Proposal for a

**COUNCIL IMPLEMENTING DECISION**

**amending Implementing Decision (EU) (ST 11046/21 INIT; ST 11046/21 ADD 1) of 8  
September 2021 on the approval of the assessment of the recovery and resilience plan  
for Ireland**

{SWD(2024) 135 final}

Proposal for a

## COUNCIL IMPLEMENTING DECISION

**amending Implementing Decision (EU) (ST 11046/21 INIT; ST 11046/21 ADD 1) of 8 September 2021 on the approval of the assessment of the recovery and resilience plan for Ireland**

THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EU) 2021/241 of the European Parliament and of the Council of 12 February 2021 establishing the Recovery and Resilience Facility<sup>1</sup>, and in particular Article 20(1) thereof,

Having regard to the proposal from the European Commission,

Whereas:

- (1) Following the submission of the national recovery and resilience plan ('RRP') by Ireland on 28 May 2021, the Commission proposed its positive assessment to the Council. The Council approved the positive assessment by means of the Council Implementing Decision of 8 September 2021<sup>2</sup>. That CID was amended on 14 July 2023<sup>3</sup> and 8 December 2023<sup>4</sup>.
- (2) On 22 March 2024, Ireland submitted a modified national RRP, including REPowerEU chapter in accordance with Article 21c of Regulation (EU) 2021/241, to the Commission. Ireland also made a reasoned request to the Commission to make a proposal to amend the Council Implementing Decision of 8 September 2021 in accordance with Article 21(1) of Regulation (EU) 2021/241 on the grounds that the RRP is partially no longer achievable because of objective circumstances. On that basis, Ireland has submitted an amended RRP.
- (3) The submission of the amended RRP including a REPowerEU chapter followed a consultation process, conducted in accordance with the national legal framework, involving local and regional authorities, social partners, civil society, and other relevant stakeholders. The summary of the consultations was submitted together with the amended national RRP. Pursuant to Article 19 of Regulation (EU) 2021/241, the Commission assessed the relevance, effectiveness, efficiency and coherence of the amended RRP in accordance with the assessment guidelines set out in Annex V to that Regulation.

---

<sup>1</sup> OJ L 57, 18.2.2021, p. 17.

<sup>2</sup> ST 11046/21 INIT; ST 11046 21 ADD 1.

<sup>3</sup> ST 11336/23 INIT.

<sup>4</sup> ST 15965/23 INIT; ST 15965/23 ADD 1.

### ***Amendments based on Article 21 of Regulation 2021/241***

- (4) The amendments to the RRP submitted by Ireland because of objective circumstances concern four measures.
- (5) Ireland has explained that one measure is no longer achievable because the pandemic resulted in an unexpected surge of enrolments of students in 1-year ICT programmes in 2021, which was then followed by a drop in the following year as many potential students had already completed a programme. In addition, a low unemployment rate as a result of the unexpected resilience of employment after the pandemic crisis resulted in a lower number of enrolments in ICT courses as of 2022 than expected. This concerns target 75 of measure 2.7 (Addressing the digital divide and enhancing digital skills) under component 2 (Accelerating and expanding digital reforms and transformation). On this basis, Ireland has requested to amend target 75. The Council Implementing Decision of 8 September 2021 should be amended accordingly.
- (6) Ireland has explained that for one measure, better alternative for its implementation exist in order to achieve the original ambition of the measure. This concerns milestone 85 under measure 3.3 (Technological Universities Transformation Fund) under component 3 (Social and economic recovery and job creation). On this basis, Ireland has requested to amend milestone 85. The Council Implementing Decision of 8 September 2021 should be amended accordingly.
- (7) Ireland has explained that one measure is no longer achievable, because the unexpected finalisation of the text of the 6th Anti-Money Laundering Directive and its adoption by the Parliament and the Council before the end of the current legislature have provided the opportunity for a more effective Anti-Money Laundering reform. This concerns milestone 94 of measure 3.5 (Anti-Money Laundering) under component 3 (Social and economic recovery and job creation). On this basis, Ireland has requested to extend the implementation timeline of the milestone 94. Furthermore, Ireland has requested to amend milestone 94. The Council Implementing Decision of 8 September 2021 should be amended accordingly.
- (8) Ireland has explained that one measure is no longer achievable because localised affordability needs have been identified by local authorities outside what was initially envisaged. Consequently, the existing eligibility criteria proved to be restrictive and not apt to achieve the objectives of the measures. For this reason, the Department of Housing needed to expand the eligibility criteria of the Cost Rental Scheme. This expanded eligibility equally achieves the objective of the measure without reducing its ambition. This concerns targets 102, 103 and 104 under measure 3.8 (Increasing The Provision Of Social And Affordable Housing) under component 3 (Social and economic recovery and job creation). On this basis, Ireland has requested to amend the aforementioned targets. The Council Implementing Decision of 8 September 2021 should be amended accordingly.
- (9) The Commission considers that the reasons put forward by Ireland justify the amendment(s) pursuant to Article 21(2) of Regulation (EU) 2021/241, and the Council Implementing Decision of 8 September 2021 should be amended accordingly.

### ***Corrections of clerical errors***

- (10) One clerical error has been identified in the text of the Council Implementing Decision, affecting one milestone and one measure under one component. The Council Implementing Decision should be amended to correct this clerical error that does not reflect the content of the RRP submitted to the Commission on 28 May 2021, as

agreed between the Commission and Ireland. This clerical error relates to milestone 57 of investment 2.2 (Programme to drive the digital transformation of enterprise in Ireland) under component 2 (Accelerating and expanding digital reforms and transformation). This correction does not affect the implementation of the measure concerned.

***The REPowerEU chapter based on Article 21c of Regulation (EU) 2021/241***

- (11) The REPowerEU chapter includes one new reform and five new investments. The chapter includes a reform to introduce a plan-led regime in the deployment of offshore renewable energy through the introduction of a policy statement, the adoption of two designated maritime planning areas by the Irish parliament (the Oireachtas), as well as an auction of offshore renewable energy capacity. The reform contributes towards the development of offshore wind energy in Ireland, enabling a combined capacity of offshore wind of 5 GW by 2030. The chapter further includes investments in scaling-up the production of sustainable biomethane in Ireland through the adoption of a dedicated biomethane strategy and an action plan, and the introduction of a capital grant for the construction or upgrade of the production capacity of sustainable biomethane, investments in sustainable rail transport through the construction of charging infrastructure on the route from Dublin City Centre to Drogheda on the Northern Line, facilitating the deployment of battery electric rolling stock, as well as dedicated energy efficiency interventions in hospitals, public schools (combined with the delivery phase of the Energy Profile Programme to identify further cost-efficient energy interventions), and public office buildings. Overall, the new reform and the new investments included in the REPowerEU chapter contribute to reducing the overall reliance on fossil fuels by accelerating the deployment of renewable energy sources and renewable gases, boosting energy efficiency and reducing primary energy consumption, and by facilitating sustainable urban transport. The REPowerEU chapter also contributes to addressing energy poverty by increasing the deployment of renewable energy and renewable gases, as well as decreasing energy consumption in public buildings, thereby reducing energy system costs.

***Commission's assessment***

- (12) The Commission has assessed the amended RRP against the assessment criteria laid down in Article 19(3) of Regulation (EU) 2021/241.

***Balanced response contributing to the six pillars***

- (13) In accordance with Article 19(3), point (a), of and Annex V, criterion 2.1, to Regulation (EU) 2021/241, the amended RRP, including the REPowerEU chapter, represents to a large extent (Rating A) a comprehensive and adequately balanced response to the economic and social situation, thereby contributing appropriately to all of the six pillars referred to in Article 3 of that Regulation, taking into account the specific challenges faced by and the financial allocation for the Member State concerned.
- (14) The Irish RRP, as well as the inclusion of the REPowerEU chapter, continue to comprehensively cover the six pillars structuring the scope of application of the Facility. The new measures included in the REPowerEU chapter in particular further strengthen the focus of the RRP on the green transition, thereby contributing to the first pillar (green transition).

***Addressing all or a significant subset of challenges identified in country-specific recommendations***

- (15) In accordance with Article 19(3), point (b), of and Annex V, criterion 2.2, to Regulation (EU) 2021/241, the amended RRP including the REPowerEU chapter is expected to contribute to effectively addressing all or a significant subset of challenges (Rating A) identified in the relevant country-specific recommendations addressed to Ireland, including fiscal aspects thereof, or challenges identified in other relevant documents officially adopted by the Commission in the context of the European Semester.
- (16) Having assessed progress in the implementation of all relevant country-specific recommendations as part of the 2022 and 2023 European Semester, the Commission finds that the recommendation on increasing the deployment of renewables and was fully implemented. Substantial progress has been achieved with respect to the recommendations on additional investments in energy efficiency measures and increasing public investments aimed at addressing climate objectives and the green transition in 2022.
- (17) The amended RRP includes an extensive set of mutually reinforcing reforms and investments that contribute to effectively addressing all or a significant subset of the economic and social challenges outlined in the country-specific recommendations addressed to Ireland by the Council in the context of the European Semester, notably the country-specific recommendations on reducing the overall reliance on fossil fuels (country-specific recommendation 4.1 in 2022 and 4.1 in 2023) by accelerating the deployment of renewable energy, in particular offshore wind and sustainable biomethane, and rationalising the planning and permitting framework for renewables (country-specific recommendation 4.2 in 2022 and 4.4 in 2023), as well as implementing additional measures that support energy efficiency in private and public buildings to reduce energy bills and energy system costs (country-specific recommendation 4.5 in 2023). In addition, through retrofit measures bringing reductions in public sector energy consumption, the chapter helps addressing the recommendation to expand public investment for the green transition and energy security (country-specific recommendation 1 in 2022).

***Do no significant harm***

- (18) In accordance with Article 19(3), point (d), of and Annex V, criterion 2.4, to Regulation (EU) 2021/241, the amended RRP including the REPowerEU chapter is expected to ensure that no measure (Rating A) for the implementation of reforms and investments projects included in this RRP does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852 of the European Parliament and of the Council<sup>5</sup> (the principle of ‘do no significant harm’).
- (19) The modified RRP including the REPowerEU chapter is assessed to be compliant with the principle of ‘do no significant harm’ following the methodology set out in the Technical Guidance in the Commission Notice (2021/C58/01). The assessment concludes that, for all new measures under the REPowerEU chapter, there is either no risk of significant harm or, where a risk is identified, a more detailed assessment is performed demonstrating the absence of significant harm. Where needed, the requirements of compliance with the principle of ‘do no significant harm’ are

---

<sup>5</sup> Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment, and amending Regulation (EU) 2019/2088 (OJ L 198, 22.6.2020, p. 13).

enshrined in the design of a measure and specified in a milestone or target representing such measure.

### ***Contribution to the REPowerEU objectives***

- (20) In accordance with Article 19(3), point (da), of and Annex V, criterion 2.12, to Regulation (EU) 2021/241, the REPowerEU chapter is expected to effectively contribute to a large extent (Rating A) to energy security, the diversification of the Union's energy supply, an increase in the uptake of renewables and in energy efficiency, and an increase of energy storage capacities or the necessary reduction of dependence on fossil fuels before 2030.
- (21) The measures included in the REPowerEU chapter are expected to contribute to the objective under Article 21c(3), points (b), (d) and (e), of Regulation (EU) 2021/241. The investment in increasing the production and uptake of sustainable biomethane and the reform of the Offshore Renewable Energy Support Scheme, which aims to introduce a plan-led deployment scheme in Ireland and includes the auctioning of development rights for deployment of additional offshore renewable energy will contribute to the objectives of Article 21c(3) point (b) and point (e) of Regulation (EU) 2021/241. Supporting battery charging infrastructure will enable the utilisation of zero-emission rolling stock and contribute to zero-emission transport and its infrastructure, including railways, in line with objectives of Article 21c(3) point (e) of Regulation (EU) 2021/241. Lastly, investments into energy efficiency retrofits of the public building stock in Ireland, in particular in hospital assets, community nursing units, primary and post-primary schools and a public office building will contribute to the objectives of Article 21c(3) point (d) of Regulation (EU) 2021/241 by incentivising reductions of energy demand.

### ***Measures having a cross-border or multi-country dimension or effect***

- (22) In accordance with Article 19(3), point (db), of and Annex V, criterion 2.13, to Regulation (EU) 2021/241, the measures included in the REPowerEU chapter are expected to a large extent (Rating A) to have a cross-border or multi-country dimension or effect.
- (23) The REPowerEU chapter contributes to securing energy supply in the Union as a whole, including by addressing challenges identified in the Commission's most recent needs assessment, in line with the objectives set out in Article 21c(3), taking into account the financial contribution available to Ireland and its geographical position. The measures included in the REPowerEU chapter contributes to reducing Ireland's reliance on imported energy and fossil fuels by developing additional capacity for production of renewable gases and by advancing the deployment of offshore wind energy. The REPowerEU chapter also contributes to reducing dependency on fossil fuels and to reducing energy demand by supporting the retrofit of the public building stock and further enabling sustainable public transport. The estimated costs of the measures included in the REPowerEU chapter having a cross-border or multi-country dimension or effect represents 98% of the estimated total costs of the REPowerEU chapter.

