This staff working document (SWD) accompanies the fourth biennial report “Implementing EU food and nutrition security policy commitments”.

The fourth report highlights the progress which the EU and its Member States (MS) have achieved towards implementing their common policy framework to assist developing countries in addressing food security challenges¹. Since its adoption in 2010, the policy framework has guided the EU and its Member States in engaging in international cooperation and development assistance concerning food security. A specific Implementation Plan was adopted in 2013, further detailing commitments in this area. Subsequently, the EU and its Member States have reported every second year on progress made on the 2010 policy framework and the 2013 implementation plan. A first biennial report was issued in 2014, a second in 2016, and a third in 2018. In line with Article 210(2) Treaty on the Functioning of the European Union (TFEU), the fourth report is coordinated by the European Commission, with inputs from the following MS: Austria, Belgium, Finland, France, Germany, Ireland, Italy, the Netherlands, Spain and the United Kingdom². The financial reporting of the report and this accompanying SWD covers up to and including 2018 (for methodological/comparability reasons), while experiences captured also include 2019.

¹ An EU policy framework to assist developing countries in addressing food security challenges, COM(2010)127.

² During the period under review of this Report, the UK was a member of the European Union.

1. ADDITIONAL FIGURES AND EXAMPLES OF INTERVENTION, BY PRIORITY

1.1 Overview of food and nutrition security assistance compared to total Official Development Assistance (ODA), in EUR million³

| | Total ODA in all sectors | | | | | | Food and nutrition security ODA | | |
|---|--------------------------|-------------------|-------------------|-------------------|------------------|------------------|---------------------------------|------------------|--|
| | 2012 | 2014 | 2016 | 2018 | 2012 | 2014 | 2016 | 2018 | |
| Austria | 421.587 | 474.754 | 892.258 | 402.643 | 16.652 | 12.879 | 24.413 | 31.772 | |
| Belgium | 1,148.809 | 1,029.645 | 1,331.763 | 1,144.553 | 158.787 | 143.387 | 158.847 | 138.751 | |
| Finland | 589.001 | 671.372 | 557.510 | 374.172 | 53.087 | 63.732 | 46.526 | 45.761 | |
| France | 7,319.011 | 6,260.428 | 6,715.343 | 7,931.848 | 362.426 | 388.151 | 456.246 | 603.158 | |
| Germany | 7,510.396 | 10,194.420 | 19,209.131 | 18,532.456 | 613.221 | 760.658 | 887.442 | 1,215.425 | |

| Share of FNS in total ODA, in % | | | | | 7.508 | 7.681 | 6.549 | 8.117 | |

³ OECD DAC official annual US dollar exchange rate is used for 2018 data flows: 1 USD = 0.8473 EUR. Total ODA data comprise two types of flows: ODA grants and ODA loans without grant equivalent. Source: <https://data.oecd.org/conversion/exchange-rates.htm>.

⁴ The variation in Ireland's FNS disbursements in 2018 compared to 2016 is mainly due to the advance FNS disbursements in 2016.

1.2 Evaluation of the policy priorities over time

The table shows disbursements, number of programmes and number of countries which received funding per policy priority.

| Performance criteria | | Number of programmes | | | Support received, EUR million | | | Number of countries | | | | | |
|---|--------------|----------------------|--------------|--------------|-------------------------------|--------------|--------------|---------------------|-------|------------|------------|------|-------|
| Year | | 2012 | 2014 | 2016 | 2018 | 2012 | 2014 | 2016 | 2018 | 2012 | 2014 | 2016 | 2018 |
| 1. Improve smallholders' resilience and livelihoods | 1,560 | 1,822 | 1,863 | 4,471 | 2,022 | 2,137 | 2,120 | 2,377 | 108 | 103 | 108 | 126 | |

1.3 Examples of interventions per priority

| Recipient countries | Project Title |
|--|---|
| Policy priority 1: Improve smallholder resilience and rural livelihoods | |
| Austria | Ethiopia |
| | SWEEP - Water for Food Security, Women's Empowerment and Environmental Protection |
| Belgium | Malawi |
| | Reducing food and income insecurity among vulnerable households in Malawi through climate services and integrated risk management |
| EU | Yemen |
| | Enhancing Rural Resilience in Yemen (ERRY) |
| Finland | Nepal |
| | Rural Village Water Resources Management Project |
| France | Cuba |
| | Support for the modernisation of the cattle breeding and dairy production sector in Camaguey province |
| Germany | Niger |
| | Smallholder Irrigation Farming to increase agricultural production |
| Ireland | Malawi |
| | Implementing the promotion of Community-Supported Agriculture (CSA) technologies to improve food and nutrition security |
| Italy | Ethiopia |
| | Inclusive and sustainable agricultural value chain development. Modernisation of strategic agricultural value chain in the Agro-Commodities Procurement Zones of two Integrated Agro-Industrial Parks |
| Netherlands | South of Sahara |
| | Organic markets for development (OM4D). Development of organic farming in Burkina Faso, Ghana, Sao Tome and Principe and Togo |
| Spain | Ethiopia |
| | Food security for agropastoral communities of Dolobay Woreda through the introduction of an innovative fish farming system |
| United Kingdom | Tanzania |
| | Agribusiness window- support to innovative business ideas in agribusiness, agribusiness value chains, and financial services |
| Austria | Georgia |
| | Promoting sustainable forest management for climate resilient rural development in Georgia by establishing an enabling environment and effective interagency coordination for improved forest and watershed management, sustainable rural energy solutions, and diversification of rural income opportunities |
| Policy priority 2: Support effective governance | |
| Belgium | Benin |
| | Appui Institutionnel au Ministère de l'agriculture, de l'élevage et de la pêche afin de renforcer les capacités institutionnelles, organisationnelles et individuelles des acteurs impliqués dans le développement agricole |
| EU | Developing countries |
| | Information for Nutrition Food Security Resilience Decision Making - Worldwide component with FAO. Improve availability of regular, timely and early warning information as well as evidence-based analysis regarding the food security, nutrition and resilience situation for decision-making |
| Finland | Mozambique |
| | Support to the Institute of Social and Economic Research. Increasing the research capacity in the country, bringing topics |

