ITEMS DEBATED

OTHER ITEMS APPROVED***Temporary derogation from the Council's rules of procedure***

Owing to exceptional circumstances related to the COVID-19 pandemic, on 23 April 2020 the Council agreed on a temporary derogation from its rules of procedure to make it easier to take decisions by written procedure. The temporary derogation is currently in force until 21 May 2021 ([2021/454](#)). It may be renewed, if justified by a continuation of the current exceptional circumstances.

The derogation allows member states' EU ambassadors sitting in the Committee of Permanent Representatives (Coreper) to decide to use the written procedure in accordance with the voting rule applicable to the adoption of the act itself. It means that the requirement for unanimity for all decisions adopted using the written procedure no longer applies. The objective is to facilitate the use of the written procedure to help ensure the continuity of Council business.

For more information on the temporary derogation, see the [press release](#).

As the latest formal Council meeting was held on 22 March, the results of written procedures concluded between 23 March and 6 May 2021, which would otherwise have been communicated in Outcomes of Council meetings, are presented below. The results which have been communicated by means of a Council press release might have not been included.

Schengen evaluation mechanism

The Council adopted conclusions on the functioning of the Schengen evaluation and monitoring mechanism ([7939/21](#)).

In its conclusions, the Council reiterates that the peer-to-peer review foundation is a key element of the evaluation mechanism. The Council highlights the need to put more focus on ensuring the swift remedy of deficiencies identified during the evaluation process, especially those that constitute a risk for the functioning of the Schengen area. To this end, it stresses the need to further reinforce the follow-up mechanism in order to ensure the effective and timely implementation of the recommendations.

The Council invites the Commission to include in its announced proposal for the revision of the mechanism initiatives to streamline and clarify, where necessary, the evaluation process. It also invites the Commission, in consultation with member states, to reflect on a reorganisation of the evaluations and restructuring of the reports with a view to improving efficiency in the functioning of the Schengen area. ECONOMIC AND MONETARY AFFAIRS

Capital Markets Recovery Package – securitisation

On 30 March 2021, the Council adopted two regulations forming part of the Capital Markets Recovery Package, amending

- Regulation (EU) [2017/2402](#) laying down a general framework for securitisation and creating a specific framework for simple, transparent and standardised securitisation ([PE-CONS 70/20](#));
- Regulation (EU) No [575/2013](#) as regards adjustments to the securitisation framework ([PE-CONS 73/20](#)).

To facilitate securitisation, the existing EU framework for simple, transparent and standardised (STS) securitisations is extended to cover synthetic securitisations. Synthetic securitisations are an important credit risk management tool for banks as they enable them to transfer the credit risk of a set of loans, typically large corporate loans or SME loans, to investors.

The agreed changes will free up bank capital for further lending and allow a broader range of investors to fund the economic recovery from the COVID-19 crisis. In order to encourage the use of the STS label, preferential risk weights are introduced for senior tranches retained by the originator, while the European Banking Authority will closely monitor the market for such products to ensure that this does not lead to excessive leveraging of banks.

The new rules also remove regulatory obstacles to the securitisation of non-performing exposures (NPEs). This is done by broadly aligning NPE rules with international standards and ensuring their prudential soundness, while at the same time allowing originating banks to use risk-sensitive modelling practices.

This will help banks to better manage their balance sheets when dealing with the economic fall-out from the COVID-19 pandemic, to secure their lending capacity in the medium term and to share risks more broadly with the non-bank financial sector.

International meetings

On 2 April 2021, the Council approved the EU Terms of Reference for the G20 Finance Ministers and Central Bank Governors meeting on 7 April 2021 (6683/21) and the EU statement for the IMFC Annual meeting on 8 April 2021 (6684/21).

Single Resolution Mechanism

On 6 April 2021, the Council approved conclusions on the European Court of Auditors' special report 1/2021 "Resolution planning in the Single Resolution Mechanism" ([7339/1/21 REV 1](#)).