### ***Contribution to the green transition including biodiversity***

- (24) In accordance with Article 19(3), point (e), of and Annex V, criterion 2.5, to Regulation (EU) 2021/241, the modified RRP including the REPowerEU chapter, contains measures that contribute to a large extent (Rating A) to the green transition, including biodiversity, or to addressing the challenges resulting therefrom. The

measures supporting climate objectives account for an amount which represents 50.2% of the RRP's total allocation and 81.6% of the total estimated costs of measures in the REPowerEU chapter, calculated in accordance with the methodology set out in Annex VI to that Regulation. In accordance with Article 17 of Regulation (EU) 2021/241, the amended RRP including the REPowerEU chapter is consistent with the information included in the National Energy and Climate Plan 2021-2030.

- (25) The REPowerEU chapter has the overarching objective of accelerating the green transition and climate action through the further deployment of renewable energy such as sustainable biomethane and offshore wind energy, reduction of energy consumption through retrofit actions in the public building stock, and the provision of net-zero public transport.
- (26) Three investments in the chapter aim to decrease primary energy consumption in public building stock through investments in energy efficiency interventions. These interventions have the objective of reducing primary energy demand by 30% on average. The provision of battery electric trains and charging stations for the Dublin to Drogheda route enables zero-emissions transport for a large number of commuters. Lastly, the reform on plan-led development of offshore wind deployment and the investment in increasing the production of sustainable biomethane are expected to facilitate the integration of energy from renewable sources.

#### ***Costing***

- (27) In accordance with Article 19(3), point (i), of and Annex V, criterion 2.9, to Regulation (EU) 2021/241, the justification provided in the amended RRP including the REPowerEU chapter on the amount of the estimated total costs of the RRP is to a medium extent (Rating B) reasonable and plausible, is in line with the principle of cost efficiency and is commensurate to the expected national economic and social impact.
- (28) The cost information provided by Ireland for the amended RRP is detailed and well substantiated. Moreover, Ireland submitted separate documents including more elaborate descriptions of the methodology underlying the cost calculations and explanations of how past projects relate to the cost estimates of the new measures as documentation. The assessment of the cost estimates and inherent supporting information shows that the majority of the costs of the new measures are well justified, reasonable, plausible and do not include costs covered by existing or planned EU financing. However, as some costing elements are not entirely documented, this leads to the assessment that the costing information is clear to a medium extent, which would warrant a B rating. Finally, the amount of the estimated total cost of the RRP is in line with the principle of cost-efficiency and commensurate to the expected national economic and social impact.

#### ***Any other assessment criteria***

- (29) The Commission considers that the amendments put forward by Ireland do not affect the positive assessment of the RRP set out in the Council Implementing Decision ST 11046/21 INIT of 8 September 2021 on the approval of the assessment of the RRP for Ireland regarding the relevance, effectiveness, efficiency and coherence of the RRP against the assessment criteria laid down in Article 19(3), points (c), (f), (g), (h), (j) and (k) of Regulation (EU) 2021/241.

#### ***Positive assessment***

- (30) Following the positive assessment by the Commission of the amended RRP including the REPowerEU chapter, with the finding that the RRP satisfactorily complies with

the criteria for assessment set out in Regulation (EU) 2021/241, in accordance with Article 20(2) of and Annex V to that Regulation, the reforms and investment projects necessary for the implementation of the amended RRP including the REPowerEU chapter, the relevant milestones, targets and indicators, and the amount made available from the Union for the implementation of the modified RRP including the REPowerEU chapter in the form of non-repayable financial support should be set out.

### ***Financial contribution***

- (31) The estimated total costs of the modified RRP including the REPowerEU chapter of Ireland is EUR 1 163 158 300. As the amount of the estimated total costs of the modified RRP including the REPowerEU chapter is higher than the updated maximum financial contribution available for Ireland, the total financial contribution calculated in accordance with Articles 20(4), 21a(6) and 21b(2) of Regulation (EU) 2021/241 allocated for Ireland's amended RRP should be equal to EUR 914 368 618<sup>6</sup>.
- (32) Pursuant to Article 21a(5) of Regulation (EU) 2021/241, on 22 March 2024, Ireland submitted a request for the allocation of the revenue referred to in Article 21a (1) of that Regulation, shared between Member States on the basis of the indicators set out in the methodology in Annex Iva to Regulation (EU) 2021/241. The estimated total costs of the measures referred to in Article 21c(3), points (b) to (f) included in the REPowerEU chapter is EUR 240 000 000. As this amount is higher than the allocation share available for Ireland, the additional non-repayable financial support available for Ireland should be equal to the allocation share. This amount is equal to EUR 89 428 389.
- (33) Additionally, in accordance with Article 4a of Regulation (EU) 2021/1755<sup>7</sup> on 1 March 2023 Ireland submitted a reasoned request to transfer part of its remaining provisional allocation from the resources of the Brexit Adjustment Reserve to the Facility, amounting to EUR 150 000 000. That amount should be made available to support the reforms and investments in the REPowerEU chapter as additional non-repayable financial support.
- (34) The total financial contribution available to Ireland should be EUR 1 153 797 007.
- (35) Council Implementing Decision ST 11046/21 of 8 September 2021 on the approval of the assessment of the RRP for Ireland should therefore be amended accordingly. For the sake of clarity, the Annex to that Council Implementing Decision should be replaced entirely,

HAS ADOPTED THIS DECISION:

### ***Article 1***

The Council Implementing Decision of 8 September 2021 on the approval of the assessment of the recovery and resilience plan for Ireland is amended as follows:

- (1) Article 1 is replaced by the following:

*“Article 1*

---

<sup>6</sup> This amount corresponds to the financial allocation after deduction of Ireland's proportional share of the expenses referred to in Article 6(2) of Regulation (EU) 2021/241, calculated in accordance with the methodology set out in Article 11 of that Regulation.

<sup>7</sup> Regulation (EU) 2021/1755 of the European Parliament and of the Council of 6 October 2021 establishing the Brexit Adjustment Reserve (OJ L 357 8.10.2021, p. 1).

### *Approval of the assessment of the RRP*

The assessment of the modified RRP of Ireland on the basis of the criteria provided for in Article 19(3) of Regulation (EU) 2021/241 is approved. The reforms and investment projects under the RRP, the arrangements and timetable for the monitoring and implementation of the RRP, including the relevant milestones and targets, the relevant indicators relating to the fulfilment of the envisaged milestones and targets, and the arrangements for providing full access by the Commission to the underlying relevant data are set out in the Annex to this Decision.”;

(2) In Article 2, paragraphs 1 and 2 are replaced by the following:

“1. The Union shall make available to Ireland a financial contribution in the form of non-repayable support amounting to EUR 1 153 797 007.<sup>8</sup> That contribution includes:

- (a) an amount of EUR 914 368 618 that shall be available to be legally committed by 31 December 2022;
- (b) an amount of EUR 89 428 389, in accordance with Article 21a(6) of Regulation (EU) 2021/241, exclusively for measures referred to in Article 21c of that Regulation, with the exception of measures referred to in Article 21c (3), point (a);
- (c) an amount of EUR 150 000 000, transferred from the Brexit Adjustment Reserve to the Facility.

2. The Union financial contribution shall be made available by the Commission to Ireland in instalments in accordance with the Annex to this Decision.

The pre-financing and instalments may be disbursed by the Commission in one or several tranches. The size of the tranches shall be subject to the availability of funding.”;

(3) The Annex is replaced by the text in the Annex to this Decision:

### *Article 2 Addressee*

This Decision is addressed to the Republic of Ireland.

Done at Brussels,

*For the Council  
The President*

---

<sup>8</sup> This amount corresponds to the financial allocation after deduction of Ireland’s proportional share of the expenses of Article 6(2) of Regulation (EU) 2021/241, calculated in accordance with the methodology of Article 11 of that Regulation.

for Ireland**

{SWD(2024) 135 final}

## ANNEX

### SECTION 1: REFORMS AND INVESTMENTS UNDER THE RECOVERY AND RESILIENCE PLAN

#### 1. DESCRIPTION OF REFORMS AND INVESTMENTS

##### A. COMPONENT 1: ADVANCING THE GREEN TRANSITION

This component of the Irish recovery and resilience plan contributes to addressing Ireland's climate and biodiversity challenges and aims to accelerate the decarbonisation of the Irish economy, as Ireland is lagging behind other Member States in tackling decarbonisation.

The objectives of the component are twofold:

- Strengthen the overall governance framework by enshrining key climate targets and associated institutional structures and processes into national legislation; and
- Direct relevant funding towards decarbonising projects, such as retrofitting and investment in railways, whilst also enhancing ecosystem resilience and rehabilitation.

The component contributes to addressing the country-specific recommendations related to front-loading investments focusing on low carbon and energy transition, the reduction of greenhouse gas emissions, sustainable transport, and water supply and treatment (country-specific recommendations 3 in 2019 and 2020). It also contributes to the recommendation to promote and stimulate research and innovation (country-specific recommendations 3 in 2019 and 2020).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

##### **A.1. Description of the reforms and investments for non-repayable financial support**

###### **Investment: 1.2 Accelerate the Decarbonisation of the Enterprise Sector**

The objective of this investment is to support the decarbonisation of enterprises, foreign- and indigenous-owned, by incentivising the installation of energy metering and monitoring control systems, and increasing the uptake of carbon neutral low/medium temperature heating in the manufacturing industry.

This investment helps to finance projects through two funds. First, the investment shall provide funding to the Enterprise Emissions Reduction Investment Fund, which targets enterprises in the manufacturing sector (*1.2.1 Accelerate the Decarbonisation of the Enterprise Sector Accelerate the decarbonisation of the enterprise sector - Enterprise Emissions Reduction Investment Fund*). Second, it shall support the Climate Planning Fund for Business, targeting enterprises (*1.2.2 Accelerate the Decarbonisation of the Enterprise Sector - Climate Planning Fund for Business*).

This fund targets identification of CO<sub>2</sub> abatement opportunities for companies, projects for lower-carbon products, or research and development of new low carbon products.

It is expected that this investment does no significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the investment and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01). In particular, if bioenergy technology is to be supported for climate change mitigation and biodiversity, assurance shall be provided that biomass meets the sustainability and greenhouse gas emission savings criteria set out in Articles 29, 30 and 31 of the Renewable Energy Directive 2018/2001/EU (REDII) and the rules on food and feed based biofuels set out in Article 26 of that Directive, and related implementing and delegated acts. For pollution prevention and control, in residential environments, compliance with air quality standards set by Directive 2008/50/EU shall be ensured and the Carbon Reduction Fund shall comply with the applicable Best Available Technologies (BAT) conclusions under the Industrial Emissions Directive (Directive 2010/75/EU). Only high efficiency, eco-design compliant boilers shall be eligible for support under this measure. The eligibility criteria contained in terms of reference for upcoming calls for projects shall exclude the following list of activities: (i) activities related to fossil fuels, including downstream use; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks<sup>1</sup>; (iii) activities related to waste landfills, incinerators and mechanical biological treatment plants; and (iv) activities where the long-term disposal of waste may cause harm to the environment. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation may be selected.

The investment shall be completed by 31 August 2026.

#### Investment: 1.3 Public Sector Retrofit Pathfinder Project

The objective of this investment is to finance a major upgrade of public office buildings by investing in energy efficiency and modernisation upgrades in order to significantly reduce their carbon footprint and prolong their useful lifespan.

The measure consists of:

- The upgrade of at least 5 400 m<sup>2</sup> of public office accommodation located throughout Ireland with building energy ratings of C3 or less. The upgrade shall achieve at least a 30 % reduction in primary energy use and building energy ratings of at least B.
- A deep retrofit of the Tom Johnson House in Dublin. The target building energy rating after refurbishment shall be at least A2 and the improvement shall represent at least a 30 % reduction in primary energy use.

It is expected that those investments do no significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the investments and the mitigating steps set out in the recovery and resilience plan in accordance with

---

<sup>1</sup> Where the activity supported achieves projected greenhouse gas emissions that are not substantially lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

the DNSH Technical Guidance (2021/C58/01). In particular, the first at least 70% (by weight) of the non-hazardous construction and demolition waste (excluding naturally occurring material referred to in category 17 05 04 in the European List of Waste established by Decision 2000/532/EC) generated on the construction site shall be prepared for re-use, recycling and other material recovery, including backfilling operations using waste to substitute other materials, in accordance with the Waste Hierarchy Directive and EU construction and Demolition Waste Management Protocol. Second, operators shall limit waste generation in processes related to construction and demolition, in accordance with the EU Construction and Demolition Waste Management Protocol and taking into account best available techniques and using selective demolition to enable removal and safe handling of hazardous substances and facilitate re-use and high-quality recycling by selective removal of materials, using available sorting systems for construction and demolition waste.