| Recipient countries | Project Title | |
|--|------------------|---|
| France | Senegal | into public debate and supporting evidence based decision making, including in food and nutrition security |
| Germany | Philippines | Technical and financial support to agricultural cooperatives |
| Italy | Jordan | Enhancing community resilience and farmers collective capacities to achieve food security and food sovereignty |
| Netherlands | Benin | Institutional strengthening for innovative rural development strategies in Jordan |
| Spain | Mali | Land administration |
| United Kingdom | Rwanda | Strengthening the Women's Cooperative Musow Ka Cesiri through the improvement of the capacities and the commercialisation of its food products |
| | | Support to Rwanda natural resources authority to issue registered title to every landholder, and establish systems for maintenance of those titles |
| Policy priority 3: Support regional agriculture and food and nutrition security policies | | |
| France | West Africa | Supporting the resilience of agropastoral systems in West Africa. Contribute to the improvement of the living conditions of agropastoralists and the sustainable economic development of livestock in the sub-region. |
| Germany | Africa, regional | Enhancing food security and rural development through the African Forest Landscape Restoration initiative (AFR100) |
| Italy | South of Sahara | Drought mitigation caused by El Niño in Southern Africa |
| Netherlands | South of Sahara | Trademark East Africa strategy 2 to support increased intraregional trade in the East African Community and its neighbours by reducing barriers to trade and by increasing business competitiveness |
| Spain | Mali | Agriculture Irrigation Sahel |
| | | West African Agroecological Transition Support Project (PATAE/Projet d'Appui à la Transition Agroécologique en Afrique de l'Ouest). Implemented together with the French Development Agency (AFD), the project contributes to stimulate the development of innovative practices, which optimise the mobilisation of ecological processes in the field of agricultural production and food security in West Africa and this, mainly in areas affected by issues of land degradation and stressful rain conditions. |
| United Kingdom | South of Sahara | Delivering sustainable intensification of agriculture in Sub-Saharan Africa to generate new evidence to help women and poor African smallholder farmers develop environmentally and financially sustainable enterprises and boost productivity |
| Policy priority 4: Strengthen social protection mechanisms for food and nutrition security, particularly for vulnerable | | |
| EU | Nigeria | EU Support to Food Security and Resilience aiming to strengthen the resilient livelihoods and socioeconomic development of the people through social protection/safety nets and strengthening market system |
| EU | Eswatini | Technical Assistance for development of a Social Protection system in Swaziland. Support to the Department of Social Welfare (social work, welfare) of the Ministry of Labor and Social Security and the University of Swaziland (BA). |

| Recipient countries | Project Title |
|---|----------------------|
| Finland | Developing countries |
| Germany | Malawi |
| Ireland | Malawi |
| Italy | Sudan |
| Netherlands | Ethiopia |
| United Kingdom | Malawi |
| Austria | Kenya |
| Belgium | Burundi |
| EU | Pakistan |
| Finland | Cameroon |
| France | South of Sahara |
| Germany | Tajikistan |
| Ireland | Sierra Leone |
| Italy | Afghanistan |
| Netherlands | Bangladesh |
| Spain | Guatemala |
| United Kingdom | Kenya |
| Belgium | South Africa |
| EU | Sri Lanka |
| Supporting Sustainable and Inclusive Social Protection Systems (EU/SPS-Programme) to eradicate extreme poverty and to reduce social and gender inequalities and to guarantee the realisation of the human right to adequate livelihoods for all | |
| Social Protection of the Ultra Poor IV | |
| Scale up of Social Cash Transfer Programme (SCTP), including resilience to climatic and socio-economic stress | |
| Support to the Development of the National Health System of Gedaref, Kassala and Red Sea States and integration with the EU | |
| Productive Safety Net Programme (PSNP FASE 3) | |
| Strengthening social protection systems to strengthen the resilience of poor households in Malawi to withstand current and projected weather and climate-related shocks and stresses | |
| Policy priority 5: Enhance nutrition, in particular for mothers, infants and children | |
| Stayaya Maternal and Child Nutrition Nawiri project | |
| Programme FBSA Burundi - Croix Rouge - Amélioration de la situation nutritionnelle des populations des communes de Cendajuru, Kinyinya et Gisuru | |
| Capacity-Building and Systems Development in Support to a Sindh Multi-Sectoral Nutrition Policy, Strategy and Implementation Framework. | |
| Nutrition Education promotion of gender equality and empowerment of poor girls and women in Cameroon | |
| Pasteur institut, Malinea project : improve the management of moderate acute malnutrition (MAM) by acting on intestinal infections and exploring the interactions between malnutrition and changes in the intestinal microbiota. | |
| Improvement of nutrition for women and infants in rural areas of Tajikistan | |
| Improving the Nutritional Status of Children under five | |
| Scaling up Community-based Maternal and Child Nutrition Services | |
| Scaling up of rice fortification | |
| Improvement of living conditions and reduction of chronic malnutrition in rural families | |
| Maternal and child nutrition programme (MCNP) to improve the capacity of health system to respond effectively to fluctuations in demand for nutrition services resulting from seasonal spikes and recurrent crises | |
| Climate Change: Promoting Ecosystem Based Adaptation in South Africa. An adaptation strategy providing technical assistance to South African EbA planning, implementation and monitoring | |
| Homes not just Houses: Building Sustainable Future Together aiming to bridge the gap between relief, rehabilitation and development for resilient and secure communities in the North and East | |

