Proposal for a
COUNCIL IMPLEMENTING DECISION
on the approval of the assessment of the recovery and resilience plan for Bulgaria

{SWD(2022) 106 final}

Proposal for a

COUNCIL IMPLEMENTING DECISION

on the approval of the assessment of the recovery and resilience plan for Bulgaria

THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EU) 2021/241 of the European Parliament and of the Council of 12 February 2021 establishing the Recovery and Resilience Facility¹ and in particular Article 20 thereof,

Having regard to the proposal from the European Commission,

Whereas:

- (1) The COVID-19 outbreak has had a disruptive impact on the economy of Bulgaria. In 2019, the gross domestic product (GDP) per capita of Bulgaria was 28% of the Union average. The real GDP of Bulgaria declined by 4.4% in 2020 and by 0.4% cumulatively in 2020 and 2021. Bulgaria has one of the highest levels of poverty and income inequality in the EU and its health system remains weak and characterised by limited access to healthcare services. Bulgaria is the most carbon- and energy-intensive economy in the Union. It is highly reliant on coal and lignite, despite having a vast potential for renewable energy and increasing energy efficiency, especially for the building stock. Improving the quality of institutions and fighting corruption remain key challenges for fostering a favourable business environment. Labour and skills shortages as well as skills mismatches relative to the labour market needs represent a significant barrier to business investment and limit productivity gains. The uptake of digital technologies is slow in both public and private sectors. Bulgaria ranks last in the Union in digital skills.
- (2) On 9 July 2019 and on 20 July 2020, the Council addressed recommendations to Bulgaria in the context of the European Semester. In particular, the Council recommended Bulgaria to take all necessary measures to effectively address the pandemic, sustain the economy and support the ensuing recovery and pursue fiscal policies aimed at achieving prudent medium-term fiscal positions and ensuring debt sustainability, while enhancing investment. Also in relation to public finances, the Council recommended improving tax collection through targeted measures in areas such as fuel and labour taxes and upgrading the corporate governance of state-owned enterprises. The Council further recommended Bulgaria to ensure the stability of the banking sector by reinforcing supervision and promoting adequate valuation of assets.

¹ OJ L 57, 18.2.2021, p. 17-75.

In relation to the non-banking sector, it was recommended to ensure effective supervision and the enforcement of the anti-money laundering framework and the effective functioning of the insolvency framework. Furthermore, it was recommended to improve the quality and effectiveness of public administration, minimise the administrative burden and reinforce digital government. In addition, the Council recommended Bulgaria to strengthen the resilience, accessibility and capacity of the health system, ensure a balanced geographical distribution of health workers, and improve access to health services, including by reducing out-of-pocket payments and addressing shortages of health professionals. Particularly relevant to social challenges were the recommendations to improve the quality, inclusiveness and labour market relevance of education and training, in particular for Roma and other disadvantaged groups, strengthen active labour market policies, strengthen employability by reinforcing skills, including digital skills, and to address social inclusion through improved access to integrated employment and social services and via more effective minimum income support. To tackle the COVID-19 crisis, Bulgaria was recommended to improve access to distance working, promote digital skills and equal access to education. Moreover, the Council recommended Bulgaria to provide effective support to small and medium-sized enterprises (SMEs) and the self-employed, also ensuring their continued access to finance and flexible payment arrangements and to front-load mature public investment projects and promote private investment to foster the economic recovery. It was recommended to focus investments on the green and digital transition, in particular on clean and efficient production and use of energy and resources, environmental infrastructure and sustainable transport, contributing to a progressive decarbonisation of the economy, including in the coal regions. The Council also recommended to focus investment-related economic policy on research and innovation, transport, notably on its sustainability, water, waste and energy infrastructure and energy efficiency, taking into account regional disparities, and improving the business environment. Having assessed progress in the implementation of these country-specific recommendations at the time of submission of the recovery and resilience plan ('RRP'), the Commission finds that substantial progress has been achieved with respect to the recommendations on ensuring the stability of the banking sector by reinforcing supervision, strengthening the non-banking financial sector by effectively enforcing risk-based supervision, providing an immediate fiscal policy response to effectively address the pandemic, sustain the economy and support the ensuing recovery, and the recommendation to streamline and accelerate the procedures to provide effective support to SMEs and the self-employed. Some progress has been made with the recommendation on the improvement of the tax collection system and there are several projects planned under the Technical Support Instrument to support further progress in this area.

- (3) On 15 October 2021, Bulgaria submitted its national RRP to the Commission, in accordance with Article 18(1) of Regulation (EU) 2021/241. That submission followed a consultation process, conducted in accordance with the national legal framework, involving local and regional authorities, social partners, civil society organisations, youth organisations and other relevant stakeholders. National ownership of the RRP underpins their successful implementation and lasting impact at national level and credibility at European level. Pursuant to Article 19 of Regulation (EU) 2021/241, the Commission has assessed the relevance, effectiveness, efficiency and coherence of RRP, in accordance with the assessment guidelines set out in Annex V to that Regulation.