The implementation of this investment shall be completed by 31 December 2025.

#### Investment: 1.4 Enable future electrification through targeted investment in Cork commuter rail

The objective of the investment is to enable the future electrification of railways in the Cork metropolitan area, in order to to expand sustainable mobility policy in the region of Cork, reduce car use and increase the uptake of public transport, thus contributing to reducing greenhouse gas emissions.

The investment consists of the following three sub-investments:

- The first sub-investment includes the creation of an additional through-running line, with an extended platform at Kent Station, in compliance with accessibility objectives (*1.4.1 Enable Future Electrification through Targeted Investment in Cork Commuter Rail - Creation of an additional through-running line with an additional platform at Kent Station*).
- The second sub-investment consists in double-tracking the current single line and signalling work for the twin line section, between Glounthaune and Middleton (*1.4.2 Enable Future Electrification through targeted Investment in Cork Commuter Rail - Double tracking of the current single line between Glounthaune and Middleton*).
- The third sub-investment relates to the re-signalling of at least 62 km of the lines for the Cork Area Commuter network (*1.4.3 Enable Future Electrification through targeted Investment in Cork Commuter Rail - Re-signalling of the lines*).

The investment shall be completed by 31 August 2026.

#### Investment: 1.5 National Grand Challenge Programme

The objective of the investment is to promote research and development projects covering a range of priorities in climate, healthcare, digital and agriculture sectors. The investment uses a challenge-based funding model devised by Science Foundation Ireland to support research and innovation projects, which incentivises researchers to focus efforts on delivering tangible impact for society. The National Grand Challenges shall be organised under three rounds (*1.5.1 National Grand Challenge – Round 1; 1.5.2 National Grand Challenge – Round 2; 1.5.3 National Grand Challenge – Round 3*). It shall consist of five green challenges, and two digital challenges.

The investment consists in a selection of projects following three phases. A first phase, lasting between 12 and 18 months, shall consist in shortlisting research projects that are likely to solve these relevant priorities. In a second stage, candidates shall receive a letter of offer. They shall have 24 months to achieve the transition of their projects to the stage of a prototype or a government accepted policy or regulatory change. Lastly, winning teams shall be awarded a financial support to enable a deployment solution. Three rounds of selections shall be organised.

It is expected that this investment does no significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the investment and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01). In particular, the responsible metrics and targets for challenges shall be technologically neutral, the results of the R&I processes shall also be technologically neutral and brown R&I shall be excluded from the scheme.

The investment shall be completed by 31 July 2026.

#### Investment: 1.6 Enhanced rehabilitation of peatlands

The objective of the investment is to prevent further degradation of peatlands and to improve and enhance their condition. The investment aims to change land use from peat extraction to carbon sequestration and shall also contribute to increased biodiversity, support bog amenity and eco-systems, and improve water quality and flood risk management. The investment shall contribute to changing land use from peat extraction to carbon sequestration.

The investment consists in the rehabilitation of 33 000 hectares of peatlands areas owned by a semi-state-owned company, Bord Na Móna. The rehabilitation of these peatlands shall include the creation of wetlands and fens, the improvement of the topography, the trenching of drains blocking the re-wet cutaway, the implementation of different techniques to accelerate the vegetation and the construction of a solar powered pumping system to elevate water.

The investment shall be completed by 31 August 2026.

#### Investment 1.7 River basin management plan – Enhanced ambition programme

The objective of the investment is to improve waste water infrastructure by front-loading priority waste water treatment plant projects whose discharges have been identified as putting significant pressure on receiving water bodies.

The investment consists of: (i) the upgrade of at least 10 small water treatment plants (*1.7.1 River Basin Management Plan - Upgrade of at least 10 small water treatment plants*); (ii) the realisation of feasibility studies on at least 20 waste water treatment plants (*1.7.2 River Basin Management Plan - Feasibility studies on at least 20 waste water treatment plants*); and (iii) the monitoring of biological and physico-chemical indicators of at least 20 sites and the development of capability for establishing required treatment standards to support achieving Water Framework Directive objectives (*1.7.3 River Basin Management Plan - Monitoring of biological and physico-chemical indicators of at least 20 sites*).

The investment shall be completed by 30 September 2025.

#### Reform: 1.8 Climate Action and Low Carbon Development (amendment) Bill

The objective of this reform is to set an emissions reduction target for 2030 and the climate neutrality objective by 2050 into primary legislation, and to strengthen the governance framework for the achievement of these objectives.

The reform consists in the signature and entry into force of the Climate Action and Low Carbon Development (amendment) Bill that shall require, among others, putting the climate neutrality objective by 2050 on a statutory basis, the adoption of 5-yearly carbon budgets at sectoral and economy wide-levels, setting the first two carbon budgets in line with the 51% reduction objective for 2030, and preparing annual updates of the Climate Action Plan and the realisation of annual climate reporting.

The reform shall be completed by 31 December 2025.

#### Reform: 1.9 Carbon tax

The objective of the reform is to help decarbonise the economy by disincentivising the use of fossil fuels, encouraging the use of renewable energy by industry and society and fostering energy efficiency gains.

The reform consists in the implementation of successive annual increases in the carbon tax rate, by EUR 7,50 per year between 2021 and 2025, following the trajectory that would lead to a rate of EUR 100 per tonne of CO<sub>2</sub> emissions in 2030.

The reform shall be completed by 30 June 2025.

## **A.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support**

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
4	1.2.1 Accelerate the Decarbonisation of the Enterprise Sector - Enterprise Emissions Reduction Investment Fund	Milestone	Launch of call for proposals	Publication of the call for proposals by the Department of Enterprise, Trade and Employment and the enterprise agencies	-	-	-	Q3	2022	The call for proposals shall have been launched. The Enterprise Emissions Reduction Investment Fund shall target enterprises in the manufacturing sector, with a focus on carbon reducing technologies, monitoring and tracking systems, and research, development and innovation. The terms of reference of the call for proposals shall include eligibility criteria that ensure that the selected projects comply with the 'Do no significant harm' Technical Guidance (2021/C58/01) through the use of the list of excluded activities and the requirement for bioenergy technology in line with the measure description and the requirement that only activities that comply with relevant EU and national environmental legislation may be selected.
5	1.2.1 Accelerate the Decarbonisation of the Enterprise Sector - Enterprise Emissions Reduction Investment Fund	Target	Projects completed	-	Number	0	150	Q3	2026	At least 150 projects shall have been approved under the Enterprise Emissions Reduction Investment Fund, in compliance with the 'Do no significant harm' Technical Guidance (2021/C58/01) through the use of the list of excluded activities in line with the measure description and the requirement of compliance with the relevant EU and national environmental legislation.

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
6	1.2.1 Accelerate the Decarbonisation of the Enterprise Sector - Enterprise Emissions Reduction Investment Fund	Target	Quantity of CO <sub>2</sub> abated by the installation of low carbon technologies	-	Number (tons in thousands)	0	40	Q3	2026	At least 40 000 tons of estimated CO <sub>2</sub> shall have been abated from the installation of low carbon technologies. This shall be confirmed through self-reported emissions abatement by enterprises in receipt of the funding for capital installations.
7	1.2.2 Accelerate the Decarbonisation of the Enterprise Sector - Climate Planning Fund for Business	Milestone	Completion of an awareness campaign on the fund	Completion of an awareness campaign to promote uptake of support available from the Climate Planning Fund for Business	-	-	-	Q3	2026	An awareness campaign shall have been completed, which shall have included national and local radio coverage, to promote the uptake of the supports available from the Climate Planning Fund for Business.
8	1.2.2 Accelerate the Decarbonisation of the Enterprise Sector - Climate Planning Fund	Target	Approval of applications for funding support	-	Number	0	500	Q3	2026	At least 500 applications for funding support shall have been approved, and compliance with the 'Do no significant harm' Technical Guidance (2021/C58/01) shall have been ensured through the use of the list of excluded activities and the requirement for bioenergy technology in line with the measure description and the requirement that only activities that comply with relevant EU and

				introduce rate increases as set out in Finance Act 2020						the dates specified in Finance Act 2020.

## **B. COMPONENT 2: ACCELERATING AND EXPANDING DIGITAL REFORMS AND TRANSFORMATION**

This component of the Irish recovery and resilience plan contributes to addressing the challenges of the digital transformation by supporting the digitalisation of public services and companies, and improving digital skills.

The objective of the component is to accelerate and expand the country's digital transformation by supporting the digitalisation of enterprises, addressing the risk of the digital divide, including in the education sector, enhancing digital skills, and supporting the development of digital infrastructure and the delivery of digital public services.

The component supports addressing the country-specific recommendations on investment in the digital transition and digital infrastructure, as well as addressing the risk of digital divide, including in the education sector (country-specific recommendation 3 in 2019, and country-specific recommendations 2 and 3 in 2020).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

### **B.1. Description of the reforms and investments for non-repayable financial support**

#### **Investment: 2.1 Development of a shared Government data centre**

The objective of the measure is to deliver high-quality data centre facilities to replace the Government's outdated current public server rooms and data centre facilities, which are mostly located in city centre office locations that are inherently inefficient from a power usage perspective. The shared Government data centre developed at the Backweston Campus shall function in a more environmentally friendly manner, including by using the data centre's waste heat for other buildings. The data processing shall result in demonstrated substantial life-cycle greenhouse gas emissions savings.

The investment consists in the construction, electrification and mechanical equipment of the data centre. Two government organisations' servers and services shall have been migrated to the new Government data centre.

The investment shall be completed by 30 June 2026.

#### **Investment: 2.2 Programme to drive the digital transformation of enterprise in Ireland**

The objective of the measure is to tackle an unbalanced digitalisation among companies, particularly small and medium-sized enterprises (SMEs), and to enhance the digitalisation of businesses in Ireland.

The investment consists in supporting programmes aimed at the digitalisation of companies in Ireland, such as developing online presence, digitalisation of products and business processes, and using digital technologies to develop new markets and business models. This measure shall also

support Irish European Digital Innovation Hubs as part of the multi-country project. The hubs shall further help companies undertake the digital transformation and become more competitive.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects shall exclude the following list of activities: (i) activities related to fossil fuels, including downstream use<sup>2</sup>; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks<sup>3</sup>; (iii) activities related to waste landfills, incinerators<sup>4</sup> and mechanical biological treatment plants<sup>5</sup>; and (iv) activities where the long-term disposal of waste may cause harm to the environment. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation may be selected.

The investment may receive co-funding from the Digital Europe Programme.

The investment shall be completed by 30 June 2026.

#### Investment: 2.3 Programme to provide digital infrastructure and funding to schools

The objective of the measure is to ensure that learners of primary and post-primary schools are equipped with appropriate digital skills. The measure contributes to addressing regional and digital divide and disparities in Ireland.

The investment consists of two sub-measures in the digital area in schools. The first sub-measure (2.3.1 *Digital Infrastructure and Funding to Schools – Connectivity*) shall provide high-speed broadband connectivity for primary schools, and the second one (2.3.2 *Digital Infrastructure and Funding to Schools – ICT infrastructure*) shall fund the access to ICT infrastructure, notably by supporting schools to provide digital devices and software to disadvantaged students.

The investment shall be completed by 30 September 2022.

#### Investment: 2.4 Online response option for the census of population

The objective of the measure is to improve the efficiency of data collection and analysis by digitalising the census exercise. It shall reduce the burden on survey respondents and the cost of collecting data. The census is the only operation that gives a comprehensive picture of the social

---

<sup>2</sup> Except projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01).

<sup>3</sup> Where the activity supported achieves projected greenhouse gas emissions that are not substantially lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

<sup>4</sup> This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

<sup>5</sup> This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

and living conditions of Irish people. It provides policy makers with valuable information to create high quality public policies.

The investment consists in developing a platform for householders to complete their census return online. The infrastructure used shall have a reuse potential for any large-scale data collection by public authorities.

The investment shall be completed by 30 June 2026.

#### Investment: 2.5 Using 5G technologies to drive a greener more innovative Ireland

The objective of the measure is to ensure that public administrations maximise the benefit from 5G technologies.

The investment consists in building a low-latency platform with a high-speed backbone using edge compute nodes to enable a faster response. A variety of public services shall be subsequently developed, tested and deployed using the platform, notably for public protection and disaster relief and test before invest for SMEs and start-ups.

The investment shall be completed by 31 December 2025.

#### Investment: 2.6 Suite of e-Health projects

The objective of the measure is to support the digitalisation of the Irish healthcare system by enhancing the interoperability between different digital systems.