The EU established the Single Resolution Mechanism in 2014 to ensure the orderly resolution of failing banks with minimal burden to taxpayers. The Court of Auditors assessed the appropriateness of the policy framework and the organisational setup of resolution planning, as well as the quality and timing of the resolution plans adopted for banks.

In its conclusions, the Council welcomes the special report. It acknowledges the Court of Auditors' assessment that the Single Resolution Mechanism, and in particular the Single Resolution Board, has made considerable progress since the audit conducted in 2017, and since the current audit in early 2020. The Council stresses, however, that a number of findings and recommendations in the special report point to further necessary improvements in the following areas:

- policy design, steering and implementation
- full compliance of resolution plans with the Single Rulebook requirements and adoption timing of such plans
- organisational set-up of the Single Resolution Mechanism
- criteria for timely supervisory action

The Council invites the Single Resolution Board to further examine and possibly implement the relevant recommendations in cooperation with the Commission, the ECB (Banking supervision) and National Resolution Authorities, and to report regularly on progress in this regard.

Common Transit Convention

On 12 April 2021, the Council adopted a decision on the EU position in the EU-CTC Joint Committee, established by the Convention of 20 May 1987 on a common transit procedure, as regards amendment of Appendices I and III to the Convention ([6124/21](#) + [6126/21](#)).

The position will be taken within the Joint Committee either during its 33rd meeting or a subsequent meeting, or by means of a written procedure.

Pericles IV programme

On 13 April 2021, the Council adopted its position at first reading on the draft regulation establishing the 'Pericles IV' programme, as well as the statement of the Council's reasons ([6164/1/21 REV 1](#) + [ADD 1](#)).

The Pericles IV programme will replace the Pericles 2020 programme for the period 2021-2027. It aims to protect euro banknotes and coins against counterfeiting and related fraud. The programme supports and supplements the measures undertaken by the member states. In addition, it assists the competent national and EU authorities in their efforts to develop among themselves and with the Commission a close and regular cooperation and an exchange of best practice, where appropriate including third countries and international organisations.

Capital Requirements Directive – regulatory technical standards

On 19 April 2021, the Council confirmed that it had no intention to object to the Commission delegated regulation of 25 March 2021 supplementing Directive 2013/36/EU with regard to regulatory technical standards:

- setting out the criteria to define managerial responsibility, control functions, material business units and a significant impact on a material business unit’s risk profile, and
- setting out criteria for identifying staff members or categories of staff whose professional activities have an impact on the institution’s risk profile that is comparably as material as that of staff members or categories of staff referred to in Article 92(3) of that directive ([7375/21](#)).

This means that, if the European Parliament also confirms that it has no intention to object to this delegated act, it will be published and enter into force.

Export credits

On 20 April 2021, the Council adopted a decision on the EU position regarding the envisaged decision of the Participants to the Arrangement on Officially Supported Export Credits to increase official support for export credits in the form of local costs ([7201/21](#) + [7202/21](#)).

The decision is expected to be adopted by the Participants to the Arrangement in the written procedure.

On 23 April 2021, the Council adopted six implementing decisions amending implementing decisions granting temporary support under regulation (EU) 2020/672 to Belgium, Cyprus, Greece, Latvia, Lithuania and Malta ([7499/21](#) + [7498/21](#) + [7497/21](#) + [7495/21](#) + [7496/21](#) + [7494/21](#)).

The implementing decisions provide additional assistance of €3.7 billion to the six member states concerned to mitigate unemployment risks in the emergency following the COVID-19 outbreak.

Following the adoption of these decisions, the Council has approved a total of €94.3 billion in financial support to 19 member states under SURE. SURE is a €100 billion instrument designed to protect jobs and incomes affected by the COVID-19 pandemic.

Green bonds

On 23 April 2021, the Council approved conclusions on Next Generation EU green bonds ([7817/21](#)).

In these conclusions, the Council welcomes the Commission's target that up to 30% of Next Generation EU proceeds will be mobilised through the issuance of NGEU green bonds. This is based on a robust and credible framework and is aligned with prevailing market standards.

