### ANNEX

# SECTION 1: REFORMS AND INVESTMENTS UNDER THE RECOVERY AND RESILIENCE PLAN

### 1. Description of Reforms and Investments

#### **COMPONENT 1: SUSTAINABLE RECOVERY**

### A. SUBCOMPONENT 1.A RENOVATION WAVE

This subcomponent of the Austrian recovery and resilience plan addresses the following challenges: climate change, energy efficiency, use of renewable energy, resource efficiency, air pollution, energy poverty, social inequality, job creation.

The objective of the subcomponent is to (i) promote the green transition by supporting the replacement of climate-damaging oil and gas heating systems with renewable technology, and (ii) strengthen social resilience by supporting complex thermal renovation of dwellings to reduce the energy costs of low-income households. In the wake of the COVID-19 crisis, it also aims to contribute to employment recovery, owing to multiplier effects of renovation works on job creation.

The subcomponent contributes to addressing the country-specific recommendations on sustaining the economy and supporting recovery (Country Specific Recommendation 1 in 2020), focusing investment on the green transition, clean and efficient production and use of energy (Country Specific Recommendation 3 in 2020) and investment-related economic policy on sustainability (Country Specific Recommendation 3 in 2019).

It is expected that no measure in this subcomponent does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

# A.1. Description of the reforms and investments for non-repayable financial support

### Reform: 1.A.1 Renewable Heating Law

The objective of the reform is to create the framework conditions for replacing outdated heating systems. Building on an existing reform that banned heaters using fossil fuels in newly constructed buildings, the Renewable Heating Law shall regulate the phase-out of outdated heating systems in existing buildings from 2025 onwards and encourage their replacement by renewable energy or district heating. Additionally, the reform shall create a common platform, in cooperation with the *Länder* and social organisations, to coordinate flanking measures against energy poverty, including funding and consultancy services for low-income households.

The Renewable Heating Law shall be enacted by 31 March 2022. The remaining elements of the reform shall be implemented by 31 December 2022.

Investment: 1.A.2 Exchange of oil and gas heating systems

The objective of the investment is to increase the share of heating systems based on renewable energy in residential buildings, and thus reduce heating-related energy consumption, greenhouse gas emissions and air pollution.

The investment consists of a support scheme for private individuals to replace fossilfuel heating system with biomass-based heaters, heat pumps or connectors to district heating.

The implementation of the measure shall be completed by 30 June 2026.

### Investment: 1.A.3 Combating energy poverty

The objective of the investment is to contribute to a reduction in energy consumption in buildings, while supporting a just transition. The investment shall support thermal renovation of dwellings of low-income households prone to energy poverty, and thus reduce their energy consumption and costs in a sustainable manner. The measure targets low-income households living in older buildings which cannot afford an own contribution to existing national and regional schemes supporting energy efficiency measures.

The investment consists of an integrated support scheme that shall provide tailored support and funding for renovation of family houses, comprising thermal insulation of walls and roof, replacement of windows and heaters as well as planning support. Part of the investment shall be dedicated to consultancy services and awareness raising, in cooperation with social NGOs, building on the reform included in this subcomponent.

The implementation of the measure is expected to start by 31 March 2022 and shall be completed by 31 December 2025.

# A.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

Sequentia	Related Measure	Milestone / Target	Name	Qualitative indicators	Quantitati (for target		ndicators	Indicativ timeline completi	for	Description of each
l Number	(Reform or Investment)	Target		(for milestones)	Unit of measure	Baseline	Goal	Quarte r	Year	milestone and target
1	1.A.1 Renewable Heating Law	Milestone	Entry into force of Renewable Heating Law	Provision in the law indicating the entry into force of the Renewable Heating Law	-	-	-	Q1	2022	Entry into force of the Renewable Heating Law to regulate the phase-out of heaters using liquid or solid fossil fuels in existing buildings
2	1.A.1 Renewable Heating Law	Milestone	Training for energy consultants	Launch of the training for energy consultants to advise low- income and energy-poor households	-	-	-	Q4	2022	In agreement with the <i>Länder</i> and the social NGOs involved in the project, training shall be offered to energy consultants to advise low-income and energy-poor households
3	1.A.2 Exchange of oil and gas heating systems	Target	Replacement of heating systems	-	Number	0	6 360	Q4	2021	At least 6 360 projects of replacement of heating systems have been implemented and audited.

### **B. SUBCOMPONENT 1.B ECO-FRIENDLY MOBILITY**

This subcomponent of the Austrian recovery and resilience plan addresses the following challenges: decarbonisation of the transport sector, sustainable infrastructure, climate-friendly mobility.

The objectives of the subcomponent are enhancing environmentally friendly mobility by developing the necessary infrastructure and incentivising the use of sustainable means of transportation.

The subcomponent contributes to addressing the country-specific recommendation on focusing investment on the green transition (Country Specific Recommendation 3 in 2020) and investment-related economic policy on sustainability (Country Specific Recommendation 3 in 2019).

It is expected that no measure in this subcomponent does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

# **B.1.** Description of the reforms and investments for non-repayable financial support

### Reform: 1.B.1 Mobility Masterplan 2030

The objective of this reform is to reduce  $CO_2$  -emissions in the transport sector and provide for a coherent approach to reach climate neutrality.

The reform consists of bringing forward a Mobility Masterplan, which shall set out a strategy for sustainable mobility until 2030, and the subsequent implementation of the envisaged activities. This includes comprehensive measures regarding e-mobility, including developing infrastructure such as cycling paths. It shall be accompanied by establishing a monitoring system for evaluating the progress.

The implementation of the measure is expected to start by 30 September 2023 and shall be completed by 30 September 2025.

### Reform: 1.B.2 Introduction of 1-2-3 climate ticket

The objective of this reform is to facilitate sustainable public transport between regions by creating a reasonably priced, simple and consistent ticketing offer.

The reform consists of developing a flat-rate season ticket, valid across regions in Austria, with the aim to lower the costs and incentivise the use of public transport.

The implementation of the measure is expected to start by 30 September 2021 and shall be completed by 31 December 2021 for the national and/or regional climate ticket category. All 1-2-3 tickets are expected to be available beyond 2021.

### Investment: 1.B.3 Zero-emission buses

The objective of this investment is to lower the emissions of the public transport system by increasing the use of zero-emission buses.

The investment consists of providing funding to switch to buses which shall be equipped with zero carbon emitting technologies. This shall be accompanied by the development of the necessary infrastructure for operating the buses in public transportation, including recharging and refuelling points. This is meant to support the transition from currently fossil-fuel-powered to zero-emission buses, operated with renewable energy. The investment shall be managed through calls for expression of interest enabling transport associations, transport companies and other potential beneficiaries to submit their applications. Eligible projects shall include zero-emission buses and the infrastructure to operate the buses. If operational procedures allow, the supported refuelling and charging infrastructure shall also be usable by other types of vehicle (heavy and long-distance traffic) and be accessible to the public. Provided that these minimum pre-defined criteria are met, projects shall be ranked according to environmental, economic and other quality assessment criteria that include implementation in an overarching transport concept.

The implementation of the measure is expected to start until 31 March 2022 and shall be completed by 30 June 2026.

### Investment: 1.B.4 Zero-emission utility vehicles

The objective of this investment is to lower the emissions from transport by increasing the share of zero-emission commercial vehicles.

The investment consists of providing funding to switch to commercial vehicles which shall be equipped with zero carbon emitting technologies and operated with renewable energy. From 2022, the existing funding scheme shall be accompanied by a new investment scheme, which shall be managed through calls for expression of interest enabling businesses and business organisations, public authorities and associations to submit their applications. Eligible projects shall include zero-emission utility vehicles of category N1 and the infrastructure to operate the vehicles. If operational procedures allow, the supported refuelling and charging infrastructure shall also be usable by other types of vehicle and be accessible to the public. Provided that these minimum pre-defined criteria are met, projects shall be ranked according to environmental, economic and other quality assessment criteria within the new investment scheme.

The implementation of the measure shall be completed by 30 June 2026.

# Investment: 1.B.5. Construction of new railways and electrification of regional railways

The objective of this investment is to improve the Trans-European Network along the Baltic-Adriatic Core-Network Corridor and the intra-regional connectivity in Austria through public transport.

The investment consists of constructing a new railway line (Koralmbahn) between Styria and Carinthia. This new railway line shall create a link and additional capacity in rail transport. It also comprises the electrification of existing regional railway lines in the area of Carinthia, which are along the new railway line. The Koralmtunnel shall be part of the Koralmbahn, but the Koralmtunnel itself is outside the scope of the recovery and resilience plan.

The implementation of the measure shall be completed by 31 August 2026.

# **B.2.** Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

Sequential	-	Milestone / Target	Name in	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each
Number	(Reform or Investment)				Unit of measure	Base- line	Goal	Quarter	Year	milestone and target
9	1.B.1 Mobility Masterplan 2030	Milestone	Implementatio n of the Mobility Masterplan has started	Completion of several steps in the Mobility Masterplan	-	-	-	Q3	2023	The following strategic documents under the Mobility Masterplan have been published: - Fast-track renewable energy mobility programme - Shared Mobility Strategy - Freight Masterplan - Masterplan Digital Transformation in Mobility - FTI Mobility Strategy 2040 - FTI Aviation Strategy In addition, a legislative package introducing a Climate Check for existing legislation for the mobility sector has been enacted and the Alpine Convention (Transport Protocol) has been

										implemented.
10	1.B.1 Mobility Masterplan 2030	Milestone	Reduction of CO <sub>2</sub> emissions in the transport sector	Lasting trend change in the reduction of CO <sub>2</sub> emissions in the transport sector (permanent reduction below the peak in 2019, including a general downward trend), as per monitoring of the 2030 Mobility Masterplan		-	-	Q3	2025	Evaluation of the indicators of the 2030 Mobility Masterplan to demonstrate its impact and underlying causes and to demonstrate that a sustainable shift in the reduction of $CO_2$ emissions in the transport sector has been achieved. This is done in the context of the near-term forecast of Austrian greenhouse gas emissions. A permanent reduction in $CO_2$ emissions, including a general downward trend below the peak in 2019 (taking into account any special effects of COVID-19), shall be demonstrated in the framework of the monitoring of the Mobility Masterplan 2030.
11	1.B.2 Introduction	Milestone	Entry into force of law	Provision in the law indicating the	-	-	-	Q3	2021	The 'Federal Act on the introduction of the

	of 1-2-3 climate ticket			entry into force of the law on the introduction of the climate ticket						climate ticket' has entered into force. The law shall prescribe a general rule for setting maximum tariffs in accordance with EU Regulation No 1370/2007. The law shall define the territorial, traffic, personal and temporal scope, and the price of the 1-2-3 climate ticket.
12	1.B.2 Introduction of 1-2-3 climate ticket	Milestone	Introduction of 1-2-3 climate ticket	The first 1-2-3 climate tickets shall be introduced on the market.	-	-	-	Q4	2021	National and/or regional categories of the 1-2-3 climate ticket are available for customers to buy and use.
13	1.B.3 Zero- emission buses	Milestone	Launch of the zero-emission buses support programme	The call for expression of interest has been publicly announced.	-	-	-	Q1	2022	The call for expression of interest has been launched. The call shall enable transport associations, transport companies and other potential beneficiaries to submit their applications (through the Settlement Office's digital submission portal). Eligible projects shall include zero-emission buses and the

