COMMISSION DELEGATED REGULATION (EU)...

**supplementing Regulation (EU) 2020/1056 by establishing the eFTI common data set
and eFTI data subsets**

ANNEX

eFTI COMMON DATA SET AND eFTI DATA SUBSETS

Section 1

Introductory notes

A. As per the definitions provided in points (5), (6) and (7) of Article 3 of Regulation (EU) 2020/1056, the eFTI common data set and eFTI data subsets are not just lists of data elements, but “set[s] of structured data elements”, where all the data elements corresponding to all of the subsets constitute the common data set, with the data elements common to two or more subsets included only once. Those definitions also indicate that each data element should be described through specific properties such as definition and technical characteristics, including format, length and character type, and that what distinguishes a data element in the common data set is their “unique definition”. Several data elements may share therefore one or more properties such as format or character type, but not the definition.

B. This Annex describes the eFTI data subsets and the eFTI common data set, established pursuant to Article 7 of Regulation (EU) 2020/1056, as follows:

1. The eFTI common data set is described in **Section 2**.
2. The eFTI data subsets corresponding to information requirements in provisions of EU acts, as referred in Article 2(1) of Regulation (EU) 2020/1056, are described in **Section 3**.
3. The eFTI data subsets corresponding to information requirements in provisions of national law, as listed in the Annex to Delegated Regulation [*OP insert reference to COMMISSION DELEGATED REGULATION (EU) .../... supplementing Regulation (EU) 2020/1056 by amending its Annex I Part B*] are described in **Section 4**.
4. The code lists for which the reference is provided in column “Code List” of Table 1 (see Section 2) are detailed in **Section 5**. Table 30 provides the name of the code list for each code list reference used in eFTI common data set. The table also provides the indication of all the codes that are allowed to be used from that specific code list at the level of the entire eFTI common data set.

When specific restrictions to the allowed codes apply to individual data elements, this is indicated first at the level of the common data set in column “Allowed Codes” (see Section 2, Table 1) and, where applicable, further restrictions are indicated at the level of data subsets in column “Code(s)” (See Sections 3 and 4, Tables 2 to 29).

5. The business rules for which the reference is provided in column “BR(s)” of Tables 2 to 29 (see Section 3) are detailed in **Section 6**.

Section 2

eFTI common data set

A. The eFTI common data set is described in Table 1, where:

1. Column with heading “H*” represents the structure of the common data set by indicating the hierarchy level of the data objects, either data classes or data elements. This hierarchical structure begins with level 1. Each data object directly subordinated to level 1 is marked with level 2, each data object directly subordinated to level 2 is marked with level 3 and so on and so forth. Each data object is a subordinated component of the last preceding object in the table at higher level.

Example:

Data element eFTI41 ‘Gross mass’ is marked with hierarchy level 3. It is subordinated to the last preceding data object at higher level, i.e. level 2, which is data class ASBIE1027 ‘eFTI data set consignment’. The subordinated component of data element eFTI41 is data element eFTI42 ‘Measurement unit code’, which is marked with level 4.

2. Column with heading “Object Type” indicates:

- (a) data classes, when the reference provided is “ASBIE”. Data classes are groupings of data elements describing a certain piece of information;
- (b) data elements, when the reference provided is “BBIE” or “SC”. Data elements marked as “SC” are always related to a “BBIE” data element, as they constitute supplementary units of information necessary to fully specify the information provided by the BBIE data element¹;
- (c) the comprehensive hierarchical structure of the eFTI common data set, by means of the graphical lines on the left side of the column.

3. Column with heading “ID” indicates the data element identification number in format ‘eFTIxxx(x)’, which uniquely identifies the data element in the eFTI common data set. The identification number is automatically assigned and indicates neither sequence nor hierarchy of the data element in the eFTI common data set.

4. Column with heading “L*” indicates, when provided, the data elements that will be accompanied by a language indicator providing information on the language of the content of the data field.

