## 6. RESULTS ANNEXES

### 6.1. Methodological basis for selected results from the EU Results Framework

This annex describes the methodological basis for results presented in the various sections of the Staff Working Document and this annex.

The indicators and results figures presented come from the EU Results Framework. Specifically, results in the Staff Working Document draw upon indicators included in level 2 of the framework, as explained below.

In 2015, the EU RF was launched to strengthen the monitoring and reporting of results, enhancing accountability, transparency and visibility of EU aid<sup>95</sup>. The current version was introduced in 2018 and published in the European Commission's Staff Working Document (SWD)(2018) 444, 'A revised EU international cooperation and development results framework, the Sustainable Development Goals of the 2030 Agenda for Sustainable Development and the New European Consensus on Development'.

The framework consists of a set of indicators selected to monitor the policy priorities of the European Commission Directorates-General INTPA and NEAR.

#### *Coverage of the EU Results Framework*

The EU RF is structured around three levels of results. At the core of the framework, a set of 30 indicators at output and outcome level (Level 2) measure results achieved by EU-funded projects and programmes.

**Level 1** corresponds to development progress in partner countries; that is, the medium- and long-term development impact achieved in partnership and collaboration with others. Impacts reflect the operational context in which EU external assistance is provided.

Data source Level 1: Internationally available indicators, as much as possible from the SDG database.

**Level 2** focuses on development outcomes and outputs to which EU-funded interventions contribute in collaboration with partner governments and other funding providers. In line with the principles of aid effectiveness and effective development cooperation that emphasise partnerships and country ownership, results at this level are presented on a contribution basis. Rather than results being based on the share of funding provided by the EU, they represent the combined efforts of a variety of partners, including the EU, Member States, partner country governments and public institutions, local communities, international finance agencies, CSOs, non-profit entities and private companies. Data collection is guided by specific methodological notes<sup>96</sup>.

Data source Level 2: Results data are drawn from the reports of EU implementation partners (i.e., partner countries, international organisations, Member States' development agencies, international financial institutions and NGOs).

---

<sup>95</sup> Launching the EU International Cooperation and Development Results Framework, SWD(2015)80 final

<sup>96</sup> Methodological notes are available online <https://europa.eu/capacity4dev/eu-rfi>

**Level 3** focuses on the mainstreaming of policy priorities, as measured by budgetary commitments directed at specific cross-cutting issues (e.g. human development, gender, nutrition), and focuses on organisational financial data.

Data source level 3: Internal financial monitoring systems.

To increase coherence with international and European policy frameworks, the EU RF is structured according to the SDGs and includes results statements that articulate the key EU international cooperation objectives, as reflected in the European Consensus on Development.

## 6.2. Latest results for Level 1 indicators- Reporting on development progress in partner countries

This annex presents the latest figures for the level 1 indicators in the EU Results Framework.

**Data sources and coverage:** The statistics used to report on the indicators were taken from international data sources (presented in Table 1 below). They refer to data available in April 2021. The figures reported are world figures, considering all countries included in reporting by international data sources (United Nations (UN) database on Sustainable Development Goals, World Bank data, etc.). For five indicators, total aggregates were not available.

**Table 1: Latest figures for Level 1 indicators**

EU RF indicator – Level 1	Latest figure	Data source
1.1 Proportion of population below the international poverty line	10 % (2015)	Global SDG Indicators Database
1.2 Prevalence of moderate or severe food insecurity in the population	25.9 % (2019)	Global SDG Indicators Database
1.3 Prevalence of stunting among children under five years of age	21.3 % (2019)	Global SDG Indicators Database
1.4 Value added of agriculture as a percentage of GDP	3.3 % (2018)	World Bank World Development Indicators
1.5 Universal Health Coverage index	66 (2017)	Global SDG Indicators Database
1.6 Adolescent birth rate per 1 000 adolescents aged 15–19 years	41.2 (2020)	Global SDG Indicators Database
1.7 Literacy rate of 15- to 24-year-olds	92 % (2019)	World Bank World Development Indicators
1.8 Proportion of seats held by women in national parliaments	25.6 % (2021)	Global SDG Indicators Database
1.9 Proportion of population using safely managed drinking water services	70.6 % (2017)	Global SDG Indicators Database
1.10 Proportion of population using safely managed sanitation services	45 % (2017)	Global SDG Indicators Database
1.11 Proportion of population with access to electricity	90 % (2020)	Global SDG Indicators Database

1.31 Total government revenue as a proportion of GDP, by source	38.3 % (2019)	Global SDG Indicators Database

### 6.3. Level 2: Reporting on partner country results supported by the EU

**Selection criteria:** Results were collected from a set of ongoing and completed interventions<sup>98</sup> that started between 1 January 2014 and 1 July 2019, with an EU contribution of EUR 750 000 or more. This year, over 3 000 projects and programmes reported latest results information, out of which 1 500 projects and programmes contributed to at least one of the corporate indicators. The sample of ongoing interventions continues to expand over time.