										infrastructure to operate the buses.
14	1.B.3 Zero- emission buses	Milestone	Last call completed	Last call for expression of interest by potential beneficiaries completed	-	-	-	Q4	2024	The last call for expression of interest by potential beneficiaries has been completed. Eligible projects shall include zero-emission buses and the infrastructure required for their operation.
15	1.B.3 Zero- emission buses	Target	Buses equipped with zero- emission technologies	-	Number	0	682	Q2	2026	On the basis of grant agreements, the beneficiaries have procured and received at least 682 buses with zero- emission technology.
16	1.B.3 Zero- emission buses	Milestone	Infrastructure is in place	The infrastructure necessary for the conversion of 682 buses on the Austrian regular service to zero- emission buses has been built.	_	-	-	Q2	2026	On the basis of grant agreements, the beneficiaries have installed the charging infrastructure (overnight/deposit and occasional loading at stops), overhead contact lines and hydrogen refuelling points necessary for the operation of at least 682 zero-emission buses.
17	1.B.4 Zero- emission	Milestone	Launch of the support	Launch of the support	-	-	-	Q1	2021	The support programme has been launched. It

	utility vehicles		programme	programme for zero-emission utility vehicles and their charging infrastructure ('E- <i>Mobilitäts-</i> <i>offensive 2021</i> ' for companies).						shall enable businesses and other business organisations, public authorities, and associations to consult all necessary documents and to submit their applications (through the Settlement Office's digital submission portal). Eligible projects shall include zero-emission utility vehicles and the infrastructure to operate these vehicles.
18	1.B.4 Zero- emission utility vehicles	Milestone	Last call completed	Last call for expression of interest by potential beneficiaries completed	-	-	-	Q4	2024	The last call for expression of interest by potential beneficiaries has been completed. Eligible projects include zero- emission utility vehicles and the infrastructure to operate these vehicles.
19	1.B.4 Zero- emission utility vehicles	Target	Vehicles equipped with zero-emission technologies	-	Number	0	2 767	Q2	2026	On the basis of grant agreements, the beneficiaries have procured and received at least 2767 N1 utility vehicles with zero- emission technology.

2	20	1.B.4 Zero- emission utility vehicles	Milestone	Infrastructure is in place	The infrastructure needed to switch from 2 767 utility vehicles to zero- emission utility vehicles has been built.	-	-	-	Q2	2026	On the basis of grant agreements, the beneficiaries have installed the charging infrastructure and hydrogen refuelling points necessary for the operation of at least 2 767 zero-emission utility vehicles.
4	21	1.B.5 Construction of new railways and electrification of regional railways	Milestone	Ongoing construction project	Start of construction of Lavanttal railway station	-	-	-	Q1	2020	Construction began in March 2020 for the Lavanttal station, a new regional railway station located in Carinthia along the Koralmbahn. The station shall allow a link between the Koralmbahn and the Lavanttalbahn.
2	22	1.B.5 Construction of new railways and electrification of regional railways	Milestone	Electrification	Putting into operation of Lavanttal station and of electrification of regional railway line including feeder route in Carinthia to the Koralmtunnel	-	-	-	Q4	2023	The feeder routes to the Koralmtunnel located in the province of Carinthia, as well as the regional sections 'Bleiburger Schleife' and 'Lavanttalbahn' linked to the Koralmbahn, have been electrified. This shall mean that the infrastructural conditions are in place for regional

										traffic to be managed electrically in Carinthia. Lavanttal station has been completed and is put into operation.
23	1.B.5 Construction of new railways and electrification of regional railways	Milestone	Completion of construction project	Putting into operation of Koralmbahn including all Styria feeder route to Koralmtunnel	-	-	-	Q4	2025	The Koralmbahn has been put into operation, including the opening of the Koralmtunnel. The feeder route to the Koralmtunnel located in the province of Styria has been put into service. Together with the Koralmtunnel, the infrastructure requirements are in place for the Vienna–Villach long-distance service to be operated via Graz.

### C. SUBCOMPONENT 1.C BIODIVERSITY AND CIRCULAR ECONOMY

The subcomponent of the Austrian recovery and resilience plan addresses the following challenges: waste prevention, sorting and recycling of plastic waste, transition to a circular economy and promoting biodiversity.

The objectives of the subcomponent are enhancing the shift from Austria's linear economy to a low-carbon circular economy, improving take-back systems and increasing the quota of reusable beverage packaging, constructing and retrofitting of sorting facilities to increase the sorting output, as well as promoting the repair of electrical and electronic equipment and supporting the preservation and restoration of biodiversity in Austria.

The subcomponent contributes to addressing the country-specific recommendation on focusing investment on the green transition (Country Specific Recommendation 3 2020) and investment-related economic policy on sustainability (Country Specific Recommendation 3 2019).

It is expected that no measure in this subcomponent does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

# C.1. Description of the reforms and investments for non-repayable financial support

<u>Reform: 1.C.1 Legal framework for increasing collection rates for beverage</u> packaging and the supply of reusable beverage containers in retail

The objective of this reform is to increase the reuse, collection and recycling rate of beverage packaging and containers.

The reform consists of legal changes in two areas. The first element shall establish a legal framework that shall provide for an effective take-back system for single-use plastic and metal beverage packaging and, ultimately, increase the recycling rate of these materials. This is complemented by legal changes in the area of waste management, which shall raise the supply of reusable beverage containers in the retail sector.

The implementation of the measure is expected to start by 31 December 2021 and shall be completed by 31 August 2026.

### Investment: 1.C.2 Biodiversity fund

The objective of this investment is to support the preservation and restoration of biodiversity in Austria.

The investment consists of establishing a biodiversity fund, which shall fund projects for the conservation of biodiversity, restoration of degraded ecosystems, awareness raising activities and implementation of biodiversity monitoring. Eligible beneficiaries shall include businesses, non-governmental organisations, private households and public entities.

The implementation of the measure is expected to start by 31 March 2022 and shall be completed by 31 December 2025.

Investment: 1.C.3 Investments in reverse vending systems and measures to increase the reuse quota of beverage containers

The investment shall promote take-back systems in the retail sector as well as measures to increase the reuse quota of beverage containers.

The investment consists of supporting the purchase and refurbishment of take-back systems in the retail sector. This shall facilitate the return of disposable beverage containers by consumers and lead to the automation of the take-back process. Investments in the construction and expansion of filling and washing facilities, the acquisition of new packaging equipment and of reusable standard containers and crates shall also be supported

The implementation of the measure is expected to start by 31 March 2024 and shall be completed by 31 March 2026.

### Investment: 1.C.4 Retrofitting of existing and construction of new sorting facilities

The investment shall increase the plastic waste sorting capacity and depth in Austria.

The investment consists of constructing new and retrofitting of existing plastic waste sorting facilities in order to raise the amount of recycled material.

The implementation of the measure is expected to start by 30 September 2022 and shall be completed by 31 August 2026.

### *Investment:* 1.C.5 *Promotion of the repairing of electrical and electronic equipment* (repair bonus)

The investment shall raise the number of refurbished and repaired electrical and electronic equipment.

The investment consists of creating a support programme to incentivise the repair of electrical and electronic equipment. The repair bonus system shall provide funding for households in the form of vouchers, which shall cover a part of the costs for repairing or renewing electoral and electronic equipment.

The implementation of the measure is expected to start by 31 March 2022 and shall be completed by 31 August 2026.

# C.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

Sequentia	Related Measure	Milestone / Target	Name	Qualitative indicators	Quantitativ (for targets	indicators	Indicative timeline completio	for	Description of each	
l Number	(Reform or Investment )			(for milestones)	Unit of measure	Base- line	Goal	Quarter	Year	milestone and target
24	1.C.1 Legal framework for increasing collection rates for beverage packaging and the supply of reusable beverage containers in retail	Milestone	Entry into force of the amended Waste Management Act	Provision in the law indicating the entry into force of the amended Waste Management Act	-	-	-	Q4	2021	The amendment to the Waste Management Act shall establish the legal basis for increasing the collection rates for plastic beverage packaging and the supply of reusable beverage containers in the retail sector. This includes quotas for separate collection of single-use beverage bottles, requirements for clear labelling of beverage packaging offered at the point of sale as single-use or reusable beverage packaging, and concrete targets for the development of

										reusable systems for beverage packaging; end distributors shall be required to offer a minimum number of reusable beverage packaging at the point of sale.
25	1.C.1 Legal framework for increasing collection rates for beverage packaging and the supply of reusable beverage containers in retail	Milestone	Entry into force of the implementing regulation	Entry into force of the Implementing Regulation for increasing collection rates for plastic beverage packaging	-	-	-	Q1	2023	The Implementing Regulation has established the sub- legal basis for increasing collection rates for plastic beverage packaging.
26	1.C.1 Legal framework for increasing collection rates for beverage packaging and the supply of reusable	Target	Reusable quota	-	Percentage	19	25	Q1	2026	At least 25% of the volume of all beverages sold in 2025 were placed on the market in reusable containers compared to 19% in 2019.

27	beverage containers in retail 1.C.2 Biodiversity fund	Milestone	Entry into force of the legal framework for Biodiversity Fund	Provision in the law indicating the entry into force of the legal framework for Biodiversity Fund and National Biodiversity Strategy 2030	-	-	-	Q1	2022	The Federal Act (amendment of the Environmental Federation Act) has established the Biodiversity Fund and set its objectives and implementation modalities.
28	1.C.2 Biodiversity fund	Milestone	Completion of the call for projects to restore priority degraded ecosystems and protect endangered species and habitats	The call for projects has been completed and projects have been awarded	-	-	-	Q1	2023	Based on the funding guidelines, which shall specify the nature and scope of eligible projects and the potential beneficiaries, the implementing body has conducted a call for projects for the restoration of degraded ecosystems and the protection of endangered species and habitats. Funding projects for biodiversity monitoring have been awarded on the basis of

										an existing nationwide approach.
29	1.C.2 Biodiversity fund	Target	Biodiversity projects completed	-	Number	0	20	Q4	2025	At least 20 approved projects for restoration, species and habitat protection have been completed by the beneficiaries; a monitoring report on the state and trends of biodiversity has been prepared.
30	1.C.3 Investments in reverse vending systems and measures to increase the reuse quota of beverage containers	Target	Take-back systems	-	Number	0	5 000	Q1	2024	Companies in the retail sector have purchased at least 5 000 new reverse vending machines or upgraded existing ones in terms of efficient take-back and data connectivity.
31	1.C.3 Investments in reverse vending systems and measures to increase the reuse quota of beverage	Target	Increased collection rate	-	Percentage	70	80	Q1	2026	At least 80% of all plastic beverage packaging placed on the market in 2025 was collected separately compared to 70% in 2018.

	containers									
32	1.C.4: Retrofitting of existing and construction of new sorting facilities	Target	Permit applications for construction or retrofitting	-	Number	0	3	Q3	2022	The competent authorities have received at least three applications from public and/or private waste management companies for permits for the construction or retrofitting of sorting facilities for plastic waste.
33	1.C.4: Retrofitting of existing and construction of new sorting facilities	Target	Commissionin g of facilities	-	Number	0	3	Q1	2025	At least three new or retrofitted sorting facilities for plastic waste are in operation; material is delivered and sorted.
34	1.C.4: Retrofitting of existing and construction of new sorting facilities	Target	Sorting depth	-	Percentage	33	50	Q1	2026	Nationwide, at least 50% of Austrian plastic waste shall be sorted for further recycling compared to 33% in 2018.
35	1.C.5 Promotion of	Milestone	Launch of the repair bonus	The repair bonus support	-	-	-	Q1	2022	Organisational arrangements and

	the repairing of electrical and electronic equipment (repair bonus)		support programme	programme shall be open for applications						technical procedures for the launch of the repair bonus programme have been completed; the funding programme shall be published and opened for applications.
36	1.C.5 Promotion of the repairing of electrical and electronic equipment (repair bonus)	Target	Repaired or renewed electrical or electronic equipment	-	Number	0	200 000	Q1	2024	At least 200 000 electrical or electronic devices have been repaired or renewed; the relevant information from the beneficiaries has been collected and transmitted by the funding processing office.
37	1.C.5 Promotion of the repairing of electrical and electronic equipment (repair bonus)	Target	Increased number of repaired or renewed electrical or electronic equipment	-	Number	200 000	400 000	Q1	2026	At least 400 000 electrical or electronic devices have been repaired or renewed; the relevant information from the beneficiaries has been collected and transmitted by the funding processing office.

