern relations between Member States in the internal market, in particular regarding the requirements on local provision of services and emergency powers of the European Supervisory Authorities.

- **Consistency with existing policy provisions in the policy area**

The Agreement is a significant milestone which responds directly, on the one hand, to the EU's objective to develop a special relationship with neighbouring countries as set out in Article 8 TEU and, on the other hand, to these two countries' stated interest in building closer relations with the EU.

The EU's main interests, as stated in the 2012 Commission Communication[3] and 2013 report[4], reflected in subsequent Council conclusions, and eventually in the Council's negotiating directives, include the contribution that closer economic ties could make to greater employment, trade and investment activity in EU regions neighbouring these countries. Given the obstacles to the small countries' access to the EU's internal market and cooperation in other areas, there would be significant potential to develop relations further for mutual benefit by breaking down barriers to cross-border economic activity.

In addition, the Agreement establishes a coherent and efficient institutional framework for relations, including institutional provisions to ensure the preservation of the homogeneity and the good functioning of the internal market, the indivisibility of the four freedoms and legal certainty, while taking into account the particular situation of each these countries.

**a) The EU and Andorra**

**• Consistency with other Union policies**

The Agreement is fully consistent with EU policies and fully respects the Treaties, preserving the integrity and the autonomy of the EU legal order. The Agreement will not require the EU to amend its rules, regulations or standards in any regulated area. They promote the values, objectives, and interests of the EU, and ensure the consistency, effectiveness and continuity of its policies and actions.

## 2. LEGAL BASIS, SUBSIDIARITY AND PROPORTIONALITY

**• Legal basis**

The substantive legal basis for the proposed Council Decision on signature is Article 217 of the Treaty on the Functioning of the European Union (TFEU). This legal basis is the most appropriate given the broad scope of the envisaged Agreement.

The procedural legal basis is Article 218(5) TFEU, read in conjunction with the second subparagraph of Article 218(8) TFEU which provides for unanimity voting in the Council.

Thus, the legal basis for the proposed Council Decision is Article 217 TFEU, read in conjunction with Articles 218(5) TFEU and the second subparagraph of Article 218(8) TFEU.

## 3. OTHER ELEMENTS

- **Implementation by bodies established under the Agreement**

The Agreement sets up an institutional framework composed of an Association Committee consisting of representatives of the EU, Andorra and San Marino, as well as a Joint Committee and several Subcommittees between the EU and each of the two countries. The Agreement provides for a mechanism to address failure by one of the Parties to fulfil obligations assumed under the Agreement.

- **Implementation and application of the Agreement**

In accordance with Article 216(2) TFEU, agreements concluded by the Union are binding upon the institutions of the EU and its Member States.

The interim solutions set out below are required for the time of provisional application in order to allow the very voluminous and imminent update of the EU acquis included in the Associated State Protocols and their Annexes, with a view to ensuring dynamic alignment during provisional application:

(a) It is appropriate to authorise the Commission, pursuant to Article 218(7) TFEU, to approve on behalf of the Union certain modifications to the Agreement that are to be adopted by a simplified procedure or by a body set up by the Agreement. Such modifications relate to Article 108 of the Framework Agreement as regards amendments to the Associated State Protocols, excluding their Annexes. The Commission should inform the Council of the above-mentioned proposed modifications in advance. The Council may object to those proposed modifications by a blocking minority of the Council in accordance with Article 16(4) TEU. In that case, the Commission has to reject the proposed modifications on behalf of the Union, without prejudice to the possibility of subsequently making a proposal to the Council in accordance with Article 218(9) TFEU.

(a) It is also appropriate to authorise the Commission, pursuant to Article 218(7) TFEU, to approve on behalf of the Union the position regarding decisions by the Joint Committees that simply extend EU acts included in the Annexes to the Associated State Protocols to Andorra and San Marino respectively, subject to technical adaptations.

To guarantee compliance with the obligations under the Agreement, there are robust enforcement mechanisms. The Agreement also provides for the possibility for the Parties to take measures to protect their interests, such as compensatory measures for the incorrect application of the Agreement, safeguard measures in the event of serious economic, societal and environmental difficulties of a regional nature that are caused by the application of the Agreement or safeguard measures in the event of a terrorist attack or a natural or man-made disaster that affects one of the Parties. It is important for the EU to be fully able to deploy these measures rapidly and effectively. For this purpose, until a specific legislative act regulating the adoption of the above-mentioned measures enters into force in the EU, any decision of the EU to take such measures should be taken by the Commission in accordance with the conditions set out in the corresponding provisions of the Agreement.

- **Detailed explanation of the specific provisions of the proposal**

The Agreement is formed of the following elements: a Framework Agreement; seven Framework Protocols; two Associated State Protocols; and 25 technical Annexes to each Associated State Protocol, containing all EU legal acts falling within the scope of the Agreement.

www.parlament.gv.at

The main elements of the Agreement are the following:

**a) The Framework Agreement**

The Framework Agreement outlines the essential elements for the future association between the EU and Andorra and San Marino respectively, which ensures the participation of Andorra and San Marino to a homogenous extended internal market under equal conditions of competition and respect of the same rules, while at the same time establishing a framework to develop and promote dialogue and cooperation in other areas of common interest. The Framework Agreement foresees that the EU law principle of non-discrimination on grounds of nationality is respected by Andorra and San Marino.

The Framework Agreement also establishes a coherent, effective and efficient institutional framework with a view to ensuring the homogeneity of the internal market and legal certainty for (*inter alia*) economic operators and citizens.

The Agreement provides for the possibility of an application of the Agreement between the EU and one of the Associated States, pending the finalisation of the ratification procedure for the entry into force of the Agreement between the three contracting parties.

**b) Seven Framework Protocols**

The Agreement contains seven Framework Protocols aimed at clarifying and detailing the provisions included in the Framework Agreement.

Among these Framework Protocols, Framework Protocol 1 (on horizontal adaptations) contains a number of general rules, including with regard to the functioning of specific adaptations, including transitional periods and certain derogations.

Framework Protocol 3 (on financial services) is organised on the basis of the following elements:

- access to the EU single market on financial services depends on a comprehensive evaluation on the full and effective implementation of the EU acquis for the financial sector and the robustness of the Associated States' regulatory and supervisory frameworks.
- The Framework Protocol provides for a staggered approach, whereby the Associated States may decide not to seek access to the entire EU internal market for financial services. This possibility will not last longer than 15 years after the entry into force of the Agreement.
- market access requires the adoption by the Commission of a positive recommendation that all necessary conditions set out in the protocol have been fulfilled.
- in case the regulatory or supervisory frameworks of an Associated State show deficiencies, the EU has the possibility to suspend market access.
- local presence and provision of services in the Associated States are required;
- compliance with the anti-money laundering *acquis* is a pre-condition to access the EU market for financial services.
- the European Supervisory Authorities will be instrumental in the auditing process, in which competent authorities of EU Member States may also participate. Furthermore, they will be able to exercise their authority vis-à-vis the Associated States and their financial services sector.

www.parlament.gv.at

The other Framework Protocols cover aspects such as: (a) implementation of competition rules applicable to undertakings; (b) organisation of cooperation in the field of statistics; (c) status of the parliamentary association committee; (d) arbitration procedures; and (e) existing agreements.

**c) Two Associated State Protocols**

The Associated State Protocols contain matters which are strictly bilateral (between the EU and one of the Associated States) such as provisions concerning customs cooperation.

**d) 25 Annexes to each Associated State Protocol**

Each Associated State Protocol is accompanied by 25 Annexes, containing the EU legal acts falling within the scope of the Agreement. The Annexes include several sectoral or specific adaptations to take account of the specificities of Andorra and San Marino arising from their specific relations of proximity with their neighbours, their size and their relatively small populations. The Annexes also include transitional periods for the take-over, implementation, and application of certain EU legal acts by the two countries.

Proposal for a

# COUNCIL DECISION

## on the signing, on behalf of the European Union, and on provisional application of the Agreement establishing an association between the European Union and the Principality of Andorra and the Republic of San Marino respectively

THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union ('TFEU'), and in particular Article 217, in conjunction with Article 218(5) and the second subparagraph of Article 218(8) thereof,

Having regard to the proposal from the European Commission,

Whereas:

(1) On 16 December 2014, the Council authorised the European Commission to negotiate, on behalf of the European Union (the 'Union'), an Association Agreement with the Principality of Andorra ('Andorra'), the Principality of Monaco ('Monaco') and the Republic of San Marino ('San Marino'). Negotiations have been conducted in light of the negotiating directives of 16 December 2014.

