- C Item based on a Commission proposal
-

Statements to the legislative "A" items set out in doc. 9475/1/21 REV 1

Ad "A" item 1: **Regulation on Certificates on vaccination, testing and recovery**
Adoption of the legislative act

Ad "A" item 2: **Regulation on Certificates on vaccination, testing and recovery (third
country nationals)**
Adoption of the legislative act

STATEMENT BY THE COMMISSION

“The Commission agrees that affordable and accessible COVID-19 vaccines and tests for SARS-CoV-2 infection are crucial in the fight against the COVID-19 pandemic. Taking into account that not the entire population will have been vaccinated when Regulations ... and ... of the European Parliament and of the Council enter into force, access to affordable and widely available testing possibilities is important to facilitate free movement and mobility in Europe.

To support Member States’ testing capacities, the Commission has already mobilised funds under the Emergency Support Instrument to purchase rapid antigen tests and has launched a joint procurement for over half a billion rapid antigen tests. The International Federation of Red Cross is also supporting Member States to increase testing capacity, using funding from the Emergency Support Instrument.

To further support the availability of affordable tests, in particular for persons who cross borders daily or frequently to go to work or school, visit close relatives, seek medical care, or to take care of loved ones, the Commission commits to mobilise additional funds of EUR 100 million under the Emergency Support Instrument for the purchase of tests for SARS-CoV-2 infection that qualify for the issuance of a test certificate pursuant to Regulation If necessary, additional funding above EUR 100 million could be mobilised, subject to approval by the budgetary authority.”

STATEMENT BY AUSTRIA

“As Austria has stated in the deliberations for the Council Position on the Digital Green Certificate (DGC – now EU Digital COVID Certificate), it is important that bilateral agreements on the mutual recognition of such certificates among Member States are possible also in case the Regulation on the DGC will not fully enter into force before the summer of 2021.

The use of a trust framework digital infrastructure (gateway), which is foreseen in the draft Regulation will be important as to avoid administrative burden due to the need for creating an interim trust framework digital infrastructure (gateway).

In addition, it is Austria’s understanding that there will be no additional costs for the Member States (except for those expenses required nationally for the implementation of the Regulation).”

STATEMENT BY BULGARIA

“Bulgaria has consistently supported that rapid antigen tests (RATs), which are considered appropriate and reliable for the test certificate (Art. 3 lit. b) of the final compromise text), should be also part of the "recovery certificate" (Art. 3 lit. c).

In order to avoid discrimination and in view of the fact that RATs are considered equivalent in the diagnosis of COVID-19, subject to certain criteria and according to the definition of ECDC, Bulgaria considers that among the first implementation steps of the Regulation should be the inclusion of RATs in the recovery certificate.”