#### **D. SUBCOMPONENT 1.D TRANSFORMATION TO CLIMATE-NEUTRALITY**

This subcomponent of the Austrian recovery and resilience plan addresses the following challenges: electricity generation from renewable sources, integration of energy system, climate change mitigation, decarbonisation and reduction of energy intensity of industry.

The objective of the subcomponent is to support the development of renewable energy sources and decarbonisation of industrial sectors in Austria.

The subcomponent contributes to addressing the country-specific recommendations on focusing investment on the green transition, clean and efficient production and use of energy (Country Specific Recommendation 3 in 2020) and investment-related economic policy on sustainability Country Specific Recommendation 3 in 2019).

It is expected that no measure in this subcomponent does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

# **D.1.** Description of the reforms and investments for non-repayable financial support

The subcomponent consists of a reform of the national support framework for renewable energy and of an investment aimed at *industrial* emissions *abatement*. *Both measures contribute to green transition and climate change mitigation*.

### Reform: 1.D.1 Renewables Expansion Law

The objective of the reform is to contribute to an increase in the share of renewable energy in electricity supply to 100% by 2030, which shall require adding 27 TWh of electricity generation capacity from renewable sources by 2030. The reform represents a key government priority in energy policy that plays an essential role on Austria's path towards climate neutrality by 2040. The reform overhauls the national support scheme relying on market premiums and investments for wind power, hydropower, solar energy, biomass, renewable gases, including hydrogen. The elements of the reform regarding hydrogen are coherent with the investment measure 3.D.2 IPCEI Hydrogen.

The Renewables Expansion Law shall be enacted by 31 December 2021.<sup>1</sup>

### Investment: 1.D.2 Transforming industry towards climate neutrality

The investment measure aims to accelerate the decarbonisation of industry, increase its resource and energy efficiency, support industrial eco-innovations and advanced technology reducing the environmental impact of hazardous waste treatment.

The investment consists of a call for tender that targets large-scale transformative projects in industries inter alia also falling under the EU Emissions Trading Scheme.

<sup>&</sup>lt;sup>1</sup> The Renewables Expansion Law has been notified as State aid and is subject to any changes required to ensure compliance with State aid rules.

The implementation of the measure is expected to start by 30 September 2021 and shall be completed by 30 June 2026.

**D.2.** Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

Sequential		Milestone /	Name	Qualitative indicators	Quantitative indicators (for targets)			Indicative timeline completio	for	Description of each

## **COMPONENT 2: DIGITAL RECOVERY**

### E. SUBCOMPONENT 2.A BROADBAND EXPANSION

This subcomponent of the Austrian recovery and resilience plan addresses the Austrian backlog in the deployment of Gigabit-capable access networks. Austria has a particularly low coverage of fixed very high-capacity networks, reaching 39% in 2020, compared to the EU average of  $59\%^2$ .

The subcomponent aims to ensure the widespread availability of Gigabit-capable access networks and the establishment of new symmetrical Gigabit connections in areas with particular socio-economic drivers, such as public institutions and enterprises. Therefore, the objective of the subcomponent is to provide efficient and affordable broadband connectivity throughout Austria, ensuring in particular the digital inclusion of rural regions.

The subcomponent contributes to addressing the country-specific recommendations on additional investment in infrastructure, including rural broadband (Country Specific Recommendations in 2020, recital 21) and ensuring high-speed connectivity in rural areas (Country Specific Recommendations in 2019, recital 15).

It is expected that no measure in this subcomponent does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

# E.1. Description of the reforms and investments for non-repayable financial support

### Reform: 2.A.1 Set-up of Platform Internet-infrastructure Austria (PIA) 2030

The reform envisages the creation of a platform with the purpose of coordinating the relevant stakeholders (such as federal government, Länder, municipalities, companies and citizens) and developing legal, regulatory and technical measures for broadband deployment. In addition, the platform shall implement recommendations of the Connectivity Toolbox. The reform shall reduce bureaucracy and simplify procedures for broadband deployment.

The implementation of the measure is expected to start by 31 December 2021 and shall be completed by 31 December 2023.

Investment: 2.A.2 Widespread availability of Gigabit capable access networks and creation of new symmetric Gigabit connections

The investment consists of the two funding directives, Access and OpenNet, of the Austria Broadband Programme 2030. Both funding directives have the objective to improve broadband availability in those areas of Austria, which, due to a market failure, are not or are insufficiently developed by the private sector. The measure shall increase the availability of Gigabit-capable access networks, as a result of the

<sup>&</sup>lt;sup>2</sup> Broadband Coverage in Europe studies for the European Commission by IHS Markit, Omdia and Point Topic.

RRP support, to cover at least 50% of Austrian households.<sup>3</sup> Both directives have the objective of doubling the existing download and upload speed, at least to 100 Mbit/s symmetrically. Furthermore, the funded access networks must be upgradable to symmetrical Gigabit speeds without further investments in the passive infrastructure. The Access directive aims at vertical integrated telecom operators, whereas the OpenNet directive aims at wholesale-only providers.

Deployment of mobile networks shall be excluded from the investment. Additionally, availability of services of the telecom operators is expected to increase, which is expected to stimulate the wholesale market and ensure competition in the retail market.

The implementation of the measure is expected to start by 31 December 2021 and shall be completed by 31 August 2026.

# **E.2.** Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

<sup>&</sup>lt;sup>3</sup> The availability of Gigabit connections is expected to further increase as a result of the roll-out by telecom operators on a commercial basis without the RRP support.

### F. SUBCOMPONENT 2.B DIGITALISATION OF SCHOOLS

The subcomponent of the Austrian recovery and resilience plan addresses the following challenges: supporting the digital transition in schools, while respecting equal access and equal opportunities, through providing pupils with the necessary digital devices, starting at lower secondary level.

The objective of the subcomponent is the sustainable implementation of ITsupported teaching in all schools of lower secondary level under the same framework conditions for all pupils. Furthermore, in the context of the digital transition of schooling, the subcomponent aims at providing needs-based services as well as creating equal opportunities for all and increasing the level of digital competences of teachers and pupils starting from the lower secondary level.

The subcomponent addresses the country-specific recommendations focusing on raising basic skill levels of disadvantaged groups (Country Specific Recommendation 3 in 2019) and ensuring equal opportunities in education and increasing digital learning (Country Specific Recommendation 2 in 2020).

It is expected that no measure in this subcomponent does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

# F.1. Description of the reforms and investments for non-repayable financial support

# Reform: 2.B.1 Fair and equal access of pupils to basic digital competence

The objective of the reform is to set out the framework conditions and provide supporting measures to enable fair and equal access for all pupils at lower secondary schools to basic digital competences.

The reform consists of a number of supporting actions facilitating the digitalisation in schools in a comprehensive manner. It shall include different activities to ensure that teachers are provided with sufficient in-service training course opportunities to improve their digital skills and broaden their knowledge concerning digital means and measures to be applied when teaching. To ensure the optimal use of the digital end devices provided to pupils, this reform shall help to improve the infrastructure in the various school buildings. Furthermore, the reform shall provide digital solutions to simplify pedagogical and administrative exchanges through a portal consolidating all essential applications for education and administration. Eventually, the reform shall ensure the further development of an already existing portal comprising digital teaching and learning materials and offering access to learning applications. The reform shall be evaluated after four years, with the aim to prolong and further improve it.

The implementation of the measure shall be completed by 30 June 2025.

Investment: 2.B.2 Provision of digital end-user devices to pupils

The objective of the investment is to provide the pedagogical and technical requirements for IT-supported lessons at all school locations, by handing out digital devices to all pupils at lower secondary level. All pupils are expected to have access to digital education under fair and appropriate framework conditions. The central provision of devices and uniform equipment in the participating classes places

pedagogical goals at the centre of teaching without interference by the social background of the pupils.

The measure consists of a step-by-step rollout of the digital equipment. Each year, every pupil in one vintage (those in the fifth grade, the first year of the lower secondary level) shall receive a digital device. This is expected to benefit at least 80 000 pupils per year. In the first implementation year (2021/22) two vintages of pupils (i.e. also sixth grade pupils in addition to fifth grade pupils) shall receive the digital equipment.

The implementation of the measure is expected to start by 31 December 2021 and shall be completed by 31 December 2024.

F.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

Sequential	1 (Retorm or	Milestone	N	Qualitative indicators	Quantitative (for targets)		indicators	Indicative for comple		Description of each

53	2.B.2 Provision of digital end- user devices to pupils	Target	Digital devices for the first two year of secondary school	-	percentage of 5 <sup>th</sup> and 6 <sup>th</sup> grade pupils	0	100	Q4	2021	The delivery of the devices for the 5 <sup>th</sup> and 6 <sup>th</sup> grade (first and second years of lower secondary level) shall be completed.
54	2.B.2 Provision of digital end- user devices to pupils	Target	Digital devices for the remaining grades of lower secondary school	-	percentage of pupils in the first four lower secondary grades	0	100	Q4	2023	The delivery of the devices for the new 5 <sup>th</sup> and 6 <sup>th</sup> grades shall be completed, so that pupils across the first four years of secondary school have been provided with a device
55	2.B.2 Provision of digital end- user devices to pupils	Target	Digital terminals for the first year of the new cycle of secondary school	-	percentage of 5 <sup>th</sup> grade pupils	0	100	Q4	2024	The delivery of the devices for the first year of the new four-year cycle has been completed

#### G. SUBCOMPONENT 2.C DIGITALISATION OF PUBLIC ADMINISTRATION

This subcomponent of the Austrian recovery and resilience plan addresses the challenge of ensuring digital transition in the public administration, the importance of which has been further highlighted by the COVID-19 outbreak.

