of income tax information (CBCR)
Analysis of the final compromise text with a view to agreement

The Committee endorsed the text of the final compromise and will inform the European Parliament.

Statement by Cyprus, Czech Republic, Ireland, Luxembourg, Malta and Sweden

"Notwithstanding the general support expressed by all for tax transparency and the constructive discussions facilitated by the Presidency, Cyprus, Czech Republic, Ireland, Luxembourg, Malta and Sweden have ongoing concerns regarding the legal basis of this Proposed Directive, and consider that the proposal for a Directive amending Directive 2013/34/EU as regards disclosure of income tax information must be based on Article 115 TFEU since both the aim and the content of the proposal relate to "fiscal provisions", rejecting thereby the appropriateness of the legal basis of the initial proposal, i.e. Article 50(1) TFEU."

Fisheries

7. Bilateral EU-UK consultations on fishing opportunities for 2021 and, for deep-sea stocks, for 2021 and 2022

Joint statement by the Council of the European Union and the European Commission on the implementation of the Connecting Europe Facility 2021-2027

"In accordance with the European Council Conclusions of 21 July 2020, the Council and the Commission recall that, in the implementation of the Connecting Europe Facility 2021-2027, from the amount specified in Article 4(2), point (a)(i), of the CEF Regulation, an amount of EUR 1 384 000 000 (in 2018 prices) will be used for the completion of missing major cross-border railway links between Member States eligible for funding from the Cohesion Fund."

Statement by Poland

"Equality between women and men is enshrined in the treaties of the European Union as a fundamental right. Poland ensures equality between women and men within the framework of the Polish national legal system in accordance with international human rights treaties and within the framework of the fundamental values and principles of the European Union. PECHE

Joint Statement by the Council and the Commission

"The Council and the Commission remain committed to trying to avoid an interruption of fishing activities under Sustainable Fisheries Partnership Agreements by striving towards the timely renewal of Sustainable Fisheries Partnership Agreements and their implementing Protocols."

Joint Statement by the European Parliament, the Council and the Commission

"The European Parliament, the Council and the European Commission recognise the need to urgently advance action on the protection and conservation of marine and coastal ecosystems and biodiversity. The three institutions agree that tackling biodiversity loss, protecting and restoring ecosystems and/or maintaining them in good condition will require significant public and private investment at national and European level and that a significant proportion of the EMFAF expenditures should be invested in biodiversity. The three institutions agree that the European Commission will work with Member States, in the context of the programming exercise for the EMFAF 2021-2027, to reach the overall ambition of biodiversity spending highlighted in recital 15."

Statement by Lithuania

"Lithuania supports the general aim of the European Maritime, Fisheries and Aquaculture Fund for 2021-2027 to provide support for the achievement of sustainable fisheries and aquaculture, the development of local coastal communities, the promotion of a sustainable blue economy, the implementation of the European Union's maritime policy towards safe and sustainably managed seas and oceans, and for international ocean governance.

Lithuania considers European Maritime, Fisheries and Aquaculture Fund for 2021-2027 as the main tool for successful implementation of the goals of the EU Common Fisheries Policy.

In this regard, Lithuania regrets that certain provisions of the regulation do not reflect properly the continuous critical situation of the Baltic Sea Fisheries, fishing conditions and the needs of fleets concerned.

The political agreement reached between co-legislators on the 4th December 2020 has not addressed our concerns on the practical application of fleet support measures for vessels operating in the Baltic Sea and does not provide necessary tools to adjust the fishing capacity of our fleet to fishing opportunities and maintain the remaining Baltic fleet viable and active.

Therefore, Lithuania cannot endorse the adoption of the Council's position at first reading on the "Proposal for a Regulation of the European Parliament and of the Council on the European Maritime and Fisheries Fund and repealing Regulation (EU) No 508/2014 of the European Parliament and of the Council" and abstains in the voting."

Statement by Sweden

"The proposal provides for support for enhanced fishing capacity as well as a substantial increase in the proportion of the Fund's budget that can be used for measures linked to fishing capacity. The proposal does not contain sufficient conditions to prevent overcapacity, which can lead to overfishing. The proposal therefore runs contrary to the objectives of the EU's Common Fisheries Policy and the transition to sustainable fisheries as well as the EU's international commitments within the framework of Agenda 2030. Sweden therefore votes against the proposal."

