1. INTRODUCTION

This Staff Working Document (SWD) accompanies the Report on the Management of the European Fund for Strategic Investments Guarantee Fund (EFSI GF) in 2019. The SWD provides further information and tables on (2) operations under the IIW and SMEW (signatures and disbursed amounts, breakdown by sector and country), (3) financial statements, (4) provisioning of the EFSI GF and (5) asset management.

2. EFSI OPERATIONS SUPPORTED BY THE EU GUARANTEE

This section provides a breakdown of the EFSI operations supported by the EU Guarantee in terms of number of operations, investment volume (signature and investment mobilised) as well sector and country breakdown.

2.1 IIW OPERATIONS

As at 31 December 2019, 532 operations in 28 Member States were signed under the IIW. The total signatures amount to EUR 49.2 billion which is expected to mobilise investments of EUR 244.4 billion. Half of the signed operations in terms of volume were in the energy (26%) and research sector (21%), followed by the provision of financial support to SMEs and small Mid-Cap companies (18%) and transport (15%).

2.2 SMEW OPERATIONS

As at 31 December 2019, 630 operations in 28 Member States were signed under the SMEW. The total financing of EUR 19.5 billion is expected to mobilise investments of EUR 156.3 billion. The most important sectors in terms of volume were research and development (69%) and digital (17%).

2.3 BREAKDOWN OF EFSI OPERATIONS BY SECTOR AND COUNTRY

Table 1: Distribution of signed EFSI IIW and SMEW operations by sector as at 31 December 2019 (EUR million).

Objective and subcategory	Signed operations		
	IIW	SMEW	Total
EFSI: research, development and innovation	10.374,14	13.410,85	23.784,98
EFSI: development of the energy sector in accordance with the Energy Union priorities	12.710,98	-	12.710,98
EFSI: development of transport infrastructures, and equipment and innovative technologies for transport	7.143,06	-	7.143,06
EFSI: financial support through the EIF and the EIB to entities having up to 3 000 employees	8.944,88	1.424,46	10.369,34
EFSI: development and deployment of information and communication technologies	3.410,13	3.317,66	6.727,79
EFSI: environment and resource efficiency	3.805,30	-	3.805,30
EFSI: human capital, culture and health	1.847,27	1.297,61	3.144,88
EFSI: Less-developed regions and transition regions	444,65	-	444,65
EFSI: sustainable agriculture, forestry, fishery, aquaculture and other elements of the wider bioeconomy	498,50	98,77	597,27
Total	49.178,90	19.549,36	68.728,26

4. PROVISIONING OF THE EFSI GF

The Guarantee Fund is provisioned through:

- Contributions from the general budget of the Union; the budget allocated for the EFSI contributions amounts to EUR 8 425 million;
- Revenues and any other payments received by the Union in accordance with the EFSI Agreement (i.e. projects benefitting from EFSI support); these assigned revenues to the EFSI GF amount to EUR 675 million.
- Returns (interests) on guarantee fund resources invested in the financial markets;
- Amounts recovered from projects for which the EU Guarantee was called (i.e. defaulting debtors);

The Guarantee Fund is provisioned progressively up to the target amount of EUR 9 100 million by 2022.

Table 3: Provisioning of the EFSI GF for the period 2015-2022 (EUR million)

	2015	2016	2017	2018	2019	2020	2021	2022
Commitments	1350	2110	2680	2069	357	153		
Payments (*)		1018	2490	2014	1166	1088	525	392

Note: From 2020 and onward data are provisional and do not include the expected assigned revenues.

(*) Including assigned revenues: EUR 6.3 million in 2016, EUR 39.2 million in 2017, EUR 59.0 million in 2018 and 163.1 million in 2019.

5. ASSET MANAGEMENT

The following sections provide some further details on (a) the composition of the portfolio and (b) the key risk characteristics of the portfolio.

5.1 COMPOSITION OF THE PORTFOLIO

The EFSI GF portfolio at the year-end is well diversified in terms of asset classes and rating categories. In addition, it is diversified in non-euro denominated securities (USD) in the form of an allocation to US Treasuries and other issuers (e.g. Supranational, other Sovereigns or Agencies) for about 6% of the portfolio. The currency risk is hedged. The exposure of the portfolio to bonds complying with environmental, social and governance criteria was more than 5 times higher when compared to its benchmark (6,93% for the portfolio vs 1,24% for the benchmark).