The objective of the subcomponent is to foster the digitalisation of the public administration, which is expected to contribute to boosting economic dynamism and speeding up recovery. This objective extends beyond the immediate management of the crisis and is expected to have a long-term impact on the development of the administration, as well as on competitiveness, the economy and society.

The subcomponent contributes to addressing the country-specific recommendation to reduce administrative and regulatory burden (Country Specific Recommendation 3 in 2020).

It is expected that no measure in this subcomponent does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

## G.1. Description of the reforms and investments for non-repayable financial support

### <u>Reform: 2.C.1 Proposed legislation for Once Only: Amendment of the Business</u> <u>Service Portal Act</u>

The reform aims to further reduce bureaucracy for business operators and citizens by introducing the actions to implement the Once Only principle, thereby reducing double and multiple reporting.

The reform includes the amendment of the Business Service Portal Act (*Unternehmensserviceportalgesetz*), which shall serve as a basis for further relevant legislative measures. The application of the Once Only principle shall become mandatory in administrative proceedings provided for by the new legislative measures. The set-up of the basic infrastructure for administrations across regional authorities to be able to design reporting processes and services in accordance with the Once Only principle shall be funded in 2021 by the digitalisation fund (see investment 2.C.2), while in subsequent years it is expected to be financed by the Federal Finance Framework Act. As a first step, entrepreneurs at national level shall benefit from the measure. In a second step from 2023, as a result of the Single Digital Gateway Regulation, also entrepreneurs at Union level shall benefit. In a further step, the services may also be offered to citizens.

The implementation of the reform is expected to start by 30 September 2021 and shall be completed by 31 December 2023.

## Investment: 2.C.2 Digitalisation fund public administration

The investment aims to contribute to developing citizen-centred service-oriented administration with a modern digital infrastructure. The objective is to accelerate digitalisation in the federal administration by financing projects with a cross-departmental impact. There is currently an increased need for consolidation in the IT landscape of the Austrian federal administration, which is very heterogeneous. Departments often use different data centres, software and hardware and service providers. The consequences are, for example, avoidable costs and variable quality.

The investment shall help address those issues by implementing IT consolidation in the federal government, develop IT services for citizens and businesses, and optimise procedures.

The investment consists of funding the projects submitted by federal departments and selected by the dedicated task force. At least half of these funds shall be used for cross-departmental projects to implement IT consolidation in the federal government. The other funds shall be used for projects with a cross-departmental impact for the development of citizen and business services and for projects aimed at accelerating and improving the efficiency of procedures. Examples of possible projects include electronic identity (e-ID), introduction of Single Digital Gateway, development of the Business Service Portal and implementation of the Once Only principle.

The investment shall be implemented by 31 December 2023.

**G.2.** Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

## H. SUBCOMPONENT 2.D DIGITAL AND ECOLOGICAL TRANSFORMATION OF ENTERPRISES

This subcomponent of the Austrian recovery and resilience plan addresses the challenges related to fostering the digital and green transition of companies.

The subcomponent aims to accelerate the digitalisation and ecological transformation of Austrian companies, notably by encouraging companies' investment in these priority areas.

The subcomponent contributes to addressing the country-specific recommendations to stimulate digitalisation of businesses (Country Specific Recommendation 3 in 2019) and to focus investment on the green and digital transitions, in particular on innovation, sustainable transport, clean and efficient production and use of energy (Country Specific Recommendation 3 in 2020).

It is expected that no measure in this subcomponent does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

## H.1. Description of the reforms and investments for non-repayable financial support

### Investment: 2.D.1 Digitalisation of SMEs

The investment aims to help SMEs get advice on the state and opportunities of digitalisation in their business and to assist them in designing, implementing and scaling up their digitisation projects, in order to remain competitive in the future digitalised market.

The investment consists of two support programmes KMU.DIGITAL and KMU.E-Commerce. KMU.DIGITAL shall provide both advisory support and implementation support for concrete digitisation projects. Advisory support involves personalised advice to Austrian SMEs by certified consultants on four topics: (i) business models and processes (including resource optimisation), (ii) e-commerce and online marketing, (iii) IT and cyber security, and (iv) digital administration. Implementation support provides funding for the implementation of the digitisation projects for which advisory support was provided. KMU.E-Commerce shall support SMEs in the implementation of concrete e-commerce projects and shall provide funding for new investments into e-commerce and related services from external providers at a rate of 20% (up to a maximum amount of EUR 12 000 per recipient).

The implementation of the investment shall be completed by 31 December 2023.

## Investment: 2.D.2 Digital investments in enterprises

The investment aims to encourage companies' investments into digitalisation and to direct them towards forward-looking priority areas.

The investment consists of a 14% investment premium granted to companies for investments in the priority areas of digitalisation. Support shall be granted for new tangible and intangible investments in depreciable capital assets of companies that are permanently established in Austria. By specifying the eligible areas to be supported with the investment premium, the measure shall encourage in particular investments in the digitalisation of business models and processes, including for Industry 4.0 and e-commerce, as well as investments in the introduction or

improvement of IT and cyber security measures. The Investment Premium Act and the respective funding guidelines<sup>4</sup>exclude climate-damaging investments such as into equipment or installations that directly use fossil fuels, while also stipulating that payments shall be conditional on submitting evidence that excludes negative impacts on environmental and climate objectives. The Investment Premium Act shall be amended to increase the budget available for support taking into account the RRP funds.

The implementation of the investment shall be completed by 31 March 2025.

### Investment: 2.D.3 Green investments in enterprises

The investment aims to encourage companies' investments into ecological transformation and to direct them towards forward-looking priority areas.

The investment consists of a 14% investment premium granted to companies for investments in the priority areas of green transition, such as thermal renovations of buildings, heating optimisation and other energy saving measures, production of renewable energy, photovoltaic and electricity storage systems, zero-emission vehicles, charging stations. Support shall be granted for new tangible and intangible investments in depreciable capital assets of companies that are permanently established in Austria. The Investment Premium Act and the respective funding guidelines<sup>5</sup> exclude climate-damaging investments such as into equipment or installations that directly use fossil fuels, while also stipulating that payments shall be conditional on submitting evidence that excludes negative impacts on environmental and climate objectives.

The implementation of the investment shall be completed by 31 March 2025.

## **COMPONENT 3: KNOWLEDGE BASED RECOVERY**

## I. SUBCOMPONENT 3.A RESEARCH

This subcomponent of the Austrian recovery and resilience plan addresses the following challenges: to foster research, innovation and technology policy in Austria.

The objectives of the subcomponent are to strengthen the research, innovation and research policy in Austria with the development of the Research, Innovation and Technology Strategy 2030 and related targeted investments. Furthermore, the measures are expected to enhance Austria's international position as an innovation and research location.

The subcomponent supports addressing the country-specific recommendations related to enhancing investment in research and innovation and enhancing the innovative outcomes (Country Specific Recommendations 3 in 2019 and 2020).

It is expected that no measure in this subcomponent does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

## I.1. Description of the reforms and investments for non-repayable financial support

# <u>Reform: 3.A.1 Research, Innovation and Technology Strategy 2030 (RTI Strategy 2030)</u>

The objective of this reform is to design the overarching framework for the research, innovation and technology policy in Austria in the coming ten years. The aims are to become an international innovation leader and to strengthen Austria as an RTI location, to focus on effectiveness and excellence, and to focus on knowledge, talent and skills. The implementation of the reform is organised with the research financing act and the operationalisation with three-year pacts for research, technology and innovation. The investments included in this subcomponent complement the RTI Pact 2021-2023 adopted in 2020 and will be covered by the future pacts. The 'RTI-Strategy 2030' is to be implemented by the end of 2030.

The implementation of the part of the reform under the recovery and resilience plan shall be completed by 31 December 2025.

#### Investment: 3.A.2 Quantum Austria — Promotion of Quantum Sciences

The objective of this investment is to facilitate excellent future-oriented, transformative and innovative basic and advanced research and to place Austria among those EU countries that successfully use quantum sciences for innovative products and services.

The investment consists of funding research infrastructures (incl. software development) and research collaborations, with the aim to expand the knowledge base for the (further) development of technological concepts for quantum computing, simulation, and communication, the establishment or development of technologies for the whole area of quantum sciences, especially hardware and software for

quantum computing, simulation, and communication. The investment is also expected to strengthen cross-border cooperation (such as between German-speaking countries) and achieve or expand the alignment with relevant European initiatives and projects.

The implementation of the investment shall be completed by 31 March 2026.

### Investment: 3.A.3 Austrian Institute of Precision Medicine

The objective of this investment is to establish a centre for precision medicine on the campus of the Medical University of Vienna. Due to the immediate proximity to the largest hospital of Vienna, that is also of one of the largest hospitals in the world, the AKH (General Hospital Vienna), the institute is expected to translate scientific results immediately to the benefit of the patients.

The investment consists of a new building to be built for this new research centre. The investments include both the structural and the necessary infrastructural and digital equipment for research.

The implementation of the investment is expected to start by 30 June 2022 and shall be completed by 30 June 2026.

#### Investment: 3.A.4 (Digital) Research Infrastructures

The strategic development of research infrastructures is an important field of action of the Austrian Research, Technology and Innovation Strategy (RTI) 2030 in order to catch up with the top international field and to strengthen Austria as a location for RTI.

The investment consists in funding of (digital) research infrastructure projects for the Austrian universities. A call for expressions of interest will be set up to enable financing high quality and competitive infrastructure at the Austrian universities and giving them the possibility to participate in large international research infrastructures.

The implementation of the investment is expected to start by 31 December 2022, and shall be completed by 31 August 2026.

# **I.2.** Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

## J. SUBCOMPONENT 3.B RE-SKILLING AND UP-SKILLING

This subcomponent of the Austrian recovery and resilience plan aims to address the following challenges: integration of low skilled into the labour market, reskilling and upskilling, preparing for future challenges of the labour market.

The objectives of the subcomponent are to improve the skills and competence level, particularly of the low skilled and to increase their labour market opportunities, notably in a crisis situation and in a period where new qualifications are required. Investing in the human capital of the unemployed, particularly for those with low qualification levels, is expected to increase their long-term resilience by reducing the likelihood of future unemployment

The subcomponent contributes to addressing the country-specific recommendations related to improving the labour market results of the low skilled (Country Specific Recommendation 2 in 2019) and taking necessary measures to reduce the negative effects resulting from the COVID-19 pandemic (Country Specific Recommendation 1 in 2020).

It is expected that no measure in this subcomponent does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

# **J.1.** Description of the reforms and investments for non-repayable financial support

## Reform: 3.B.1 Education bonus

The objective of this reform is to improve the incentives and the material framework conditions for long-term unemployed to participate in organised training or qualification sessions. The reform is expected to reduce the risk of participants dropping-out from the sessions before they are finalised. The reform consists of a 'top up' to the unemployment benefit. The additional payment is based on a fixed daily rate and depends on the participation in a full training and qualification session with a duration of at least four months.

The implementation of the reform shall be completed by 31 December 2021.

#### Investment: 3.B.2 Promoting re-skilling and up-skilling

The objective of this investment is to improve the skills and competences of unemployed, particularly the low skilled, to prepare them for the future challenges of the labour market and to make them less vulnerable for future spells of unemployment.