The investment consists of two sub-measures. The first sub-measure (*2.6.1 Suite of e-health projects – ePharmacy*) shall support the deployment of ePharmacy systems across hospitals in Ireland. This investment shall enable authorities to better monitor the use and costs of medications, as well as enable the creation of an integrated care delivery system where prescription data are linked to electronic patient records. The second sub-measure (*2.6.2 Suite of e-health projects - integrated financial management system*) shall support the deployment of an integrated financial management system to provide financial and procurement efficiencies within the health system. The integrated financial management system is expected to achieve this by providing a single view of all purchases and prices across hospitals in Ireland, which is expected to allow health authorities to optimise their public procurement practices.

The investment shall be completed by 31 December 2025.

#### Reform: 2.7 Addressing the digital divide and enhancing digital skills

The objective of the measure is to support digital transformation of Irish education and training at all levels (schools, tertiary, lifelong learning), mainstream essential digital skills across all settings, and address the risk of a digital divide.

The reform consists of: (i) a Digital Strategy for Schools 2021-2027 that shall aim to realise the potential of digital technologies in teaching, learning and assessment; (ii) a 10 Year Adult Literacy, Numeracy and Digital Literacy Strategy to help individuals build their digital literacy; (iii) a measure to increase the number of graduates with high level ICT skills; and (iv) a measure to support the access to ICT devices, notably by enabling further and higher education institutions to provide laptops to disadvantaged students.

The reform shall be completed by 31 December 2022.

## **B.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support**

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
53	2.1 Development of a shared Government data centre	Milestone	Signature of the contract for the building of the data centre facility	Signature of the contract	-	-	-	Q1	2022	The contract awarding the building construction, mechanical and electrical fit out of the data centre shall have been signed.
54	2.1 Development of a shared Government data centre	Milestone	Completion of the construction of the building of the data centre facility	Completion of the construction	-	-	-	Q2	2025	All plant, mechanical and electrical components of the data centre facility shall have been completed and successfully tested together and the facility shall have been commissioned and handed over to the Office of Public Works.
55	2.1 Development of a shared Government data centre	Target	Migration of the servers/services to the new Government data centre	-	Number	0	2	Q2	2026	At least 2 government organisations' servers and services shall have been migrated to the new Government data centre. In the meaning of footnote 2 of Annex VI and footnote 7 of Annex VII of the Regulation 2021/241, the data processing shall result in demonstrated substantial life-cycle greenhouse gas emissions savings through reductions in power usage effectiveness (PUE) of services and the project shall comply with the European Code of Conduct on data Centre Energy Efficiency.
56	2.2 Digital Transformation of Irish Enterprise	Milestone	Launch of calls for proposals	Publication of calls for proposals	-	-	-	Q2	2022	The initial calls for proposals by Enterprise Agencies for all elements of the programme (such as the voucher schemes) shall have been published, with terms of reference including eligibility criteria that ensure that the selected projects comply with the 'Do no significant harm' Technical Guidance

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
										(2021/C58/01) through the use of an exclusion list and the requirement of compliance with the relevant EU and national environmental legislation.
57	2.2 Digital Transformation of Irish Enterprise	Milestone	European Digital Innovation Hubs established	The European Digital Innovation Hubs are considered established	-	-	-	Q3	2022	At least two European Digital Innovation Hubs (EDIH) under the European Commission's Digital Europe Programme to drive the digital transformation of SMEs, the public service, and the economy more widely shall have been established. Four Irish EDIHs shall have been designated to go forward to the Commission restricted call for the EU-wide network.
58	2.2 Digital Transformation of Irish Enterprise	Target	Digital transformation funding approvals	-	Number	0	720	Q2	2026	At least 720 companies shall have received funding through the implementation of the Digitalisation Programmes.
59	2.3.1 Digital Infrastructure and Funding to Schools - Connectivity	Target	Connection of schools to broadband network	-	Number	0	750	Q2	2022	The Retail Service Providers shall have installed routers in at least 750 primary schools. These schools shall have been connected to HEAnet schools broadband network.
60	2.3.1 Digital Infrastructure and Funding to Schools – Connectivity	Target	Connection of schools to broadband network	-	Number	750	990	Q3	2022	The Retail Service Providers shall have installed routers in at least 990 primary schools. These schools shall have been connected to HEAnet schools broadband network.

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
61	2.3.2 Digital Infrastructure and Funding to Schools – ICT infrastructure	Milestone	Publication of the circular to schools to communicate the funding criteria	Publication of the circular to schools	-	-	-	Q3	2021	The funding criteria and mechanisms of the programme shall have been finalised and communicated to schools through the publication of a circular for schools.
62	2.3.2 Digital Infrastructure and Funding to Schools – ICT infrastructure	Target	Funding issued to primary and post-primary schools	-	Number	0	3 415	Q4	2021	At least 3 415 primary and post-primary schools shall have received the funding for access to ICT infrastructure. Schools shall receive funding based on the profile of the school, including socio-economic factors, to target learners at risk of educational disadvantage.
63	2.4 Online response option for the census	Milestone	The pilot for the online data collection is tested for verification of feasibility	Testing of the pilot of the online data collection system	-	-	-	Q3	2022	A pilot shall have been implemented and executed to test the online data collection concept. It shall involve the completion of the development and implementation of a pilot online census system and the execution of tests to verify the feasibility of progressing towards a full online census.
64	2.4 Online response option for the census	Milestone	A sample of citizens test the online data collection dress rehearsal	Testing by a sample of citizens	-	-	-	Q3	2024	A dress rehearsal shall have been implemented and executed to verify the correct functioning of the online data collection facility. It shall have confirmed that the online data collection facility works in a manner that is easy for citizens and is effective in collecting required census data. It shall have included the participation of a sample of citizens.
65	2.4 Online response option for the	Milestone	Launch of the online data collection of the	Online data collection system is	-	-	-	Q2	2026	The live online data collection system to facilitate the census data collection for the 2026 census shall have been launched, meaning that the live system

										and priorities, and actions that shall be undertaken to achieve the required outcomes in accordance with the objectives.
75	2.7 Addressing the digital divide and enhancing digital skills	Target	Increase of graduates with high level ICT skills	-	Number	0	12 450	Q4	2022	At least 12 450 learners shall graduate in 2021 with high-level ICT skills. These skills shall be defined as NFQ Level 6 or above.
76	2.7 Addressing the digital divide and enhancing digital skills	Milestone	Publication of 10 Year Strategy on adult skills	Publication of the 10 Year Adult Literacy, Numeracy and Digital Literacy Strategy	-	-	-	Q3	2021	A 10 Year Adult Literacy, Numeracy and Digital Literacy Strategy shall have been adopted and published. It shall set targets for basic digital literacy acquisition.
77	2.7 Addressing the digital divide and enhancing digital skills	Target	Disadvantaged students equipped with ICT devices	-	Number	0	20 000	Q4	2021	At least 20 000 laptops shall have been provided to disadvantaged students at further and higher education. The laptop specifications shall have been drawn up in conjunction with subject matter experts from higher or further education institutions, and the devices shall be suitable in the context of higher and further education provision.

### **C. COMPONENT 3: SOCIAL AND ECONOMIC RECOVERY AND JOB CREATION**

This component of the Irish recovery and resilience plan contributes to addressing the following challenges: (i) the need to foster activation strategies; (ii) the need to address skill shortages and prepare the workforce for the green and digital transitions; (iii) the need to lower regulatory barriers to entrepreneurship; (iv) the need to strengthen the anti-money laundering framework; (v) the need to address features of the tax system that facilitate aggressive tax planning; (vi) the need to fully implement pension reform plans; (vii) the need to address shortages in social housing supply and improve housing affordability; and (viii) the need to improve the accessibility, resilience, and cost-effectiveness of the healthcare system.

The objectives of the component are: (i) keeping those who are unemployed close to the labour market; (ii) equipping the Irish workforce with the necessary future-oriented skills that are required to boost the innovation and productivity of the small and medium-sized enterprise (SME) sector and skills in support of climate action; and (iii) contributing to strengthening the overall social and economic policy framework to help create an environment that helps maximise investments in activation support and upskilling.

The component contributes to addressing the country-specific recommendations related to employment through active integration support and upskilling (country-specific recommendations 2 in 2019 and 2020), regulatory barriers to entrepreneurship (country-specific recommendation 3 in 2019), anti-money laundering (country-specific recommendation 4 in 2020), aggressive tax planning (country-specific recommendations 1 in 2019, and 4 in 2020), pensions (country-specific recommendation 1 in 2019), social and affordable housing (country-specific recommendations 3 in 2019, and 2 in 2020) and healthcare (country-specific recommendations 1 in 2019 and 2020).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

#### **C.1. Description of the reforms and investments for non-repayable financial support**

##### **Investment: 3.2 Solas Recovery Skills Response Programme**

The objective of the measure is to support the reskilling and upskilling of workers to take account of the challenges of the modern Irish economy and labour market.

The investment consists in developing a range of additional educational and training programmes as part of the ‘Skills to Compete’ programme and to formally establish the ‘SOLAS Green Skills Action’ programme. Training programmes and modules shall be managed by the Education and Training Boards. They shall notably focus on skills which are relevant for the twin transition and target sectors with employment opportunities, such as information and communications technology (ICT) programming, green construction and climate change mitigation.

The investment shall be completed by 31 December 2024.

##### **Investment: 3.3 Technological Universities Transformation Fund**

The objective of the measure is to build capacity in education and training in technological universities.

The investment consists in expanding the Technical Universities Transformation Fund (TUTF) to finance a number of projects under a dedicated ‘TUTF Education & Training Reforms programme’. These projects shall be selected following a call for proposals targeting the five new and emerging technological universities. They shall include projects related to (i) staff skills and development, (ii) curricular and teaching and learning reform, (iii) skills for regional development and for SME, enterprise and social engagement, (iv) digital and enabling infrastructure, and (v) nationally shared technological universities’ digital services. Proposals shall be subject to specific criteria on gender equality and equal opportunities for all.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects shall exclude the following list of activities: (i) activities related to fossil fuels, including downstream use<sup>6</sup>; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks<sup>7</sup>; (iii) activities related to waste landfills, incinerators<sup>8</sup> and mechanical biological treatment plants<sup>9</sup>; and (iv) activities where the long-term disposal of waste may cause harm to the environment. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation may be selected.

The investment shall be completed by 31 December 2024.

#### Reform: 3.4 Reducing Regulatory Barriers To Entrepreneurship

The objective of the measure is to remove unnecessary regulatory obstacles for SMEs when it comes to establishing and growing their business.

The reform consists in the design, implementation, and verification of application of the SME test. The SME test shall contain four steps for policymakers to consider: (i) SME stakeholder consultation, (ii) identification of affected businesses, (iii) measurement of the impact on SMEs, and (iv) assessment of alternative mechanisms and mitigating measures. In addition, the reform consists in the publication of a project report on the development of a single SME Portal to provide assistance and supports for SMEs.

---

<sup>6</sup> Except projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01).

<sup>7</sup> Where the activity supported achieves projected greenhouse gas emissions that are not substantially lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

<sup>8</sup> This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

<sup>9</sup> This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

The reform shall be completed by 31 March 2023.

#### Reform: 3.5 Anti Money Laundering

The objective of the measure is to strengthen Ireland's anti-money laundering framework.

The reform consists in the publication of a sectoral anti-money laundering/counter financing of terrorism risk assessment of trust or company service providers (TCSPs). The Anti-Money Laundering Compliance Unit (AMLCU) staff in the Department of Justice shall be reinforced, notably with a view to conducting a greater number of inspections of TCSPs. Inspections shall consider legal obligations of TCSPs including: scope of the authorisation; business risk assessment; customer risk assessment; policies and procedures; staff training and instruction; customer due diligence and beneficial ownership of clients; suspicious transaction reporting. In addition, a working group shall be established by the AMLCU, which shall submit a review report to Government, on the feasibility of amending the primary legislation to expand the regulatory toolkit to include an administrative financial sanctions regime, including recommendations towards such an expansion of the regulatory toolkit where considered feasible. New legislation aiming at introducing an administrative financial sanctions regime for the AMLCU or any relevant successor bodies in line with the Sixth Anti-Money Laundering Directive shall enter into force.

The reform shall be completed by 30 June 2026.

#### Reform: 3.6 Aggressive Tax Planning

The objective of the measure is to apply preventative measures to limit opportunities for aggressive tax planning and in particular double non-taxation by means of outbound payments.

The reform consists of: (i) an amendment to the legislation on capital allowances on intangible assets, guidance on the corporate tax residency reform and the entry into force of enhanced Controlled Foreign Company rules. In respect of outbound payments, the reform also includes (ii) the publication of economic analysis by an independent external contractor on the impact of recent reforms affecting payment flows; (iii) a public consultation on the possibility of introducing measures on outbound payments; and (iv) the entry into force of legislation to prevent double non-taxation applying to outbound payments towards jurisdictions on the EU list of non-cooperative jurisdictions, no-tax, and zero-tax jurisdictions. These legislative measures shall include withholding taxes or non-deductibility of outbound payments. In the case of dividends, measures shall include withholding taxes since dividends cannot be deducted.

