Statements to the legislative "A" items set out in doc. 10311/24

**Ad "A" item 3:**            **Directive on promoting the right to repair**  
                                 *Adoption of the legislative act*

**JOINT STATEMENT BY ESTONIA AND LATVIA**

“Estonia and Latvia support the main objectives of the Directive to promote sustainable consumption and improve the functioning of the internal market, thus promoting circular economy and environmental protection. At the same time, we believe that the measures adopted in pursuit of these goals should offer sufficient added value and be effective in practice.

Even though the initial proposal has improved to some extent (including during the trilogues), we are still not entirely convinced that all the measures introduced are appropriate and necessary for achieving the objectives of the Directive (i.e. the manufacturer’s obligation to repair and amendments to the recently transposed Sale of Goods Directive). But what it does achieve – **additional administrative burden** for businesses and Member States, and information overload for consumers.

In particular, our main concern from the start has been and still is the online platform.

Firstly, we are not persuaded that the average consumer would use it to look for information on repair service providers. In today’s technology-driven society, consumers already have access to different search engines and social media, which makes it convenient to find necessary information quickly and efficiently.

Secondly, although we find the single European Platform to be a better option compared to 27 national platforms, we are concerned about the administrative burden that managing of national sections brings to the Member States. Therefore, we are not in favour of placing the responsibility for ensuring the functioning of the national sections of an EU-wide platform on the Member States due to different costs related to administration, registration and user service. This is especially onerous for smaller Member States, such as Estonia and Latvia. Moreover, fragmentation of the internal market may occur amongst the EU, if each Member State has the possibility to impose conditions for registering and accessing the platform. Imposing additional conditions would be especially burdensome for small repairers, who would therefore not use the platform, reducing the competitiveness and visibility of small entrepreneurs.

In conclusion, we are of the opinion that ensuring the functioning of the national section of the European Platform is disproportionately burdensome and leads to unreasonable costs for the Member States. We still strongly doubt whether an online platform provides sufficient added value to justify imposing such an obligation on the Member States. We would be able to support the introduction of the European platform only on the condition that the Commission would be solely responsible for the development, management and ensuring the functioning of the platform (including the national sections).

In light of the above, Estonia and Latvia regrettably cannot endorse the final text.”

**Ad "A" item 4:**

**Regulation on the prevention of the use of the financial system for the purposes of money laundering or terrorist financing**

*Adoption of the legislative act*

**STATEMENT BY AUSTRIA**

“Austria reiterates its strong commitment to the fight against financial crime and supports the compromise on the legislative package. Austria would like to underline that access to cash is an important issue both for the broader public and for social and financial inclusion. Austria supports further work to strengthen the legal tender of euro banknotes and coins, including in the context of the ongoing legislative negotiations on the legal tender Regulation.”

**Ad "A" item 9:**

**Directive amending Directive (EU) 2019/1153 on law enforcement access to financial information: single access point**

*Adoption of the legislative act*

**STATEMENT BY THE COMMISSION**

“In the Commission’s view, the appropriate place to address the matter of Europol cooperation with Financial Intelligence Units in relation to their joint analysis is in the context of the Anti Money Laundering package. The Commission underlines that any such cooperation with Europol will occur in accordance with Regulation (EU) 2016/794, in particular the rules on Europol’s tasks and on the protection of personal data laid down in that Regulation.”