(2) On 17 September 2023, Monaco and the European Commission agreed to suspend the negotiations following the observation of both sides that it was impossible to reconcile, on one hand, the negotiating directives of the European Commission and, on the other hand, the limits set by Monaco, aimed in particular at maintaining unchanged the living, working and housing conditions of its nationals in the country.

(3) Taking account of the close historical, geographical, cultural, political and economic links between the Union, Andorra and San Marino, as well as their desire to deepen, diversify and sustain their relations by establishing a comprehensive and coherent legal framework, the negotiations with Andorra and San Marino were completed on 12 December 2023.

(4) The Agreement establishing an association between the Union and Andorra and San Marino, respectively (the 'Agreement') provides for the participation of the two countries in the Union's internal market and related horizontal and flanking policies, while also replacing the current customs unions between the Union and each of these countries. The Agreement also includes a framework for possible cooperation in policy areas outside the four freedoms such as research and development, education, social policy, the environment, consumer protection, culture and regional cooperation.

(5) To ensure the effective functioning of the Union's internal market, the Agreement foresees dynamic regulatory alignment. The Agreement further includes provisions establishing a dispute settlement mechanism with the Court of Justice of the European Union as arbiter for disputes on the interpretation and application of the Agreement.

(6) The situation of Andorra and San Marino as small-sized States is taken into account, in accordance with Declaration 3 on Article 8 of the Treaty on European Union ('TEU'). This is reflected in a number of adaptations to the provisions of Union legal

www.parlament.gv.at

acts included in the annexes to the Agreement, as well as in several transitional periods for the implementation and application of parts of the Union's acquis.

(7) The Agreement allows for a staggered access to the Union's internal market for financial services, whereby Andorra and San Marino may decide not to seek access to the entire EU internal market for financial services. This possibility should not last longer than 15 years after the entry into force of the Agreement.

(8) In light of the specificities of Andorra and San Marino and the related specific rules and provisions introduced to cater for orderly and sound market integration, it was necessary to subject market access in the area of financial services to specific additional safeguards to those that govern relations between Member States in the internal market, in particular regarding the requirements on local provision of services and emergency powers of the European Supervisory Authorities.

(9) Access to the Union's internal market on financial services should therefore depend on a comprehensive evaluation on the full and effective implementation of the Union's acquis for the financial sector and the robustness of Andorra's and San Marino's regulatory and supervisory frameworks and will require the adoption by the European Commission of a positive recommendation that all necessary conditions set out in the Agreement have been fulfilled. The assessment of Andorra's and San Marino's regulatory and supervisory frameworks should be based on rules that are foreseen in the Union's regulatory framework.

(10) The Agreement should be applied, on a provisional basis in accordance with Article 112 thereof, which provides for the provisional application of the Agreement before its entry into force, pending the completion of the procedures for its conclusion.

(11) It is appropriate to define the modalities of the Union's representation in the Association Committee and the Joint Committees established by the Agreement. The European Commission, as provided for in Article 17(1) TEU, is to represent the Union and to express the Union's positions in accordance with the Treaties.

(12) Pursuant to Article 218(7) TFEU, it is also appropriate to define the modalities for deciding on the positions to be taken on the Union's behalf in the Joint Committees established by the Agreement in order to guarantee that the legal acts adopted by the Union in the fields covered by the Agreement are incorporated into the Agreement as soon as possible after their adoption and transmission to Andorra and San Marino with a view to ensuring, to the extent possible, the simultaneous application of those legal acts in the Union and in Andorra and San Marino respectively.

(13) It is appropriate to authorise the European Commission, pursuant to Article 218(7) TFEU, to approve on the Union's behalf certain modifications to the Agreement that are to be adopted by a simplified procedure or by a body set up by the Agreement in accordance with the provisions of that agreement. The procedure of consultation of the Council regarding such modifications should be established.

(14) With a view to enabling the Union to take rapid and effective action to protect its interests in accordance with the Agreement, and until a specific legislative act regulating the adoption of remedial measures under the Agreement is adopted and enters into force in the Union, the European Commission should be empowered to take remedial measures, such as compensatory measures for the incorrect application of the Agreement, safeguard measures in the event of serious economic, societal and environmental difficulties of a regional nature that are caused by the application of the

www.parlament.gv.at

Agreement or safeguard measures in the event of a terrorist attack or a natural or man-made disaster that affects the Union.

(15) The Agreement should be signed, and the attached Declarations, approved, on behalf of the Union.

(16) The European Commission should ensure the signing of the Agreement subject to its conclusion.

Such measures shall cause the least possible disturbance in the functioning of this Agreement and shall not be wider in scope than is strictly necessary to remedy the sudden difficulties which have arisen.

4. When measures are taken as referred to in paragraph 3 of this Article, notice thereof shall be given at the latest by the day of their entry into force, and the exchange of information and consultations referred to in paragraph 2 of this Article shall then take place as soon as possible thereafter.

If, after giving notice to the parties concerned to submit their comments, the European Commission finds that aid granted by an Associated State or through State resources is not compatible with the internal market or that such aid is being misused, it shall decide that the Associated State shall abolish or alter such aid within a period of time to be determined by the Commission.

4. If the Associated State does not comply with that decision within the time limit set, the Commission may refer the matter directly to the Court of Justice of the EU.

The competent authorities of the Associated States and OLAF may enter into administrative arrangements for their cooperation.

   Those arrangements shall be entered into before an Associated State may receive EU funds in connection with its participation in programmes financed by the EU.

   The Associated States shall cooperate with the EU in the fight against fraud and shall commit to gradually bringing their policies and legislation in line with EU anti-fraud provisions without, however, being required to harmonise them. Those provisions are listed in the Associated State Protocols.

The Associated Parties may exchange evidence, analyses or other types of information, including personal data, for the purpose of preventing, detecting, investigating, prosecuting and punishing, administratively and criminally, fraud, corruption, smuggling and any other illegal activity affecting their respective financial interests.

   The information and evidence transmitted or obtained pursuant to this Article, whatever its form, shall be subject to professional confidentiality and shall enjoy the protection enjoyed by comparable information, including of personal data, conferred by the domestic law of the Associated Party receiving it and by the corresponding provisions applicable to the institutions of the EU.

   In particular, such information and evidence shall not be communicated to persons other than those, in the institutions of the EU or the authorities of the Associated States, whose functions require them to know it, nor may it be used for purposes other than those that fall within the scope of this Article.

3. OLAF may carry out on-the-spot checks and inspections on economic operators on the territory of the Associated State concerned where that Associated State is in receipt of EU funds under programmes financed by the EU, where OLAF has been entrusted by the European Commission with budget implementation tasks under those programmes or where fraudulent activities in the Associated State are to the detriment of EU customs duties or other own resources identified by a Decision of the Joint Committee. The competent authorities of the Associated State concerned shall assist OLAF in this respect within the framework of the close cooperation referred to in paragraph 1.

Within the limits of its powers and on the basis of a duly substantiated request to the competent authorities of an Associated State, OLAF may carry out on-the-spot checks and inspections on economic operators on the territory of that Associated State in cases other than those provided for in the first point of this paragraph, provided that the competent authority does not object to that request.

2. In particular, the Associated Parties may exchange information and, at the request of one of them, hold consultations within the Joint Committee in respect of plans or proposals for the establishment or amendment of framework programmes, specific programmes, actions and projects in the fields referred to in Article 64 of the Framework Agreement.

3. Part VII shall apply *mutatis mutandis* with regard to this Part whenever the latter or the Associated State Protocols specifically provide thereof.

(a) The contribution of Associated States, arising from their participation in EU activities, shall be calculated proportionally:

– to the commitment appropriations, and

– the payment appropriations,

entered each year for the EU in its general budget for each budgetary line corresponding to the activities in question.

The proportionality factor determining the contribution of Associated States shall be the sum of the ratios between, on the one hand, the gross domestic product at market prices of each Associated State and, on the other hand, the sum of the gross domestic products at market prices of the EU Member States and of the Associated State concerned. That factor shall be calculated, for each budgetary year, on the basis of the most recent statistical data.

The amount of the contribution of the Associated States shall be additional, both in commitment appropriations and in payment appropriations, to the amounts entered for the EU in the general budget on each line corresponding to the activities concerned.

The contributions to be paid each year by Associated States shall be determined on the basis of the payment appropriations.

Commitments entered into by the EU prior to the participation, on the basis of this Agreement, of Associated States in the activities in question – as well as the payments which result from this – shall give rise to no contribution on the part of the Associated States.