5. Column with heading “Name and Definition” indicates, in separate rows:

- (a) the standard, non-technical name of the data element;
- (b) the short textual description of the data element;
- (c) when provided, the reference of specific rules (in format ‘BR-xxx’) that need to be applied in relation to the use of a data element when certain conditions are met. The aim of these rules is to ensure that the value to be provided for the respective data element corresponds to the specific conditions established in the corresponding regulatory information requirement. These rules are detailed in Section 6.

6. Column with heading “Data Type” indicates what kind of value the data element can hold.

¹ ASBIE, BBIE and SC are standard acronyms used in data modelling, as used in the UN/CEFACT MMT-RDM, based on ISO 15000-5.

Example: “quantity” indicates that the data element can hold a number expressing the count of non-monetary units.

7. Column with heading “Format” indicates the requirements for the data type and the data length, where:

(b) The codes for the data types are as follows:

- (i) ‘a’ means alphabetic;
- (ii) ‘n’ means numeric;
- (iii) ‘an’ means alphanumeric.

(c) The number following the code indicates the admissible data length, where:

- (i) the optional two dots before the length indicator mean that the data has no fixed length, but it can have up to a number of digits, as specified by the length indicator;
- (ii) a comma in the data length means that the attribute can hold decimals, where the digit before the comma indicates the total length of the attribute and the digit after the comma indicates the maximum number of digits after the decimal point.

Examples of field lengths and formats:

- ‘a1’ means 1 alphabetic character, fixed length;
- ‘n2’ means 2 numeric characters, fixed length;
- ‘an3’ means 3 alphanumeric characters, fixed length;
- ‘a..4’ means up to 4 alphabetic characters;
- ‘n..5’ means up to 5 numeric characters;
- ‘an..6’ means up to 6 alphanumeric characters;
- ‘n..7,2’ means up to 7 numeric characters including maximum 2 decimals, a delimiter being allowed to float.

8. Column with heading “Code List” indicates, when provided, the reference of the code list (in format ‘CL-xxx’) that shall be applied.

Example:

“CL-017” indicates the code list to be applied for the data element eFTI76 “Country code” which indicates, as its definition specifies “The code of the country for this consignee address”.

The code lists are described in Section 4.

9. Column with heading “Allowed Code(s)” indicates,

(a) When provided, a selection of the codes that are allowed to be used from the applied code list. Example:

For data element eFTI46 “Measurement unit code”, which is a structural component linked to data element eFTI45 “Gross volume”, the codes allowed to be used from UNECE Recommendation 20 (UNECE (UN/EDIFACT) codes 6411) are LTR (litre) and MTQ (cubic metre).

(b) When no codes are provided, but a code list is provided in column with heading “Code List”, all codes in that code list are allowed.

eFTI data subsets corresponding to information requirements in EU legal acts provisions

A. The data subsets corresponding to information requirements in EU legal acts provisions, as referred in Article 2(1) of Regulation (EU) 2020/1056, are described in Table 2, where:

1. The numbering of the data subsets follows the sequence of the EU legal provisions listed in Article 2(1)(a) of Regulation (EU) 2020/1056. To identify these subsets, the following references are used:

- (a) “EU01” indicates the eFTI subset consisting of the data elements that correspond to the information requirements set out in Article 6(1) of EEC Council Regulation No 11, as referred to in point (i) of Article 2(1)(a) of Regulation (EU) 2020/1056;
- (b) “EU02” indicates the eFTI subset consisting of the data elements that correspond to the information requirements set out in Article 3 of Council Directive 92/106/EEC, as referred to in point (ii) of Article 2(1)(a) of Regulation (EU) 2020/1056;
- (c) “EU03” indicates the eFTI subset consisting of the data elements that correspond to the information requirements set out in Article 8(3) of Regulation (EC) No 1072/2009 of the European Parliament and of the Council, as referred to in point (iii) of Article 2(1)(a) of Regulation (EU) 2020/1056;
- (d) “EU05a” indicates the eFTI subset consisting of the data elements that correspond to the information requirements set out in the provisions of the international agreements on the transport of dangerous goods referred to in Section I.1 of Annex I to Directive 2008/68/EC of the European Parliament and of the Council, as referred to in point (v) of Article 2(1)(a) of Regulation (EU) 2020/1056;
- (e) “EU05b” indicates the eFTI subset consisting of the data elements that correspond to the information requirements set out in the provisions of the international agreements on the transport of dangerous goods referred to in Section II.1 of Annex II to Directive 2008/68/EC of the European Parliament and of the Council, as referred to in point (v) of Article 2(1)(a) of Regulation (EU) 2020/1056;
- (f) “EU05c” indicates the eFTI subset consisting of the data elements that correspond to the information requirements set out in the provisions of the international agreements on the transport of dangerous goods referred to in Section III.1 of Annex III to Directive 2008/68/EC of the European Parliament and of the Council, as referred to in point (v) of Article 2(1)(a) of Regulation (EU) 2020/1056;
- (g) “EU06” indicates the eFTI subset consisting of the data elements that correspond to the information requirements set out in Annex 6.3.2.6 (a), (b), (c), (d), (e), (f) and (g) of Commission Implementing Regulation (EU) 2015/1998, as referred to in point (1) of Part A of Annex I to Regulation (EU) 2020/1056.

2. Column with heading “H*” represents the structure of the data subset by indicating the hierarchy level of the data objects, either data classes or data elements. This hierarchical structure begins with level 0. Each data object directly subordinated to level 0 is marked with level 1, each data object directly subordinated to level 1 is marked with level 2 and so on and so forth. Each data object is a subordinated component of the last preceding object in the table at higher level.

Example:

Data element eFTI41 is marked with hierarchy level 2. It is subordinated to the last preceding data object at higher level, i.e. level 1, which is data class ASBIE1027. The

subordinated component of data element eFTI41 is data element eFTI42, which is marked with level 3.

3. Column with heading “Object Type” indicates:
 - (a) data classes, when the reference provided is “ASBIE”. Data classes are groupings of data elements describing a certain piece of information;
 - (b) data elements, when the reference provided is “BBIE” or “SC”. Data elements marked as “SC” are always related to a “BBIE” data element, as they constitute supplementary units of information necessary to fully specify the information provided by the BBIE data element².
4. Column with heading “ID” indicates the identification number of the data element as assigned in the eFTI common data set (‘eFTIxxx(x)’).
5. The header of a group of 3 columns, in format “EUyy”, indicates the unique identification number of the data subset, where ‘EU’ stands for the European Union and ‘yy’ stands for the number of the subset. Each of the 3 columns under this header provides details about this specific subset.
6. Column with heading “LS” indicates the legal status of the data element in the context of the specific subset, where:
 - (a) status ‘M’ indicates that the Economic Operator must provide this information;
 - (b) status ‘C’ indicates that providing this information is conditional, depending on the provision of some other information;
 - (c) status ‘O’ indicates that providing this information is optional;
 - (d) status ‘D*’ indicates that this is a supplementary unit of information that is necessary to be provided to fully specify the information provided for the data element to which it is related;
 - (e) Status ‘SI’ indicates that this is a data class and not a data element, where “SI” stands for “structural indicator”.
7. Column with heading “BR(s)” indicates, when provided, the reference of specific rules (in format ‘BR-xxx’) that need to be applied in relation to the use of a data element when certain conditions are met in the context of this specific subset. The aim of these rules is to ensure that the value to be provided for the respective data element corresponds to the specific conditions laid down in the corresponding regulatory information requirement, including how that value would relate to the value of other data elements necessary to express the respective required information. These rules are detailed in Section 6.
8. Column with heading “Code(s)” indicates, when provided, a selection of codes that are allowed to be used in the context of this specific subset from the applied code list. In case no subset-specific code restrictions are mentioned, the same restrictions apply to the data element as in the context of the eFTI common data set (Table 1, column “Allowed Codes”).