The investment consists of funding of reskilling and upskilling measures related to basic qualifications, electronics and digital technologies, nursing, social and caring professions, environment/sustainability, project oriented transitional work places as well as youth coaching. The funding shall also concentrate on offering flexible training methods and focuses on supporting women.

The implementation of the investment shall be completed by 31 December 2024.

J.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

Sequential	Related Measure	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target

87	3.B.1 Promoting re-and upskilling	Milestone	Ensuring the preconditions for re- and upskilling	The necessary budgetary provision was established in December 2020, under the 2021 budget and the Federal budgetary framework act (BFRG)	-	-	-	Q4	2020	The legal act enabling the re- and upskilling measures to be implemented was included in the budgetary framework act adopted in December 2020.
88	3.B.2 Promoting re-skilling and up- skilling	Milestone	First annual overview	The first annual overview statement based on quarterly implementation reports	-	-	-	Q1	2022	Annual implementation reports shall be issued by the Ministry based on quarterly implementation reports. They shall provide detailed information on the training and further education measures carried out.
89	3.B.2 Promoting re-skilling and up- skilling	Target	People benefitting from re- and upskilling.	-	Number	0	94 000	Q4	2024	At least 94 000 people shall have benefited from re- and up-skilling measures over the period of implementation as stated in the annual implementation report issued by the responsible Ministry.

### K. SUBCOMPONENT 3.C EDUCATION

The subcomponent of the Austrian recovery and resilience plan addresses the following challenges: targeted compensation of educational and learning deficits due to the COVID-19 crisis, quantitative and qualitative improvement of the elementary education offer.

The objective of the subcomponent is to improve equal access to education by strengthening early childhood education, particularly for under 3-years old, and through extra support for pupils to compensate for learning loss during the pandemic in the context of a reform that widens access to education.

The subcomponent contributes to addressing the country-specific recommendation focusing on raising the levels of basic skills for disadvantaged groups, including people with a migrant background (Country Specific Recommendation 2 in 2019), expanding childcare facilities (Country Specific Recommendation 2 in 2019) and ensuring equal opportunities in education (Country Specific Recommendation 2 in 2020).

It is expected that no measure in this subcomponent does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

## K.1. Description of the reforms and investments for non-repayable financial support

## Reform: 3.C.1 Improved access to education

The reform measure provides the framework for the two investment measures. It aims to improve the basic skills of disadvantaged groups in order to guarantee equal opportunities in education. It seeks to set the scene for the investments that are part of the same subcomponent to be successfully implemented and for the share of pupils completing lower secondary education to be increased. It describes the same conditions and actions as the investments, but with a longer timeframe. It will depend on investments beyond the Recovery and Resilience Facility for the part of the implementation that exceeds the investments of the subcomponent.

The implementation of the measure shall be completed by 31 December 2025.

## Investment: 3.C.2 Remedial education package

The objective of the investment is to compensate for the accumulated learning deficits and potential losses in education, during the prolonged periods of distance learning, during the COVID-19 Pandemic. The focus is particularly on disadvantaged pupils, so to avoid any increase in already existing inequalities in education outcomes.

The investment consists of an extensive package of additional learning hours and a bundle of individual support measures. These support measures may be designed individually and flexibly at the school location and should benefit all pupils. A particular focus is given to pupils in final year classes and pupils with need for additional support.

The implementation of the measure shall be completed by 31 March 2022.

Investment: 3.C.3 Expansion of elementary education

The objective of the investment is to expand the provision of childcare facilities, particularly for the under three year old and the opening hours for the three to six years old, to facility the reconciliation of work and family life. Additionally, with a focus improving early childhood education and care at the earliest possible age of learners, the quality of early childhood education and care facilities is expected to be improved.

The investment consists of funding to expand the provision of suitable early childhood education and care facilities for the under three year old, to meet the Barcelona target for children under the age of three (childcare rate  $33\%)^6$ . In addition, incentives will be created to extend the opening times of elementary educational institutions for three to six year olds. The quality of education and care for children until the start primary school shall be further developed, notably by improving the staff/child ratio.

The implementation of the measure shall be completed by 30 September 2023.

## K.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

<sup>&</sup>lt;sup>6</sup> In 2002, the Barcelona European Council defined the target that high quality and affordable childcare facilities should be available to at least 33% of children under the age of three.

96	3.C.3 Expansion of elementary education	Target	Increasing rates of early childhood education for children aged three to six compatible with full-time employment of parents	-	% (percentage)	46.8	52.8	Q4	2023	The offer of places in early childhood education institutions for children aged three to six years of age shall increase and be compatible with fulltime employment of parents. The increase shall be accompanied by yearly resource targets and performance reviews with the <i>Laender</i> . The data of the increased offer shall be available at Statistik Austria.

### L. SUBCOMPONENT 3.D STRATEGIC INNOVATION

This subcomponent of the Austrian recovery and resilience plan aims to address the following challenges: digital transformation, strategic value chains and autonomy in semiconductor production in Europe; energy transformation, building the hydrogen economy in Europe, decarbonisation of energy-intensive sectors.

The objective of the subcomponent is to (i) promote Europe's autonomy in semiconductor production and strengthen Austria's position in this area, and (ii) promote integrated projects along the hydrogen value chain, in order to accelerate energy transformation and decarbonisation of energy-intensive sectors.

The subcomponent contributes to addressing the country-specific recommendations to stimulate digitalisation of businesses and sustainability (Country Specific Recommendation 3 in 2019) and to focus investment of the green and digital transitions, in particular on innovation, sustainable transport, clean and efficient production and use of energy (Country Specific Recommendation 3 in 2020).

It is expected that no measure in this subcomponent does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

## L.1. Description of the reforms and investments for non-repayable financial support

## Investment: 3.D.1 IPCEI Microelectronics and Connectivity

The investment into the planned Important Project of Common European Interest (IPCEI) on Microelectronics and Connectivity, which is to be implemented as a multi-country project, aims, on the one hand, to strengthen areas within the sector of microelectronics in which Europe is already performing well (such as power electronics, sensors, process technologies) and, on the other hand, to target areas in which Europe is currently dependent on imports (such as the development of innovative network/microelectronics technologies based on smaller structures and the combination of functionalities and materials). A key objective is therefore to strengthen Europe's open strategic autonomy. In addition, planned IPCEI projects are expected to develop more energy-efficient solutions and thus contribute to the achievement of climate objectives.

The investment includes funding of the projects selected, following a call for expression of interest, in the areas of microelectronics and connectivity.

The implementation of the investment is expected to start by 31 December 2021 shall be completed by 31 August 2026.

## Investment: 3.D.2 IPCEI Hydrogen

The general objective of the planned investment is to help build a national and European hydrogen ecosystem to help contributing to the achievement of Austria's and the EU's climate objectives. Austria's ambition is to be firmly anchored in the renewable hydrogen value chain.

The planned investment aims to promote integrated projects along the hydrogen value chain, especially covering hydrogen production, storage and applications. Following a call for interest, the investment shall provide funding to selected

projects, focusing in particular on energy-intensive industrial and mobility sectors that are difficult to decarbonise as well as on R&D/FID of components.

The planned investment includes funding of the projects selected, following a call for expression of interest, especially in the areas of hydrogen production, storage and applications.

The implementation of the investment is expected to start by 30 September 2021 and shall be completed by 31 August 2026.

## **COMPONENT 4: JUST RECOVERY**

### M. SUBCOMPONENT 4.A HEALTH

This subcomponent of the Austrian recovery and resilience plan addresses the challenges faced by Austria's healthcare sector, in particularly the inefficient use of resources in secondary care.

The objective of the subcomponent is to foster resilience of the health sector whilst ensuring universal access, high quality of care and sustainable services.

The reform aims to improve sustainability and resilience in healthcare by strengthening public health and primary health care. These objectives are expected to be achieved through an increased provision of primary health care units, shifting the weight from hospital care (Reform 4.A.1 and Investment 4.A.2). Furthermore, the subcomponent also includes investments to step up digitalisation within the health sector (4.A.3) and to increase social fairness within it (4.A.4). Overall, the proposed modernisation of the Austrian health care sector is expected to provide low-threshold access to health care services and continuity of care, as well as to reduce the burden on hospital capacity in the long term.

This subcomponent also builds on previous actions being implemented in relation to stepping up primary health care units (supported by the Technical Support Instrument and European Investment Bank).

The subcomponent contributes to addressing previous country-specific recommendations on improving the sustainability of the healthcare system (Country Specific Recommendation 1 in 2019 and Country Specific Recommendation 1 in 2020), especially in view of a global pandemic.

It is expected that no measure in this subcomponent does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

## M.1. Description of the reforms and investments for non-repayable financial support

## Reform: 4.A.1 Enhancing primary health care

The Austrian platform for primary health care is intended to serve as an information and communication hub between health professionals, patient organisations, education, science, the public administration of the health care system and other health care stakeholders. It will also promote social innovation within primary health care in Austria.

The overall objectives of the measure is to promote the attractiveness of working conditions for general practitioners and other health and social professions in primary health care, particularly in rural areas. Besides improved health care provisions, the reform aims also at promoting a culture of interprofessional cooperation and mutual understanding of roles and competencies between health care and social professions in the field of primary health care.

The implementation of the measure shall be completed by 31 August 2026.

Investment: 4.A.2 Funding of primary health care projects

The objectives of the measure are to expand rapidly multi-professional primary health care units in Austria and to ensure low-threshold decentralised access to services for the population, especially in rural areas.

The investment consists of two major funding parts: firstly to invest in at least 60 new primary care units (*Primärversorgungseinrichtungen/PVE*) compared to January 2021 and secondly to finance different projects in existing primary health care settings with a focus on environmental and social sustainability, digital and spatial infrastructure and training opportunities. Targeted measures will be developed and implemented together with relevant stakeholders, such as the municipal association. When setting up new primary health care units (either in form of centres or networks), environmental aspects shall also be taken into account. A special focus shall be placed on establishing multi-professional primary health care networks in rural areas by closely involving the respective municipalities.

The implementation of the measure shall be completed by 31 August 2026.

## *Investment:* 4.A.3 *Development of the electronic mother child pass platform including the interfaces to the early aid networks*

The objective of this measure is to run a screening programme for the early detection of health risk factors, diseases and health problems during pregnancy and early childhood until the age of 62 month. This shall create better health opportunities for pregnant/breastfeeding women and their children, in particular for socially disadvantaged families.

The investment consists in the development of an electronic documentation and communication platform with simplified access to test results for health care practitioners and affected women (pregnant and breastfeeding). Accessibility shall be made easy in order to allow also socially disadvantaged families or less educated women with limited German-language skills to use the mother child passport as a key preventive tool.

The implementation of the measure shall be completed by 30 June 2026.

## Investment: 4.A.4 National roll-out of 'early aid' for socially disadvantaged pregnant women, their young children and families

The objectives of the measure is to support families in vulnerable situations during the period of pregnancy and beyond. It aims to promote health equality and social fairness.

The investment consists in preventive interventions throughout the phase of early childhood by improving and extending already existing support measures, setting up regional 'early aid' networks and establishing cooperation among all relevant institutions and services in the field of early childhood in the districts ('Bezirke'-Austrian subregional entity) not yet covered.

The implementation of the measure shall be completed by 30 September 2024.