As in previous years, the results reported cannot be interpreted as providing a full picture of the interventions financed by the EU in the countries concerned.

**Methodology notes for EU Results Framework indicators:** Methodology notes are available for each EU Results Framework indicator to ensure that data from the various reporting sources could be aggregated consistently. These notes provide definitions and data sources clearly explaining what type of interventions should be included when reporting against an indicator. These notes, for both the original and the revised results frameworks, can be found at <http://capacity4dev.ec.europa.eu/eu-rfi>.

**Data:** As mentioned previously, results data is drawn from the reports of EU implementation partners (i.e. partner countries, international organisations, Member States' development agencies, international financial institutions and NGOs). These organisations use data collected from a variety

---

<sup>97</sup> Proportion of countries with independent National Human Rights Institutions in compliance with the Paris Principles (%)

<sup>98</sup> The interventions considered were financed using the following instruments: the European Development Fund (EDF); the Development Cooperation Instrument (DCI); the programmable part of the Instrument contributing to Stability and Peace (IcSP) under Art. 5; the European Instrument for Democracy and Human Rights (EIDHR); the Instrument for Nuclear Safety Cooperation; the Instrument for Greenland; and the European Neighbourhood Instrument (ENI).

of sources, such as the management information system of partner countries, the individual project monitoring frameworks of implementation partners and representative surveys.

**Reporting:** The 2018-2020 figure reports a cumulative number, including results reported since the last results reporting exercise (2018). The numbers are cumulated with careful consideration of potential double counting across projects and programmes and across years. The approach taken is to err on the side of safety, so any potentially double counted results are excluded from the results reported. For the 2013-17 figures, the same extensive cross-year double-counting checks were not deemed to be necessary as the double-counting risk was assessed to be low.

A common feature of all Level 2 indicators is that the results reported have been calculated using a contribution-based approach. This means that where an intervention has been financed by the EU jointly with other funders – such as partner country governments or other donors – the overall results of the collective effort are reported, rather than those linked to the share of funding provided by the EU specifically.

EU RF indicator 2.30 ‘Number of countries supported by the EU to strengthen revenue mobilisation, public financial management and/or budget transparency’ is an exception in terms of scope and data collection. In addition to the interventions included in the exercise, this indicator draws on all countries with an ongoing EU budget support contract.

EU RF indicators 2.9 ‘Number of individuals with access to electricity with EU support through a) new access, b) improved access’, 2.10 ‘Renewable energy generation capacity installed with EU support (MW)’ and 2.21 ‘Greenhouse gas emissions avoided with EU support (tonnes CO<sub>2</sub>eq)’ also include reporting by the EU–Africa Infrastructure Trust Fund (EU-AITF). EU RF 2.9 reports inferred figures, which were calculated using the KfW model for estimating access using electricity generation capacity. EU RF 2.10 and EU RF 2.21 report expected results.

**Results by sex of beneficiaries:** The SWD(2018) 444 mentions that, where possible, results are to be disaggregated by sex. These results are presented in Annex 2. Where this disaggregation has not been provided, it is either because this was not relevant for the indicator in question (e.g., EU RF 2.4 ‘Agricultural and pastoral ecosystems where sustainable management practices have been introduced with EU support’) or because the data were not available. Due to data availability at intervention level, the sum of sex-disaggregated results may not equal total results figures.

**Results by country:** When presenting results broken down by country, figures are reported according to the country where the result was achieved. While efforts have been made to capture this detailed level of reporting as far as possible, data were not always available at this level; for example, in the case of multi-country regional interventions where country-level results were not reported.

Where the EU has funded interventions in overseas countries and territories, results achieved are reported at this level. This approach is also taken where EU RF indicators measure the number of countries supported in a specific sector.