² ASBIE, BBIE and SC are standard acronyms used in data modelling, as used in the UN/CEFACT MMT-RDM, based on ISO 15000-5.

Section 4

eFTI data subsets corresponding to information requirements in provisions of national law

A. The eFTI data subsets corresponding to information requirements in provisions of national law, as listed in the Annex to Delegated Regulation [OP insert reference to *COMMISSION DELEGATED REGULATION (EU) .../... supplementing Regulation (EU) 2020/1056 by amending its Annex I Part B*], are described in Tables 3 to 29, where:

1. To identify the subsets, references in format “XXyy” are used, where ‘XX’ stands for the two-letter country code for each Member State (e.g., AT, BE, BG etc.) and ‘yy’ stands for the number of the subset. The subsets’ numbering follows the sequence in which the respective national provisions are listed in the Annex to Delegated Regulation [OP insert reference to *COMMISSION DELEGATED REGULATION (EU) .../... supplementing Regulation (EU) 2020/1056 by amending its Annex I Part B*].

2. Column with heading “H*” represents the structure of the data subset by indicating the hierarchy level of the data objects, either data classes or data elements. This hierarchical structure begins with level 0. Each data object directly subordinated to level 0 is marked with level 1, each data object directly subordinated to level 1 is marked with level 2 and so on and so forth. Each data object is a subordinated component of the last preceding object in the table at higher level.

Example:

Data element eFTI41 is marked with hierarchy level 2. It is subordinated to the last preceding data object at higher level, i.e. level 1, which is data class ASBIE1027. The subordinated component of data element eFTI41 is data element eFTI42 ‘Measurement unit code’, which is marked with level 3.

3. Column with heading “Object Type” indicates:

- (a) data classes, when the reference provided is “ASBIE”. Data classes are groupings of data elements describing a certain piece of information;
- (b) data elements, when the reference provided is “BBIE” or “SC”. Data elements marked as “SC” are always related to a “BBIE” data element, as they constitute supplementary units of information necessary to fully specify the information provided by the BBIE data element³.

4. Column with heading “ID” indicates the identification number of the data element as assigned in the eFTI common data set (‘eFTIxxx(x)’).

5. The header of a group of 3 columns, in format “XXyy”, indicates the unique identification number of the data subset, as described in point 1 above. Each of the 3 columns under that header provides details about this specific subset.

6. Column with heading “LS” indicates the legal status of the data element in the context of the specific subset, where:

- (a) status ‘M’ indicates that the Economic Operator must provide this information;
- (b) status ‘C’ indicates that providing this information is conditional, depending on the provision of some other information;

³ ASBIE, BBIE and SC are standard acronyms used in data modelling, as used in the UN/CEFACT MMT-RDM, based on ISO 15000-5.

- (c) status ‘O’ indicates that providing this information is optional;
- (d) status ‘D*’ indicates that this is a supplementary unit of information that is necessary to be provided to fully specify the information provided for the data element to which it is related;
- (e) Status ‘SI’ indicates that this is a data class and not a data element, where “SI” stands for “structural indicator”.

7. Column with heading “BR(s)” indicates, when provided, the reference of specific rules (in format ‘BR-xxx’) that need to be applied in relation to the use of a data element when certain conditions are met in the context of this specific subset. The aim of these rules is to ensure that the value to be provided for the respective data element corresponds to the specific conditions laid down in the corresponding regulatory information requirement, including how that value would relate to the value of other data elements necessary to express the respective required information. These rules are detailed in Section 6.

8. Column with heading “Code(s)” indicates, when provided, a selection of codes that are allowed to be used in the context of this specific subset from the applied code list. In case no subset-specific code restrictions are mentioned, the same restrictions apply to the data element as in the context of the eFTI common data set (Table 1, column “Allowed Codes”).