The reform shall be completed by 31 March 2024.

#### Reform: 3.7 Pensions

The objective of the measure is to simplify and harmonise the supplementary pension landscape.

The reform consists of legislative measures that shall support the harmonisation of the tax treatment of employer contributions and help simplify the drawdown process. A first measure consists in removing a rule which prohibits transfer from second pillar occupational schemes to third pillar personal retirement savings accounts (PRSAs), where the individual has more than 15 years qualifying service. A second measure includes removing the benefit-in-kind charge on employer contributions to an employee's pension. A third measure is the potential abolition of the 'approved minimum retirement fund'.

The reform shall be completed by 31 December 2022.

#### Reform: 3.8 Increasing the provision of social and affordable housing

The objective of the measure is to increase the supply of social and affordable housing.

The reform consists in the entry into operation of the Land Development Agency (LDA) as commercial state agency as provided under the LDA Act. It also consists in the entry into force of an Affordable Housing Act. Housing units shall be delivered under the different schemes established by the reform.

It is expected that this measure does not do significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measure and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01). In particular, at least 70% (by weight) of the non-hazardous construction and demolition waste (excluding naturally occurring material referred to in category 17 05 04 in the European List of Waste established by Decision 2000/532/EC) generated on the construction site shall be prepared for re-use, recycling and other material recovery, including backfilling operations using waste to substitute other materials, in accordance with the waste hierarchy and the EU Construction and Demolition Waste Management Protocol.

The reform shall be completed by 31 March 2022.

#### Reform: 3.9 Health

The objective of the measure is to progress on the implementation of the Sláintecare reform programme to contribute to achieving a universal single-tier healthcare system where everyone has equal access to services based on need irrespective of ability to pay.

The reform consists in implementing the Sláintecare Consultant Contract. The Sláintecare Consultant Contract shall be a 'public only' contract of employment for consultants, with no provision for any private practice, on or offsite, and shall introduce increased salary over existing new entrant salary levels. The reform also consists in the operationalisation of 96 Community Health Networks (CHNs) for planning and delivery of primary health care services in a structured way. Finally, it also consists in ensuring the participation of an increasing number of patients in a Chronic Disease Management Programme.

The reform shall be completed by 31 December 2023.

## **C.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support**

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
80	3.2 Solas Recovery Skills Response Programme	Milestone	Development of skill provision opportunities under the 'Skills to Compete' programme	Skills provision opportunities available for learners to book their place	-	-	-	Q3	2021	'Skills to Compete' skill provision opportunities shall have been made available for booking. They shall include opportunities in the areas of (i) digital skills, (ii) employability (transversal) skills and (iii) specific sector skills.
81	3.2 Solas Recovery Skills Response Programme	Milestone	Development of green skills provision and modules opportunities	Green skills modules and provision opportunities are available for enrolment	-	-	-	Q4	2021	Green skills modules and provision opportunities shall have been made available for booking. They shall cover at least specific skills areas in Near Zero Emission Building and retrofit and a suite of green skills for upskilling and re-skilling. In particular, opportunities shall include specific skills training which may also enable the application of standards higher than NZEB. Compliance with the DNSH Technical Guidance (2021/C58/01) shall be ensured by the exclusion of the following activities from the modules and provision opportunities: - Activities linked to disposal of waste in landfill or incinerators that may cause harm to the environment, - Activities related to fossil fuel (however, it is noted that skills provision activities may target the re-skilling of peat-based plant workers with a view to allow them to take part in different types of activities not covered by this exclusion list), and - Activities where the long-term disposal of waste may cause long-term harm to the environment.
82	3.2 Solas Recovery Skills Response Programme	Target	Participation in the Green Skills Action Programme and	-	Number	0	81250	Q4	2024	Number of participants enrolled from 1 January 2021 onwards in at least one of the skill provision and modules under the SOLAS Green Skills Action Programme and the Skills to Compete Initiative. In

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
			Skills to Compete Participation							cases where individuals enrol in multiple skill provision opportunities and/or modules, then these multiple participations are not excluded. This is a single target for the SOLAS Green Skills Action Programme and the Skills to Compete Initiative combined, and does not include sub-targets for individual programmes or initiatives
83	3.2 Solas Recovery Skills Response Programme	Target	Share of women enrolled in the Skills to Compete Initiative	-	Percentage	0	50	Q4	2024	Share of female participants (in relation to the total number of participants as computed for Target 82) enrolled in at least one of the skills provision opportunities under the the Skills to Compete Initiative
84	3.3 Technological Universities Transformation Fund	Milestone	Project grants awarded under the Education and Training Reforms programme	Project grant agreements are signed by successful applicants	-	-	-	Q1	2022	All grant agreements under the Education and Training Reforms programme shall have been signed by successful applicants, in compliance with the 'Do no significant harm' Technical Guidance (2021/C58/01) through the use of an exclusion list and the requirement of compliance with the relevant EU and national environmental legislation. Each grant agreement shall include the financial amount allocated to the successful applicant (technological university (TU) or TU development consortium) and details of the project and timeline. Each proposal shall have clearly demonstrated how gender equality and equal opportunities have been considered in constructing the application, the specific actions that shall be taken, the provision of gender and equality disaggregated data on the beneficiaries of measures, and how these actions shall align with institutional gender action plans. Each grant agreement shall specify that the Higher Education Authority shall make stage payments subject

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
										to the achievement of deliverables and criteria for approved projects. Projects shall fall under one of the following categories: - staff skills and development, - curricular and teaching and learning reform, - skills for regional development and for SME, enterprise and social engagement, - digital and enabling infrastructure, - nationally shared TU digital services.
85	3.3 Technological Universities Transformation Fund	Milestone	Approval of project reports	Project reports are signed off by the Higher Education Authority	-	-	-	Q4	2024	All final project reports under the Education and Training Reforms Programme shall have been approved by the Higher Education Authority. Final project reports shall measure progress on the achievement of deliverables and respect of underlying criteria for approved projects, gender equality and equal opportunities.
86	3.3 Technological Universities Transformation Fund	Target	Staff members of all five Technological Universities having participated in upskilling and development activities	-	Number	0	4 000	Q2	2024	At least 4 000 staff members coming from all five technological universities shall have participated in upskilling and development activities financed under the projects of the Education and Training Reforms programme referred to in milestone 84.
87	3.3 Technological Universities Transformation Fund	Target	Students of all five technological universities enrolled in a new or reformed	-	Number	0	9 600	Q2	2024	At least 9 600 students coming from all five technological universities shall have been enrolled in a new or reformed curriculum or have participated in new or reformed training or learning activities financed under the projects of the Education and Training Reforms programme referred to in milestone 84.

			curriculum or having benefitted from new or reformed training or learning activities							
88	3.4 Reducing Regulatory Barriers To Entrepreneurship	Milestone	Publication of a programme for the implementation of the SME Test and communication to all Government departments	Publication of a programme of actions and communication on implementation of the SME Test issued to all Government Departments	-	-	-	Q1	2022	A programme of actions for the implementation of the SME Test, with the objective of removing unnecessary regulatory obstacles for SMEs, shall have been published. The programme shall specify a clear timeline and objectives for the SME test. A Communication on implementation of the SME Test shall also have been issued to all Government departments, which shall have requested that the SME Test be fully applied on all relevant legislation.
89	3.4 Reducing Regulatory Barriers To Entrepreneurship	Milestone	Implementation of all identified actions to ensure a consistent uptake of the SME Test across Government	Implementation of all identified actions to ensure a consistent uptake of the SME Test across Government, including the establishment of a network and reporting framework	-	-	-	Q2	2022	All actions identified in the programme of actions set out in Milestone 88 shall have been implemented according to the timeline defined in that programme. A network shall have been established and shall include a nominated member from each Government Department, unless an appropriate justification was given by a particular Department for not nominating a member. A reporting framework shall have been established and shall allow for the monitoring of application of the SME Test across Government.
90	3.4 Reducing Regulatory	Target	Government Departments having applied	-	Number	0	5	Q1	2023	At least five additional Government Departments shall have applied the SME Test at least once in 2022 as compared to no Government Department having

	Barriers To Entrepreneurship		the SME test							applied the SME Test at least once in 2020. This shall be evidenced by the data on the application of the SME Test published on a dedicated centralised website.
91	3.5 Anti-Money Laundering	Target	Inspections of Trust or Company Service Providers (TCSPs) carried out by the Anti-Money Laundering Compliance Unit (AMLCU)	-	Number	0	120	Q4	2021	At least 120 inspections of TCSPs (either onsite or remotely) shall have been carried out by AMLCU regulatory investigators. AMLCU shall have recruited at least two additional staff in 2021, including at least one with specialist skills in forensic accounting, to assist with the supervision and management of TCSPs. Inspections shall have considered legal obligations of TCSPs including: scope of the authorisation; business risk assessment; customer risk assessment; policies and procedures; staff training and instruction; customer due diligence and beneficial ownership of clients; suspicious transaction reporting. Following an inspection, the TCSP shall have been rated as high risk, medium- high risk, medium- low risk or low risk and this shall inform the level of future inspections.
92	3.5 Anti-Money Laundering	Milestone	Review of the Regulatory enforcement toolkit under the Criminal Justice (Money Laundering and Terrorist Financing) Act 2010	Review of the Regulatory enforcement toolkit under the Criminal Justice (Money Laundering and Terrorist Financing) Act 2010, including recommendations on expanding the toolkit to include	-	-	-	Q4	2021	The review report on the feasibility of amending the primary legislation to expand the regulatory toolkit to include an administrative financial sanctions regime, including recommendations towards such an expansion of the regulatory toolkit where considered feasible, shall have been submitted by the working group to Government.

				an administrative financial sanctions regime						
93	3.5 Anti-Money Laundering	Milestone	Publication of an anti-money laundering / counter financing of terrorism Sectoral Risk Assessment of Trust or Company Service Providers (TCSPs)	Publication of an anti-money laundering / counter financing of terrorism Sectoral Risk Assessment of Trust or Company Service Providers (TCSPs)	-	-	-	Q1	2022	An anti-money laundering / counter financing of terrorism Sectoral Risk Assessment of Trust or Company Service Providers (TCSPs) by the Anti-Money Laundering Steering Committee (AMLSC) shall have been published. The analysis in the risk assessment shall be based on responses received to a detailed questionnaire issued to all relevant TCSP supervisors. The methodology applied in this assessment shall be the methodology recommended by the European Commission, as applied in the European Commission's supra-national risk assessment.
94	3.5 Anti-Money Laundering	Milestone	Entry into force of legislation introducing an administrative financial sanctions regime for the AMLCU or any relevant successor bodies	Provision in the legislation indicating the entry into force of the legislation	-	-	-	Q2	2026	Legislation shall have entered into force. It shall have introduced an administrative financial sanctions regime for the AMLCU or any relevant successor bodies in line with the Sixth Anti-Money Laundering Directive. This new administrative financial sanctions regime shall cover those designated persons in the non-financial sector the AMLCU or any relevant successor bodies are competent authority for, at a minimum Trust or Company Service Providers not in the remit of the Central Bank of Ireland or prescribed accounting bodies.
95	3.6 Aggressive Tax Planning	Milestone	Amendment of capital allowances on intangible assets	Provision in the legislation indicating the entry into force of the legislation	-	-	-	Q3	2020	Legislation shall have entered into force. It shall have amended capital allowances on intangible assets to provide that all assets acquired from October 2020 are fully within the scope of balancing charge rules in line with international best practice.