**Rounding of figures:** The results estimates have been rounded using the following method:

- Estimates of 10 000 or more – rounded to the nearest 1 000;
- Estimates between 1 000 and 10 000 – rounded to the nearest 100;
- Estimates between 100 and 1 000 – rounded to the nearest 10;
- Estimates that are less than 100 – no rounding.

**Quality:** The data are subjected to an extensive quality assurance process to ensure that:

- The data sources are reliable;
- The link between the indicators from the monitoring system of the intervention and the indicators from the EU RF is robust;
- The individuals who have benefited from the same intervention over different years, and/or from different interventions ending and/or ongoing in the same year, are only counted once.

However, given the great variety of data sources used, the data quality may vary.

**Joint reporting with EU Trust Fund for Africa interventions:** As part of the 2018 revision of the results framework, efforts have been made to harmonise indicator methodologies to enable joint reporting with other monitoring systems. Four indicators can be reported together with results from EU Trust Fund for Africa (EU TF) interventions. Thus, in addition to the figures collected through the EU RF, reporting includes figures reported through the EU TF. The EU RF indicators that feature data via joint reporting are:

- EU RF 2.15 Number of people who have benefited from institution- or workplace based vocational education and training (VET)/skills development interventions supported by the EU (window: Horn of Africa, Sahel and Lake Chad);
- EU RF 2.17 Number of migrants, forcibly displaced people or individuals from host communities protected or assisted with EU support (windows: Horn of Africa, Sahel and Lake Chad, North of Africa);
- EU RF 2.18 Number of migration management or forced displacement strategies or policies a) developed/revised (window: North of Africa);
- EU RF 2.29 Number of state institutions and non-state actors supported on security, border management, countering violent extremism, conflict prevention, protection of civilian population and human rights (window: North of Africa).

2.30	Number of countries supported by the EU to strengthen revenue mobilisation, public financial management and/or budget transparency	–	153	153

<sup>a</sup>Total figures, covering 2013 to 2020, may not equal the sum of results from 2013–2017 and 2018–2020. This is due to the avoidance of double counting, or the rounding of numbers, or both.

Furthermore, note that historical data for 2013–2017 are not available for EU RF indicators that were substantially revised or newly introduced. Besides reporting on interventions covered by the EU RF, four indicators -EU RF 2.15, 2.17, 2.18 and 2.29- also include figures reported through the EU Trust Fund for Africa.

<sup>b</sup> Refers to data collected from EU-funded interventions that ended between July 2013 and June 2017.

<sup>c</sup> Refers to data collected from ongoing or completed EU-funded interventions that started between January 2014 and July 2019. Figures are cumulated with the values reported last year, cleaned of double counting.

<sup>e</sup> The number reported under indicator 2.1 may overlap with those for indicators 2.2 and/or 2.3. Indeed, food-insecure people may also be reached by nutrition-related interventions covered by indicator 2.2 and/or interventions aimed to increase smallholders' sustainable production, access to markets and/or security of land covered by EU RF 2.3. For indicators 2.2 and 2.3, the numbers of food-insecure people reached (based on the revised EU RF) are reported separately.

<sup>f</sup> This indicator was introduced in the 2018 revision of the EU RF. It combines parts of the previous EU RF indicators 'Number of people receiving rural advisory services' and 'Number of people who have secure tenure of land' (values for 2013–2017: 3 841 000 and 815 000, respectively). For the purpose of reporting with across years, the current value was cumulated with the historical data for 'Number of people receiving rural advisory services'.

<sup>g</sup> This indicator was newly introduced in the 2018 revision of the EU RF. The value reported represents inferred access to electricity for the overall reporting period 2013–19. It currently does not include the number of individuals with access to electricity with EU support through improved access, due to data limitations. Improved access will be reported in the forthcoming years. As a result, the number of people with access to electricity (new or improved) through EU support is expected to be significantly higher.

<sup>h</sup> The 2018-2020 value corresponds to: a) 13 000 km constructed, b) 5 000 km rehabilitated and c) 50 000 km maintained.

<sup>i</sup> Note that there is no entry for the EU RF indicator 2.22 ‘Marine areas under b) sustainable management with EU support (km2)’. This indicator was introduced in the 2018 revision of the EU results framework and the methodology is still under development, closely following the ongoing work done by the UN on SDG indicator ‘Proportion of national EEZs managed using ecosystem-based approaches’.

<sup>j</sup> The value for 2013–2017 is from a related indicator in the previous EU RF: ‘Number of hectares of protected areas managed with EU support’.