(b) The financial contribution of the Associated States deriving from their participation in certain projects or other activities shall be based on the principle that each Associated State shall cover its own costs and make an appropriate contribution, which shall be fixed by the Joint Committee, to the European Union's overhead costs.

(c) The relevant Joint Committee shall take the necessary decisions concerning the contribution of Associated States to the costs of the activity in question.

2. The detailed provisions for the implementation of this Article shall be set out in the Protocol provided for in Article 72 of the Framework Agreement.

The Associated Parties shall take the necessary steps to develop, strengthen or broaden cooperation within the framework of EU activities in fields not listed in Article 64 of the Framework Agreement, where such cooperation is considered likely to contribute to the attainment of the objectives of this Agreement or otherwise deemed to be of mutual interest. Such steps may include the amendment of Article 64 of the Framework Agreement by the addition of new fields to those listed therein.

In the case of any difficulties, the consultations between the Associated Parties shall be enhanced formally or informally with a view to finding a mutually acceptable solution, including the possibility to take notice of the equivalence of national legislation. The Associated State concerned shall transmit in writing all useful information to the EU to enable an in-depth assessment of the situation.

3. The decisions of Joint Committees pursuant to paragraph 2 of this Article must be taken at the latest at the expiry of a period of six months from the date of referral to the relevant Joint Committee. 3. The competent authorities of the Associated Parties may receive and examine complaints concerning the application of this Agreement. On receiving such complaints, they shall inform the other Associated Party.

ARTICLE 87

Surveillance in specific sectors

1. Where EU legal acts listed in the Annexes confer on the European Commission powers, including decision-making or executive powers, vis-à-vis the competent authorities of the EU Member States, economic operators or individuals, the European Commission shall have the same powers, *mutatis mutandis*, vis-à-vis the Associated States and their natural and legal persons. Specific provisions may be laid down in the Protocols.

2. In order to carry out its tasks in accordance with paragraph 1, the European Commission may request from the competent authorities of the Associated States and from the natural and legal persons concerned any information deemed necessary.

ARTICLE 88

Cooperation with the competent authorities of EU Member States and EU institutions

An Associated State may rely on the cooperation of one or several EU Member States or EU institutions to fulfil its obligations in terms of implementation and effective application of this Agreement. In such cases, the Associated State shall make arrangements laying down the details of such cooperation and inform the European Commission thereof within the relevant Joint Committee. Those arrangements shall not in any way affect the powers of the European Commission.

## CHAPTER 5

For that purpose, the Joint Committee shall be provided with all relevant information to allow a detailed examination of the situation.

6. Should the Joint Committee fail to resolve the dispute, it may take a decision on compensatory measures for the alleged incorrect application of this Agreement, so as to remedy possible imbalances. That decision shall be taken within twelve months of the date of the CJEU judgment.

If the Joint Committee is unable to take a decision within a period of three months after the matter has been referred to it, either Associated Party may submit the question of the proportionality of those measures to arbitration in accordance with Framework Protocol 6. No question concerning the interpretation of this Agreement, as referred to in paragraph 3, may be addressed in arbitration. The arbitration ruling shall be binding on the Associated Parties.

Action for failure to act

1. An Associated State, as well as any natural or legal person domiciled or established on its territory, may complain to the CJEU that an EU institution, body or agency has failed to address to that person an act in violation of this Agreement, other than a recommendation or an opinion.

2. The action referred to in paragraph 1 shall be admissible only if the EU institution, body or agency has first been called upon to act. ARTICLE 93

Appeal in the case of non-contractual liability

In cases of non-contractual liability and in accordance with this Agreement, an Associated State, as well as the natural or legal persons domiciled or established on its territory, may refer the case to the CJEU to obtain compensation for damages caused by the activities of the EU institutions, bodies or agencies or by their officials in the performance of their duties.

ARTICLE 94

Reference for a preliminary ruling

1. Where, in a case pending before a court or tribunal of an Associated State, a question is raised relating to the interpretation of this Agreement or to the validity of an act adopted by EU institutions, bodies or agencies within the scope of this Agreement, that court or tribunal may seek a preliminary ruling from the CJEU.

2. Where such a question is raised in a case pending before a court or tribunal in an Associated State against whose decisions there is no judicial remedy under the national law of the Associated State, that court shall bring the matter before the CJEU.

3. An Associated State shall have the right to submit statements of case or written observations to the CJEU in cases where a court or tribunal in an EU Member State has requested a preliminary ruling in respect of this Agreement, or where a court or tribunal in an Associated State has done so in a case as referred to in paragraph 1.

## ARTICLE 95

### Law applicable to proceedings before the CJEU

## ARTICLE 96

### CJEU judgments

1. CJEU judgments rendered under this Agreement shall be binding.

2. The EU institution, body or agency whose act has been declared void, or whose failure to act has been declared contrary to this Agreement, shall be required to take the necessary measures to comply with the CJEU judgment.

In the event of serious economic, societal or environmental difficulties of a sectorial or regional nature that are caused by the application of this Agreement and that are likely to persist, an Associated Party may unilaterally take appropriate safeguard measures under the conditions and in accordance with the procedures laid down in this Article.

2. Those safeguard measures shall be limited in scope and duration to what is strictly necessary to remedy the situation. Priority shall be given to measures which least disturb the functioning of this Agreement.

3. When an Associated Party considers taking safeguard measures referred to in paragraph 1 of this Article, it shall promptly notify the other Associated Party and provide it with all relevant information.

4. The Associated Parties shall immediately consult each other within the relevant Joint Committee with a view to finding an acceptable solution.

# FRAMEWORK PROTOCOL 3

# ON FINANCIAL SERVICES

## PREAMBLE

The EU of the one part, and Andorra and San Marino respectively, of the other part,

Whereas:

(1) This Framework Protocol takes into account the specificities of the Associated States and how their financial services markets would integrate within the EU internal market for financial services and its supervisory infrastructure. In light thereof, specific rules and provisions catering for a smooth market integration should be introduced.

(2) The adoption of a staggered approach for the implementation and application of the EU acquis is envisaged to offer an Associated State the flexibility to prioritize specific segments of the EU acquis for which it intends to provide cross-border financial services first. Such approach allows the Associated State to gradually adopt the EU acquis and apply it in a phased manner, taking into account its particular circumstances and preferences.

(3) The assessment of the supervisory infrastructure of the Associated State, through an assessment to access the EU internal market for financial services, and subsequent regular assessments, serves the purpose of evaluating its effectiveness, robustness, and suitability, taking into consideration the characteristics of the Associated State's financial sector, such as its nature, diversity, size and complexity. A robust supervisory framework is crucial for ensuring the integrity and stability of the EU internal market, promoting confidence among market participants and safeguarding the interests of consumers and investors. The EU supervisory authorities are entrusted with a pivotal role in conducting those assessments comprehensively requiring, where necessary, the active collaboration and cooperation from the competent authorities of EU Member States.

(4) In order to avoid abuses of the right of establishment, it is necessary to require that financial operators based in the Associated State provide at least part of their services within that jurisdiction. The supervisory authorities of the Associated State will prevent the creation of legal entities with no or minimal substance that perform no or very little economic activities in their jurisdiction.

Have agreed as follows:

In the event of serious economic, fiscal, societal or environmental difficulties caused by the rate of progressive tariff elimination applicable to Chapter 24 of the Harmonised System referred to in Article 10 of this Protocol, Andorra may unilaterally take safeguard measures to adjust that rate, under the conditions and in accordance with this Article.

2. For the purposes of the application of paragraph 1 imports shall be regarded as being of a non-commercial character if they:

   (a) are of an occasional nature;

   (b) consist exclusively of goods for the personal or family use of the travellers, or of goods intended as presents.

3. The nature or quantity of the goods must not be such as to indicate that they are being imported for commercial reasons.

3. For goods to which a monetary threshold applies, the total value of the exemption shall be set at three times the value of the exemption applied by the EU in respect of third countries. This paragraph shall not apply to travellers under the age of 15.

4. For the purposes of applying monetary thresholds, the value of an individual item may not be split up.

5. For goods to which a quantitative limit applies, exemptions shall be set at:

### ARTICLE 17

### General principles concerning customs security measures

1. The EU and Andorra undertake to apply to the carriage of goods to and from third countries the customs security measures set out in Article 15 of this Protocol and thus to ensure an equivalent level of security at their external borders.

2. The EU and Andorra shall waive the application of the customs security measures referred to in Article 16 of this Protocol during the carriage of goods between their customs territories.

