## **ANNEX I**

### **CRITERIA FOR THE DETERMINATION OF MAXIMUM WHOLESALE CHARGES**

Principles, criteria and parameters for the determination of maximum wholesale charges referred to in Article 22:

- (a) the rates shall allow recovery of wholesale roaming costs incurred by an efficient operator in any Member State when offering the relevant, regulated wholesale service; the evaluation of efficient costs shall be based on current cost values; the cost methodology to calculate efficient costs shall be based on a bottom-up modelling approach using long-run incremental costs plus some allocation of joint and common costs (LRIC+) of providing the wholesale roaming services to third parties;
- (b) The increment refers to the relevant part (service) of interest in the specific situation, here roaming services. The LRIC cost standard encompasses solely the elements needed to provide this specific service;
- (c) The LRIC+ cost standard allows for including joint and common costs which are relevant for other services;
- (d) As network operators need to be able to recover joint and common costs to ensure long-term sustainability, joint and common costs are shared among the services that generate them and accordingly recovered by any price cap set above the estimated costs for those services;
- (e) for mobile network operators, the minimum efficient scale shall be set at a market share not below 20 %;
- (f) the relevant approach for asset depreciation shall be economic depreciation; and
- (g) the technology choice of the modelled networks shall be forward looking, based on an IP core network, taking into account the various technologies likely to be used over the period of validity of the maximum rate.
