## **NOTE**

---

Subject: MONTHLY SUMMARY OF COUNCIL ACTS - JULY 2020

---

This document lists the acts<sup>1</sup> adopted by the Council in July 2020.<sup>23</sup>

It provides information on the adoption of legislative and non-legislative acts, including:

- the date of adoption,
- the relevant Council session,
- the number of the document adopted,
- the Official Journal reference,
- reference to the minutes of the Council session when the act was adopted.

---

<sup>1</sup> For easy reference, the "short titles" as mentioned in the Council's agendas are also indicated (see in italics).

<sup>2</sup> With the exception of certain acts of limited scope such as procedural decisions, appointments, specific budgetary decisions, etc unless adopted by written procedure.

<sup>3</sup> In the case of legislative acts adopted in the ordinary legislative procedure, there may be a difference between the date of the Council's meeting where the legislative act is adopted and the actual date of the act in question, since legislative acts adopted in the ordinary legislative procedure are only considered to have been adopted after signature by both the President of the Council and the President of the European Parliament and the Secretaries-General of the two institutions.

This document is also available on the Council's website at:

[Monthly summaries of Council acts \(acts\) - Consilium](#)

Documents listed in the summary may be obtained from the public register of Council documents at: [Documents and publications - Consilium](#).

If not directly available, a request for access to documents can be submitted at:

<https://www.consilium.europa.eu/en/documents-publications/public-register/request-document/>

It should be noted that this document is exclusively for information purposes - only Council minutes are authentic. These are available on the Council's website at: [Council Minutes - Consilium](#)

---

**INFORMATION ON THE ACTS ADOPTED BY THE COUNCIL IN JULY 2020**

European Semester: integrated country-specific recommendations - Approval and report to the European Council		8593/1/20 REV1
<b>Statement by Poland</b>		
<p>Poland reiterates its statement submitted to the General Secretariat of the Council with regard to the written procedure CM 2409/20, which is as follows:</p> <p>Poland would like to abstain from voting regarding the approval of the contribution on economic/financial and MIP-related aspects of the draft Council Recommendations on the National Reform Programmes 2020 to each Member State, delivering Council Opinions on the updated Stability or Convergence Programmes.</p> <p>Poland does not support part of country specific recommendation 4 (CSR) where Commission advises to "<i>Enhance the investment climate, in particular by safeguarding judicial independence</i>".</p> <p>In our opinion there is no evidence of any negative impact of changes in the judicial system on the investment climate in Poland. Since 2017, when the Commission for the first time decided to align the legal certainty, trust in the quality and predictability of regulatory with the investment climate, Poland has been recording a steady increase in both public and private investment (about 22 per cent for last 3 years).</p> <p>Poland has introduced many favourable changes important for investment and business environment. The improvement in investment performance was also confirmed by the Commission in 2020 Country report-Poland but even though the Commission decided to strengthen this issue in the CSR4.</p> <p>Moreover, as stated in the recital 25, some of the CJEU proceedings are pending along with a debate over the scope of authority of the CJEU over the matters pertaining to the Member States' scope of competence, i.e. the organization of the judiciary. So far, Poland complies with the CJEU's guidelines, therefore we don't see a reason to underline the necessity to additionally safeguard the judicial independence.</p> <p>We would like to stress the importance of the European Semester as a framework for enhanced economic policy coordination in Europe. This economic process should be based on facts and figures. Otherwise we can have political statements and recommendations without any economic underpinning and instead of strengthening this important coordination tool we would weaken its effectiveness. We also stressed that European Semester should not duplicate other EU procedures.</p>		