| Recipient countries | Project Title | |
|---------------------|---------------|---|
| Germany | Haiti | Protracted Relief and Recovery Operation. Strengthening emergency preparedness and resilience in Haiti supporting the government in developing national resilience plans |
| Italy | West Bank | From the water to the market: a great challenge for the small farmers and the women producing milk products in the West Bank |
| Spain | Mauritania | Supporting women's leadership in strategies to mitigate climate change and sustainable productive initiatives |
| United Kingdom | South Sudan | World Food Programme emergency operation for the South Sudan humanitarian assistance and resilience building programme helping approximately three million South Sudanese by providing critical life-saving support and helping people to better cope with shocks from conflict, drought and flooding |

1.4 Highlights on the progress made in policy priorities

This section presents highlights of the progress made in the six policy priorities and reflects how the EU and its Member States have stepped up support to increasingly address them in an integrated manner.

“Improve smallholders’ resilience and livelihoods” remains the most significant part of the EU and its Member States’ development cooperation portfolio. This support is increasingly addressing the underlying dynamics of the socio-economic, environmental, and security factors of sustainable, resilient and healthy food systems. The development of such food systems should strengthen sustainable rural development.

“Enhancing the resilience of the most vulnerable to food crises” also remains significant in the development cooperation of the EU and its Member States. The EU continues to support the Global Report on Food Crises which 2020 edition showed that, for the third consecutive year, over 100 million people suffer from acute hunger and malnutrition.⁵ In order to address the immediate needs and the underlying dynamics of the socio-economic, environmental, and security trends generating food crises, the EU is supporting the transformation of food systems to prevent food crises, mitigate their impact and boost recovery.

The Global Network Against Food Crises (GNAFC) plays a critical role in agri-food transformation with a focus on three priorities addressed across the humanitarian-development-peace nexus: the Network generates consensus-based information on food crises⁶; leverage strategic investments to prepare, prevent and respond to food crises; and foster political uptake and coordination across sectors. During a High Level Event held in April 2019 *Food & Agriculture in times of crisis: working better together for long-term solutions*, the EU, the Netherlands, France, Germany, Italy, and Finland and their partners reiterated their support to the GNAFC action at national, regional, and global level.

The EU, France, and Germany reiterated their support to the Committee on World Food Security. The EU and its Member States have significantly increased *responsible investments in agriculture and agri-businesses*. Blending assistance has increased markedly in 2018 with the AGRIFI Facility set up with the Dutch Development Bank (FMO); a contribution to the African Agriculture Trade and Investment Fund (AATIF) via Kreditanstalt für Wiederaufbau (KfW); the Agri-Business Capital (ABC) Fund managed by IFAD and established with the Luxembourg Ministry of Foreign Affairs and the international NGO AGRA; and the HURUMA Fund focussing on micro-loans with the Spanish agency for international cooperation and a Spanish development finance institution (COFIDES). The EU continues to support land governance interventions in about 40 countries and the development of value chains with a particular focus on their economic, social and environmental impact. The EU contributes to the development of fisheries and aquaculture value chains to boost economic returns and social equity, and reduce negative impacts on the marine environment. The FISH4ACP innovative programme develops sustainable fisheries and aquaculture in Africa, the Caribbean and the Pacific paying special attention to small-scale fisheries because of their potential to deliver economic and social benefits, particularly for women.

The EU and its Member States cooperate in the Development-Smart Innovation through Research in Agriculture (DeSIRA) Initiative. Within this framework, the EU stepped up its

⁵ More than 135 million people across 55 countries experience acute hunger requiring urgent food, nutrition and livelihoods assistance. Global Report on Food Crises 2020.

⁶ The EU, Germany, Belgium, and the United Kingdom enhance, for example, early warning and food security information systems.

support to the overall governance and architecture for agricultural research and innovation (e.g. funding the Tropical Agricultural Platform (TAP), Global Forum on Agricultural Research (GFAR), the CAADP research and extension organisations and the CGIAR). DESIRA has also enhanced country research capacities for innovation within national agriculture knowledge and innovation systems with projects addressing agro-ecology and climate-relevant practices; agroforestry; livestock; or the water–energy–food–forest nexus. A number of interventions are specifically implemented in partnership with EU Member States including Italy (Burkina Faso, Egypt, Ethiopia, Kenya, Niger and Sudan), the Netherlands (Mali, Benin, Ethiopia, Rwanda, and Kenya), and France (Thailand, Vietnam, Cambodia, Lao PDR, and Myanmar, and ECOWAS), which also provided financial support.