## 6.4. Latest results for Level 3 indicators

This Annex presents the latest figures for indicator from level 3 of the EU Results Framework which present policy priorities. The sources of data are the European Commission's internal monitoring systems.

All indicators presented in this section have been calculated with reference to the calendar year 2020.

In terms of coverage, the figures presented here refer only to the following financing instruments managed by the Commission services: the European Development Fund (EDF)<sup>99</sup>, the Development Cooperation Instrument (DCI)<sup>100</sup>, the Instrument contributing to Stability and Peace (IcSP)<sup>101,102</sup>, the European Instrument for Democracy and Human Rights (EIDHR)<sup>103</sup>, the Instrument for Nuclear Safety Cooperation<sup>104</sup> and the Instrument for Greenland<sup>105</sup>.

## 7. FINANCIAL ANNEXES

### 7.1. EU development assistance in 2020

#### 7.1.1. Introduction to financial tables

##### **General concepts:**

This Annual Report provides an overview of policies, objectives and achievements in 2020. The tables and graphs in these financial annexes present the main data on EU development assistance in 2020 by country, region, sector and instrument.

The legal and financial basis of EU development assistance under the 2014-2020 Multiannual Financial Framework is composed of several instruments, which can be geographic (targeting a group of countries) or thematic (targeting a specific development issue). The geographic cooperation with the African, Caribbean and Pacific (ACP) countries is based on the Partnership Agreement with the ACP signatory states and is mainly financed, South Africa excepted, by the European Development Fund (EDF) which is separate from the EU budget. External assistance for other geographic areas and the thematic programmes with worldwide coverage are financed from the General EU budget under different instruments such as Development and Cooperation Instrument (DCI) or the European Neighbourhood Instrument (ENI).

Whenever references are made in the following tables to the 'EU budget', this refers to the budget managed by the European Commission and does not cover EU Member States' national budgets for development assistance.

The methodology of the financial annexes of the Annual Report is compliant with international standards as defined by OECD's Development Assistance Committee (DAC) and in particular :

- The concept of Official Development Assistance (ODA) used throughout the tables and figures is defined by the OECD DAC. Not all EU external assistance can be reported as ODA. Whether a project is classified as ODA depends on the eligibility of the recipient country and the purpose and contents of the project.
- The definition of "region" reflects the country groupings used by OECD DAC. It does not always coincide with the country groupings used in the Commission instruments. The granularity level of some of the tables allows for a breakdown by country and instrument for analytical purposes.
- The grouping of ODA-eligible countries in four groups (Less Developed Countries or LDCs; Other Low-Income Countries or OLICs; Lower Middle-Income Countries or LMICs; Upper Middle-Income Countries or UMICs) is a dimension widely used by OECD DAC and other international organisations. It is based on Gross National Income (GNI) per capita calculations and on human development indexes.
- The activity sectors used in the tables are those used by OECD DAC for sectoral ventilation (DAC purpose codes).

It is worth noting that there are significant methodological differences between the presentation of the data in this Annual Report and the OECD DAC statistics, which makes it difficult to compare the two data sets.

### **Structure and common elements:**

Financial annexes of the 2020 Annual Report are structured in four sections as follows:

- Tables 1 to 19 in these annexes are the core of the financial reporting. These tables remain unchanged year after year and ensure the continuity of the statistical series. They mainly present commitments and payments funded by the Heading IV of the General Budget and the EDF in 2020.
- Tables 20 to 23 present (as requested by the Council of the European Union<sup>118</sup>) 2020 payments reporting on implementation by type of implementation partners, as referenced in the Financial Regulation<sup>119</sup>, as well as by type of instruments.
- Tables 24 to 29 are specific to the 2020 Annual Report, which marks the end of the 2014-2020 Multiannual Financial Framework. They present a synthesis of the last seven years of financial statistics, as requested by Article 31 of the new Neighbourhood, Development and International Cooperation Instrument (NDICI) basic act.
- Tables TF1 to TF6 present data on the implementation of the European Union Trust Funds.

At the top right of each table, a small information box specifies whether the figures in the table are Commitments or Disbursements (C or D respectively); whether only Official Development Assistance (ODA) figures are included, or non-ODA figures are included as well (Y or N, depending); which of the EDF, the INTPA (Directorate-General for Development and Cooperation) budget lines, and the non-INTPA budget lines (including Directorate-General for Neighbourhood and Enlargement Negotiations) are included (Y or N, depending).