96	3.6 Aggressive Tax Planning	Milestone	Corporate Tax residency reform and enhanced controlled foreign companies (CFC) rules applying to the list of non-cooperative jurisdictions	Publication of a circular and provision in the legislation indicating the entry into force of the legislation	-	-	-	Q1	2021	Publication of a circular concerning the amendment of Ireland's corporate tax residence rules to prevent Irish incorporated companies from being stateless for tax purposes and to shut down structures (such as the so-called 'Double Irish') that were designed to exploit gaps in US anti-avoidance rules. Legislation shall have enhanced CFC rules to apply to the list of non-cooperative jurisdictions, exceeding the minimum requirements for ATAD in Part 35B of the Taxes Consolidation Act, 1997, concerning controlled foreign companies ('CFCs'). Section 835YA shall disapply section 835T (the Effective tax rate exemption), section 835U (the Low profit margin exemption) and section 835V (the Low accounting profit exemption) so that an Irish resident company with a CFC resident in a jurisdiction that is included on the EU Code of Conduct list of non-cooperative jurisdictions for tax purposes in an accounting period of the CFC may not avail of the aforementioned exemptions.
97	3.6 Aggressive Tax Planning	Milestone	Economic analysis on outbound payment flows and recent reforms and public consultation on measures applying to outbound payments	Publication of economic analysis on outbound payment flows and recent reforms and publication of public consultation summary on measures applying to	-	-	-	Q4	2021	The economic analysis by an independent external contractor shall have been published. It shall have examined payment flows (including interest, royalties and dividends to/from EU Member States and non-EU jurisdictions including offshore financial centres) and the practical impact of the implementation of recent reforms to Ireland's corporate tax code, and key reforms in other jurisdictions notably the United States, on these flows. Public consultation shall also have taken place on the possibility of introducing measures applying to outbound payments and shall have been published on Department of Finance website. The consultation shall

					Unit of measure	Baseline	Goal	Quarter	Year	
										the construction site shall be prepared for re-use, recycling and other material recovery, including backfilling operations using waste to substitute other materials, in accordance with the waste hierarchy and the EU Construction and Demolition Waste Management Protocol.
102	3.8 Increasing The Provision Of Social And Affordable Housing	Target	Homes made available for sale through the new Affordable Purchase scheme for homes on public lands	-	Number	0	100	Q3	2023	At least 100 homes shall have been made available for sale through the Affordable Purchase Scheme for homes on public lands.
103	3.8 Increasing The Provision Of Social And Affordable Housing	Target	Homes delivered under the cost rental scheme	-	Number	0	450	Q3	2023	At least 450 homes shall have been completed and tenanted under the cost rental scheme.
104	3.8 Increasing The Provision Of Social And Affordable Housing	Target	Homes made available for sale to purchasers who avail of the equity support scheme	-	Number	0	100	Q3	2023	At least 100 homes shall have been made available for sale to purchasers who avail of the equity support scheme.
105	3.9 Health	Milestone	Entry into operation of Sláintecare Consultant Contract	Entry into operation of Sláintecare Consultant Contract	-	-	-	Q3	2021	The Sláintecare Consultant Contract shall have entered into operation. It shall include increased salary over existing new entrant salary levels and new contractual arrangements for consultants. The contract shall be a 'public only' contract of employment, with no provision for any private practice, on or offsite. The new contract shall have been applicable to all contracts

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
										issued after 30 September 2021 at the latest. All existing consultants shall have been offered the opportunity to switch permanently to the Sláintecare Consultant Contract, but shall have been able to retain the option to remain on their existing contract.
106	3.9 Health	Target	Community Health Networks enter into operation	-	Number	0	96	Q4	2022	A total of 96 Community Health Network (CHN) shall have entered into operation. Each CHN shall consist of primary care teams involving General Practice in the planning and delivery of primary health care services in a structured way.
107	3.9 Health	Target	Patients participating in the Chronic Disease Management Programme	-	Number	120 000	430 000	Q4	2023	At least 430 000 patients with chronic disease or at high risk of chronic disease shall have been registered as participants in one of the components (Opportunistic Case Finding; Annual Preventive Programme for patients at high risk of cardiovascular disease or diabetes; Structured Treatment Programme for those diagnosed with Chronic Diseases included in the Programme) of the Chronic Disease Management Programme when the programme reaches full implementation in 2023, as compared to the 120 000 patients eligible to register in the programme by 31 December 2020. Patients in the Chronic Disease Management Programme shall be provided two scheduled reviews in a 12-month period that shall include patient education, preventative care, medication review, physical examination, scheduled investigations and an individual care plan. Each review shall consist of a consultation with the practice nurse followed by a consultation with the General Practitioner.

## **D. AUDIT AND CONTROL**

### **D.1. Description of the reforms and investments for non-repayable financial support**

A repository system for recording, storing and making available all relevant data related to the implementation of the recovery and resilience plan - the achievement of milestones and targets, data on final recipients, contractors, subcontractors and beneficial owners - shall be operational before the first payment request is submitted. Ireland shall submit a dedicated audit report before the first payment request confirming the effectiveness of the functionalities of the repository system. The audit report shall be undertaken to analyse any related weaknesses found and corrective actions taken or planned.

In addition, before making the first payment request under the Recovery and Resilience Facility, Ireland shall ensure that the administrative capacity of the Implementing Body, as well as the administrative capacity for the audit body is guaranteed by means of a workload analysis.

The Implementing Body with the objective of strengthening the framework further to prevent, detect, and correct any serious irregularities such as fraud, conflict of interest, corruption and double funding shall issue instructions to the Accountable Departments on ex-ante conflict of interests and double funding checks, on fraud risk assessment and on-the-spot verifications.

Milestone 110 under this measure shall be fulfilled by the time of submission of the second request for payment to the Commission.

**D.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support**

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
108	Monitoring and implementation of the plan	Milestone	Repository system for audit and controls: information for monitoring implementation of RRF	An audit report confirming repository system functionalities	-	-	-	Q4	2021	A repository system for monitoring the implementation of the RRF shall be in place and operational before the first payment request. The system shall include, as a minimum, the following functionalities: (a) collection of data and monitoring of the achievement of milestones and targets; (b) collect, store and ensure access to the data required by points (i) to (iii) of point (d) of Article 22(2) of the RRF Regulation.
109	Monitoring and implementation of the plan	Milestone	Administrative capacity of the Implementing Body and the audit body	A report confirming the commitment of resources for the Implementing Body and the audit body	-	-	-	Q4	2021	The administrative capacity of the Implementing Body, as well as the administrative capacity for the audit body shall be guaranteed by the first payment request by means of a workload analysis.
110	Monitoring and implementation of the plan	Milestone	Strengthening framework to prevent, detect, and correct any serious irregularities	Issued instructions	-	-	-	Before the second payment request	Before the second payment request	The Implementing Body of the Irish Recovery and Resilience Plan shall issue instructions to the Accountable Departments with the objective to strengthen the framework to prevent, detect, and correct any serious irregularities such as fraud, conflict of interest, corruption and double funding. These instructions shall include, as a minimum:

										<p>(a) Instructions for the Accountable Departments to conduct ex-ante conflict of interests and double funding checks through the use of appropriate national databases and data mining and risk scoring tools. The instructions should also include which data must be collected and reported by Accountable Departments from final recipients;</p> <p>(b) Instructions for the Accountable Departments to conduct a fraud risk assessment for their respective RRF measures;</p> <p>(c) Clear procedures for on-the-spot verifications to be performed by the Accountable Departments.</p>
--	--	--	--	--	--	--	--	--	--	---

## **E. REPowerEU**

This component of the Irish recovery and resilience plan is structured around six measures and contributes to addressing the challenges of the green transition, in particular the need to improve energy efficiency in buildings, accelerate the development of additional generation capacity from renewable energy sources, reduce dependency on imported fossil fuels, and improve the availability and accessibility of net-zero public transportation.

The objective of the REPowerEU chapter of the Irish recovery and resilience plan is to:

- Increase and accelerate the deployment of renewable energy by increasing the production capacity of sustainable biomethane and accelerating the deployment of offshore wind energy through the adoption of a policy statement on the establishment of a plan-led regime, the adoption of a designated maritime area plan, and the commencement of an auction for development rights to these areas.
- Boost energy efficiency and reducing energy system costs by providing retrofit schemes to public buildings such as administrative buildings, hospitals and schools, and reducing primary energy consumption in public buildings.
- Bolster the provision of sustainable and net-zero public transport through the construction of battery charging infrastructure for the Dublin City Centre to Drogheda line, part of Ireland's Core Network under the TEN-T Regulation.

All measures included in the Irish REPowerEU chapter have cross-border or multi-country effects. Increasing the share of renewable energy sources, either through auctions for offshore renewable energy sources or supporting the upscaling of a sustainable biomethane industry, has a cross-border or multi-country dimension because it contributes towards ensuring the security of supply as well as removing bottlenecks in the energy flows and freeing up excess capacity for interconnection purposes. Similarly, addressing primary energy consumption and reducing energy demand also contributes towards cross-border objectives through freeing up capacity, and thereby supply, for other Member States. Lastly, increasing the availability and accessibility of net-zero public transport in TEN-T corridors is likely to help reduce the demand for fossil fuels for the purposes of private transport.

The REPowerEU chapter supports addressing the country-specific recommendations on reducing the overall reliance on fossil fuels (country-specific recommendation 4.1 in 2022 and 4.1 in 2023) by accelerating the deployment of renewable energy, in particular offshore wind and sustainable biomethane, and rationalising the planning and permitting framework for renewables (country-specific recommendation 4.2 in 2022 and 4.4 in 2023), as well as implementing additional measures that support energy efficiency in private and public buildings to reduce energy bills and energy system costs (country-specific recommendation 4.5 in 2023). In addition, through retrofit measures bringing reductions in public sector energy consumption, the chapter helps addressing the recommendation to expand public investment for the green transition and energy security (country-specific recommendation 1 in 2022).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

## **E.1. Description of the reforms and investments for non-repayable financial support**

### **Investment: 5.1 Upscaling a Biomethane Industry in Ireland**

The objective of this measure is to boost the production and uptake of sustainable biomethane in line with the Renewable Energy Directive and to accelerate the integration of renewable energy sources. The investment consists of two sub-measures.

Sub-measure one consists of the adoption by the Irish government of a National Biomethane Strategy that provides policy direction to guide the development of a sustainable biomethane industry in Ireland. The Strategy shall identify actions to support the development of the sustainable biomethane industry.

Sub-measure two consists of funding a capital grant for the building or upgrade of production facilities. The call for applications for the grant shall require the compliance with the Renewable Energy Directive 2018/2001/EU, in particular that the facilities meet the sustainability and greenhouse gas emission savings criteria set out in Articles 29-31 and the rules on food and feed-based biofuels set out in Article 26. It shall also include the selection criterion that the traffic of trucks transporting biowaste shall be minimised. The support from this measure shall increase the production capacity of sustainable biomethane by at least 0.1 terawatt-hours (TWh).

The implementation of the investment shall be completed by 30 June 2026.

### **Investment: 5.2 Drogheda Charging Infrastructure**

The objective of the investment is to enable sustainable rail transport through the installation of a train battery charging infrastructure in Drogheda, enabling the deployment of battery-electric trains in replacement of diesel carriages on the route from the Dublin City Centre to Drogheda.

The measure consists of the installation of the train battery charging infrastructure in Drogheda to cater for the battery-electric train carriages. It shall include the charging infrastructure with a charging capacity of 3.5 megawatt-hours (MWh) and its installation, as well as stabling works.

The implementation of the investment shall be completed by 30 June 2026.

### **Investment: 5.3 SEAI/HSE Pilot Energy & Decarbonisation Pathfinder**

The objectives of the investment are to support and mobilise energy and decarbonisation retrofits in the public sector. It further develops the SEAI Pathfinder Programme, which aims to help public bodies achieving their retrofit targets and improve energy performance. The Health Service Executive (HSE) Pilot Energy & Decarbonisation Pathfinder aims to provide energy retrofits and modernisations in the healthcare environment, and act as a pathfinder to provide experience and insights to the HSE for the decarbonisation of their estate portfolio.

The investment consists of retrofit actions for the upgrade of HSE assets. The energy efficiency interventions include enabling infrastructure, low carbon heating system investments, as well as fabric upgrades (e.g., walls, windows, insulation) and other energy efficiency upgrades (e.g., roof mounted solar, LED lighting upgrades, building management system controls, mechanical & electrical services). The retrofit actions shall be undertaken in five HSE estates: Lusk Community Nursing Unit, Baltinglass Community Nursing Unit, Clonakilty Community Nursing Unit, Regional Hospital Mullingar, and Our Lady of Lourdes Hospital. The actions shall lead to at least a 30% reduction in primary energy use in the five HSE estates.

The implementation of the investment shall be completed by 30 June 2026.

#### Investment: 5.4 Expanded School Sector Pathfinder Decarbonisation and Retrofit Programme

The objective of the investment is to renovate a selection of the primary and post-primary schools in the Pilot Energy Inventory Profile Programme database. The investment also aims to complete the delivery phase of the Energy Profile Inventory of Schools Programme that identifies and develops targeted energy and decarbonisation programmes for the school sector.

The investment consists of two sub-measures. The first sub-measure concerns energy efficiency upgrades of primary and post-primary schools through retrofit interventions. This may include upgrades to wall and roof insulations, doors and windows, air tightness improvements, LED lighting and heating upgrades, as well as installation of renewable technologies. At least 20 primary/post-primary schools shall be upgraded. This shall lead to at least 30% reduction in primary energy use in the schools.

The second sub-measure concerns the delivery phase of the Energy Profile Inventory of Schools Programme. It shall consist of the surveying and data collection of at least 2 991 schools by construction professionals to gather data relevant for retrofitting interventions.

The implementation of the investment shall be completed by 30 June 2026.

#### Investment: 5.5 Retrofit of No.6 Ely Place

The objective of this investment is to finance the retrofit of a public office block on the site of no. 6 Ely Place in Dublin to reduce carbon emissions from the building and improve energy efficiency.

The measure consists of the renovation of at least 3 500 square meters of a building located on 6 Ely Place. This shall lead to an at least 30% reduction in primary energy use.

The implementation of the investment shall be completed by Q1 2026.