To support the implementation of *social protection programmes* in situations of shocks and protracted crises, the EU produced a Guidance Package including guiding principles, lessons learned and promising practices. EU support to social protection mechanisms remained significant in 2018: EUR 237 million. In Yemen the **EU, Germany, UK, and the Netherlands** significantly support the Social Fund for Development interventions enhancing livelihoods and empowering smallholders. During the emergency period 2016–18, the Fund directly benefited more than 62,000 thousand people (47% women). In Niger, the EU and its Member States continue to support the capacity of *The Dispositif National de Prévention et de Gestion des Crises Alimentaires*, progressively integrating social protection schemes to tackle chronic malnutrition and support production and capital reconstitution.

The **EU, France, Germany, Ireland, the Netherlands, and the United Kingdom** support the Scaling Up Nutrition (SUN) Movement. The fourth progress report on the implementation of the Commission’s Action Plan on Nutrition published in 2019 highlights the need to further escalate nutrition-relevant actions at country level, by mobilising the full potential of sectoral interventions necessary to address the range of causal factors of malnutrition in order to achieve the global stunting reduction target by 2025. The 2020 resource-tracking exercise confirmed that by 2019, the Commission’s EUR 3.5 billion global pledge for nutrition has already been achieved – one year ahead of schedule. Moreover, the EU is increasing its efforts to analyse how its support is contributing towards changes in stunting. The EU remains committed to strengthen global governance and accountability mechanisms (SUN networks and the 2019 and 2020 Global Nutrition Reports) and support the implementation of country partners’ policies and action plans for nutrition through a *Capacity for Nutrition* programme implemented in partnership with Germany.

The EU partners have increasingly embarked on nutrition JP: in **Lao PDR** the **EU, France, UK, Ireland, Germany**, and Switzerland support the Government’s National Nutrition Strategy and Plan of Action. The Mid-Term Review of this programming highlighted the good progress made in terms of division of labour, policy dialogue, and strengthening the Provincial Nutrition Committees with a priority given to the provinces with the worst nutrition indicators. The Review also suggested further efforts to be made to use more effectively the local coordination mechanisms, mainstream nutrition programming across sectors, and expand joint implementation.

Through the EU Emergency Trust Fund for Africa (EUTF for Africa) in **Burkina Faso**, the EU was able to support nearly 950,000 beneficiaries by improving access to basic social services (health, nutrition, water and sanitation); strengthening livelihoods (small-scale agriculture and livestock, income generating activities, cash transfers); and improving the capacity of actors at the local level. It sets out a good example of partnering effectively with decentralised government services and civil society to improve local governance accountability and civil society participation. In a context where local authorities are affected

by lack of resources to effectively implement decentralisation, positive experiences were demonstrated in terms of better and more responsible water management, public works and resource management. Improving the relationship of trust between local authorities and citizens has made it possible to improve the payment of local taxes (in seven communes, these increased by 20%), making it possible to initiate other local actions.

In **Myanmar**, the *Livelihoods and Food Security Fund* (LIFT) multi-donor initiative funded by the **EU**, the **UK**, Australia, Switzerland, the USA, Canada and **Ireland** contributed to improve nutrition, income diversification and skills development. The programme supports innovative maternal and child cash transfers (incorporating social and behaviour change communication interventions). These inputs showed significant positive results thereby reinforcing the government's policy and budgetary commitments. Endorsed in November 2018 a Multi-sectoral National Plan of Action on Nutrition (MS-NPAN) engages key actors and stakeholders to develop sub-national planning with convergence across interventions and services. A transformative approach to enhanced gender equality is also central to LIFT's strategy, whether via interventions fostering equitable access to and control over land and natural resources or support to vocational training and livelihood opportunities for youth in camps established for internally displaced people (IDPs). In 2018, LIFT had reached 11.6 million people and 2.6 million families while 247 out of 330 townships have benefited from the programme's support.

1.5 EU and Member States' FNS support to partner countries in 2018

(Disbursements in EUR million)

| Countries and regions | Austria | Belgium | EU | Finland | France | Germany | Ireland | Italy | Netherlands | Spain | United Kingdom | Total | Number of donors | Average per donor |

2. CASE STUDIES

2.1 EU Joint Programming (JP) in Bolivia

In May 2018, the then European Commissioner for International Cooperation and Development, Neven Mimica, and Bolivia's Ministers of Planning and of Foreign Affairs launched the 2017-2020 Joint European Strategy (JES) for Bolivia⁷ with an indicative funding of EUR 530 million. One of the largest recipients of EU bilateral development assistance in Latin America and the Caribbean, Bolivia has been among the first countries to embark on JP with a JES adopted by the Government, the **EU, Germany, Denmark, Belgium, France, Spain, Italy, Sweden, the United Kingdom** and Switzerland. The development of the Strategy has built on a roadmap, a joint analysis and a Common European Strategy in place since 2014. The partners used the flexibility allowed in the process to build trust and ownership. They also invited Switzerland to join the process. The JES is aligned with Bolivia's 2025 Patriotic Agenda and the 2016-2020 Economic and Social Development Plan, which in turn, are aligned with both the SDGs and COP21 objectives.