ARTICLE 18

Agreements with third countries

1. The EU and Andorra shall consult each other prior to the conclusion of any agreement with a third country relating to customs security measures in order to ensure consistency with this Chapter, particularly if the proposed agreement includes provisions that derogate from the customs security measures set out in this Chapter.

2. The EU and Andorra agree that agreements concluded by either of them with a third country in an area covered by customs security measures shall not create obligations for the other Associated Party, unless the Joint Committee decides otherwise.

ARTICLE 19

Place for lodging an entry summary declaration and a declaration prior to exit of goods

1. The entry summary declaration shall be lodged with the competent authority of the Associated Party into whose customs territory the goods are brought from third countries. That authority shall carry out a risk analysis based on data contained in the declaration and any customs security controls deemed necessary, including in cases where goods are destined for the other Associated Party.

2. The declaration prior to exit of goods shall be lodged with the competent authority of the Associated Party in whose customs territory the formalities for export or, where appropriate, exit to third countries are carried out. That competent authority shall carry out a risk analysis based on the data in that declaration together with the customs security controls deemed necessary.

2. The Joint Committee shall adopt any decision necessary for the application of paragraph 1.

ARTICLE 21

Monitoring the implementation of customs security measures

1. The Joint Committee shall adopt decisions setting out the way in which the EU and Andorra are to monitor the implementation of this Chapter and to verify compliance with customs security measures.

   That monitoring may take the form of:

   (a) a regular assessment of the implementation of this Chapter;

   (b) a review to improve the manner in which it is applied or to amend its provisions so that it better fulfils its objectives;

   (c) the organisation of thematic meetings between experts of the EU and Andorra and audits of administrative procedures, including on-the-spot visits.

Rebalancing measures

1. The EU or Andorra may, after consultation within the Joint Committee, take appropriate rebalancing measures, including the suspension of the application of customs security measures, where it finds that the other Associated Party does not comply with the conditions thereof.

2. Where any delay could jeopardise the effectiveness of customs security measures, provisional precautionary measures may be taken, without prior consultation, provided consultations take place within the Joint Committee immediately after the adoption of those measures.

3. Where the implementation of the relevant acquis on customs security measures is no longer ensured by Andorra in accordance with this Chapter, the EU may suspend the application of the customs security measures, unless the Joint Committee, after having examined ways of maintaining the application of the acquis, decides otherwise.

4. Rebalancing measures should be proportional, and their scope and duration should be limited to what is necessary to address the situation. An Associated Party may request the Joint Committee to hold consultations on the proportionality of those measures.

Tolerance rule

1. By way of derogation from Article 4 of this Appendix and subject to paragraphs 2 and 3 of this Article, non-originating materials which, according to the conditions set out in the list in Annex II, are not to be used in the manufacture of a given product may nevertheless be used, provided that their total net weight or value assessed for the product does not exceed:

   (a) 15 % of the net weight of the product falling within Chapters 2 and 4 to 24, other than processed fishery products of Chapter 16;

   (b) 15 % of the ex-works price of the product for products other than those covered by point (a).

   This paragraph shall not apply to products falling within Chapters 50 to 63 of the Harmonised System, for which the tolerances mentioned in Notes 6 and 7 of Annex I shall apply.

2. Paragraph 1 of this Article shall not allow to exceed any of the percentages for the maximum content of non-originating materials as specified in the rules set out in Annex II.

3. Paragraphs 1 and 2 of this Article shall not apply to products wholly obtained in an Associated Party within the meaning of Article 3 of this Appendix. However, without prejudice to Articles 6 and 9(1) of this Appendix, the tolerance provided for in those provisions shall nevertheless apply to products for which the rules set out in Annex II requires that the materials which are used in the manufacture of that product are wholly obtained.

## ARTICLE 6

### Insufficient working or processing

1. Without prejudice to paragraph 2 of this Article, the following operations shall be considered to be insufficient working or processing to confer the status of an originating product, whether or not the requirements of Article 4 of this Appendix are fulfilled:

   (a) preserving operations to ensure that the products remain in good condition during transport and storage;

   (b) breaking-up and assembly of packages;

   (c) washing, cleaning; removal of dust, oxide, oil, paint or other coverings;

   (d) ironing or pressing of textile

   (e) simple painting and polishing operations;

(f) husking and partial or total milling of rice; polishing, and glazing of cereals and rice;

(g) operations to colour or flavour sugar or form sugar lumps; partial or total milling of crystal sugar;

(h) peeling, stoning and shelling, of fruits, nuts and vegetables;

(i) sharpening, simple grinding or simple cutting;

(j) sifting, screening, sorting, classifying, grading, matching; (including the making-up of sets of articles);

(k) simple placing in bottles, cans, flasks, bags, cases, boxes, fixing on cards or boards and all other simple packaging operations;

(l) affixing or printing marks, labels, logos and other like distinguishing signs on products or their packaging;

(m) simple mixing of products, whether or not of different kinds;

(n) mixing of sugar with any material;

(o) simple addition of water or dilution or dehydration or denaturation of products;

(p) simple assembly of parts of articles to constitute a complete article or disassembly of products into parts;

(q) slaughter of animals;

(r) a combination of two or more operations specified in points (a) to (q).

2. All the operations carried out in the exporting Associated Party on a given product shall be taken into account when determining whether the working or processing undergone by that product is to be regarded as insufficient within the meaning of paragraph 1.

ARTICLE 7

Bilateral cumulation of origin

1. Without prejudice to Article 2 of this Appendix, products shall be considered as originating in the exporting Associated Party when exported to the other Associated Party if they are obtained there, incorporating materials originating in the other Associated Party provided that the working or processing carried out in the exporting Associated Party goes beyond the operations referred to in Article 6 of this Appendix. It shall not be necessary for such materials to have undergone sufficient working or processing.

2. Without prejudice to Article 2 of this Appendix, working or processing carried out in an Associated Party shall be considered as having been carried out in the exporting Associated Party when the products obtained undergo subsequent working or processing in this exporting Associated Party.

ARTICLE 8

Unit of qualification

1. The unit of qualification for the application this Appendix shall be the particular product which is considered to be the basic unit when determining the classification using the nomenclature of the Harmonised System. It follows that:

   (a) when a product composed of a group or assembly of articles is classified under the terms of the Harmonised System in a single heading, the whole constitutes the unit of qualification;

   (b) when a consignment consists of a number of identical products classified under the same heading of the Harmonised System, each individual item shall be taken into account when applying these Rules.

2. Where, under General Rule 5 of the Harmonised System packaging, is included with the product for classification purposes, it shall be included for the purposes of determining the origin.

3. Accessories, spare parts and tools dispatched with a piece of equipment, machine, apparatus or vehicle which are part of the normal equipment and included in the ex-works price thereof shall be regarded as one with the piece of equipment, machine, apparatus or vehicle in question.

ARTICLE 9

Sets

Sets, as defined in General Rule 3 of the Harmonised System, shall be regarded as originating when all the component products are originating. Where a set is composed of originating and non-originating products, the set as a whole shall however be regarded as originating, provided that the value of the non-originating products does not exceed 15 % of the ex-works price of the set.

ARTICLE 10

Neutral elements

In order to determine whether a product is an originating product, no account shall be taken of the origin of the following which might be used in its manufacture:

(a) energy and fuel;

(b) plant and equipment;

(c) machines and tools;

(d) any other goods which do not enter, and which are not intended to enter, into the final composition of the product.

ARTICLE 11

Accounting segregation

1. If originating and non-originating fungible materials are used in the working or processing of a product, economic operators may ensure the management of materials using the accounting segregation method, without keeping the materials on separate stocks.

2. Economic operators may ensure the management of originating and non-originating fungible products of HS heading 1701 using the accounting segregation method, without keeping the products on separate stocks.

3. The Associated Parties may require that the application of accounting segregation is subject to prior authorisation by the customs authorities. The customs authorities may grant the authorisation subject to any conditions they deem appropriate and shall monitor the use made of the authorisation. The customs authorities may withdraw the authorisation whenever the beneficiary makes improper use of the authorisation in any manner whatsoever or fails to fulfil any of the other conditions laid down in this Appendix.

   Through the use of accounting segregation it must be ensured that, at any time, no more products can be considered as '"originating in the exporting Associated Party" than would have been the case if a method of physical segregation of the stocks had been used.

   The method shall be applied and the application thereof shall be recorded on the basis of the general accounting principles applicable in the exporting Associated Party.

4. The beneficiary of the method referred to in paragraphs 1 and 2 shall make out or apply for proofs of origin for the quantity of products which may be considered as originating in the exporting Associated Party. At the request of the customs authorities, the beneficiary shall provide a statement of how the quantities have been managed.