- (4) The RRP should pursue the general objectives of the Recovery and Resilience Facility established by Regulation (EU) 2021/241 (the 'Facility') and of the European Union Recovery Instrument set up by Council Regulation (EU) 2020/2094 in order to support the recovery in the aftermath of the COVID-19 crisis. They should promote the Union's economic, social and territorial cohesion by contributing to the six pillars referred to in Article 3 of Regulation (EU) 2021/241.
- (5) The implementation of the Member States' RRP will constitute a coordinated effort involving reforms and investments across the Union. Through coordinated and simultaneous implementation and the implementation of cross-border and multi-country projects, such reforms and investments will mutually reinforce each other and generate positive spillovers across the Union. Therefore, about one third of the impact of the Facility on Member States' growth and job creation will come from spillovers from other Member States.

Balanced response contributing to the six pillars

- (6) In accordance with Article 19(3), point (a), of and Annex V, criterion 2.1, to Regulation (EU) 2021/241, the RRP represents to a large extent (Rating A) a comprehensive and adequately balanced response to the economic and social situation, thereby contributing appropriately to all of the six pillars referred to in Article 3 of that Regulation, taking into account the specific challenges faced by and the financial allocation for Bulgaria.
- (7) The RRP includes measures that contribute towards all six pillars, with almost all of its components addressing multiple pillars. Such an approach contributes to ensuring that each pillar is addressed comprehensively and in a coherent manner.
- (8) The RRP includes important measures to accelerate the twin transition. In the area of climate action and energy transition, significant efforts are dedicated to accelerating and facilitating the deployment of renewable energy generation and storage, cutting the greenhouse gas emissions in the power sector by almost half, liberalising the wholesale and retail electricity markets, and boosting renovations of the building stock with a view to improving energy efficiency. Significant investments and reforms also aim at promoting low-emission mobility and use of less polluting modes of transport, notably rail transport. There is also a strong focus on the digital transformation of Bulgaria's economy and society, with measures to support the acquisition of digital skills across the whole population, the digitalisation of businesses, public administration, including the judiciary, as well as enhancing the connectivity and broadband deployment in remote and sparsely populated areas. Investments in areas like power storage capacities, digitalisation and sustainability of rail transport, and smart water management make an important contribution both to the green and digital objectives.
- (9) Several components in the RRP are expected to contribute to the pillar on smart, sustainable, and inclusive growth, with a wide array of measures aiming to strengthen competitiveness and enhance research and development. The RRP contains investments to support businesses, especially SMEs via grants and financial instruments aimed at promoting digitalisation, circular economy, and use of renewables for own consumption to allow businesses to deal with the energy transition. Measures in the plan also contribute to creating favourable conditions for investments in industrial parks and zones and to support the cultural and creative sectors. Moreover, reforms and investments should support the improvement of the

research and innovation ecosystem thus increasing the innovation output of Bulgaria, fostering technology transfer and commercialisation of research results, which should lastingly spur its economic growth. The RRP strongly focuses on the decarbonisation of the energy sector, sustainable agriculture, sustainable mobility (rail and public transport), modernisation of the educational system and infrastructure, modernisation of healthcare provision and support for the deinstitutionalisation of care. The RRP also aims to reinforce the business environment and the rule of law with measures addressing corruption issues such as reformed anti-corruption institutions, new legislation on lobbying and on the protection of whistle-blowers, reforms of the judicial system to ensure effectiveness of criminal investigations, including the accountability and criminal liability of the Prosecutor General, reforms to improve the legislative process, reforms on public procurement to reduce the use of non-transparent procedures, reform of the governance framework of state-owned enterprises and a reform on improving the insolvency and restructuring proceedings.

- (10) The pillar on health, economic, social, and institutional resilience includes measures that are expected to contribute to improving access to education, lifelong learning and healthcare, and promoting social inclusion. Relevant measures in the field of education and training include measures enhancing the relevance of higher education, with the aim of addressing labour market shortages and promoting research, and the development of a platform for lifelong learning. The relevant measures in the field of healthcare also include the adoption of a new national strategy on health, the implementation of the National Health Information System, and the establishment of a network of outpatient units, supported by a reform targeting the unbalanced distribution of medical professionals. To foster social inclusion, the RRP covers a reform to enhance the coverage and adequacy of the minimum income scheme and measures in the area of social services, including long-term care. With respect to social and territorial cohesion, the support of broadband roll-out in rural and remote areas is expected to help ensure that all citizens have access to high-speed connectivity, while social cohesion is expected to be fostered through the reform of the minimum income scheme benefitting adults and children, investment in the social economy, the modernisation of the social and employment services and the provision of telemedicine and e-government services in remote areas through a repurposing of the country's postal network. The Bulgarian RRP is expected to contribute to policies for the next generation with measures such as the mandatory inclusion of four-year olds in pre-school education and the modernisation and construction of educational infrastructures, including kindergartens and school laboratories, and the establishment of youth centres across the country.