To improve readability, all numbers in the tables are presented as rounded up to the nearest million euro. When a table shows the number “0”, it means that the exact figure is lower than 0.5 million euro. When a table shows a blank, it means that the exact figure is zero.

A list of abbreviations is also provided in this annex before the Tables.

### **List of tables:**

Table 1 shows the relative importance of external assistance in the overall expenditure of the European Commission.

Table 2 provides a breakdown between ODA and non-ODA by Directorate-General.

Table 3 and 4 provide detailed breakdowns of the commitments and payments funded by the EU Budget by managing entity and instrument.

<sup>118</sup> WK 1423/2020 REV 2.

<sup>119</sup> Financial Regulation Article 62 para 1 point c).

Table 5 presents a summary of the commitments and payments funded by the European Development Fund for 2020.

Table 6 gives a sectoral breakdown of ODA by Directorate-General.

Table 7 gives a breakdown of European Commission external assistance by country.

Table 8 shows the distribution of ODA by OECD sector and different country groupings, including the country income level group.

Table 9 combines a ventilation of ODA by sector and by country.

Table 10 and 11 provide a sectoral breakdown by OECD DAC region for INTPA and non-INTPA ODA, respectively.

Table 12 combines a breakdown by sector and by EC instrument.

Table 14 introduces a breakdown by aid mechanism (project approach, sectoral budget support or general budget support) combined with instruments.

Table 16 to 19 provide a historical perspective (last five years) for the sectoral breakdown, the regional distribution of aid, the breakdown by income group and the breakdown by aid mechanism.

NB/ Last year's table 20 (amounts disbursed from transfer agreements) now duplicates with a new table shown this year (table 26) and has therefore been removed. For data on disbursements from transfer agreements, please refer to table 26.

Table 20 presents Budget Support (direct management) as a share of total expenditure and the top ten countries that received budget support payments in 2020.

Table 21 presents the top ten third countries that received funding in indirect management as per Article 62.1.c.i) of the Financial Regulation 2018.

Table 22 presents the detail of international organisations that received funding in indirect management (by class of international organisation and the top ten recipients) as per Article 62.1.c.ii) of the Financial Regulation 2018.

Table 23 presents the top ten Member State and non-Member State agencies that received funding in indirect management. The table covers sections v (public law bodies, including Member State organisations) and vi (bodies governed by private law with a public service mission, including Member State organisations) as defined in article 62.1.c of the Financial Regulation 2018 grouped together.

Detailed lists of contracts signed with international organisations or development agencies in indirect management are available in the Annual Activity Reports (annex 6) of the Directorate General for International Cooperation and Development (INTPA), the Directorate General for Neighbourhood and Enlargement Negotiations (NEAR), and the Directorate General for European Civil Protection and Humanitarian Aid Operations (ECHO) respectively, at the following link: [https://ec.europa.eu/info/publications/annual-activity-reports\\_en](https://ec.europa.eu/info/publications/annual-activity-reports_en).

Table 24 to 29, presenting a synthesis of seven years of activities (2014-2020), are specific to this annual report, which marks the end of the 2014-2020 MFF. Specific methodologies apply to these tables:

- A few corrections have been made after the previous annual reports were released, owing mainly to requests made by OECD DAC and data quality issues. As a result, the totals in these tables are fully up to date, but may differ very slightly from the totals that could be made by compiling the seven reports from 2014 to 2020.
- Following OECD DAC methodology, tables 24A and 25A present the sum of commitments from 2014 to 2020 inclusive but includes decommitments only if they take place during the same calendar year as the corresponding commitment. Decommitments of the non-contracted balance potentially taking place at the end of the life of a commitment are not included. As a result, the totals presented are to be considered gross totals rather than net ones.
- Respecting the principle of annularity of the budget, 2014-2020 totals shown in these tables include disbursements funded by both the 2014-2020 MFF and the completion lines of the previous MFF (2007-2013). Table 29 shows the respective proportions of both funding sources.

Table 24A and 24B present a breakdown by sector and by instrument of the total of 2014-2020 data for commitments and disbursements.

Table 25A and 25B present a breakdown by country and instrument of the total of 2014-2020 data for commitments and disbursements. Countries that have graduated (becoming ineligible for ODA) during the course of the 2014-2020 MFF are shown twice, once in the “developing countries” section and once in the “countries and territories in transition section” with the relevant financial flows.