## PART III

## TERRITORIAL REQUIREMENTS

### ARTICLE 12

### Principle of territoriality

1. The conditions set out in Part II shall be fulfilled without any interruption in the Associated Party concerned.

2 If originating products exported from an Associated Party to a third country are returned, they shall be considered to be non-originating, unless it can be demonstrated to the satisfaction of the customs authorities that:

(a) the products returned are the same as those which were exported; and

(b) they have not undergone any operations beyond that which is necessary to preserve them in good condition while in that country or while being exported.

3. The obtention of originating status in accordance with the conditions set out in Part II shall not be affected by working or processing done outside the exporting Party on materials exported from this Associated Party and subsequently re-imported there, provided:

(a) those materials are wholly obtained in the exporting Associated Party or have undergone working or processing beyond the operations referred to in Article 6 of this Appendix prior to being exported; and

(b) it can be demonstrated to the satisfaction of the customs authorities that:

(i) the re-imported products have been obtained by working or processing the exported materials; and

(ii) the total added value acquired outside the exporting Associated Party by applying this Article does not exceed 10 % of the ex-works price of the end product for which originating status is claimed.

4. For the purposes of paragraph 3 of this Article, the conditions for obtaining originating status set out in Title II shall not apply to working or processing done outside the exporting Associated Party. However, where, in the list in Annex II, a rule setting a maximum value for all the incorporated non-originating materials is applied in determining the originating status of the end product, the total value of the non-originating materials incorporated in the territory of the exporting Associated Party, taken together with the total added value acquired outside this Associated Party by applying this Article, shall not exceed the stated percentage.

5. For the purposes of applying paragraphs 3 and 4, "total added value" shall be taken to mean all costs arising outside the exporting Associated Party, including the value of the materials incorporated there.

6. Paragraphs 3 and 4 of this Article shall not apply to products which do not fulfil the conditions listed in Annex II or which can be considered sufficiently worked or processed only if the general tolerance fixed in Article 5 of this Appendix is applied.

7. Any working or processing of the kind covered by this Article and done outside the exporting Associated Party shall be done under the outward processing arrangements, or similar arrangements.

## ARTICLE 13

### Non-alteration

1. The preferential treatment provided for under this Agreement shall apply only to products fulfilling the requirements set out in this Appendix and declared for importation in an Associated Party provided that those products are the same as those exported from the exporting Party. They shall not have been altered, transformed in any way or subjected to operations other than to preserve them in good condition or than adding or affixing marks, labels, seals or any documentation to ensure compliance with specific domestic requirements of the importing Associated Party carried out under customs supervision in the third country(ies) of transit or splitting prior to being declared for home use.

2. Storage of products or consignments may take place, provided that they remain under the supervision of customs authorities in the third country(ies) of transit.

3. Without prejudice to Title IV of this Appendix, the splitting of consignments may take place, provided that they remain under the supervision of customs authorities in the third country(ies) of splitting.

4. In the case of doubt, the importing Associated Party may request the importer or its representative to submit at any time all appropriate documents to provide evidence of compliance with this Article, which may be given by any documentary evidence, and notably by:

(a) contractual transport documents such as bills of lading;

(b) factual or concrete evidence based on marking or numbering of packages;

(c) a certificate of non-manipulation provided by the customs authorities of the third country(ies) of transit or splitting or any other documents demonstrating that the goods remained under the supervision of the customs authorities in the third country(ies) of transit or splitting; or

(d) any evidence related to the goods themselves.

ARTICLE 14

Exhibitions

1. Originating products, sent for exhibition in a country other than that with which cumulation is applicable in accordance with Article 7 of this Appendix and sold after the exhibition for importation in an Associated Party, shall benefit on importation from this Agreement, provided that it is shown to the satisfaction of the customs authorities that:

   (a) an exporter has consigned the products from an Associated Party to the country in which the exhibition is held and has exhibited them there;

   (b) the products have been sold or otherwise disposed of by that exporter to a person in another Associated Party;

   (c) the products have been consigned during the exhibition or immediately thereafter in the State in which they were sent for exhibition; and

   (d) the products have not, since they were consigned for exhibition, been used for any purpose other than demonstration at the exhibition.

2. A proof of origin shall be issued or made out in accordance with Part V and submitted to the customs authorities of the importing Associated Party in the normal manner. The name and address of the exhibition shall be indicated thereon. Where necessary, additional documentary evidence of the conditions under which they have been exhibited may be required.

3. Paragraph 1 shall apply to any trade, industrial, agricultural or crafts exhibition, fair or similar public show or display which is not organised for private purposes in shops or business premises with a view to the sale of foreign products, and during which the products remain under customs control.

## PART IV

## PROOF OF ORIGIN

### ARTICLE 15

### General requirements

1. Products originating in an Associated Party shall, on importation into the other Associated Party, benefit from the provisions of this Agreement upon submission of one of the following proofs of origin:

   (a) a movement certificate EUR.1, a specimen of which appears in Annex IV to this Appendix;

   (b) in the cases specified in Article 16(1) of this Appendix, a declaration, subsequently referred to as the 'origin declaration' given by the exporter on an invoice, a delivery note or any other commercial document which describes the products concerned in sufficient detail to enable them to be identified; the text of the origin declaration appears in Annex III to this Appendix.

2. Notwithstanding paragraph 1 of this Article, originating products within the meaning of this Appendix shall, in the cases specified in Article 25 of this Appendix, benefit from the provisions of this Agreement without being necessary to submit any of the proofs of origin referred to in paragraph 1 of this Article.

3. Without prejudice to paragraph 1, the Associated Parties may agree that, for the preferential trade between them, proofs of origin referred to in paragraph 1 are replaced by statements on origin made out by exporters registered in an electronic database in accordance with the law of the Associated Parties.

4. For the purposes of paragraph 1, the Associated Parties may agree to establish a system that allows for proofs of origin referred to in paragraph 1 to be issued or submitted electronically.

## ARTICLE 16

### Conditions for making out an origin declaration

1. An origin declaration as referred to in point (b) of Article 15(1) of this Appendix may be made out:

   (a) by an approved exporter within the meaning of Article 17 of this Appendix; or

   (b) by any exporter for any consignment consisting of one or more packages containing originating products the total value of which does not exceed EUR 6 000.

2. An origin declaration may be made out if the products can be considered as originating in an Associated Party and fulfil the other requirements of this Appendix.

3. The exporter making out an origin declaration shall be prepared to submit at any time, at the request of the customs authorities of the exporting Associated Party, all appropriate documents proving the originating status of the products concerned as well as the fulfilment of the other requirements of this Appendix.

4. An origin declaration shall be made out by the exporter by typing, stamping or printing on the invoice, the delivery note or another commercial document, the declaration, the text of which appears in Annex III to this Appendix, using one of the linguistic versions set out in that Annex and in accordance with the provisions of the national law of the exporting Associated Party. If the declaration is handwritten, it shall be written in ink in printed characters.

5. Origin declarations shall bear the original signature of the exporter in manuscript. However, an approved exporter within the meaning of Article 17 of this Appendix shall not be required to sign such declarations provided that the exporter provides the customs authorities of the exporting Associated Party with a written undertaking that the exporter accepts full responsibility for any origin declaration which identifies the exporter as if it had been signed in manuscript by the exporter.

6. An origin declaration may be made out by the exporter when the products to which it relates are exported, or after exportation (the "retrospective origin declaration") provided that it is presented in the importing Associated Party within two years after the importation of the products to which it relates.

   Where the splitting of a consignment takes place in accordance with Article 13(3) of this Appendix and provided that the same two-year deadline is respected, the retrospective origin declaration shall be made out by the approved exporter of the exporting Associated Party of the products.

ARTICLE 17

Approved exporter

1. The customs authorities of the exporting Associated Party may, subject to national requirements, authorise any exporter established in that Associated Party (the "approved exporter"), to make out origin declarations irrespective of the value of the products concerned.

2. An exporter who requests such authorisation must offer, to the satisfaction of the customs authorities, all guarantees necessary to verify the originating status of the products as well as the fulfilment of the other requirements of this Appendix.

3. The customs authorities shall grant the approved exporter a customs authorisation number which shall appear on the origin declaration.

4. Customs authorities shall verify the proper use of an authorisation. Customs authorities may withdraw the authorisation where the approved exporter makes improper use of it and shall do so where the approved exporter no longer offers the guarantees referred to in paragraph 2.