The Strategy has not led to a reduction of the number of donors per sectors or the number of sectors covered per donor: it encompasses eight priority sectors and 5 crosscutting approaches. In the food security and rural development sector, the EU and its Member States (**Germany, Denmark, and Italy**) fund a programme package worth EUR 66 million to support the 2016-2020 Plan for the Agricultural and Rural Sector with Integral Development⁸. The EU supports the fight against illicit drugs by promoting alternative economic and employment opportunities to coca growers with a Sector Reform Contract worth EUR 27 million, while the **Danish** cooperation strengthens the institutional capacities of the Ministry of Rural Development and Land (EUR 20 million). Having a limited number of Member States willing to embark on sectoral JP proved to be an enabling factor in a context where collaboration with the government is good and European visibility was (and still is) high. Moreover, those Member States that were in the process of phasing out (**Belgium and Sweden**) took advantage of the JES exercise to further ensure the sustainability of their programmes with the on-going interventions.

JP has created greater awareness around the programmes/projects managed by the EU+ group and in several sectors such as environment and climate change, it has fostered collaboration and coordination. In the food security and rural development sector maintaining the momentum to keep the JP process going proved to be challenging and further efforts should contribute to move from joint strategising to joint implementation. Maintaining regular dialogue and joint activities are key incentives to bring Member States together via a more sustained coordination approach and more guidance regarding joint implementation opportunities and joint reporting expectations. The next programming exercise offers a good opportunity for the EU+ partners for the alignment of bilateral strategies and their linkages to the SDGs and the Paris Agreement objectives. As the European Consensus on Development (2017) makes results frameworks core elements of the joint response to inform policy dialogue and enhance mutual accountability, the next JES should use SDGs indicators as key JP performance indicators (if measurable at country level) and an emphasis should be put on the availability of means of verification - at sector level - when selecting key indicators.

2.2 EU JP in Madagascar

In 2017, the **European Union** and the most active EU Member States in the country

⁷ https://eeas.europa.eu/delegations/bolivia/45328/estrategia-europea-conjunta-2017-2020_sl

⁸ <https://www.ruraltierras.gob.bo/leyes/plansectorial.pdf>

(Germany and France) embarked on a joint JP process organised around the SDG themes of People, Planet, Prosperity, and Peace. A joint analysis was validated in July 2018 which included three key avenues for cooperation: (i) support to good governance and effective institutions; (ii) the sustainable use of natural resources; and (iii) support to the emerging industrialisation, in particular through the quality and adequacy of education including labour skills. Following the presidential elections -marking the first political alternation of power in the country- the Malagasy Government prepared the 2019-2023 *Plan Emergence Madagascar* (PEM) which should provide the strategic framework for the next steps of JP planned in 2020.

The main challenge in this process relates to the alignment of the EU partners to the government policy framework and more specifically the delayed adoption of the PEM. From a sectoral perspective, the transition has enabled the establishment of a structured policy dialogue that takes place within the framework of coordination platforms and includes the government and the development partners. The EU partners implement rather similar interventions spread across the country, including the support to food and cash crops along value chains, institutional capacity building, the improvement of nutrition, and the sustainable management of natural resources alongside adaptation to climate change. In these areas, a range of joint initiatives translates a culture of collaboration and partnership.

France and Germany have been actively involved in the Food and Nutrition Security and Sustainable Agriculture sector for an extended period, and with the **EU Delegation**, have increasingly jointly implemented programmes and projects across sectors. The wide array of collaborative efforts by the EU partners has improved the synchronisation and complementarity of their interventions – including in terms of support to the civil society. This ‘working better together’ culture has clearly eased the development of JP. JP is facilitated by the presence of a limited number of Member States, geographical complementarity, good communication flows between the EU partners; and since 2019, the establishment of a Dialogue and Cooperation Group boosting multi-sectoral coordination.

The challenge now is to consolidate the progress made in a context where there is limited ownership of the national development plan. The EU partners are adopting a pragmatic approach and move a sectoral JP exercise forward around the fight against environmental degradation and climate change, taking into account that agriculture and livestock activities are the most important factors causing deforestation and land degradation in Madagascar. In order to achieve a greater impact, the JP is expected to promote a more integrated, coordinated, and focused approach based on an increased division of labour. The EU partners could seize this opportunity to incorporate the objectives of Agenda 2030, the Paris Agreement and the EU Green Deal into this second phase of the JP and enhance policy dialogue, alongside data collection and analysis. In this manner bilateral strategies can be progressively replaced by a joint EU programme.

3. FURTHER DETAILS ON THE THEMATIC FOCUS

3.1 Gender

The 2nd EU Gender Action Plan (GAPII) underlines the link between gender inequalities and disparities and food and nutrition security and sustainable agriculture, and supports transformative change for equal access to land and assets, and control over resources. Reflecting this commitment to a gender transformative approach, the EU interventions including gender-responsive activities in FNS have risen from 37% in 2014 to 57% in 2018. EU interventions increase women’s access to productive resources and employment

opportunities, stimulate behaviour changes such as strengthened joint decision-making in rural households, and provide women with platforms to voice their rights.