## <u>M.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support</u>

#### N.SUBCOMPONENT 4.B RESILIENT MUNICIPALITIES

This subcomponent of the Austrian recovery and resilience plan addresses the following challenges: (i) reactivation of town centres, particularly in rural areas, (ii) investment supporting the green transition, (iii) the needs-based provision and expansion of professional care services.

The objectives of the subcomponent are to: (i) make town centres more attractive and reduce mobility constrains, through the resettlement of businesses; (ii) finance the thermal renovation of company and municipality buildings and provide additional incentives for local and district heating systems in town centres/districts that were previously fossil-fuelled; and (iii) improve the capacity to provide targeted services and the resilience of the long-term care system in Austria.

The subcomponent consists of two reform measures: (i) a new soil protection strategy and (ii) a reform to further develop the provision of care. It includes also two investments: (i) support for climate change in town centres and (ii) the pilot project on community nurses.

The subcomponent addresses the country-specific recommendations on enhancing sustainability (Country Specific Recommendation 3 in 2019) and to improve the provision and the sustainability of the long-term care system (Country Specific Recommendation 1 in 2019).

It is expected that no measure in this subcomponent does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

# **N.1.** Description of the reforms and investments for non-repayable financial support

### Reform: 4.B.1 Soil protection strategy

The objective of the development of a soil protection strategy is to set up a framework for consensus-finding and coordination processes with all relevant planning bodies (federal level, *Laender* and municipalities) to agree on a strategic guidance to curb land use. The final aim of the soil protection strategy is to gradually reduce the land use in Austria to net 2.5 hectare per day until 2030.

The first step of the reform is the development of, and the agreement on, the key elements of an Austrian soil protection strategy and a roadmap for its implementation. These shall be developed by all relevant institutional actors (federal level, *Laender*, municipalities) and shall be agreed upon in the framework of the Austrian Conference on Spatial Planning (*Oesterreichische Raumordnungskonferenz*). The main elements for the development of the implementation strategy shall be the definition of concrete milestones and the agreement on an indicator-based monitoring system. Besides the overall objective (reduction of land use to 2.5 hectare per day), additional quantifiable targets and milestones will be determined, based on negotiations between the Laender in the framework of the Austrian Conference on Spatial Planning. At the end of the implementation of the reform, the Austrian quantitative soil protection strategy, including the overall objective of reducing the land use in Austria to net 2.5 hectare per day until 2030 will be adopted.

The measure shall enter into force by 31 December 2022.

#### Reform: 4.B.2 Reform to further develop care provision

The objective of the reform is to address challenges in the long-term care sector. Due to the growing challenges in the area of long-term care, the federal government has set the goal of implementing a fundamental reform to further develop care provision. In coordination with the *Laender*, the focus is to be placed on people in need of care and their relatives and caregivers.

The reform consists of several preparatory steps for a long-term care reform starting in 2024, within the next period of the Intergovernmental Fiscal Relations Act. The report of the Task Force Care, comprised of experts from all levels of government and external stakeholders, has defined the objectives for the development of the existing care system. Based on this report, talks between the federal government, states, cities and municipalities shall lead to common approaches and reform projects, in the framework of the long-term care target based governance ('*Zielsteuerung Pflege*'), as part of the preparation for a reform of the provision of long-term care in the context of the negotiations of the fiscal framework. The key principles of the long-term care reform and the division of responsibilities among the federal level, the *Laender* and municipalities shall be reflected in the Intergovernmental Fiscal Relations Act for the next period (starting in 2024).

The implementation of the reform is expected to start by 30 September 2021 and shall be completed by 31 March 2024. The roll-out of changes in long-term care provision on the ground may take place after 2024.

#### Investment: 4.B.3 Investment in climate-friendly town centres

The objective of the investment is to raise the attractiveness of town centres, notably in rural areas, by supporting the often costly investment in necessary measures to make buildings fit for the green transition, thereby preventing the use of new land outside the town centres and making a positive contribution to reduction of mobility.

The investment consists of several elements, which shall help entrepreneurs establish their businesses in town centres and the renovation of public buildings in town centres. The areas of investment included are thermal renovation of commercial and communal buildings in town centres, and measures for greening facades. Additionally connection to high-efficiency district heating as well as recycling of brownfield land shall be funded.

The implementation of the investment shall be completed by 30 June 2026.

#### Investment: 4.B.4 Investment in the implementation of community nurses

The objective of the establishment of community nursing in Austria is to make a significant contribution to local, low-threshold and needs-based care; community nurses are central contact persons who coordinate various services (such as therapies and social services) and play a central role in the field of prevention.

The investment consists in the establishment of a network of community nurses close to their patients. Community nurses are qualified nurses with at least two years of professional experience. Community nurses with a further relevant qualification (such as courses on community nursing, family health nursing, public health nursing) shall preferably be employed. In the course of the project, 150 community nurses shall be posted nationwide as part of the pilot project within the framework of fixed-term employment contracts.

The implementation of the investment shall be completed by 31 December 2024.

### **O. SUBCOMPONENT 4.C ARTS AND CULTURE**

This subcomponent of the Austrian recovery and resilience plan addresses the following challenges: support of the green and digital transitions in arts and culture.

The objectives of the subcomponent are to set incentives for an ecologically more sustainable cultural sector and to accelerate the digital structural change of the sector, with a special focus on the digitalisation of cultural heritage.

The subcomponent addresses country specific recommendations related to ecological sustainability of the economy (Country Specific Recommendation 3 in 2019) and investment in the digital transition (Country Specific Recommendation 3 in 2020).

It is expected that no measure in this subcomponent does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

## O.1. Description of the reforms and investments for non-repayable financial support

### Reform: 4.C.1 Development of a building culture programme

The objective of the reform is to establish a framework for '*Baukultur*' which combines high quality architecture and built environment taking into account social, ecological, economic and cultural components. The aim is to raise awareness for building culture and to integrate aspects of the green transition in this area.

The reform consists mainly of the 'Fourth Austrian Building Culture Report', which is intended to set the basis for a reform of building culture in Austria for the coming years and outline concrete measures for a building culture programme. The reform shall create better legal, financial and structural framework conditions for highquality building. The ability to connect to European requirements plays an essential role.

The implementation reform is expected to be completed by 30 September 2021.

### <u>Reform: 4.C.2 Develop a national digitalisation strategy for cultural heritage</u>

The objective of the reform is to expand digitalisation in arts and culture and to promote the digital transformation of the art and culture sector. It aims at better visibility of cultural objects and networking between cultural institutions.

The reform consists of the development and adoption of a national strategy for the digitalisation of cultural heritage. This strategy shall aim at promoting the further digital transformation of the art and culture sector in Austria. It shall advance the digitalisation of cultural heritage, such as the collections and inventory of cultural institutions. The strategy process shall include a public kick-off event, workshops, and web-based support in the *Laender*. The result of the process shall be the decision and the publication of a strategy document. The strategy is also the framework for the investments in digitalisation included in this subcomponent.

The implementation of the reform is expected to be completed by 31 March 2023.

#### Investment: 4.C.3 Renovation of Volkskundemuseum Wien and Prater Ateliers

The objective of the investment is to demonstrate, with selected renovation projects, how they may become models of combining a living building culture with the aim of environmentally conscious monument protection. Furthermore, the implementation of the 'Federal Building Culture Guidelines' should be visibly displayed.

The investment consists of the renovation of two historic buildings, where holistic quality criteria as well as up-to-date participation and planning procedures are used, taking into consideration the 'Federal Building Culture Guidelines'. The renovation measures shall contribute to a significant increase of energy efficiency of both buildings.

The implementation of the investment is expected to be completed by 30 June 2026.

### Investment: 4.C.4 Digitalisation wave cultural heritage

The objective of the investment is to launch a large digitalisation wave in cultural institutions. The archives of the different art and culture divisions should be increasingly translated into a digital format and hence become accessible to a wider public. The awareness of the need for enhanced digital activity of Austrian museums, the Austrian institutes of cultural heritage and cultural institutions has increased during the COVID-19 pandemic.

The investment consists of an update of the existing platform '*Kulturpool*' to '*Kulturpool NEU*' and hence a state of the art central digital platform. It should also include innovative tools to connect with people who have not been in touch with cultural heritage so far, e.g. younger people. To make this work, the cultural institutions have to deliver the appropriate data. The cultural institute shall decide autonomously which objects of their collection they would like to digitalise. The '*Kulturpool*' shall function as a central platform that merges the data form different institutions of cultural heritage, makes them digitally available and enables also a bundled transmission of this data.

The implementation of the investment is expected to 1 be completed by 30 June 2026.

### Investment 4.C.5 Investment fund for climate-friendly cultural businesses

The objective of the investment is to support cultural institutions, which have often little capacity for investments in a more ecological design of their operational structures. The measure shall increase the possibility for the realisation of such investments and also raise awareness of medium to long-term cost savings if such investments are realised.

The investment consists of funding for the following areas: renewable energy sources (such as photovoltaics, heat pumps or biomass); energy saving measures (such as heating optimisation or lighting optimisation); circular economy (such as reduction of raw material consumption); adaptation measures to climate change (such as green facades for cooling).

The implementation of the measure is expected to be completed by 30 September 2025.

## **O.2.** Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

The funds shall be paid out on a project-by-project basis depending on the project size and schedule.

#### P. SUBCOMPONENT 4.D RESILIENCE THROUGH REFORMS

The present subcomponent subsumes central reforms that will increase Austria's resilience in the coming years. The reform measures complement reform and investment measures included in the different subcomponents and include also additional reforms to address structural challenges and provide framework conditions for certain areas.

The contribution to challenges of country-specific recommendations and the objectives of the reforms are included below for each reform measure.

It is expected that no measure in this subcomponent does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

## **P.1.** Description of the reforms and investments for non-repayable financial support

### Reform: 4.D.1 Spending review focusing on green and digital transformation

The objective of the reform is to carry out spending reviews for public spending related to the green and digital transitions. Spending reviews, as topic-related budget analysis points, supplement the regular budget planning process and may make an important contribution to improving the impact orientation of the federal budget. They shall help to assess for the analysed policy areas whether the intended objectives are being achieved and/or to what extent these goals are achieved in effective and efficient way.

The reform consists of several implementation steps. For the focus on green transition, spending reviews are planned to be carried out in modules that build on one another. The spending review concerning the digital transition is planned after the measures of the digitalisation fund have been rolled out (see 2.C.2 Digitalisation fund public administration).

The reform contributes to addressing the Country Specific Recommendation related to simplifying and rationalising fiscal relations and responsibilities across layers of government and aligning financing and spending responsibilities (Country Specific Recommendation CSR 1 in 2019).

The implementation of the reform is expected to start by 30 June 2022 and shall be completed by 31 December 2025.

#### Reform: 4.D.2 Increase in effective retirement age

The objective of the reform is to increase the effective retirement age by reducing incentives for early retirement, thus helping to limit the growth of public pension expenditure, albeit to a limited extent. The replacement of the 'early retirement pension' (*abschlagsfreie vorzeitige Alterspension*) by the so-called 'early starter bonus' (*FrühstarterInnenbonus*), in the context of the Social Insurance Amendment Act 2020 increases the effective retirement age, while also reducing the pension gap and contributing towards reducing old-age poverty. The law was passed in November 2020 and will enter into force as of January 2022.