ARTICLE 18

Procedure for issuing of a movement certificate EUR.1

1. A movement certificate EUR.1 shall be issued by the customs authorities of the exporting Associated Party at the written application of the exporter or, under the exporter's responsibility, by his authorised representative.

2. For that purpose, the exporter or his authorised representative shall fill in both the movement certificate EUR.1 and the application form as contained in Annex IV to this Appendix. Those forms shall be completed in one of the languages in which this Agreement is drawn up and in accordance with the provisions of the national law of the exporting Associated Party. If the completion of the forms is done in handwriting, they shall be completed in ink in printed characters. The description of the products shall be given in the box reserved for that purpose without leaving any blank lines. Where the box is not completely filled in, a horizontal line shall be drawn below the last line of the description, the empty space being crossed through.

3. The exporter applying for the issue of a movement certificate EUR.1 shall be prepared to submit at any time, at the request of the customs authorities of the exporting Party where the movement certificate EUR.1 is issued, all appropriate documents proving the originating status of the products concerned as well as the fulfilment of the other requirements of this Appendix.

4. A movement certificate EUR.1 shall be issued by the customs authorities of the exporting Associated Party where the products concerned can be considered as products originating and fulfil the other requirements of this Appendix.

5. The customs authorities issuing movement certificates EUR.1 shall take any steps necessary to verify the originating status of the products and the fulfilment of the other requirements of this Appendix. For that purpose, they shall have the right to call for any evidence and to carry out any inspection of the exporter's accounts or any other check considered appropriate. They shall also ensure that the forms referred to in paragraph 2 of this Article are duly completed. In particular, they shall check whether the space reserved for the description of the products has been completed in such a manner as to exclude all possibility of fraudulent additions.

6. The date of issue of the movement certificate EUR.1 shall be indicated in Box 11 of the movement certificate EUR.1.

7. A movement certificate EUR.1 shall be issued by the customs authorities and made available to the exporter as soon as the exportation has been effected or ensured.

ARTICLE 19

Movement certificates EUR.1 issued retrospectively

1. Notwithstanding Article 18(7) of this Appendix, a movement certificate EUR.1 may be issued after the exportation of the products to which it relates if:

(a) it was not issued at the time of exportation because of errors or involuntary omissions or special circumstances;

(b) it is demonstrated to the satisfaction of the customs authorities that a movement certificate EUR.1 was issued but was not accepted at importation for technical reasons;

(c) the final destination of the products concerned was not known at the time of exportation and was determined during their transportation or storage and after possible splitting of consignments in accordance with Article 13(3) of this Appendix.

2. For the purposes of paragraph 1 of this Article, the exporter shall indicate in his application the place and date of exportation of the products to which the movement certificate EUR.1 relates, and state the reasons for his request.

3. The customs authorities may issue a movement certificate EUR.1 retrospectively within two years from the date of exportation and only after verifying that the information supplied in the exporter’s application is in conformity with the information in the corresponding file.

4. Movement certificates EUR.1 issued retrospectively shall be endorsed with the following phrase in English: 'ISSUED RETROSPECTIVELY'.

5. The endorsement referred to in paragraph 4 shall be inserted in Box 7 of the movement certificate EUR.1.

## ARTICLE 20

### Issue of a duplicate movement certificate EUR.1

1. In the event of theft, loss or destruction of a movement certificate EUR.1, the exporter may apply to the customs authorities which issued it for a duplicate made out on the basis of the export documents in their possession.

2. The duplicate issued in accordance with paragraph 1 of this Article shall be endorsed with the following word in English: 'DUPLICATE'.

3. The endorsement referred to in paragraph 2 shall be inserted in Box 7 of the duplicate movement certificate EUR.1.

4. The duplicate, which shall bear the date of issue of the original movement certificate EUR.1, shall have effect from that date.

## ARTICLE 21

### Validity of proof of origin

1. A proof of origin shall be valid for ten months from the date of issue or making out in the exporting Associated Party, and shall be submitted within that period to the customs authorities of the importing Associated Party.

2. Proofs of origin which are submitted to the customs authorities of the importing Associated Party after the period of validity referred to in paragraph 1 may be accepted for the purpose of applying the tariff preferences, where failure to submit those documents by the final date set is due to exceptional circumstances.

3. In other cases of belated presentation, the customs authorities of the importing Associated Party may accept the proofs of origin where the products have been presented to customs before the said final date.

ARTICLE 22

Free zones

1. The Associated Parties shall take all necessary steps to ensure that products traded under cover of a proof of origin which in the course of transport use a free zone situated in their territory are not substituted by other goods and do not undergo handling other than normal operations designed to prevent their deterioration.

2. By way of derogation from paragraph 1, when products originating in an Associated Party are imported into a free zone under cover of a proof of origin and undergo treatment or processing, a new proof or origin may be issued or made out, if the treatment or processing undergone complies with this Appendix.

ARTICLE 23

Importation requirements

Proofs of origin shall be submitted to the customs authorities of the importing Associated Party in accordance with the procedures applicable in that Party.

ARTICLE 24

Importation by instalments

Where, at the request of the importer and subject to the conditions laid down by the customs authorities of the importing Party, dismantled or non-assembled products within the meaning of General Rule 2(a) for the interpretation of the Harmonised System falling within Sections XVI and XVII or headings 7308 and 9406 are imported in instalments, a single proof of origin for such products shall be submitted to the customs authorities on the importation of the first instalment.

ARTICLE 25

Exemptions from proof of origin

1. Products sent as small packages from private persons to private persons or forming part of travellers' personal luggage shall be admitted as originating products without requiring the submission of a proof of origin, provided that such products are not imported by way of trade and have been declared as fulfilling the requirements of this Appendix and where there is no doubt as to the veracity of such a declaration.

2. Imports shall not be considered as imports by way of trade where all the following conditions are met:

   (a) the imports are occasional;

(b) the imports consist solely of products for the personal use of the recipients or travellers or their families;

(c) it is evident from the nature and quantity of the products that no commercial purpose is intended.

3. The total value of those products shall not exceed EUR 500 in the case of small packages or EUR 1 200 in the case of products forming part of the personal luggage of travellers.

## ARTICLE 26

### Discrepancies and formal errors

1. The discovery of slight discrepancies between the statements made in the proof of origin and those made in the documents submitted to the customs office for the purpose of carrying out the formalities for importing products shall not ipso facto render the proof of origin null and void if it is established that that document corresponds to the products in respect of which it was submitted.

2. Obvious formal errors such as typing errors on a proof of origin shall not cause the documents referred to in paragraph 1 to be rejected where those errors are not such as to create doubts concerning the correctness of the statements made in those documents.

ARTICLE 27

Supplier’s declarations

1. When a movement certificate EUR.1 is issued or an origin declaration is made out in an Associated Party for originating products, in the manufacture of which goods coming from the other Party which have undergone working or processing there without having obtained preferential originating status have been used in accordance with Article 7 of this Appendix account shall be taken of the supplier's declaration given for those goods in accordance with this Article.

2. The supplier’s declaration referred to in paragraph 1 shall serve as evidence of the working or processing undergone in an Associated Party by the goods concerned for the purposes of determining whether the products in the manufacture of which those goods are used, may be considered as products originating in the exporting Associated Party and as fulfilling the other requirements of this Appendix.

3. A separate supplier’s declaration shall, except in the cases referred to in paragraph 4, be made out by the supplier for each consignment of goods in the form contained in Annex VI on a sheet of paper annexed to the invoice, the delivery note or any other commercial document describing the goods concerned in sufficient detail to enable them to be identified.

4. Where a supplier regularly supplies a particular customer with goods for which the working or processing undergone in an Associated Party is expected to remain constant for a period of time, he may provide a single supplier’s declaration to cover subsequent consignments of those goods (the "long-term supplier’s declaration").

A long-term supplier's declaration may be valid for a period of up to two years from the date of making out the declaration. The customs authorities of the Associated Party where the declaration is made out shall lay down the conditions under which longer periods may be used.

The long-term supplier's declaration shall be made out by the supplier in the form contained in Annex VII and shall describe the goods concerned in sufficient detail for them to be identifiable. It shall be provided to the customer concerned before the customer is supplied with the first consignment of goods covered by that declaration or together with the first consignment. The supplier shall inform the customer immediately where the long-term supplier's declaration no longer applies to the goods supplied.

5. The supplier's declarations referred to in paragraphs 3 and 4 shall be typed or printed using one of the languages of this Agreement, in accordance with the law of the Associated Party where the declaration is made out, and shall bear the original signature of the supplier in manuscript. The declaration may also be in handwriting; in such case, it shall be written in ink in printed characters.