Statement by the Commission

"The Commission has accepted the eligibility of investments on board related to fisheries control and enforcement, be they mandatory or not, and for all Union fishing vessels. The Commission considers that these investments will enable Member States to make full use of the financial resources available in the EMFAF for control and enforcement, to fulfil their obligations under the Control Regulation and other rules of the Common Fisheries Policy and to substantially improve the culture of compliance in the fishing sector. Moreover, the Commission expects that – in the context of the ongoing review of the Control Regulation – the European Parliament and the Council will support the modernisation of the existing control tools and the use of new technologies as proposed by the Commission. This means in particular introducing smart solutions for the tracking and catch reporting of small scale vessels, installing systems for the continuous monitoring of engine power, moving to fully digitised traceability systems covering all fishery products (fresh, frozen and processed), and introducing mandatory remote electronic monitoring systems on board fishing vessels and based on risk assessment, as the only effective means to control the application of the landing obligation and the bycatch and discard of sensitive species."

Statement by the Commission

"The Commission takes note of the difficulties encountered up to now to grant state aid for the renewal of the fleets in the outermost regions. With a view to the sustainable development of those regions, the Commission will endeavour to assist the Member States to improve the collection of scientific data necessary to comply with the eligibility condition set in the State aid guidelines with a view to facilitating the application of the guidelines for the examination of State aid to the fishery and aquaculture sector in the Outermost Regions."

Statement by the Commission

"The European Commission, in the context of the programming exercise for the EMFAF 2021-2027, will actively encourage Member States to maximise the use of measures included in their programmes, in particular under Article 25 (protection of biodiversity and ecosystems), to reach the overall ambition of providing an annual spending under the MFF to tackle biodiversity loss, protect and restore ecosystems and maintain ecosystems in good conditions as follows: 7,5% of annual spending under the MFF to biodiversity objectives in the year 2024 and 10% of annual spending under the MFF to biodiversity objectives in 2026 and 2027. The Commission will regularly monitor the level of this spending on the basis of the total eligible expenditure declared by the beneficiaries to the managing authority and on data submitted by the Member State. Where the monitoring shows insufficient progress towards reaching the overall ambition, the Commission will actively engage with Member States in the annual review meeting in order to adopt remedial measures, including a programme amendment."

Statement by Slovenia

"Taking into account the ongoing triologue negotiations on the matter at hand, there is a risk that the Council's decision-making process in the meaning of Article 4(3) of Regulation 1049/2001 might be seriously undermined by the disclosure of the documents in question. Moreover, we do not believe that the Council has properly and fully explained the reasons behind its change of opinion on this matter. Because of these reasons Slovenia is replying NO to the draft reply, and consequently to the disclosure of the requested documents."

Statement by Slovenia

"The Republic of Slovenia supports the adoption of the multi-annual financial framework as soon as possible and greatly appreciates the efforts and efficiency of previous Presidencies in dealing with these three very difficult dossiers (funds).

The Republic of Slovenia welcomes the inclusion of some of the proposed elements in the existing compromise proposal; however, it still does not adequately address the situation at the external Schengen borders that are not external EU borders, which is something we kept raising throughout the negotiations.

The negotiations laid bare all the difficulties and unwanted consequences the Republic of Slovenia may face because the specific status of this border has never been clearly or adequately defined in different legal instruments.

Over the past years, EU legislation has imposed a lot of additional obligations to be implemented at external borders, which in most cases include the external Schengen borders. It started with the introduction of mandatory systematic checks of all travellers and travel documents and has now moved on to the Entry-Exit system, EUROSUR, as well as the Integrated Border Management Fund and the "screening" regulation.

The Republic of Slovenia is aware of its obligations and intends to fully meet them. That said, it is not reasonable to expect that all the costs of the infrastructure upgrades will be fully borne by the Republic of Slovenia from the national budget.

We find it unacceptable that all this time we have been at a disadvantage compared to the countries at the 'permanent' Schengen border, and we therefore wish to find an appropriate solution.

We have been facing the same problem in the existing Multiannual Financial Framework (2014-2020), which contains the same limitations and which have proved to be very problematic in practice.