#### Reform: 5.6: Offshore Renewable Electricity Support Scheme (ORESS).

The objective of the reform is to promote and accelerate the deployment of offshore renewable energy sources in Ireland. The reform aims to contribute towards the target of 5 gigawatt (GW) of installed offshore wind capacity by 2030.

The reform consists of the publication of a policy statement by the Irish Government, setting out the policy targets and priorities to facilitate the achievement of 5 GW of offshore wind capacity by 2030. The policy statement shall propose actions to accelerate the deployment of offshore wind. It shall also propose actions to implement a plan-led framework for offshore energy development.

The reform shall further consist of the adoption of the South Coast Designated Maritime Area Plan (Celtic Sea) by the Oireachtas and the launch and conclusion of the first Offshore Renewable Electricity Support Scheme auction under the policy statement.

The implementation of the reform shall be completed by 30 June 2026.

D.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

Nr.	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
111	5.1 Upscaling a Biomethane Industry in Ireland	Milestone	Strategy for the production and deployment of sustainable biomethane	Adoption and publication of the Strategy	-	-	-	Q2	2024	The Irish government shall adopt and publish the National Biomethane Strategy. The Strategy shall identify actions to support the development of the sustainable biomethane industry.
112	5.1 Upscaling a Biomethane Industry in Ireland	Milestone	Call for applications for grants for the building or upgrade of production facilities	Call for applications published	-	-	-	Q4	2024	Publication of the call for applications for grants to support the production of sustainable biomethane.
113	5.1 Upscaling a Biomethane Industry in Ireland	Target	Installation of new biomethane production capacity		TWh	0	0.1	Q2	2026	The grant shall lead to at least 0.1 terawatt-hours of new installed capacity for the production of sustainable biomethane.
114	5.2 Drogheda Charging Infrastructure	Milestone	Award of the contracts for train charging infrastructure and stabling works	Award of contracts	-	-	-	Q2	2024	The contract for train-charging infrastructure installation at Drogheda and the contract for the stabling works shall have been awarded.
115	5.2 Drogheda Charging Infrastructure	Milestone	Completion of battery train charging infrastructure	Certificate of completion of works signed	-	-	-	Q2	2026	Battery electric train charging infrastructure in Drogheda shall have been completed and the Authorisation for Placing in Service approved by the Commission for Railway Regulation (CRR).

Nr.	Related Measure (Reform or)	Milestone / Target	Name	Qualitative indicators	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
116	5.3 SEAI/HSE Pilot Energy & Decarbonisation Pathfinder	Milestone	Work contracts signed for retrofit actions in HSE estates	Work contracts signed	-	-	-	Q1	2025	The work contracts shall have been signed for the retrofit of five HSE estates.
117	5.3 SEAI/HSE Pilot Energy & Decarbonisation Pathfinder	Milestone	Completion of retrofitting actions in HSE estates.	Completion of retrofitting actions.	-	-	-	Q2	2026	At least 30% reduction in primary energy use in the five HSE estates shall have been achieved.
118	5.4 Expanded School Sector Pathfinder Decarbonisation and Retrofit Programme and Energy Profile Inventory of Schools	Milestone	Award of design contracts for Primary/Post-Primary schools.	Award of design contracts	-	-	-	Q4	2024	The design contracts shall have been awarded for at least 20 primary/post-primary schools.
119	5.4 Expanded School Sector Pathfinder Decarbonisation and Retrofit Programme and Energy Profile Inventory of Schools	Milestone	Completion of retrofitting of primary/post-primary schools and collection and uploading of data for schools to the inventory system.	Completion of retrofitting and collection and uploading of data to the inventory system.	-	-	-	Q2	2026	At least 30% reductions in primary energy use shall have been achieved in at least 20 primary/post-primary schools.  Data relevant for retrofitting interventions shall have been collected for at least 2 991 schools and uploaded to the inventory system.
120	5.5 Restoration and Refurbishment of no. 6 Ely Place	Milestone	Contract signed	Contract signed	-	-	-	Q3	2024	Contract shall have been signed for the restoration and refurbishment of no. 6 Ely Place, Dublin.
121	5.5 Restoration and Refurbishment of no. 6 Ely Place	Milestone	Completion of the works	Completion of the works	m <sup>2</sup>	0	3 500	Q1	2026	Completion of the works for the restoration and refurbishment of at least

Nr.	Related Measure (Reform or	Milestone / Target	Name	Qualitative indicators	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
										3 500 square meters of the building located on 6 Ely Place, Dublin, leading to an at least 30% reduction in primary energy use.
122	5.6 Offshore Renewable Electricity Support Scheme (ORESS)	Milestone	Publication of policy statement for the acceleration of deployment of offshore wind and adoption of South Coast Designated Maritime Area Plan by the Oireachtas	Publication of policy statement and adoption of South Coast Designated Maritime Area Plan	-	-	-	Q3	2025	<p>A policy statement by the Irish Government shall have been published, setting out the policy targets and priorities to facilitate the achievement of 5 GW of offshore wind capacity by 2030.</p> <p>The South Coast Designated Maritime Area Plan shall have been adopted by both houses of the Oireachtas.</p>
123	5.6 Offshore Renewable Electricity Support Scheme (ORESS)	Milestone	Award of Letter of Offer following the first auction of offshore RES development	Award of Letter of Offer	-	-	-	Q2	2026	<p>Letter of Offer shall have been awarded to the winning project following the first auction of offshore RES development.</p> <p>The Letter of Offer shall confer a two-way Contract for Difference (CfD) support to the winning project for a period of up to 20 years.</p>

## 2. ESTIMATED TOTAL COST OF THE RECOVERY AND RESILIENCE PLAN

The estimated total cost of the recovery and resilience plan of Ireland is EUR 1 163 158 300.

### SECTION 2: FINANCIAL SUPPORT

#### 1. Financial contribution

The instalments referred to in Article 2(2) shall be organised in the following manner:

##### 1.1. First Instalment (non-repayable support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
95	3.6 Aggressive Tax Planning	Milestone	Amendment of capital allowances on intangible assets
47	1.9 Carbon Tax	Milestone	Carbon tax rate trajectory Legislation
99	3.7 Pensions	Milestone	Report on supplementary pension landscape
96	3.6 Aggressive Tax Planning	Milestone	Corporate Tax residency reform and enhanced controlled foreign companies (CFC) rules applying to the list of non-cooperative jurisdictions
48	1.9 Carbon Tax	Milestone	Carbon tax rate increase for 2021
32	1.6 Enhanced Rehabilitation of Peatlands	Milestone	Peatlands rehabilitation preliminary study
43	1.8 Climate Action and Low Carbon Development (Amendment) Bill 2021	Milestone	Entry into force of Climate Action and Low Carbon Development (Amendment) Bill 2021
45	1.8 Climate Action and Low Carbon Development (Amendment) Bill 2021	Milestone	First update of the Climate Action Plan
69	2.6.1 Suite of e-health projects - ePharmacy	Milestone	Award of the contracts for ePharmacy systems
76	2.7 Addressing the digital divide and enhancing digital skills	Milestone	Publication of 10 Year Strategy on adult skills
80	3.2 Solas Recovery Skills Response Programme	Milestone	Publication of all skill provision opportunities under the 'Skills to Compete' programme
105	3.9 Health	Milestone	Entry into operation of Sláintecare Consultant Contract
61	2.3.2 Digital Infrastructure and Funding to Schools – ICT infrastructure	Milestone	Publication of the circular to schools to communicate the funding criteria
9	1.3 Public Sector Buildings' Energy Retrofit Programme	Milestone	Commencement of the retrofit works

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
14	1.4.1 Enable Future Electrification through Targeted Investment in Cork Commuter Rail - Creation of an additional through-running line with an additional platform at Kent Station	Milestone	Awarding design contract Kent station
33	1.6 Enhanced Rehabilitation of Peatlands	Target	Start of works on first bogs
44	1.8 Climate Action and Low Carbon Development (Amendment) Bill 2021	Milestone	Adoption of the first three 5-yearly carbon budgets programme
62	2.3.2 Digital Infrastructure and Funding to Schools – ICT infrastructure	Target	Funding issued to primary and post-primary schools
72	2.6.2 Suite of e-health projects - integrated financial management system	Milestone	Completion of building and configuration of the integrated financial management system
74	2.7 Addressing the digital divide and enhancing digital skills	Milestone	Publication of Digital Strategy for schools
77	2.7 Addressing the digital divide and enhancing digital skills	Target	Disadvantaged students equipped with ICT devices
81	3.2 Solas Recovery Skills Response Programme	Milestone	Publication of all Green skills provision and modules opportunities
91	3.5 Anti-Money Laundering	Target	Inspections of Trust or Company Service Providers (TCSPs) carried out by the Anti-Money Laundering Compliance Unit (AMLCU)
92	3.5 Anti-Money Laundering	Milestone	Review of the Regulatory enforcement toolkit under the Criminal Justice (Money Laundering and Terrorist Financing) Act 2010
97	3.6 Aggressive Tax Planning	Milestone	Economic analysis on outbound payment flows and recent reforms and public consultation on measures applying to outbound payments
101	3.8 Increasing The Provision Of Social And Affordable Housing	Milestone	Entry into operation of the LDA as a commercial state agency
108	Monitoring and implementation of the plan	Milestone	Repository system for audit and controls: information for monitoring implementation of RRF
109	Monitoring and implementation of the plan	Milestone	Administrative capacity of the Implementing Body and the audit body
37	1.7.1 River Basin Management Plan - Upgrade of at least 10 small water treatment plants	Milestone	Selection of eligible waste water treatment plants
53	2.1 Development of a shared Government data centre	Milestone	Signature of the contract for the building of the data centre facility
84	3.3 Technological Universities Transformation Fund	Milestone	Project grants awarded under the Education and Training Reforms programme
88	3.4 Reducing Regulatory Barriers To Entrepreneurship	Milestone	Publication of a programme for the implementation of the SME Test and communication to all Government departments
93	3.5 Anti-Money Laundering	Milestone	Publication of an anti-money laundering / counter financing of terrorism Sectoral Risk Assessment of Trust or Company Service Providers (TCSPs)
38	1.7.1 River Basin Management Plan -	Milestone	Start of the upgrade of small waste

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	Upgrade of at least 10 small water treatment plants		water treatment plants
41	1.7.3 River Basin Management Plan - Monitoring of biological and physico-chemical indicators of at least 20 sites	Milestone	Publication of sites selected for the monitoring
49	1.9 Carbon Tax	Milestone	Carbon tax rate increase for 2022
56	2.2 Digital Transformation of Irish Enterprise	Milestone	Launch of calls for proposals
59	2.3.1 Digital Infrastructure and Funding to Schools - Connectivity	Target	Connection of schools to broadband network
89	3.4 Reducing Regulatory Barriers To Entrepreneurship	Milestone	Implementation of all identified actions to ensure a consistent uptake of the SME Test across Government
12	1.4 Enable Future Electrification Through Targeted Investment in Cork Commuter Rail	Milestone	Signature of contract for electric / battery-electric fleet
		Instalment Amount	EUR 323 803 933

## 1.2. Second Instalment (non-repayable support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
4	1.2.1 Accelerate the Decarbonisation of the Enterprise Sector - Carbon Reduction Fund	Milestone	Launch of call for proposals
17	1.4.2 Enable future electrification through targeted investment in Cork commuter rail - Double tracking of the current single line between Glounthaune and Midleton	Milestone	Submission of environmental impact assessment
57	2.2 Digital Transformation of Irish Enterprise	Milestone	European Digital Innovation Hubs established
63	2.4 Online response option for the census	Milestone	The pilot for the online data collection is tested for verification of feasibility
60	2.3.1 Digital Infrastructure and Funding to Schools - Connectivity	Target	Connection of schools to broadband network
15	1.4.1 Enable future electrification through targeted investment in Cork commuter rail - Creation of an additional through-running line with an additional platform at Kent Station	Milestone	Construction contracts award
18	1.4.2 Enable future electrification through targeted investment in Cork commuter rail - Double tracking of the current single line between Glounthaune and Midleton	Milestone	Construction contract awarded
21	1.4.3 Enable future electrification through targeted investment in Cork commuter rail - Re-signalling of the lines	Milestone	Main design and build contract awarded
75	2.7 Addressing the digital divide and enhancing digital skills	Target	Increase of graduates with high level ICT skills
100	3.7 Pensions	Milestone	Legislative measures to simplify and harmonise the supplementary pension's landscape
106	3.9 Health	Target	Community Health Networks enter into operation
90	3.4 Reducing Regulatory Barriers To Entrepreneurship	Target	Government Departments having applied the SME test

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
50	1.9 Carbon Tax	Milestone	Carbon tax rate increase for 2023
102	3.8 Increasing The Provision Of Social And Affordable Housing	Target	Homes made available for sale through the new Affordable Purchase scheme for homes on public lands
103	3.8 Increasing The Provision Of Social And Affordable Housing	Target	Homes delivered under the cost rental scheme
104	3.8 Increasing The Provision Of Social And Affordable Housing	Target	Homes made available for sale to purchasers who avail of the equity support scheme
110	Monitoring and implementation of the plan	Milestone	Strengthening framework to prevent, detect, and correct any serious irregularities
		Instalment Amount	EUR 115 511 906

