NOTE

From:	General Secretariat of the Council
To:	Delegations
No. Cion doc.:	11624/23 + ADD 1 - COM(2023) 420 final
Subject:	Proposal for a Directive of the European Parliament and of the Council amending Directive 2008/98/EC on waste – Four-column document

Delegations will find in Annex the initial four-column table on the abovementioned proposal, containing the Commission proposal, the European Parliament's amendments and the Council general approach agreed on 17 June 2024, with a view to the interinstitutional negotiations.

**Proposal for a DIRECTIVE OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL amending
Directive 2008/98/EC on waste (Text with EEA relevance)**

2023/0234(COD)

	<p>produced, used and discarded, with a particular need to limit fast fashion. That Strategy considers it important to make producers responsible for the waste that their products create and refers to the establishment of harmonised Union extended producer responsibility rules for textiles with eco-modulation of fees. It provides that the key objective of such rules is to create an economy for collection, sorting, re-use, preparation for re-use and recycling, and to incentivise producers to ensure that their products are designed in respect of circularity principles. To that end, it foresees that a notable share of contributions made by producers to extended producer responsibility schemes have to be dedicated to waste prevention measures and preparation for re-use. It also supports the need for strengthened and more innovative approaches to sustainable management of biological resources to increase the circularity and valorisation of food waste and re-use of bio-based textiles.</p>	<p>produced, used and discarded, with a particular need to limit fast fashion. <u>According to the Strategy's vision for 2030, consumers should benefit longer from high quality affordable textiles.</u> That Strategy considers it important to make producers responsible for the waste that their products create and refers to the establishment of harmonised Union extended producer responsibility rules for textiles with eco-modulation of fees. Therefore, one target should be proposed for the processing and manufacturing stage and another one for the retail and other distribution of food, restaurants and food services and households. <u>Reducing food waste at any point along the food supply chain yields a significant positive environmental impact.</u></p>	<p>(11) Reducing food waste at the production and consumption stages requires different approaches and measures and involves different stakeholder groups. Therefore, one target should be proposed for the processing and manufacturing stage and another one for the retail and other distribution of food, restaurants and food services and households. With regards to the primary production stage, the Commission should first conduct a study on food waste and losses during primary production, including all different stages of primary production where food waste and losses occur. This study should evaluate the extent and causes of food waste and losses in primary production and identify appropriate levers to reduce such waste and losses.</p>	

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
Recital 12				
22	(12) Bearing in mind the interdependence between the distribution and consumption stages in the food supply chain, in particular the influence of retail practices on consumer behaviour and the relation between food consumption in- and out-of-home, it is advisable to set up one joint target for these stages of the food supply chain. Setting separate targets for each of these stages would add unnecessary complexity and would limit Member States' flexibility in focusing on their specific areas of concern. In order to avoid that a joint target results in excessive burden on certain operators, Member States will be advised to consider the principle or proportionality in setting up measures to reach the joint target. Recital 13				
23	(13) Demographic changes have a significant impact on the amount of food consumed and food waste generated. Therefore, a joint food waste reduction target, applying to retail and other distribution of food, restaurants and food services and households, should be expressed as a percentage change in food waste levels per capita in order to take into account population changes.	(13) Demographic changes have a significant impact on the amount of food consumed and food waste generated. Therefore, a joint food waste reduction target, applying to retail and other distribution of food, restaurants and food services and households, should be expressed as a percentage change in food waste levels per capita in order to take into account population changes.	(13) Demographic changes have a significant impact on the amount of food consumed and food waste generated. Therefore, a joint food waste reduction target, applying to retail and other distribution of food, restaurants and food services and households, should be expressed as a percentage change in food waste levels per capita in order to take into account population changes. Taking into account that tourists are not counted in the general population and that Member States might be confronted with an increase or decrease in tourism in relation to the reference year, the Commission should develop a correction factor, so as to support Member States in achieving the food waste reduction target expressed per capita for retail and other distribution of food, restaurants and food services and households, corrected for tourism flows.

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
50a		<p><u>(40a) It is important to emphasise the need for the Commission to continue its efforts with bringing waste management in line with the principles of circular economy and to consider a targeted revision aimed at healthcare waste, especially pharmaceutical waste from private households. Furthermore, it is important to reduce, reuse and recycle health care waste materials to minimise their environmental impact and resource depletion while safeguarding public health. This would help underscore the Union's dedication to responsible waste management and make healthcare facilities and industry a crucial partner in the Commission's broader efforts to reduce waste and promote sustainability.</u></p>

By 30 June 2025, the Commission shall conduct an assessment on appropriate levels for the setting of targets for 2032 on textile waste reduction, which shall include levels of collection rates, preparation for re-use, re-use, recycling of textiles and phasing out landfilling of textiles. The assessment shall also include an analysis of the level of exports of used textiles to third countries and of extending the responsibility of producers to those exports. To that end, the Commission shall submit a report to the European Parliament</u></p>
