## ANNEXES

to the

**Commission Delegated Regulation (EU) 2021/...**

**supplementing Regulation (EU) 2019/2144 of the European Parliament and of the Council by laying down detailed rules concerning the alcohol interlock installation facilitation in motor vehicles and amending Annex II to that Regulation**

**EN**

**EN**

## ANNEX I

### Technical requirements

1. Alcohol interlock installation facilitation shall allow the fitting or retrofitting of an alcohol interlock complying with European Standards EN 50436-1:2014 or EN 50436-2:2014+A1:2015.
2. The vehicle system as regards alcohol interlock installation facilitation in each motor vehicle of categories M and N shall conform to the relevant vehicle model as laid down in the alcohol interlock installation document ('installation document'), conforming to European Standard EN 50436-7:2016. For this purpose, the installation document shall cover at least one of the options in EN 50436-7:2016 Annex C 3a, 3b or 3c. The vehicle manufacturer may provide the installation document conforming to later revisions of the European Standard, in agreement with the approval authority and the technical service.
3. Installation document
  - 3.1. The installation document shall contain a detailed description, diagrams and images explaining the installation of an alcohol interlock, covering any of the following sets of information:
    - (a) the information regarding battery feed, ground, vehicle ready and start enabler;
    - (b) the information regarding battery feed, ground, vehicle ready and start-allowing or start-prohibiting input and output line, and an optional detection of propulsion capability (e.g. engine run) or vehicle moving signal line; or
    - (c) the information regarding battery feed, ground and a data bus connection.
  - 3.2. Any additional software, hardware or procedures necessary to allow the installation of an alcohol interlock in a standard vehicle shall be identified and indicated in the installation document.
  - 3.3. The alcohol interlock shall be in the blocking state normally. The blocking state of the alcohol interlock shall be achieved by either an open output relay, a corresponding output signal or the corresponding digital bus message. The closure of this relay or the change of the blocking output signal into the non-blocking output signal or the transmission of the corresponding non-blocking data bus message shall occur when an accepted breath sample with an alcohol concentration below the pre-set limit has been delivered.
  - 3.4. An installed alcohol interlock shall only intervene in the engine starting process or in allowing the vehicle to move under its own power upon the activation of the vehicle master control switch and the alcohol interlock shall not influence a running engine or a moving vehicle.
4. Access to alcohol interlock facilitation information
  - 4.1. Vehicle manufacturers shall put in place the necessary arrangements and procedures to ensure that vehicle alcohol interlock facilitation information, in the form of relevant details of the standardised installation document, is accessible in accordance with Annex X of Regulation (EU) 2018/858. As some of the information may relate to security-related vehicle repair and maintenance

information services, access to the alcohol interlock facilitation information is restricted to independent operators that comply with the procedure laid down in Appendix 3 of that Annex.

5. The vehicle manufacturer shall annex to the information document a declaration made out using the template set out in the Appendix to this Annex.

## **Appendix**

### **Manufacturer's declaration**

(Manufacturer):  
.....

(Address of the manufacturer):  
.....

Certifies that

It provides access to the *alcohol interlock installation document* in compliance with Article 1 of Commission Delegated Regulation (EU) .../...<sup>(1)</sup> [PO: *this Regulation*] for the following vehicle make and type: ...

The principal website address(es), where the alcohol interlock installation document may be accessed, is (are) listed in Annex A to this declaration. The contact details of the responsible manufacturer's representative who has signed this declaration are set out in Annex B to this declaration.