In **Malawi**, the EU strengthens land governance systems for smallholder farmers by training local officials on women's land rights and developing a Women's Land Rights Forum whose members have enhanced women's leadership skills. In **Lao PDR**, the EU funds the "Sustainable Change Achieved through Linking Nutrition and Governance" programme supporting video clips on national television that examine the role of men during women's pregnancy and in childcare activities.

In **Kenya, Mozambique, Malawi and Senegal**, the LANDac programme funded by the **Netherlands** supports successful initiatives promoting and extending women's access to agricultural land. The programme focuses on women's voice and vision, actively involving them in data collection and increasing their role in land governance related discussions.

Italy has been engaged in gender equality and women empowerment, strengthening women access to value chains in **Mozambique**, scaling up Community-based Maternal and Child Nutrition Services in **Afghanistan**, or enhancing the skills and networking capacity of shepherds and farmers in **West Bank** vulnerable communities

The EU developed thematic briefs underlining the principles of social change and gender transformation in policy dialogue and programming. The briefs detail how to incorporate a gender-responsive approach in land governance, nutrition, and value chains development. The brief "*Closing the gender gap through agri-food value chain development*" complements for example the EU's Value Chain Analysis for Development (VCA4D) methodology, which provides a detailed assessment of a value chains' operation and its impact on the social dimensions of sustainable development – gender equality being one of the six domains of the social analysis. In **Cambodia** the VCA4D tool highlighted women participation in aquaculture activities in the semi-intensive and small-cage production systems and their under-representation in decision-making processes in the fisheries policy.

Together with the Food and Agriculture Organization of the United Nations (FAO), the World Food Programme (WFP), and the International Fund for Agricultural Development (IFAD), the EU will support the activities of the three agencies to embed gender transformative approaches in policy dialogue, programmes, institutional culture and the working modalities of the Rome-Based Agencies (RBAs), while contributing to deliver on SDG2. The aim is to contribute to the achievement of food security and nutrition and sustainable agricultural development by addressing the root causes of gender inequalities principally in – but not limited to – rural areas and triggering transformative change processes that lead to the empowerment of women in their households, communities, and society for the improved well-being of all persons.

The EU has also stepped up its engagement in advocating a transformative gender approach in its policy dialogue. The EU, jointly with **Germany and Finland** organised for example a side event on women's land rights and women's empowerment at the Commission on the Status of Women held in New York in 2018. With the partner countries, the EU has contributed to the drafting of national strategies emphasising gender equality in **Nepal** and in **Kenya**, joint gender analysis with EU Member States as a step to forge partnerships across sectors in **Madagascar**, or stepped up the coordination between EU partners in delivering gender-sensitive messaging on violence against women in **Colombia**.

Funded by the EU Trust Fund and the **Netherlands and Austrian** Development Cooperation (EUR 48.3 million), the Resilience Building Programme in Ethiopia (RESET II) builds people and community's resilience in the most vulnerable areas of the country. The

programme has contributed to successfully mainstream gender in its strategy, approach and tools. Half of the 1.9 million people reached by the programme were women whose vulnerability has been reduced and capacity strengthened. In the Wolaita cluster, the EU focused on extremely poor women (with 0.125 ha and some labour), members of women's economic groups. By increasing their skills, connecting them to formal systems such as savings and loans groups, and providing livestock and drought-resistant/nutritious seeds/roots free of charge, the programme contributed to shift women's status from dependency to self-reliance.

3.2 Rural employment creation

In September 2018, the Commission published a Communication on a new Africa – Europe Alliance for Sustainable Investment and Jobs⁹, aiming to enhance job creation and sustainable and inclusive development. In this context, Jobs and Growth Compacts (JGC) are being developed, steering joint efforts around value chains with the highest potential for job creation. In July 2019, the EUD **Uganda** prepared a strategic JGC serving the programming exercise and as a means to foster convergence towards the EU key priorities identified with EU Member States, financial institutions and other actors as well as through structured dialogue with the government and the private sector. In June 2019, under the French Presidency, the G7 adopted a Framework on decent job creation for rural youth in the Sahel. Developed by the G7 Working Group of Food Security, this Framework was jointly welcomed by the G7 and G5-Sahel ministers and by the G7 Summit, as part of the Biarritz Sahel Partnership Action Plan. Acknowledging that the creation of decent jobs for rural youth in the Sahel should help meet the twin challenges of food insecurity and poverty while providing new economic opportunities for young Sahelians.

In the framework of the Alliance, the EU supports a range of actions to boost investment and job creation, including through the AgriFI initiative that provides blended finance to increase investment in smallholder agriculture and micro, small and medium enterprises (MSMEs). The EU supports the development of agricultural value chains taking advantage of the opportunities offered by local, regional and global markets. This is based on the assessment of the economic, social and environmental aspects of value chains in development, using the VCA4D Facility. In partnership with Agrinatura¹⁰, the EU applied this tool in value chain programmes to identify if and how growth generated by those value chains' activities impact job creation. This has, for instance, been the case in **Zambia** (egg and aquaculture), **Honduras** (coffee), **Sierra Leone** (palm oil), **Tanzania** (coffee), **Guinea Bissau** (mango and lime), **Burundi** (banana), and **Benin** (pineapple).¹¹

France, Italy and Germany promoted agricultural entrepreneurship for young people in agricultural value chains to increase income and employment prospects in a wide range of countries. For example in **Sierra Leone**, **Germany** supports the “Employment Promotion Programme (EPP III)” boosting job creation in cocoa, coffee, rice and vegetables value chains. The programme works with MSMEs and youth to improve skills – with strong mentorship and coaching elements as a means of increasing self- and wage employment. Between 2016 and 2019, the EPP III supported 1,200 businesses and trained 36,000 youth, creating more than 9,000 new jobs and self-employment opportunities. By 2019, the

⁹ COM(2018) 643 final.