<b>Written procedure completed on 1 July 2020</b>		CM 2744/20
Public access to documents - Confirmatory application No 08/c/01/20		8689/20
<b>Statements by Ireland, Finland, Latvia, Italy, The Netherlands, Estonia, Sweden, Denmark, Lithuania</b>		
<b>Statement by Ireland</b>		
Ireland does not agree with the draft reply to Confirmatory application 08/c/01/20 "WKS from Working Party on Company Law". Ireland recalls that the principle of transparency is particularly pressing in relation to decision-making processes of a legislative nature and believes the release of the specific documents referred to in this confirmatory application would not tend to undermine the decision-making process.		
<b>Statement by Finland</b>		
Finland cannot concur with the interpretation of Regulation 1049/2001 referred to in the draft reply, especially in light of the Turco case (C-39/05 and C-52/05) and the De Capitani case (T-540/15) and taking into consideration the importance of openness in legislative procedures emphasized by the Lisbon Treaty.		
<b>Statement by Latvia</b>		
Latvia considers that taking into account the specific circumstances and context of the present case, access could be granted to the four requested documents. This is in accordance with its initially stated position. Each situation will be assessed on its own merits.		
<b>Statement by Italy</b>		
We would confirm our consistency with the initial position proposed by the Council. Indeed, transparency should be granted through the availability of EU documents and discussions, especially for those negotiations that are not conclusive and no conclusion is foreseen in the short – mid term.		
<b>Statement by The Netherlands</b>		
The Netherlands cannot concur with the draft reply to confirmatory application 08/c/01/20. The Netherlands emphasizes the importance of access to documents and transparency to improve EU's legitimacy. This is particularly important with regard to transparency for documents that relate to the legislative procedures. The Netherlands is of the opinion that the reply does not strike the right balance between the principle of public access to legislative documents and the protection of the decision-making process of the Council.		

<p><b>Statement by Estonia</b> Estonia is of the opinion that the release of the documents would not undermine the decision-making process as the arguments in the draft reply are not justified and thus do not outweigh the principle of transparency. We believe that publication of all relevant documents would be advantageous for proper conclusion of the negotiations of this contentious legislative act.</p> <p><b>Statement by Sweden</b> Sweden cannot concur with the draft reply. Taking into account the specific circumstances in this case/matter and the settled case-law of the Court (i.e. De Capitani, point 78 and 99), Sweden considers that it is not sufficiently motivated how disclosure of these documents specifically and actually would undermine the ongoing decision-making process and why the risk of these interests being undermined is reasonable and foreseeable and not purely hypothetical.</p> <p><b>Statement by Denmark</b> Denmark cannot concur with the draft reply to confirmatory application 08/c/01/20. Denmark emphasizes the importance of access to documents and transparency to improve EU's legitimacy. This is particularly important with regards to transparency for documents that relate to the legislative procedures. Denmark is of the opinion that the reply does not strike the right balance between the principle of public access to legislative documents and the protection of the decision-making process of the Council.</p> <p><b>Statement by Lithuania</b> Lithuania cannot agree with the draft reply to Confirmatory application 08/c/01/20 "Wks from Working Party on Company Law", set out in doc. 8689/20. Lithuania considers that the interpretation of Regulation 1049/2001 and relevant ECJ case-law allows in this specific case to grant access to the requested documents.</p>

<p><b>Statement by Romania</b></p>	<p>Romania understands the intention of the European Commission to preserve the efficacy of the European citizens' initiative instrument during this pandemic and to provide reassurance and legal clarity to the organizers of initiatives with the collection, verification or examination still ongoing.</p> <p>Romania considers that in this difficult situation there is a need to have a clear and sound policy applying to the European Citizens' Initiative, in order to preserve their important character of participative democracy and ensuring that the voice of European citizens can be heard.</p> <p>Romania will not oppose, in the spirit of compromise, the proposal of the European Commission, but considers that some of the provisions do not provide legal certainty and equal treatment for the ECI. Romania considers that the most problematic is the application of the provisions that extend the collection period, which is unclear and could lead to discrimination between ECIs, especially in the case of those which finalized their collection period between 11 March and 11 September. Since the legal text provides the same extension for the collection of signatures without adapting it on a case by case basis, depending on the time elapsed in each case, such an approach will result in an unequal treatment between these ECI.</p> <p>Romania's position is that, even in exceptional circumstances, a legal act needs to be legally sound and ensure fair and equal treatment to all that are impacted by it.</p> <p><b>Written procedure completed on 14 July 2020</b></p> <p><i>Regulation of the European Parliament and of the Council amending Regulation (EU) 2016/1628 as regards its transitional provisions in order to address the impact of the COVID-19 crisis</i></p> <p>Regulation (EU) 2020/1040 of the European Parliament and of the Council of 15 July 2020 amending Regulation (EU) 2016/1628 as regards its transitional provisions in order to address the impact of the COVID-19 crisis (Text with EEA relevance)</p> <p><a href="#">OJ L 231, 17.7.2020, p. 1–3</a></p>