6. The supplier making out a declaration shall be prepared to submit at any time, at the request of the customs authorities of the Associated Party where the declaration is made out, all appropriate documents proving that the information given on that declaration is correct.

ARTICLE 28

Amounts expressed in euro

1. For the purposes of point (b) of Article 16(1) and Article 25(3) of this Appendix in cases where products are invoiced in a currency other than euro, amounts in the national currencies of the EU Member States that have not adopted the euro equivalent to the amounts expressed in euro shall be fixed annually by each EU Member State concerned.

2. A consignment shall benefit from the point (b) of Article 16(1) or Article 25(3) of this Appendix by reference to the currency in which the invoice is drawn up, according to the amount fixed by the EU Member State concerned.

3. The amounts to be used in a national currency shall be the equivalent in that currency to the amounts expressed in euro as at the first working day of October. The amounts shall be communicated to the European Commission by 15 October and shall apply from 1 January the following year. The European Commission shall notify the countries concerned of the relevant amounts.

4. The EU Member State concerned may round up or down the amount resulting from the conversion into its national currency of an amount expressed in euro. The amount rounded off shall not differ from the amount resulting from the conversion by more than 5 %. An EU Member State may retain unchanged its national currency equivalent of an amount expressed in euro if, at the time of the annual adjustment provided for in paragraph 3, the conversion of that amount, prior to any rounding off, results in an increase of less than 15 % in the national currency equivalent. The national currency equivalent may be retained unchanged if the conversion were to result in a decrease in that equivalent value.

5. The amounts expressed in euro shall be reviewed by the Joint Committee at the request of an Associated Party. In that review the Joint Committee shall consider the desirability of preserving the effects of the limits concerned in real terms. For that purpose, it may decide to modify the amounts expressed in euro.

## PART V

## PRINCIPLES OF COOPERATION AND DOCUMENTARY EVIDENCE

### ARTICLE 29

Documentary evidence, preservation of proofs of origin and supporting documents

1. An exporter who has made out an origin declaration or has applied for a movement certificate EUR.1 shall keep a hard copy or an electronic version of those proofs of origin and all documents supporting the originating status of the product, for at least three years from the date of issuance or making out of the origin declaration.

2. The supplier making out a supplier's declaration shall keep copies of the declaration and of all the invoices, delivery notes or other commercial documents to which that declaration is annexed as well as the documents referred to in Article 27(6) of this Appendix for at least three years.

   The supplier making out a long-term supplier's declaration shall keep copies of the declaration and of all the invoices, delivery notes or other commercial documents concerning goods covered by that declaration sent to the customer concerned, as well as the documents referred to in Article 27(6) of this Appendix for at least three years from the date of expiry of the validity of the long-term supplier's declaration.

3. For the purposes of paragraph 1, the documents supporting the originating status, *inter alia*, are the following:

(a) direct evidence of the processes carried out by the exporter or supplier to obtain the product, contained, for example, in his accounts or internal bookkeeping;

(b) documents proving the originating status of materials used, issued or made out in the relevant Associated Party in accordance with its national legislation;

(c) documents proving the working or processing of materials in the relevant Associated Party, made out or issued in that Associated Party in accordance with its national legislation;

(d) origin declarations or movement certificates EUR.1 proving the originating status of materials used, made out or issued in the Associated Parties in accordance with this Appendix;

(e) appropriate evidence concerning working or processing undergone outside the Associated Parties pursuant to Articles 12 and 13 of this Appendix, proving the fulfilment of the requirements of those Articles.

4. The customs authorities of the exporting Associated Party issuing movement certificates EUR.1 shall keep the application form referred to in Article 18(2) of this Appendix for at least three years.

5. The customs authorities of the importing Associated Party shall keep the origin declarations and the movement certificates EUR.1 submitted to them for at least three years.

6. Supplier's declarations proving the working or processing undergone in an Associated Party by materials used, made out in that Associated Party, shall be treated as a document referred to in Articles 16(3), 18(4) and 27(6) of this Appendix used for the purpose of proving that products covered by a movement certificate EUR.1 or an origin declaration may be considered as products originating in that Associated Party and fulfil the other requirements of this Appendix.

## ARTICLE 30

## Dispute settlement

Without prejudice to Article 90 of the Framework Agreement, where disputes arise in relation to the verification procedures under Articles 32 and 33, or in relation to the interpretation of this Appendix, which cannot be settled between the customs authorities requesting a verification and the customs authorities responsible for carrying out the verification, they shall be submitted to the Joint Committee. The settlement of disputes between an importer and the customs authorities of the importing Associated Party shall take place in accordance with the legislation of that Party.

## PART VI

## ADMINISTRATIVE COOPERATION

### ARTICLE 31

### Notification and cooperation

1. The customs authorities of the Associated Parties shall provide each other with specimen impressions of stamps used in their customs offices for the issue of movement certificates EUR.1, with the models of the authorisation numbers granted to approved exporters and with the addresses of the customs authorities responsible for verifying those certificates and origin declarations.

2. In order to ensure the proper application of this Appendix, the customs authorities of the Associated Parties shall assist each other in checking the authenticity of the movement certificates EUR.1, origin declarations, supplier’s declarations as well as the correctness of the information provided in those documents.

### ARTICLE 32

### Verification of proofs of origin

1. Subsequent verifications of proofs of origin shall be carried out at random or whenever the customs authorities of the importing Associated Party have reasonable doubts as to the authenticity of such documents, the originating status of the products concerned or the fulfilment of other requirements of this Appendix.

2. When they make a request for subsequent verification, the customs authorities of the importing Associated Party shall return the movement certificate EUR.1, the invoice, where it has been submitted, the origin declaration, or a copy of those documents, to the customs authorities of the exporting Associated Party giving, where appropriate, the reasons for the request for verification. Any documents and information obtained suggesting that the information provided in the proof of origin is incorrect shall be forwarded in support of the request for verification.

3. The verification shall be carried out by the customs authorities of the exporting Associated Party. For that purpose, they shall have the right to request any evidence and to carry out any inspection of the exporter's accounts or any other check considered appropriate.

4. Where the customs authorities of the importing Associated Party decide to suspend the granting of preferential treatment to the products concerned while awaiting the results of the verification, release of the products shall be offered to the importer subject to any precautionary measures judged necessary.

5. The customs authorities requesting the verification shall be informed of the results thereof as soon as possible. Those results shall indicate clearly whether the documents are authentic and whether the products concerned may be considered as products originating in one of the Associated Parties and fulfil the other requirements of this Appendix.

6. If in cases of reasonable doubt there is no reply within ten months of the date of the verification request or if the reply does not contain sufficient information to determine the authenticity of the document in question or the real origin of the products, the requesting customs authorities shall, except in exceptional circumstances, refuse entitlement to the preferences.

ARTICLE 33

Verification of supplier’s declarations

1. Subsequent verifications of supplier’s declarations or long-term supplier’s declarations may be carried out at random or whenever the customs authorities of an Associated Party where such declarations have been taken into account to issue a movement certificate EUR.1 or to make out an origin declaration, have reasonable doubts as to the authenticity of the document or the correctness of the information provided in that document.

2. For the purposes of paragraph 1, the customs authorities of the Associated Party shall return the supplier’s declaration or the long-term supplier’s declaration and invoice(s), delivery note(s) or other commercial document(s) concerning goods covered by such declaration, to the customs authorities of the Associated Party where the declaration was made out, stating, where appropriate, the reasons of substance or form for the request for verification.

   They shall forward, in support of the request for subsequent verification, any documents and information that have been obtained which suggest that the information provided in the supplier’s declaration or the long-term supplier’s declaration is incorrect.

3. The verification shall be carried out by the customs authorities of the Associated Party where the supplier’s declaration or the long-term supplier’s declaration was made out. For that purpose, they shall have the right to call for any evidence and carry out any inspection of the supplier’s accounts or any other check which they consider appropriate.

4. The customs authorities requesting the verification shall be informed of the results thereof as soon as possible. Those results shall indicate clearly whether the information given in the supplier's declaration or the long-term supplier's declaration is correct and make it possible for them to determine whether and to what extent such declaration could be taken into account for issuing a movement certificate EUR.1 or for making out an origin declaration.

## ARTICLE 34

## Penalties

Each Associated Party shall provide for the imposition of criminal, civil or administrative penalties for violations of its national legislation related to this Appendix.

## PART VII

## APPLICATION OF APPENDIX

### ARTICLE 35

### Republic of San Marino

Without prejudice to Article 2 of this Appendix, a product originating in the Republic of San Marino shall, due to the customs union between the EU and the Republic of San Marino, be considered as originating in the EU.