The 'early retirement pension without deductions' (*abschlagsfreie vorzeitige Alterspension*) provided for the possibility to retire without any deductions before the

statutory retirement age (men 65 years, women 60 years) when completing 45 contribution years. Only few people, mostly with well above-average pensions, benefited from this rule. On the contrary, with the new 'early starter bonus' *(FruehstarterInnenbonus)* people shall receive one euro on top of their pension for every month they worked between the age of 15 and 20. For the five years until the age of 20, the bonus amounts to a maximum of 60 euros per month (840 euros per year) on top of the determined pension amount. The prerequisite for receiving the early starter bonus shall be the completion of at least 25 years of insurance. As a result, the bonus shall also provide an incentives to return to work after a period of childcare.

In addition to the 'early retirement pension', the full pension increase in the calendar year after retirement shall be abolished and replaced by a monthly aliquoting as of 2022. According to the new rule, only pensioners who retired in January of the previous year may benefit from the full increase immediately. Thereafter, the adjustment shall be reduced in a way that those who retired in February receive 90% of the increase, those who retire in March receive 80% and so on. Those who retire in November or December shall have to wait until the year after next to receive their first pension increase.

The reform contributes to addressing the country-specific recommendation related to addressing the sustainability of the pension system (Country Specific Recommendation 1 in 2019).

The implementation of the reform shall be completed by 31 March 2022.

### Reform: 4.D.3 Pension splitting

The objective of the reform is to mitigate the effect of interrupted employment histories, e.g. due to childcare responsibilities, on old-age pension rates. In Austria, it is mainly women who interrupt their employment to bring up children, which leads to long-term financial challenges in retirement due to the lack of contribution periods. As a result, the gender pension gap is comparatively large and old-age poverty affects mainly women. The new provision shall enable the parent who is not primarily devoted to childcare to transfer pension entitlements resulting from employment to the other parent (excluding periods for which credits for raising children have been received).

The reform consists of two parts. The first shall be the introduction of automatic pension splitting for couples with children. The contribution bases of both parents shall be added together and credited to the respective pension account at 50% each. The second is that voluntary pension splitting shall also be possible for every form of partnership and regardless of parenthood.

The reform contributes to addressing the country-specific recommendation related to addressing the sustainability of the pension system (Country Specific Recommendation 1 in 2019).

The implementation of the reform shall be completed by 31 December 2022.

### Reform: 4.D.4 Climate action governance framework

The objective of the reform is to establish a sound legal framework for the implementation of the climate targets, which clearly defines the reduction path, establishes sectoral goals and responsibilities and provides control measures.

The reform is part of a wider Paris-compatible national greenhouse gas budget, which shall be anchored in the new Climate Protection Act (KSG). The issue of lacking cross-level governance shall be particularly addressed by the following measures, also reflected in the milestones: the establishment of a Citizens' climate council (*Klimarat*), set up for discussion and elaboration of proposals for climate protection measures necessary to achieve the Austrian climate goals. The introduction of a focal point for green budgeting in the Austrian Ministry of Finance responsible for the implementation of green budgeting standards in the Austrian budget process, and an obligatory climate check for all new and existing laws.

The reform contributes to addressing the country-specific recommendation related to achieving the climate targets and Austria's transformation to a climate neutral economy (Country Specific Recommendation 3 in 2020).

The implementation of the reform is expected to start by 31 December 2021 and shall be completed by 30 June 2022.

#### Reform: 4.D.5 Eco-social tax reform

The overarching objective of the eco-social tax reform is to combat climate change and to contribute to the achievement of European and national climate targets. Following the recent implementation of a first stage of the tax reform, additional incentives for climate-friendly consumer behaviour are necessary in order for Austria to achieve its 2030 climate targets. The forthcoming second stage of the eco-social tax reform is expected to be an important complement to investment incentives for climate-friendly technologies (included notably in Component 1 Green recovery of the Austrian Recovery and Resilience Plan) and support to expand the circular economy by providing preferential tax treatment of low- or zero-emission technologies and products. The tax reform is expected to be revenue-neutral by providing tax relief to companies and private households through compensatory measures that have additional positive social and economic effects, such as reduced labour taxes or targeted consumption-based bonuses.

The measure shall introduce a pricing for  $CO_2$  emissions, such as through  $CO_2$  pricing via existing taxes within the framework of tax legislation or a national emissions trading system with prices set at the beginning. These measures are coordinated with instruments at the European level, so that double pricing is excluded. The amount of the pricing is based on the one hand on the goal of true cost agreed in the government programme and on the other hand on the emission reductions necessary to achieve the climate targets. The reform shall be designed to contribute to annual greenhouse gas emission savings of 2.6 million tonnes of  $CO_2$  equivalent by 2030 compared with 2019.

The reform contributes to addressing the country -specific Recommendation related to making the tax mix more efficient and more supportive to inclusive and sustainable growth (Country Specific Recommendation 4 in 2020).

The implementation of the reform is expected to start by 30 June 2021 and shall be completed by 31 March 2022.

#### Reform: 4.D.6 Green Finance (Agenda)

The objective of the green finance agenda is to establish a political and monitoring framework that mobilises private capital for the necessary investments to achieve the climate and energy targets of 2030.

The actions of the green finance agenda focus on the following three aspects, under the premise of actively combating greenwashing: (i) mobilisation of capital for climate protection and sustainable investment, (ii) anchoring and managing climaterelevant risks in the due diligence obligations, and (iii) development of uniform strategies and methods as well as guidance.

Specific actions included in the Green Finance Agenda are: promoting the agreement on a 'Green Supporting Factor' at EU level and, based on the EU agreement, national implementation of the 'Green Supporting Factor' to facilitate granting of 'green loans'; development of strategies and methods for a better risk management in the context of green finance, e.g. the systematic measurement and reduction of the exposure to climate and environmental risk; and further development of appropriate methods and the related guidance.

The reform contributes to addressing the Country Specific Recommendation related to need of sizeable private investment needed to for Austria's transformation to a climate neutral economy (Country Specific Recommendation 3 in 2020).

The implementation of the reform shall be completed by 31 December 2022.

### Reform: 4.D.7 National Financial Education Strategy

The objective is to establish a national financial education strategy, which does not exist so far. It shall set common goals and a long-term vison that leads to an increase in financial education in Austria and on which stakeholders from the financial education sector may base their own programmes and measures.

The reform shall include the set-up of a strategy concept and the establishment of a competence framework. Topics that should be particularly pursued by the financial education strategy are basic financial education in schools and for young people, increasing the capital market knowledge of the population and more awareness about the importance of future and old-age provision. Women were identified as one of the specific target groups.

The reform contributes to addressing the country-specific recommendation related to enhancing education results in Austria (Country Specific Recommendation 2 in 2020).

The implementation of the reform is expected to start by 30 September 2021 and shall be completed by 31 December 2022.

#### Reform: 4.D.8 Start-up package

The objective is to provide sustainable support to growth-oriented start-ups and to increase the attractiveness of the business location internationally.

The reform consists in the implementation of a new legal form (working title 'Austrian Limited'). This new legal form shall be tailored to the needs of start-ups and innovative SMEs and the area of social entrepreneurship. To strengthen growth financing, further tax incentives shall be examined (possibility of offsetting losses and tax deductibility of growth financing). In addition, the reform has to be seen together with other simplification measures, such as the 'Once Only' principle and the implementation of a grace period (see below).

The reform contributes to addressing the Country Specific Recommendation related to stimulating company growth and reducing regulatory barriers in the service sector (Country Specific Recommendation 3 in 2019).

The implementation of the reform shall be completed by 31 March 2022.

### Reform: 4.D.9 Strengthening equity capital

The objective of the measure is to strengthen the equity position of Austrian companies by facilitating the mobilisation of private capital in companies in form of equity. For that purpose the first aim is to evaluate the equity position of Austrian companies. In particular it shall be clarified in which sectors the equity position is particularly low and also the role of company size shall be identified.

The reform measure consists of converting government-guaranteed loans, which were used to bridge liquidity bottlenecks during the COVID-19 crisis, into equity or equity-like instruments. In addition, a company form for investments in company holdings in the form of the SICAV (*société d'investissement à capital variable*), a collective investment scheme, which is already well established in other European countries, shall be anchored in Austrian company law. It is intended to make fund shares securitisable and tradable. The design shall take into account high transparency standards, investor protection, money laundering prevention and the exclusion of tax structuring models.

The reform contributes to addressing the country-specific recommendation related to stimulating company growth and reducing regulatory barriers in the service sector (Country Specific Recommendation 3 in 2019).

The implementation of the reform is expected to start by 30 June 2021 and shall be completed by 31 March 2022.

### Reform: 4.D.10 Labour market: one-stop shop

The objective of the measure is to provide targeted support for bringing long-term unemployed facing multiple barriers back to the labour market. The coordinated support is expected to help to address those multiple barriers and facilitate access to qualification and training. The need for this targeted support has also been increasing during the COVID-19 pandemic.

The measure consist in the establishment of one-stop shops for the long time unemployed facing multiple barriers to placement and inclusion in the labour market. The design and set-up of the one-stop shops shall be done in close cooperation with social partners and the *Länder*. This one-stop shop should coordinate and facilitate the access to the appropriate services of different support institutions.

The reform contributes to addressing the country-specific recommendation related to boosting labour market outcomes for the low-skilled in close cooperation with social partners (Country Specific Recommendation 2 in 2019).

The implementation of the reform shall be completed by 31 March 2022.

### Reform: 4.D.11 Liberalisation of business regulations

The objective of three targeted measures is to contribute to the liberalisation of the framework conditions for trade and the promotion of the provision of business-oriented services that also make a contribution to the green and digital transitions.

The reform package consists of three measures: The removal of barriers to business transfers (Grace Period Act) contains several activities that shall facilitate the transfer of businesses to new owners (such as to the next generation in a family business). The amendment to the Occasional Traffic Act aligns the conditions for taxis and other ride rental businesses, thus enabling the operation of innovative ride-hailing

services. The last reform measure in this package facilitates the authorisation process for recharging points for electric motor vehicles and for photovoltaic systems as part of commercial installations.

The reforms contribute to addressing the country-specific Recommendations related to reducing regulatory barriers in the service sector (Country Specific Recommendation 3 in 2019) and reducing administrative and regulatory burden (Country Specific Recommendation 3 in 2020).

The removal of barriers to business transfers (Grace Period Act) shall enter into force by 31 March 2022. The Occasional Traffic Act was to have entered into force in by 31 March 2021. The exemption from authorisation for installation of e-vehicle charging points and photovoltaic systems was to have entered into force by 31 March 2021.