Table 26 provides data for the 2014-2020 period on Transfer Agreements to the European Commission (it includes data from last year’s table 20). All transactions from the EU general budget or from the EDF which are directly co-financed by EU Member States or external donors (e.g., Bill & Melinda Gates Foundation) for specific projects are considered Transfer Agreements. EDF or Trust Funds transfer as administrative credits and EDF transfer to the EFSD are not included in the table.

Funds from the Transfer Agreements form an integral part of the EU budget and project portfolio and are therefore included in this annual report. However, as EU Member States report them directly to the DAC, the Commission excludes them from its own DAC reporting to avoid double counting.

Table 27 provides a detailed annual breakdown of 2014-2020 payments by management mode (direct and indirect) and by implementing category in the sense of Article 62.1.c of the Financial Regulation 2018<sup>120</sup>.

Table 28 provides a breakdown of 2014-2020 payments by “forms of union funding” using the new taxonomy defined in Article 23 of the NDICI basic act, as requested by Article 31 of the NDICI basic act, for both direct and indirect management modes. It should be noted that :

---

<sup>120</sup> Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council of 18 July 2018 on the financial rules applicable to the general budget of the Union.

- For the sake of clarity, certain forms of EU funding that are not explicitly included in Article 23 NDICI are shown on distinct lines: this is in particular the case for Contribution and Delegation Agreements as well as Programme Estimates.
- “Blending” is defined in the context of this table as payments on contracts funded by the European Commission leading to the mobilisation of private finance for the implementation of projects. Mobilised funds per se are not included.

Table 29 show the proportion of 2014-2020 disbursements that has been funded by the 2014-2020 Multiannual Financial Framework (MFF) and the part that has been funded using “completion lines” of the previous MFF (2007-2013).

Table TF1 to TF6 provide information on the implementation of EU Trust Funds. EU Trust Funds are new development tools that pool together resources from different donors (including the European Commission) to enable a quick, flexible, and collective EU response to the different dimensions of a situation requiring an urgent response. They are specific instruments with their own accounts and financial management.

As of 2020, four EU Trust Funds are active: EUTF Africa (fostering stability and assisting a broad group of countries across the African continent), EUTF Békou (addressing the crisis in Central Africa), EUTF Madad (addressing the consequences of the Syrian crisis) and EUTF Colombia (in support of Colombia's post-conflict peace building efforts).

The tables TF 1 to TF 6 are shown to provide some information on the financial implementation of the EU Trust Funds in a way that is consistent with international DAC standards.

Annex TF 1 shows the contributions to the Trust Funds, both during previous years and for 2020.

Annexes TF 2 to TF 6 provide the breakdown of the expenditure realised by the active Trust Funds.

To conclude, the financial annexes of the Annual Report will be overhauled and streamlined next year, while preserving the continuity of the statistical series, to integrate the needs that have arisen during the past few years and the specificities of the new MFF.

### 7.1.2. Financial tables

The Annual Report main financial annex consists of the following tables:

- 1 Percentage of EU Budget committed and disbursed on External Assistance in 2020

## 7.2. EU External Investment Plan Blending in 2019

### 7.2.1. Introduction to EU External Investment Plan Blending Tables

Section 5.2.2. of this report (see Part I of this SWD) gives an overview of the EU's use of blending as a way of financing development projects. Blending combines grants from the EU with loans and other types of financing from development banks and other public and private investors.

Blending is one of the cornerstones of the EU External Investment Plan (EIP), a major EU initiative. The EIP was created in 2017 to scale up investment in Sub-Saharan Africa and the EU Neighbourhood.

The Plan has a financing arm, the European Fund for Sustainable Development (EFSD), managing EU contributions in excess of EUR 5.3 billion from 2017 to 2020.

Of this, approximately EUR 3.7 billion is for blending projects, and the remaining amount is for the EFSD guarantee. Tables B1.1, B1.2 and B1.3 that follow give figures for blending projects which the EU approved in 2020 for the Plan's two main target regions: Sub-Saharan Africa and the EU Neighbourhood.

The tables show:

- How much the EU contributed towards blending projects;
- How much investment the projects are expected to generate (leverage);
- What form the EU's contributions take; and
- What areas of the economy the projects focus on.

A final table (B2) shows the share of total EU contributions allocated to least-developed and middle- and high-income countries in Sub-Saharan Africa.

## 7.2.2. EU External Investment Plan Blending Tables