### 1.3. Third Instalment (non-repayable support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
11	1.3 Public Sector Buildings' Energy Retrofit Programme	Milestone	Retrofit work of the Tom Johnson House is completed
22	1.4.3 Enable future electrification through targeted investment in Cork commuter rail - Re-signalling of the lines	Milestone	Acceptance of scheme detailed design
34	1.6 Enhanced Rehabilitation of Peatlands	Target	Start of works on additional bogs
40	1.7.2 River Basin Management Plan - Feasibility studies on at least 20 waste water treatment plants	Target	Feasibility studies and assessments associated with sub-measures 1 and 3 assessing opportunities for further upgrades
66	2.5 Using 5G technologies to drive a greener more innovative Ireland	Target	Purchase of 18 compute nodes
70	2.6.1 Suite of e-health projects - ePharmacy	Milestone	Completion of building and configuration of ePharmacy
107	3.9 Health	Target	Patients participating in the Chronic Disease Management Programme
19	1.4.2 Enable future electrification through targeted investment in Cork commuter rail - Double tracking of the current single line between Glounthaune and Midleton	Milestone	Commencement of works Glounthaune-Midleton line
98	3.6 Aggressive Tax Planning	Milestone	Legislation applying to outbound payments to prevent double non-taxation introduced
51	1.9 Carbon Tax	Milestone	Carbon tax rate increase for 2024
86	3.3 Technological Universities Transformation Fund	Target	Staff members of all five Technological Universities having participated in upskilling and development activities
87	3.3 Technological Universities Transformation Fund	Target	Students of all five technological universities enrolled in a new or reformed curriculum or having benefitted from new or reformed training or learning activities
111	5.1 Upscaling a Biomethane Industry in Ireland	Milestone	Strategy for the production and

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
			deployment of sustainable biomethane
114	5.2 Drogheda Charging Infrastructure	Milestone	Award of the contracts for train charging infrastructure and stabling works
		Instalment Amount	EUR 240 286 336

#### 1.4. Fourth Instalment (non-repayable support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
46	1.8 Climate Action and Low Carbon Development (Amendment) Bill 2021	Milestone	Further update of the Climate Action Plan
64	2.4 Online response option for the census	Milestone	A sample of citizens test the online data collection dress rehearsal
16	1.4.1 Enable future electrification through targeted investment in Cork commuter rail - Creation of an additional through-running line with an additional platform at Kent Station	Milestone	Through through-running platform completed
35	1.6 Enhanced Rehabilitation of Peatlands	Target	Completion of rehabilitation works for first bogs
67	2.5 Using 5G technologies to drive a greener more innovative Ireland	Target	Installation of compute nodes
85	3.3 Technological Universities Transformation Fund	Milestone	Approval of project reports
24	1.5.1 National Grand Challenge – Round 1	Milestone	Signature of Round 1 contracts for selected green projects
25	1.5.1 National Grand Challenge – Round 1	Milestone	Signature of Round 1 contracts for selected digital projects
52	1.9 Carbon Tax	Milestone	Carbon tax rate increase for 2025
54	2.1 Development of a shared Government data centre	Milestone	Completion of the construction of the building of the data centre facility
82	3.2 Solas Recovery Skills Response Programme	Target	Participants in the Green Skills Action Programme and Skills to Compete Participation
83	3.2 Solas Recovery Skills Response Programme	Target	Increase in the share of women under the age of 30 with a level of education attainment at level 5 or lower enrolled in the Skills to Compete Initiative
112	5.1 Upscaling a Biomethane Industry in Ireland	Milestone	Call for applications for grants for the building or upgrade of production facilities
116	5.3 SEAI/HSE Pilot Energy & Decarbonisation Pathfinder	Milestone	Work contracts signed for retrofit actions in HSE estates
118	5.4 Expanded School Sector Pathfinder Decarbonisation and Retrofit Programme and Energy Profile Inventory of Schools	Milestone	Award of design contracts for Primary/Post-Primary schools.
120	5.5 Restoration and Refurbishment of no. 6 Ely Place	Milestone	Contract signed
		Instalment Amount	EUR 249 302 195

1.5. Fifth Instalment (non-repayable support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
39	1.7.1 River Basin Management Plan - Upgrade of at least 10 small water treatment plants	Target	Small waste water treatment plants upgraded
42	1.7.3 River Basin Management Plan - Monitoring of biological and physico-chemical indicators of at least 20 sites	Milestone	Final report
13	1.4 Enable Future Electrification Through Targeted Investment in Cork Commuter Rail	Milestone	Selection of zero emission propulsion
27	1.5.2 National Grand Challenge – Round 2	Milestone	Signature of Round 2 contracts for selected green projects
28	1.5.2 National Grand Challenge – Round 2	Milestone	Signature of Round 2 contracts for selected green digital projects
55	2.1 Development of a shared Government data centre	Target	Migration of the servers/services to the new Government data centre
68	2.5 Using 5G technologies to drive a greener more innovative Ireland	Milestone	Testing of the Public Protection and Disaster Relief
71	2.6.1 Suite of e-health projects - ePharmacy	Target	First deployment of ePharmacy
73	2.6.2 Suite of e-health projects - integrated financial management system	Target	First deployment of the integrated financial management system
20	1.4.2 Enable future electrification through targeted investment in Cork commuter rail - Double tracking of the current single line between Glounthaune and Midleton	Target	Completion of double tracking of Glounthaune to Midleton
30	1.5.3 National Grand Challenge – Round 3	Milestone	Signature of Round 3 contracts for selected green projects
58	2.2 Digital Transformation of Irish Enterprise	Target	Digital transformation funding approvals
65	2.4 Online response option for the census	Milestone	Launch of the online data collection of the census
5	1.2.1 Accelerate the Decarbonisation of the Enterprise Sector - Carbon Reduction Fund	Target	Projects completed
6	1.2.1 Accelerate the Decarbonisation of the Enterprise Sector - Carbon Reduction Fund	Target	Quantity of CO <sub>2</sub> abated by the installation of low carbon technologies
7	1.2.2 Accelerate the Decarbonisation of the Enterprise Sector - Climate Enterprise Action Fund	Milestone	Completion of awareness campaign on the fund
8	1.2.2 Accelerate the Decarbonisation of the Enterprise Sector - Climate Enterprise Action Fund	Target	Approval of applications for funding support
23	1.4.3 Enable future electrification through targeted investment in Cork commuter rail - Re-signalling of the lines	Target	Completion of re-signalling works
26	1.5.1 National Grand Challenge – Round 1	Milestone	Completion report on the completion of Round 1 selected projects
29	1.5.2 National Grand Challenge – Round 2	Milestone	Progress report on the level of completion of Round 2 selected projects
31	1.5.3 National Grand Challenge – Round 3	Milestone	Progress report on the level of completion of Round 3 selected projects
36	1.6 Enhanced Rehabilitation of Peatlands	Target	Completion of rehabilitation work

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
10	1.3 Public Sector Buildings' Energy Retrofit Programme	Milestone	Retrofit works of regional government offices are completed
94	3.5 Anti-Money Laundering	Milestone	Entry into force of legislation introducing an administrative financial sanctions regime in the non-financial sector for the AMLCU or any relevant successor bodies
113	5.1 Upscaling a Biomethane Industry in Ireland	Target	Installation of new biomethane production capacity
115	5.2 Drogheda Charging Infrastructure	Milestone	Completion of battery train charging infrastructure
117	5.3 SEAI/HSE Pilot Energy & Decarbonisation Pathfinder	Milestone	Completion of retrofitting actions in HSE estates
119	5.4 Expanded School Sector Pathfinder Decarbonisation and Retrofit Programme and Energy Profile Inventory of Schools	Milestone	Completion of retrofitting of primary/post-primary schools and collection and uploading of data for schools to the inventory system.
121	5.5 Restoration and Refurbishment of no. 6 Ely Place	Milestone	Completion of the works
122	5.6 Offshore Renewable Electricity Support Scheme (ORESS)	Milestone	Publication of policy statement for the acceleration of deployment of offshore wind and adoption of South Coast Designated Maritime Area Plan by the Oireachtas
123	5.6 Offshore Renewable Electricity Support Scheme (ORESS)	Milestone	Award of Letter of Offer following the first auction of offshore RES development
		Instalment Amount	EUR 224 892 637

## SECTION 3: ADDITIONAL ARRANGEMENTS

### 1. Arrangements for monitoring and implementation of the recovery and resilience plan

The monitoring and implementation of the recovery and resilience plan of Ireland shall take place in accordance with the following arrangements set out in the plan:

- An Implementing Body shall have been created within the Department of Public Expenditure and Reform. It shall be responsible for the overall strategic monitoring and management of the plan as well as for the coordination among Irish authorities. The Implementing Body shall report to the Minister for Public Expenditure and Reform. It shall provide technical and systems support and communicate at national level to promote and publicise funding from the RRF.
- The Implementing Body shall also be the body drawing up the requests for payment to the Commission. Every payment application shall be accompanied by a management declaration and a summary of audits and controls undertaken by the Independent Audit Body for the plan, summarising the scope of the controls undertaken, the weaknesses identified, and the corrective actions undertaken. To that end, the Implementing Body shall collect the results of audit procedures undertaken by the Independent Audit Body, as well as all cases of serious irregularities, including cases of fraud or suspicion of fraud, corruption and conflict of interests, which shall feed into the summary of audits.
- The Internal and EU Audit Unit of the Department of Public Expenditure and Reform shall be the Independent Audit Body for the plan. The Independent Audit Body shall be responsible for conducting audits on the achievement of milestones and targets, through an appropriate sampling methodology. It shall verify the management declaration before each payment request is sent to the Commission. Risk assessment shall be performed on an ongoing basis and shall be used as the basis for the audit plan. The Independent Audit Body shall function professionally, adhering to the Internal Audit Standards (2012) of the Department of Public Expenditure and Reform and taking account of the Code of Ethics and International Standards of the Institute of Internal Auditors, in particular, the International Professional Practices Framework (IPPF). It shall be ensured that the selected sample includes a sufficient number of measures.
- Accountability for the delivery of a specific measure and the reporting on it shall lie with a department or another body designated as accountable for that measure, although other departments or other bodies may also be involved in some aspects of the implementation of that measure. The plan includes a list of departments and other bodies designated as accountable for each measure.
- Accountable departments and other bodies shall be required to apply the Public Spending Code that contains a set of rules, procedures and guidance to ensure value for money in public expenditure across the Irish Public Service. Accountable departments and other bodies shall be responsible for meeting all regulatory, monitoring and control requirements, reporting on their respective milestones and targets, reporting on costs as appropriate, communicating at project level, and record keeping.
- All responsible departments and bodies as well as the Implementing Body shall be represented in a Delivery Committee, which shall be established. The Delivery Committee shall meet at least quarterly. It shall be chaired by the Department of Public Expenditure and Reform, and deputy co-chaired by the Department of Taoiseach and the Department of Finance, at senior official level. It shall maintain ongoing oversight over the implementation of the plan and address issues as they arise. The Delivery Committee shall be tasked with

driving measure delivery and provide a forum for collaboration and coordination across the plan. Issues related both to the implementation of the plan and to the European Semester shall be subject to close cooperation between the Department of Public Expenditure and Reform, the Department of Taoiseach and the Department of Finance.

## **2. Arrangements for providing full access by the Commission to the underlying data**

The Implementing Body, within the Department of Public Expenditure and Reform, shall act as a single contact point for the Commission. It shall act as a coordinating body for monitoring progress on milestones and targets, oversee the implementation of control measures, provide confirmation on the reliability of the data and the progress of measures, and provide reporting and request for payments.

A dedicated RRF information system, which is under development and subject to a dedicated milestone (number 108), shall be used by the Implementing Body for the implementation of the plan. Its core functionalities, or a contingency system with the required core functionalities, shall be in place by the first payment request. A repository system shall record and store the relevant data related to the implementation of the recovery and resilience plan, in particular on the achievement of milestones and targets, data on final recipients, contractors, subcontractors and beneficial owners, by the first payment request. The Implementing Body shall be able to provide access to the underlying relevant data to the Commission, the European Anti-Fraud Office (OLAF) and the European Court of Auditors.

In accordance with Article 24(2) of Regulation (EU) 2021/241, upon completion of the relevant agreed milestones and targets in Section 1 of this Annex, Ireland shall submit to the Commission a duly justified request for payment of the financial contribution. Ireland shall ensure that, upon request, the Commission has full access to the underlying relevant data that supports the due justification of the request for payment, both for the assessment of the request for payment in accordance with Article 24(3) of Regulation (EU) 2021/241 and for audit and control purposes.