**P.2.** Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

Sequential	(Reform or	Milestone /	Name	Qualitative indicators		ve in s)	dicators	Indicative timeline completio	for	Description of each

This report shall focus on evaluating the effects of the digitalisation fund.
152	4.D.2 Increase in effective retirement age	Milestone	Establishment of the legal basis for the abolishment of the early retirement pension without deduction, as well as for the	Publication of the Social Insurance Amendment Act 2020 in Austria's legal information system	-	-	-	Q4	2020	The replacement of the 'early retirement pension' by the so-called 'early starter bonus', and the aliquoting of the pension increase, were adopted in November 2020 in the context of the Social Insurance Amendment Act

			introduction of the early starter bonus and the postponement of the first pension increase ( <i>Aliquotierung</i> )							2020 and will enter into force as from January 2022.
153	4.D.2 Increase in effective retirement age	Milestone	Effective implementation of the early starter bonus (replacing early retirement pensions without deduction) and of the postponement of the first pension increase ( <i>Aliquotierung</i> )	Provisions in the Social Insurance Amendment Act 2020 for the start of implementatio n	-	-	-	Q1	2022	The early starter bonus and <i>Aliquotierung</i> become effective and the early retirement is no longer available.
154	4.D.3 Pension splitting	Milestone	Legislative proposal	Preparation of a legislative proposal to introduce pension splitting	-	-	-	Q2	2022	Key elements of the reform shall be published for consultation of relevant stakeholders.
155	4.D.3 Pension splitting	Milestone	Entry into force of the law introducing automatic	Provision in the law indicating the entry into	-	-	-	Q4	2022	The law introducing automatic pension splitting for couples with children and voluntary pension

			pension splitting	force of the law introducing automatic pension splitting						splitting for every form of partnership shall enter into force
156	4.D.4 Climate action governance framework	Milestone	Citizens' Climate Council <i>(Klimarat)</i> and focal point on green budgeting	Public reporting on the establishment of a Citizens' Climate Council and of a focal point on green budgeting.	-	-	-	Q4	2021	A Citizens' Climate Council <i>(Klimarat)</i> is established as evidenced by public reporting on at least its inaugural meeting. A focal point on green budgeting to coordinate the implementation of green budgeting standards in Austria shall be established in the Ministry of Finance and publicly announced.
157	4.D.4 Climate action governance framework	Milestone	Entry into force of a law introducing a mandatory climate check for new legislative proposals	Provision in the law indicating the entry into force of a law introducing a mandatory climate check for new legislative proposals	-	-	-	Q2	2022	The climate check shall become binding for all legislative proposals. The legal implementation is expected to be carried out through a new climate protection law. The mandatory climate check shall be implemented through a new binding impact dimension within the regulatory impact assessment.

										Ministries have been informed accordingly.
158	4.D.5 Eco- social tax reform	Milestone	Launch of the second stage of the work of the task force	The task force on eco social tax reform is starting work on the second stage of eco- social tax reform	-	-	-	Q2	2021	The task force shall start its work on the second stage of the eco-social tax reform.
159	4.D.5 Eco- social tax reform	Milestone	Entry into force of the eco-social tax reform	Provision in the law indicating the entry into force of the eco-social tax reform.	-	-	-	Q1	2022	Entry into force of the eco- social tax reform, including a price for $CO_2$ emissions, which will reduce annual $CO_2$ emissions by at least 2.6 million tonnes by 2030 (compared to 2019).
160	4.D.6 Green Finance (Agenda)	Milestone	Green Finance Agenda	Publication of the Green Finance Agenda	-	-	-	Q1	2022	The Green finance agenda shall be published. It shall include concrete reference to the planned actions, such as: facilitating the granting of 'green loans' and development of strategies and methods for a better risk management in the context of green finance (such as the systematic measurement and reduction of the

										exposure to climate and environmental risk).
161	4.D.6 Green Finance (Agenda)	Milestone	Use of quantitative and qualitative indicators to measure the achievement of implementation	Publication of indicator- based report on the implementatio n of the Green Finance Agenda	-	-	-	Q4	2022	The report shall present a methodology based on quantitative and qualitative indicators to guide the measurement of the success of green finance actions.
162	4.D.7 National Financial Education Strategy	Milestone	Strategy document	Publication of the strategy document including action plan	-	-	-	Q3	2021	The strategic document shall be completed. It shall set common goals and long-term visions that lead to an increase in financial education in Austria and on which stakeholders in the field of financial education may base their own programmes and measures. A framework for cooperation and coordination between public and non-public financial education actors is also expected to be included. The document shall include an action plan to operationalise the strategy.

163	4.D.7 National Financial Education Strategy	Milestone	Finalisation of the Competence Framework for financial education	The Competence Framework for financial education is transmitted to the European Commission	-	-	-	Q4	2022	The competency framework shall focus on increased basic financial education in schools and for young people, increasing the population's capital market knowledge and raising awareness about the importance of future and old-age provision. Synergies are also expected with the Green Finance Agenda (such as 'Green Financial Literacy').
164	4.D.8 Start-up package	Milestone	Entry into force of the start-up package	Provision in the law indicating the entry into force of the start-up package	-	-	-	Q1	2022	Entry into force of a law introducing a new corporate form (working title: 'Austrian Limited'), which shall facilitate the early stages of start-ups. It shall particularly take the needs of start-ups and innovative SMEs into account. It shall include flexible allocation of shares to investors and employees.
165	4.D.9 Strengthening equity capital	Milestone	Decree on the conversion of state guaranteed	Publication of the decree	-	-	-	Q3	2021	The decree opening up the possibility to convert state guaranteed loans into

			loans into equity							equity shall be in force
166	4.D.9 Strengthening equity capital	Milestone	Entry into force of the company form for investments in shareholding (SICAV)	Provision in the law indicating the entry into force of the company form for investments in shareholdings (SICAV)	-	-	-	Q1	2022	An amendment of the Austrian company law shall enter into force to introduce the legal form of SICAV in order to facilitate equity investments in companies
167	4.D.10 Labour market: one- stop shop	Milestone	Conceptual development	The one-stop shop concept has been developed and transmitted to the European Commission	-	-	-	Q3	2021	The internal concept, to be developed with the involvement of the <i>Laender</i> and Social partners, for the establishment of the one- stop shop shall be available. It shall operationalise the introduction of the one- stop shop.
168	4.D.10 Labour market: one- stop shop	Milestone	Start of operations	The one-stop shop is operational	-	-	-	Q1	2022	The one-stop shop shall be operational and have started to offer services to the unemployed
169	4.D.11 Liberalisation of business regulations	Milestone	Entry into force of the occasional transport act	Provision in the law indicating the entry into	-	-	-	Q1	2021	The Occasional Transport Act, which shall abolish a binding tariff for occasional transport

				force of the occasional transport act.						(taximeter obligation) shall enter into force.
170	4.D.11 Liberalisation of business regulations	Milestone	Exemption of recharging points for electric motor vehicles and photovoltaic systems in commercial installations from authorisation requirements.	Publication of the decree exempting recharging points for electric motor vehicles and photovoltaic systems in commercial installations from authorisation	-	-	-	Q1	2021	The decree making recharging points for electric motor vehicles and photovoltaic systems in commercial installations in principle exempt from authorisation shall enter into force.
171	4.D.11 Liberalisation of business regulations	Milestone	Entry into force of the Grace Period Act	Provision in the law indicating the entry into force of the Grace Period Act	-	-	-	Q1	2022	The law on the removal of barriers to business transfers (Grace Period Act) shall enter into force.

## **SECTION 2: FINANCIAL SUPPORT**

## 1. Estimated total cost of the recovery and resilience plan

The estimated total cost of the recovery and resilience plan of Austria is EUR 4 449 475 001.

#### 2. Financial contribution

The instalments referred to in Article 2(2) shall be organised in the following manner:

## First Instalment (non-repayable support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
21	1.B.5 Construction of new railways and electrification of regional railways	М	Ongoing construction project
84	3.B.1 Education bonus	М	Entry into force of the Unemployment Insurance Act and the publication of the Funding Guidelines on the Ministries' website
87	3.B.1 Promoting re-and upskilling	М	Ensuring the preconditions for re- and upskilling
152	4.D.2 Increase in effective retirement age	М	Establishment of the legal basis for the abolishment of the early retirement pension without deduction, as well as for the introduction of the early starter bonus and the postponement of the first pension increase ( <i>Aliquotierung</i> )
17	1.B.4 Zero-emission utility vehicles	М	Launch of the support programme
49	2.B.1 Fair and equal access of pupils to basic digital competence	М	Entry into force of the School Digitalisation Act

142	4.C.4 Digitalisation wave cultural heritage	Т	Cultural and art objects digitalisation programme
48	2.A.2 Widespread availability of Gigabit capable access networks and creation of new symmetric Gigabit connections	Т	Provision of broadband access to 50 % of households
83	3.A.4 (Digital) Research Infrastructures	М	Final report with 100 % of investments complete
100	3.D.1 IPCEI Microelectronics and connectivity	Т	EUR 125 000 000 allocated and at least 80% of the aid disbursed for approved projects
103	3.D.2 IPCEI Hydrogen	Т	EUR 125 000 000 allocated and at least 80% of the aid disbursed for approved projects
Instalment A	Amount	EUR 243 008 020	

#### **SECTION 3: ADDITIONAL ARRANGEMENTS**

## 1. Arrangements for monitoring and implementation of the recovery and resilience plan

The monitoring and implementation of the recovery and resilience plan of Austria shall take place in accordance with the following arrangements:

- The Ministry of Finance shall ensure the overall coordination of the implementation and the monitoring and control system. The division of tasks and the relationships between the monitoring and the audit and control systems are described in a comprehensive way in the plan. While the implementation and the monitoring and control tasks for the measures are delegated to the individual Ministries, it is evident that the Ministry of Finance shall take full responsibility to ensure that all the requirements related to the implementation and the monitoring and control system are fulfilled.
- The coordinating function of the Ministry of Finance is based on established national mechanisms and regulations. The relevant national legal provisions and national mechanism for monitoring and control shall be applied, including the corresponding reporting obligations. The disbursement of funding for measures included in the plan to the final recipients shall be carried out in compliance with the legal basis for the general funding guidelines (*Förderrichtlinien*), where applicable.<sup>7</sup>

## 2. Arrangements for providing full access by the Commission to the underlying data

The Ministry of Finance shall be responsible for the overall coordination and monitoring of the plan and its implementation. It may rely on implementing Ministries to verify the correct implementation of the measures in their areas of responsibility. The implementing Ministries have dedicated departments for the internal control. The Ministry of Finance shall act as a central coordinating body for monitoring progress on milestones and targets, for monitoring and, where appropriate, implementing control and audit activities, and for providing reporting and requests for payments. It shall coordinate the reporting of milestones and targets, relevant indicators and qualitative financial information and other data, such as on final recipients. The different Ministries, or where relevant their subordinate implementing bodies, shall encode relevant data and report the required data to the Ministry of Finance.

In order to provide full access to the Commission to the underlying relevant data, Austria shall have in place the following arrangements:

In accordance with Article 24(2) of Regulation (EU) 2021/241, upon completion of the relevant agreed milestones and targets in Section 2.1 of this Annex, Austria shall submit to the Commission a duly justified request for payment of the financial contribution. Austria shall ensure that, upon request, the Commission has full access to the underlying relevant data that supports the due justification of the request for

<sup>&</sup>lt;sup>7</sup> In accordance with respective national guidelines for funding and on the basis of individual funding decisions (administrative acts) in favour of the final recipients.

payment, both for the assessment of the request for payment in accordance with Article 24(3) of Regulation (EU) 2021/241 and for audit and control purposes.
