Areas	Main Issue	Requirements and standards		Main objective of the standard
Climate and environment	Climate change (mitigation of and adaptation to)	GAEC 1	Maintenance of permanent grassland based on a ratio of permanent grassland in relation to agricultural area at national, regional, sub-regional, group-of-holdings or holding level in comparison to the reference year 2018.  Maximum decrease of 5% compared to the reference year.	<i>General safeguard against conversion to other agricultural uses to preserve carbon stock</i>
		GAEC 2	Protection of wetland and peatland <sup>4</sup>	<i>Protection of carbon-rich soils</i>
		GAEC 3	Ban on burning arable stubble, except for plant health reasons	<i>Maintenance of soil organic matter</i>
	Water	SMR 1	Directive 2000/60/EC of 23 October 2000 of the European Parliament and of the Council establishing a framework for Community action in the field of water policy:  Article 11(3)(e) and Article 11(3)(h) as regards mandatory requirements to control diffuse sources of pollution by phosphates	
		SMR 2	Council Directive 91/676/EEC of 12 December 1991 concerning the protection of waters against pollution caused by nitrates from agricultural sources (OJ L 375, 31.12.1991, p. 1):  Articles 4 and 5	

<sup>4</sup> Member States may provide in their CAP strategic plans that this GAEC will only be applicable as from claim year 2024 or 2025. In such cases, Member States shall demonstrate that the delay is necessary for the establishment of the management system in accordance with a detailed planning. Member States, when establishing the standard for GAEC 2, shall ensure that on the land concerned an agricultural activity suitable for qualifying the land as agricultural area may be maintained.

Areas	Main Issue	Requirements and standards		Main objective of the standard
		GAEC 4	Establishment of buffer strips along water courses <sup>5</sup>	<i>Protection of river courses against pollution and run-off</i>
	Soil (protection and quality)	GAEC 6	Tillage management, reducing the risk of soil degradation and erosion, including consideration of the slope gradient.	<i>Minimum land management reflecting site specific conditions to limit erosion</i>
		GAEC 7	Minimum soil cover to avoid bare soil in periods that are most sensitive <sup>6</sup>	<i>Protection of soils in periods that are most sensitive</i>
		GAEC 8	Crop rotation in arable land, except for crops growing under water <sup>7</sup>	<i>Preserve the soil potential</i>

<sup>5</sup> The GAEC buffer strips along water courses shall, as a general rule and in compliance with Union law, respect a minimum width of 3 meters without using pesticides and fertilizers.

In areas with significant dewatering and irrigation ditches, Member States may adjust, if duly justified for those areas, the minimum width in accordance with specific local circumstances.

<sup>6</sup> In duly justified cases, Member States may adapt in the regions concerned the minimum standards to take into account the short vegetation period resulting from the length and severity of the winter period.

<sup>7</sup> Rotation shall consist in a change of crop at least once a year at land parcel level (except in case of multiannual crops, grasses and other herbaceous forage, and land lying fallow), including the appropriately managed secondary crops.

On the basis of diversity of farming methods and agro-climatic conditions Member States may authorise in the regions concerned other practices of enhanced crop rotation with leguminous crops or crop diversification, which aim at improving and preserving the soil potential in line with the objectives of this GAEC.

Member States may exempt from the obligation under this standard holdings:

- (a) where more than 75 % of the arable land is used for the production of grasses or other herbaceous forage, is land lying fallow, is used for cultivation of leguminous crops, or is subject to a combination of those uses;
- (b) where more than 75 % of the eligible agricultural area is permanent grassland, is used for the production of grasses or other herbaceous forage or for the cultivation of crops under water either for a significant part of the year or for a significant part of the crop cycle, or is subject to a combination of those uses; or
- (c) with a size of arable land up to 10 hectares.

Member States may introduce a maximum limit of area covered with a single crop to prevent large monocultures.

Farmers certified in accordance with Regulation (EU) n° 2018/848 shall be deemed to comply with this GAEC standard.