As shown in Figure 1, over 26% of the market value of the portfolio is invested in AAA securities and the rest is well distributed across the whole spectrum of the investment-grade scale. The AAA category includes for example securities issued by the US Government and covered bonds issued by financial institutions.

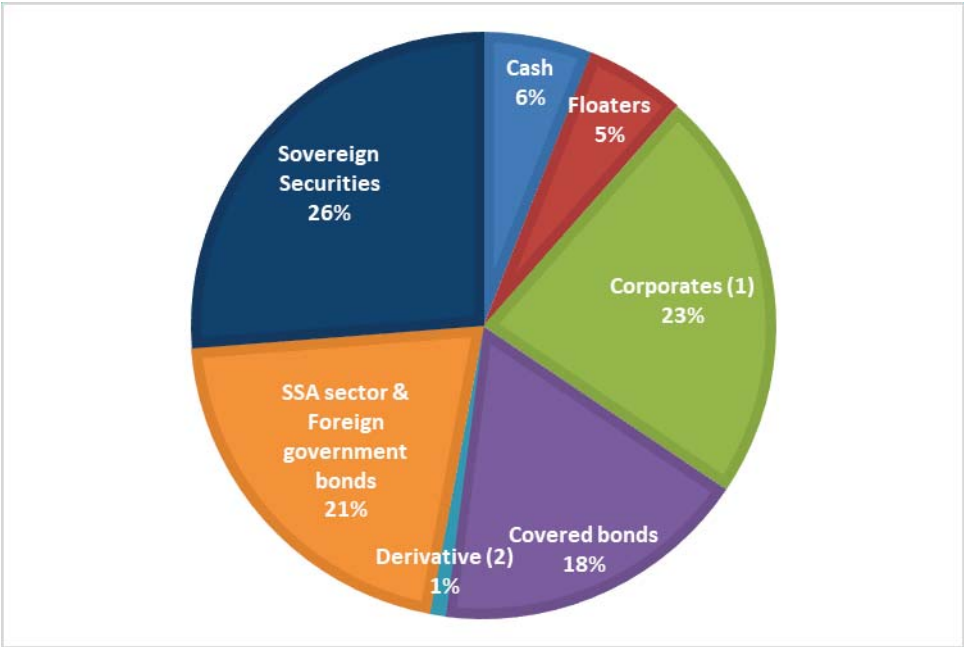

In terms of main asset classes, 47% of the portfolio is invested in Sovereign securities, sub-sovereigns, supra-nationals and agencies (SSA) and foreign Governments and 18% in covered bonds while 23% in bonds issued by corporates and financial institutions (other than covered bonds).

FIGURE 1: PORTFOLIO EXPOSURE BY RATING AS AT 31 DECEMBER 2019

Source: European Commission services

FIGURE 2: PORTFOLIO EXPOSURE BY ASSET CLASS AS AT 31 DECEMBER 2019

Source: European Commission services

(1) Corporate: unsecured bonds issued by financial and non-financial corporations.
 (2) Derivative: inflation-linked bonds.

5.2 KEY RISK CHARACTERISTICS OF THE PORTFOLIO

Market Risk

Market risk is, inter alia, assessed by way of calculating the duration¹ of the portfolio. As at 31 December 2019, the portfolio had a duration of 3.07 years.

Currency risk and hedging activities

USD investments represented 6% of the portfolio market value as at 31 December 2019. The currency risk of USD-denominated investments was hedged via forward contracts.

Credit Risk

The credit quality of the EFSI GF portfolio is high with an average rating² of BBB+, suggesting a low default probability (0.11% at 1-year).

Liquidity characteristics of the portfolio

About 21% of the portfolio consists of bonds with a maturity below 1-year, floating rate notes and short-term money market instruments which provide a further liquidity buffer for the portfolio.

¹ The duration figure refers to 'modified duration' which measures the price sensitivity of a bond to interest rate movements.

² The average rating is calculated on the basis of portfolio's average 1-year default probability.