With this declaration, therefore, we wish to highlight in particular how important it is to pay due attention to the specific situation at the external Schengen borders that are not external EU borders.

Article 5/4a does not adequately address the specificity of those internal borders at which controls have not yet been lifted. The recital 24, with its current wording, is of little use, as it still does not justify investment in the construction of new/additional infrastructure at the border with the Republic of Croatia.

In practice, for the Republic of Slovenia this means that we cannot finance, for example, the enlargement of border crossing points or the construction of new infrastructure from the EU funds, we can only upgrade (replace or maintain) the existing infrastructure.

The Republic of Slovenia believes that all the problems and undesired consequences that we might face due to the specific situation at our external Schengen borders that are not external EU borders could be avoided if buildings, systems and activities were included in the recital 24 in addition to infrastructure."

Joint Statement by the Czech Republic and Slovakia

"The Czech Republic and Slovakia regret the outcome of the negotiations with the European Parliament on the proposed text of the Regulation establishing the Internal Security Fund. Bearing in mind the position of the Council, i.e. 50 % limit and exclusion of ICT equipment, we perceive the current compromise proposal of Article 12 (4) regarding the cap for purchase of equipment as unacceptable. Instead of proposed text of 35 % limit without exclusion of ICT equipment, The Czech Republic and Slovakia could accept either increase of the limit to 50 % OR keeping the percentage at 35 % while excluding the ICT equipment from this cap. Purchase of highly specialised equipment is essential for work of law enforcing authorities and thus for ensuring the security of the Union. The Czech Republic and Slovakia see no reason for limiting purchase of equipment, which would serve reaching the objectives of the Fund, i.e. above all fighting serious and organised crime as well as improving communication between Member States. Since purchase of standard equipment is prohibited by new recital 16a, the purchased equipment would be highly specialised and would improve the Member States' capabilities in respected areas thus fulfil the objectives of the Fund.

In view of the above the Czech Republic and Slovakia vote against the adoption of the proposal of the Regulation establishing the Internal Security Fund."

Statement by Poland

"Poland supports the approach that the discussion on the ISF, BMVI and AMIF Regulations should be accelerated so as to ensure the continuity of funding in these areas, therefore we agree to accept the compromise versions. At the same time, we maintain our concerns regarding Article 12 (4): *the limit of the allocation of a Member State programme for the purchase of equipment, means of transport, etc.* The provisions regarding Art. 12 (4) are, from the very beginning, one of the most important issues for Poland. We strongly supported the compromise version of the Council proposal (7.06.2019) to increase the limit on the allocation for the purchase of equipment, means of transport, etc. to 50%. In a spirit of compromise, we also agreed to reduce this level to 35%, but with the exclusion of information and communication technology (ICT) equipment. Such provisions would increase the equipment and infrastructure capacity of the Member States', which should definitely improve their internal security. This is particularly important for the Member States that are still improving their equipment, infrastructure, operational capacities of national services and institutions responsible for maintaining internal security, also in collaboration with other Member States. The UE funded projects should bring long-lasting effects, which will constitute an enhancement of a Member State's security also after a given project has been completed. As the previous experience shows, ISF's undertakings mainly concern the purchase of equipment, infrastructure (including IT infrastructure), because such activities guarantee a permanent increase in security level. The introduction of a limitation on such activities would indispose the Fund to respond to the key needs of services in this area. "Soft" activities, meetings, exchange of information are important, but without proper facilities and modern technology, they may not be effective enough. Especially, in the current time of the COVID-19 pandemic, the implementation of such activities is difficult or sometimes impossible. Successful actions in the area of EU security require substantial resources and capabilities from the Member States.

The current ISF proposal doesn't contain the exclusion of ICT from this limit which was already agreed in the Council position. It may cause that a significant proportion of the fund dedicated to the purchase of equipment will be spent on ICT equipment, which can be very expensive, and the purchase of other equipment will not be possible. It should be underlined that the purchase of ICT equipment is fully in line with the Fund's objectives and should not be limited in any way. Moreover, the new provision introduces a large administrative burden. This is an important issue for Poland, and the current ISF proposal may cause problems in the implementation of the Fund in the future."