¹⁰ AGRINATURA is a grouping of 27 European universities and research organisations.

¹¹ Value chain analysis studies from 2016 to 2020 : <https://europa.eu/capacity4dev/value-chain-analysis-for-development-vca4d->

programme positively affected more than 250,000 people. In Somalia, **Italy** is promoting innovative agricultural technologies for economic growth.

The EU significantly contributed to job creation through the EU Emergency Trust Fund for Africa (EUTF). In the **Sahel and Lake Chad** region more than 27,500 jobs were created, 129,000 people developed income-generating activities and more than 50,000 people benefited from professional training and or/skills development between 2018 and 2019. With the aim to increase the economic participation among young people -thereby contributing to the EUTF's stabilisation efforts in the region- approximately 700,000 youths have been supported by the EUTF through job creation initiatives, support to find a work placement, skills development, and/or professional training. For example, in Cameroon high-intensity labour programmes contributed to create 6,200 jobs, while in Senegal, the programme '*Développer l'emploi au Sénégal*' supported existing or new MSMEs and provided professional training and/or skills development to 18,700 people.

4. METHODOLOGICAL NOTE

This section briefly outlines data sources, definitions and classifications used to produce the figures presented in this report.

Purpose

The fourth EU report provides a consolidated assessment of EU and Member States' achievements on the six food and nutrition security policy priorities set out in the Implementation Plan. It provides information on how their collective performance delivered on these policy priorities, and on the level of coherence, complementarity and coordination, based on a quantitative assessment of total food and nutrition security interventions, as well as a qualitative assessment of how well the EU and its Member States are working together at national, regional and global levels.

Data

In this report, data is limited to EU institutions and ten Member States: **Austria, Belgium, Finland, France, Germany, Ireland, Italy, Netherlands, Spain and United Kingdom**¹². The total ODA flows of these donors amounted to 91.2% of the total ODA flows of the EU Institutions and twenty-eight member states in 2018. The OECD/DAC reported disbursements data is used as a source. FNS disbursements flows in this report concern only development initiatives and disbursements recorded under DAC humanitarian sector codes are not included.

Core contributions at multilateral level to a range of UN agencies, funds and programmes were not taken into account, when it was difficult to allocate a proportion of this funding to food and nutrition security. Only those contributions to these agencies that specifically target food and nutrition security as stated below (points A, B and C) are considered.

Identification of the food and nutrition security interventions

In order to ensure the greatest possible consistency, a common approach is applied by the EU and its Member States. Programmes/projects meeting the following conditions are supposed to contribute to food and nutrition security:

¹² During the period under review of this Report, the UK was a member of the European Union.

- A. which have a particular focus on FNS (by being specifically designed to improve FNS, or by having specific FNS objectives or activities), and/or
- B. which clearly fall within one or more of the four pillars of food security – food availability, access to food, utilisation of food and stability, and/or
- C. which clearly fall within the definition of ‘FNS’: “Food and nutrition security exists when all people at all times have physical, social and economic access to food, which is consumed in sufficient quantity and quality to meet their dietary needs and food preferences, and is supported by an environment of adequate sanitation, health services and care, allowing for a healthy and active life.”

Number of food and nutrition security programmes

The diversity of implementation modalities across the EU institutions and EU Member States makes it difficult to use a standard definition of “programme”. The lack of comparable data for it, resulted in taking the number of disbursements recorded in the OECD DAC CRS database as a proxy for the number of programmes. Although, this overestimates the number of programmes in absolute terms in a given time, it is a reliable method to observe an evolution over time, which is the main purpose of the report. In addition, the data for 2018 cover all disbursement amounts in the database, which were limited to disbursements above EUR 100,000 in the previous reports.

Classification of the identified food and nutrition security interventions

a) Gender and climate sensitiveness and research

OECD DAC CRS policy markers are referenced to identify whether a project targets gender equality and environmental objectives. Research related disbursements have been captured by specific DAC sector codes (agricultural research, fishery research etc), as well as by some implementation partners with a research mission (e.g. CGIAR Fund and member organisations and other).

b) Geographical classification

The geographical classification is made in two ways. First, by geographical area of recipients adjusted to this exercise but closely aligned to OECD DAC classification. Neighbourhood region includes the EU Neighbourhood policy partner countries and a few other European countries. Another classification refers to the policy intervention level: whether a project is designed with impacts at country, regional or global level. At country level, the OECD DAC list of ODA recipients and country names conventions is used.

c) Policy priority classification

FNS disbursements are regrouped in the six sub-groups according to one of the six FNS policy priorities set out in the Implementation Plan.

A project is classified only under one priority. Due to financial breakdown difficulties and to avoid double-counting, for multi-sectorial projects, only one priority, i.e. the one which seems the most important, is assigned and allocated the full project budget amount.