This framework will include a requirement to report on the use of proceeds raised through NGEU green bonds. The Council agrees that member states will make the relevant information on eligible Recovery and Resilience Fund expenditures available to the Commission on a regular basis. In particular, for measures in the Recovery and Resilience Plan that have received a positive climate marker under the methodology in the RRF Regulation, member states will regularly report on the expenditure of each individual reform and investment.

Countering illicit trade

The Council adopted by written procedure the Irish language version of the Council Decision on the position to be taken on behalf of the European Union in the OECD Public Governance Committee and the OECD Council on the draft Recommendation on Countering Illicit Trade: Enhancing Transparency in Free Trade Zones.

On 23 April 2021, the Council adopted its position on draft amending budget (DAB) No 2 to the EU budget for 2021, accepting the Commission proposal without any changes ([7873/21](#)).

The purpose of DAB No 2/2021 is to provide additional funding for the prevention, preparedness and response to the COVID-19 pandemic, in particular for:

- preparatory work for digital green certificates to facilitate free movement during the COVID-19 pandemic

The DAB also provides room under the Emergency Support Instrument (ESI) for the potential budgetary impact of further European initiatives related to the COVID-19 response.

Other changes to the 2021 budget include technical adjustments stemming from the political agreements reached on sectoral legal bases following the adoption of the multiannual financial framework in December 2020.

The net impact of the DAB on expenditure in the 2021 budget is €260.7 million in commitments and €252.6 million in payments.

Mobilisation of the EU Solidarity Fund

On 23 April 2021, the Council approved a decision on the mobilisation of the European Union Solidarity Fund ([7876/1/21 REV 1](#)). The fund aims to enable the EU to respond in a rapid, efficient and flexible manner to emergency situations. The aim is to show solidarity with the population of regions struck by major or regional natural disasters or a major public health emergency.

In accordance with the decision approved by the Council, for the EU budget for the financial year 2021, Greece will receive from the EU Solidarity Fund €3.3 million in relation to the floods in Sterea Ellada, €21.6 million in relation to cyclone Ianos and €2.5 million in relation to the earthquake in the islands of Samos, Chios and Ikaria. The EGF provides support for workers made redundant and self-employed persons whose activity has ceased because of major structural changes in world trade patterns owing to globalisation, a continuation of the global financial and economic crisis, or a new global financial and economic crisis. The help of the EGF consists in co-financing measures such as job-search assistance, careers advice, tailor-made training and re-training, mentoring and promoting entrepreneurship. Chlorpyrifos is an organophosphate chemical that has been phased out in the European Union but is still used as a pesticide and dispersed in the environment outside the Union. With this Decision, the European Union will submit a proposal to list chlorpyrifos in Annex A to the Stockholm Convention on Persistent Organic Pollutants. The proposal to amend Annex B to the Convention aims to broaden its scope of application by introducing a phase-out date for a mercury process covered by that Annex.

Convention on Long-Range Transboundary Air Pollution

The Council adopted, by written procedure, a decision on the submission, on behalf of the European Union, of a proposal for an Executive Body decision regarding the methodology for updates to reflect changes in the membership of the Union, with a view to the 41st session of the Executive Body of the Convention on Long-Range Transboundary Air Pollution, and on the position to be taken on behalf of the Union in that session.

The EU has emission baselines and emission reduction commitments set out in tables 2 to 6 of Annex II to the amended Gothenburg Protocol. Owing to changes in the membership of the EU, these commitments need to be updated, and a methodology to account for these changes needs to be adopted. Therefore, at the 41st session of the Executive Body of the Convention on Long-Range Transboundary Air Pollution, the EU will propose that the executive body adopts a decision on a methodology, based exclusively on a mathematical calculation, using only information that is already set out in those tables. The aim is to ensure that the Union values in those tables can be updated to correctly reflect the total sum of Member States' emission baselines and emission reduction commitments, following changes in the membership of the Union ([7682/21](#), [7683/21](#)).