--	--

	<p><b>Statement by the Netherlands</b></p> <p>The Netherlands feels a strong sense of urgency to speed up the development of a vaccine or treatment against COVID-19. Facilitating this process as much as possible is a key priority for the Netherlands. This is exactly why Germany, France, Italy and the Netherlands established the Inclusive Vaccine Alliance and welcomed the EU Vaccine Strategy. The Netherlands appreciates the Commission proposal I for accelerating existing procedures for clinical trials with GMOs to facilitate quicker development of a vaccine or a cure for COVID-19.</p> <p>However, the Netherlands' Commission on Genetic Modification<sup>2</sup> points out serious concerns with the proposal as it allows a derogation of the requirements for an environmental risk assessment (ERA) for clinical trials with GMOs, including clinical trials with unknown GMOs and unknown risks. In addition, the lack of an ERA brings forth questions on liability and responsibility, if an incident with negative effects would occur.</p> <p>Although the Netherlands supports faster, more harmonised procedures in the EU regarding clinical trials involving GMOs, the Netherlands shares the concerns of its Commission on Genetic Modification with regard to ensuring safety for human health and the environment. An approach that simplifies and shortens the procedures for an ERA would be preferred above a generic derogation. However, amending this proposal in such a manner would significantly delay its adoption. In light of the current, unprecedented pandemic and the urgent need for a vaccine or medicine, such a delay can currently not be afforded.</p> <p>The Netherlands urges sponsors of clinical trials, Member States and the European Commission to take full responsibility to seriously consider and prevent all possible negative impacts of GMOs for human health or the environment, when performing clinical trials with GMOs or administering medicinal products before a market authorisation is granted.</p> <p>If unforeseen negative impacts occur, the Netherlands urges all those involved to take all appropriate measures to prevent further escalation and immediately notify national authorities and the European Commission, so that coordinated efforts can be made to minimize newly identified risks.</p>

<b>Statement by The Netherlands</b> The Netherlands agrees with the reasoning in the draft reply that disclosure of the requested document would undermine the protection of the public interest as regards the international relations, considering in particular the still ongoing international negotiations. However, on a more general note, the Netherlands is of the opinion that it is not sufficiently motivated why there is a reasonably foreseeable and not purely hypothetical risk that disclosure of the requested document would also undermine future international negotiations

Council Directive amending Directive 92/83/EEC on the harmonization of the structures of excise duties on alcohol and alcoholic beverages	9139/20

<p><b>Statements by the Commission</b></p>	
<p><b>Statement by the Commission concerning the alternative structure of excise duty for wine, other fermented beverages and intermediate products:</b></p> <p>“Alcohol related harm is a major public health concern in the EU and while Member States are mainly responsible for their national alcohol policy, the Commission notes that the current wording of Directive 92/83/CEE does not offer the possibility for Member States to levy excise duties on specific alcoholic beverages in accordance with their alcoholic strength. In light of these growing concerns of some Member States, the Commission will analyse the impacts of this alternative method as part of the first review of the Directive.”</p> <p><b>Statement by the Commission concerning the extension of reduced rates for producers of wine (Article 9a):</b></p> <p>“The Commission recalls that the specific objectives of the Directive include ensuring fair treatment for all businesses, including small producers of all alcohol types and preventing and correcting any distortions of competition in the application of the reduced rates for these small producers.</p> <p>The Commission must remind the Council that when setting the threshold for defining small producers of any type of alcohol, this level should capture producers that, although numerous, represent only a small share of the market, to prevent market and trade distortions.</p> <p>The Commission disagrees with the introduction of an increased threshold of 20 000 hectolitres of wine per annum for Malta due to the possible market and trade distortions risks and the difficulty to justify such a figure when the average annual EU wine production per holding is 70 hectolitres.”</p>