The description of the six policy priorities is provided below, with some examples of typical activities.

Policy priority 1: Improve smallholder resilience and rural livelihoods

Interventions

1. Support policies and programmes which focus on sustainable agricultural intensification and diversification for smallholder farmers, particularly women, including through enhanced public private partnerships.
2. Support policies and programmes in partner countries which aim to increase access for smallholder farmers, in particular women farmers, to land and water resources, improved farm inputs, credit, and extension services, and which aim to reduce post-harvest losses and improve storage facilities.
3. Assist partner countries in addressing climate change and its effects on food and nutrition insecurity and agricultural development through adaptation, mitigation and resilience-building measures.
4. Support pro-poor, demand-led research for development and technology transfer, extension and innovation, and ensure that this research is accessible to, and used by, smallholder farmers and in particular, women.
5. Support programmes in rural areas which aim to build resilience and generate income and off-farm employment, including by assisting smallholder and women farmers, to add value to their produce and to develop viable agribusinesses, to improve the links between smallholder farmers and markets and to enhance the efficiency of agricultural value chains.

Policy priority 2: Support effective governance

Interventions

1. Support the progressive realisation of the right to safe, sufficient and nutritious food for all in partner countries, and the implementation of the Voluntary Guidelines to support the progressive realisation of the right to adequate food in the context of national food security.
2. Support national, regional and international initiatives for good governance and security of land tenure and use rights, including the implementation of the Voluntary Guidelines and responsible governance of tenure of land, fisheries and forests in the context of national food security, and facilitate responsible agricultural investments and investments in land.
3. Support initiatives to strengthen and enhance the functioning of civil society organisations in partner countries and farmers' organisations, particularly those which actively target poor smallholder and women farmers as members, contributing to their empowerment to participate in decision-making and implementation and evaluation of programmes.
4. Support programmes which focus on empowering women, strengthening their decision-making role at household level, including in relation to decisions about food production, consumption and the use of household assets, and which seek to ensure that women's voices are heard and integrated into decision making at national and local levels.
5. Increase support to continental, regional and national CAADP programmes and plans.
6. Strengthen global governance for food and nutrition security and take a strong leadership and advocacy role internationally to ensure that food and nutrition security is prioritised in global and regional development fora.
7. Promote coherence between relevant internal policies and the objectives of external development assistance policies.

Policy priority 3: Support regional agriculture and food and nutrition security policies

Interventions

1. Support the development and implementation of regional level agricultural policies and strategies to step up integration of regional food markets and disease control programmes, including food safety against foodborne illness.
2. Reinforce regional information systems in support of agriculture and food and nutrition security policies, including those for early warning systems and transparency in markets.

Policy priority 4: Strengthen social protection mechanisms for food and nutrition security, particularly for vulnerable population groups

Interventions

1. Support countries to develop nationally owned and led comprehensive social protection systems which are flexible, adapted to local contexts, and target both labour and non-labour constrained vulnerable population groups, and funded increasingly from domestic resources.
2. Support existing social protection programmes to expand their coverage and linkages with other sectors and enhance predictability, reliability, sustainability, scalability, resilience and the crisis response capacity of the interventions.

Policy priority 5: Enhance nutrition, in particular for mothers, infants and children

Interventions

1. Increase advocacy with partner country governments to raise the profile of nutrition within their respective national strategies and programmes, and to align their resources accordingly.
2. Increase financial and technical support to partner countries to scale up and effectively address under-nutrition and improve national governance on nutrition, with a particular focus on those countries which have signed up to the SUN Movement.
3. Increase financial support for scaling up proven direct nutrition interventions, in particular those which combat maternal, infant and child under-nutrition and the irreversible effects of chronic under-nutrition in early childhood, targeting the 1,000 day window of opportunity from pregnancy to the age of 2.
4. Support to continental, regional and national nutrition research programmes and plans.
5. Support partner countries to integrate nutrition into national sectoral policies including agriculture, food safety, health and HIV/AIDS, education, gender, environment, social protection, and water, sanitation and hygiene, and increase awareness raising and financial support for scaling up proven nutrition sensitive interventions in partner countries.
6. Incorporate nutrition specific objectives and indicators into the design and evaluation of EU supported agriculture and food security policies and programmes.

Policy priority 6: Enhance coordination between development and humanitarian actors to build resilience and promote sustainable food and nutrition security

Interventions

1. Support integration of resilience-building into partner countries' policies and planning, in particular into national development, poverty reduction and food and nutrition security strategies and encourage ownership of resilience priorities at national and local levels.
2. Support programmes and activities which strengthen the capacity of partner countries and local communities and assist them to anticipate, prevent and prepare for food security crises and to enhance crisis response, recognising the differential impacts and capacities of women, men and vulnerable groups.
3. Build capacity to improve risk monitoring, including climate risk, and vulnerability assessments in partner countries and regions prone to food crises.
4. Provide specific support to food insecure countries in transition and fragility to build resilience according to the Fragile States principles and the New Deal for engagement in fragile states.
5. Promote principles of aid effectiveness as outlined in the Busan conclusions.
6. Ensure that humanitarian and development funding mechanisms are flexible, predictable, and sufficient to support resilience in food insecure partner countries.
