14230/21 ADD 6

FISC 202 ECOFIN 1125

## **REPORT**

From:	General Secretariat of the Council							
To:	Permanent Representatives Committee							
Subject:	Code of Conduct Group (Business Taxation)							
	- Report to the Council							
	= Approval							

Lithuania's Special economic zones and intra-group services (IP component) (LT005)

## I. Background

1. In respect of the LT005 measure which extended the SEZ regime to certain (intra-group) service activities (Sections M and N from NACE Rev2¹), the Group agreed not to assess it. The Group decided however to monitor the potential IP component (limited to computer related activities) in the SEZ regime².

- Accounting, bookkeeping and consultancy activities (except for audit, evidence of invoice expertise and veracity),
- Office administrative and support activities,
- Human resource activities,
- Architectural, engineering and related technical consultancy activities (except for construction work control and aerial photography).

1

<sup>&</sup>lt;sup>1</sup>Sections M and N from NACE Rev2:

<sup>&</sup>lt;sup>2</sup> At the meeting on 8 June 2017, the Group agreed that, based on the description, the regime as notified does not need to be assessed against the Criteria of the Code. Lithuania agreed to provide additional information on the possible IP component of the regime in order for the Commission to examine this aspect. At the meeting on 20 July the Commission, after receiving further additional information from Lithuania, was of the opinion that the regime did not create

2. The effects of the measure for the years 2017 and 2018 have already been looked into by the Code of Conduct Group at the end of 2019. At its meeting of 14 November 2019, the Group concluded that the measure had not affected the business location among Member States in a significant way. In particular, in respect of the potential IP component, none of the companies' activities indicated in the submitted data could be attributed to computer related activities [otherwise, data on computer related activity would be stated under sector J, NACE rev. 2)].

## II. Preliminary assessment

- 3. In the current monitoring exercise (data of 2019), once more Lithuania informed that in respect of the potential IP component, none of the companies' activities indicated in the submitted data could be attributed to computer related activities [otherwise, data on computer related activity would be stated under sector J, NACE rev. 2)].
- 4. In light of the recent information, the Commission's services maintain their view that so far, the LT005 measure has not affected the business location among Member States in a significant way.
- 1. The Group should further look into the effects in the next year's monitoring exercise, when the *final data* for 2020 will have become available.

## III. Follow-up

- i. The COCG agreed with the preliminary conclusion that the **LT005 regime** does not seem to have affected in a significant way the business location among the Member States.
- ii. The COCG agreed that monitoring should continue.

any BEPS issue. This conclusion was endorsed by the Group which decided that Lithuania would provide data to the Commission on an annual basis in order to monitor the implementation of the regime.