### ARTICLE 36

### Ceuta and Melilla

1. For the purposes of this Appendix, the term “EU” shall not cover Ceuta and Melilla.

2. Products originating in Andorra, when imported into Ceuta or Melilla, shall enjoy in all respects the same customs regime as that which is applied to products originating in the customs territory of the EU under Protocol 2 of the Act concerning the conditions of accession of the Kingdom of Spain and the Portuguese Republic and the adjustments to the Treaties1. Andorra shall grant to imports of products covered by this Agreement and originating in Ceuta and Melilla the same customs regime as that which is granted to products imported from and originating in the EU.

[1] OJ EU L 302, 15.11.1985, p. 23.

3. For the purposes of paragraph 2 of this Article concerning products originating in Ceuta and Melilla, this Appendix shall apply *mutatis mutandis* subject to the special conditions set out in Annex V.

**ANNEX I**

INTRODUCTORY NOTES TO THE LIST IN ANNEX II

Note 1 – General introduction

The list sets out the conditions required for all products to be considered as sufficiently worked or processed within the meaning of Article 4 of Part II of this Appendix. There are four different types of rules, which vary depending on the product:

(a) through working or processing a maximum content of non-originating materials is not exceeded;

(b) through working or processing the 4-digit Harmonised System heading or 6-digit Harmonised System subheading of the manufactured products becomes different from the 4-digit Harmonised System heading or 6-digit subheading respectively of the materials used;

(c) a specific working or processing operation is carried out;

(d) working or processing is carried out on certain wholly obtained materials.

Note 2 – The structure of the list

2.1. The first two columns in the list describe the product obtained. The column (1) gives the heading number or chapter number used in the Harmonised System and the column (2) gives the description of goods used in that system for that heading or chapter. For each entry in the first two columns, a rule is specified in column (3). Where, in some cases, the entry in the column (1) is preceded by an "ex", this signifies that the rules in column (3) apply only to the part of that heading as described in column (2).

2.2. Where several heading numbers are grouped together in column (1) or a chapter number is given and the description of products in column (2) is therefore given in general terms, the adjacent rules in column (3) apply to all products which, under the Harmonised System, are classified in headings of the chapter or in any of the headings grouped together in column (1).

2.3. Where there are different rules in the list applying to different products within a heading, each indent contains the description of that part of the heading covered by the adjacent rules in column (3).

2.4. Where two alternative rules are set out in column (3), separated by "or", it is at the choice of the exporter which one to use.

Note 3 – Examples of how to apply the rules

3.1. Article 4 of Part II of this Appendix, concerning products having obtained originating status which are used in the manufacture of other products, shall apply, regardless of whether that status has been obtained inside the factory where those products are used or in another factory in a Party.

3.2. Pursuant to Article 6 of Part II of this Appendix, the working or processing carried out shall go beyond the list of operations mentioned in that Article. If it does not, the goods shall not qualify for the granting of the benefit of preferential tariff treatment, even if the conditions set out in the list below are met.

Without prejudice to Article 6 of Part II of this Appendix, the rules in the list represent the minimum amount of working or processing required, and the carrying out of more working or processing also confers originating status; conversely, the carrying out of less working or processing cannot confer originating status.

Thus, if a rule provides that non-originating material, at a certain level of manufacture, may be used, the use of such material at an earlier stage of manufacture is allowed, and the use of such material at a later stage is not.

If a rule provides that non-originating material, at a certain level of manufacture, may not be used, the use of materials at an earlier stage of manufacture is allowed, and the use of materials at a later stage is not.

3.3. Without prejudice to Note 3.2, where a rule uses the expression "Manufacture from materials of any heading", then materials of any heading(s) (even materials of the same description and heading as the product) may be used, subject, however, to any specific limitations which may also be contained in the rule.

However, the expression "Manufacture from materials of any heading, including other materials of heading …" or "Manufacture from materials of any heading, including other materials of the same heading as the product" means that materials of any heading(s) may be used, except those of the same description as the product as given in column (2) of the list.

3.4. When a rule in the list specifies that a product may be manufactured from more than one material, this means that one or more materials may be used. It does not require that all be used.

3.5. Where a rule in the list specifies that a product must be manufactured from a particular material, the condition does not prevent the use of other materials which, because of their inherent nature, cannot satisfy this.

3.6. Where, in a rule in the list, two percentages are given for the maximum value of non-originating materials that can be used, then those percentages may not be added together. In other words, the maximum value of all the non-originating materials used may never exceed the higher of the percentages given. The individual percentages shall not be exceeded in relation to the particular materials to which they apply.

Note 4 – General provisions concerning certain agricultural goods

4.1 Agricultural goods falling within heading 2401 which are grown or harvested in the territory of an Associated Party shall be treated as originating in the territory of that Party, even if grown from imported seeds, bulbs, rootstock, cuttings, grafts, shoots, buds, or other live parts of plants.

**ANNEX II**

LIST OF WORKING OR PROCESSING REQUIRED TO BE CARRIED OUT ON NON-ORIGINATING MATERIALS IN ORDER FOR THE PRODUCT MANUFACTURED TO OBTAIN ORIGINATING STATUS

The provisions of this Regulation shall, for the purposes of this Agreement, be read with the following adaptations:

Given the EU's decision not to extend the rights and obligations for Andorra to issue EU-type approvals and to designate EU technical services other than those established or designated by EU Member States:

(a) In relation to EU type approval, Articles 6, 7, 11, 25 to 37, 40, 41, 49, 51, 52, and 61 to 71, shall not apply.

(b) Article 42(9) is replaced by the following: "The approval authorities of EU Member States may accept the national type-approval issued by Andorra where they consider that the national technical requirements of Andorra in accordance with which the vehicle was approved are equivalent to their own. Such approval shall be valid only in that Member State accepting such equivalence."

(c) Article 53(1) is replaced by the following: "All decisions taken pursuant to this Regulation and all decisions refusing registration, prohibiting or restricting the placing on the market, registration or entry into service of a vehicle or requiring withdrawal of a vehicle from the market, shall state in detail the reasons on which they are based."

Notwithstanding these exceptions, Andorra shall accept, for vehicles, systems, components, and parts to be placed on the market, the EU and UN certificates issued by EU type approval authorities and markings thereof as a proof of conformity, without any further retesting or marking (beyond the markings or labels already mandated in the EU regulations/directives or UN regulations). With regard to UN certificates and markings, this only applies to UNECE 1958 regulations that the EU is applying.

www.parlament.gv.at

For the UNECE 1958 regulations that both the EU and Andorra are applying in the same versions, the EU shall accept the UN certificates validly issued by Andorra.

Andorra shall be obliged to apply the provisions in the EU motor vehicle legislation relating to market surveillance. Andorra may outsource that task, partly or entirely, to the market surveillance authority of an EU Member State of its choice.

The provisions of this Regulation shall, for the purposes of this Agreement, be read with the following adaptations:

Given the EU's decision not to extend the rights and obligations for Andorra to issue EU-type approvals and to designate EU technical services other than those established or designated by EU Member States:

(a) In relation to EU type approval, Articles 5, 6, 20 to 32, 35, 36 and 57 to 67, shall not apply.

(b) Article 37(8) is replaced by the following: "The approval authorities of EU Member States may accept the national type-approval issued by Andorra where they consider that the national technical requirements of Andorra in accordance with which the vehicle was approved are equivalent to their own. Such approval shall be valid only in that Member State accepting such equivalence."

(c) Article 48(1) is replaced by the following: "All decisions taken pursuant to this Regulation and all decisions refusing registration, prohibiting or restricting the placing on the market, registration or entry into service of a vehicle or requiring withdrawal of a vehicle from the market, shall state in detail the reasons on which they are based."

Notwithstanding these exceptions, Andorra shall accept, for vehicles, systems, components, and parts to be placed on the market, the EU and UN certificates issued by EU type approval authorities, as well as the OECD test reports and certifications issued by EU's national designated authorities, and markings thereof, as a proof of conformity, without any further retesting or marking (beyond the markings or labels already mandated in the EU regulations/directives or UN regulations). With regard to UN certificates and markings, this only applies to UNECE 1958 regulations that the EU is applying.

For the UNECE 1958 regulations that both the EU and Andorra are applying in the same versions, the EU shall accept the UN certificates validly issued by Andorra.

Andorra shall be obliged to apply the provisions in the EU agricultural and forestry vehicles legislation relating to market surveillance. Andorra may outsource that task, partly or entirely, to the market surveillance authority of an EU Member State of its choice.