Addressing all or a significant subset of challenges identified in country-specific recommendations

- (11) In accordance with Article 19(3), point (b), of and Annex V, criterion 2.2, to Regulation (EU) 2021/241, the RRP is expected to contribute to effectively addressing all or a significant subset of challenges (Rating A) identified in the relevant country-specific recommendations addressed to Bulgaria, including fiscal aspects thereof or challenges identified in other relevant documents officially adopted by the Commission in the context of the European Semester.
- (12) The RRP includes an extensive set of mutually reinforcing reforms and investments that contribute to effectively addressing all or a significant subset of the economic and social challenges outlined in the country-specific recommendations addressed to

Bulgaria by the Council in the European Semester in 2019 and in 2020, notably in the areas of social inclusion, education and skills, healthcare, decarbonisation and digital transition and business environment.

- (13) The RRP includes key structural reforms and investments that address long-standing recommendations in relation to the business environment and improving the institutional framework. In particular, the reform of the insolvency framework is expected to contribute to a more effective and flexible system for the restructuring of businesses, the improvement of the governance of state-owned enterprises and the reform of the public procurement procedures should contribute to more transparent and efficient allocation of public resources. Reforms included in the RRP support a stronger institutional framework, including through improvements in the capacity and functioning of the anti-corruption framework, judicial reforms to ensure the effectiveness of criminal investigations, including the accountability and criminal liability of the Prosecutor General, as well as improved implementation of the anti-money laundering framework. Further measures supporting the improvement of the business environment include a reform of the legislative process aimed at increasing its quality and predictability and regulation of lobbying activities in the context of public decision-making. The RRP also includes a set of reforms and investments aimed at minimising administrative burden to companies by improving the effectiveness of public administration and reinforcing eGovernment, including through the digitalisation of the justice system and the increased provision of digital public services also in rural and remote areas.
- (14) The comprehensive package of reforms and investments in the RRP contributes to addressing the main challenges of the Bulgarian energy and transport sectors as identified in the Council recommendations. In particular, measures included in the RRP are expected to accelerate the deployment of renewable energy sources and storage and to significantly reduce greenhouse gas emissions from power production, thus contributing to the progressive decarbonisation of the economy, including in the coal regions. The RRP also includes key reforms aiming at establishing a competitive wholesale and retail markets, thereby improving the access of renewable energy to the market, and at improving corporate governance in the energy sector. With regard to fostering sustainable transport, the RRP includes an e-mobility reform, aimed at promoting the use of zero-emission vehicles, such as increasing public charging points, and the introduction of the low-emission zones in some of the biggest and most polluted district cities. The RRP also includes a reform of the public transport system and the introduction of a single ticket system for public transport, and investments in the digitalisation and modernisation of railways, including the acquisition of zero-emission rolling stock.
- (15) A reform of the minimum income scheme aimed at increasing its adequacy and coverage is expected to contribute to addressing challenges identified in relation to social inclusion. In addition, the RRP is also expected to improve access to education and adult learning and to promote social inclusion through reforms and investments including mandatory pre-school education as of the age of four, the construction and renovation of educational facilities and the development of an online platform for adult learning linked to the public employment services. With regard to healthcare, the measures in the RRP are expected to contribute to addressing the shortages in the number of healthcare professionals, including their unbalanced geographical distribution, increasing the availability of healthcare services across the territory of the

country through outpatient units, enhancing telemedicine services and establishing an air ambulance service, thus strengthening the accessibility and resilience of the healthcare system. However, the plan does not address the high level of out-of-pocket payments.

- (16) The RRP includes measures focused on increasing the availability of digital infrastructures, access to distance working and the enhancement of digital skills, which support the digital transition, in particular through measures on the large-scale deployment of digital infrastructure, the digitalisation of administrative services and a revised regulation on remote working. The RRP also promotes skills relevance and adult learning, with a focus on digital skills. Moreover, the RRP addresses the recommendation to foster investments in the green and digital transition through an extensive package of reforms and investments. In addition to the measures focused on the transition to green, circular and digital-oriented business practices for SMEs, the RRP includes measures targeting the restructuring and further development of the research and innovation ecosystem and enhancing the innovation output of Bulgaria, with a particular focus on the field of green and digital technologies. The RRP is expected to contribute to the competitiveness and sustainable development of the regions of the country and to local development. This includes a reform of the management of the water and agricultural sectors as well as the construction or renovation of the water supply and sewage system. Moreover, local development should be promoted through a new regional policy approach and through dedicated reforms expected to foster the direct involvement of local communities in the management of Union funds.
- (17) The recommendations related to the immediate fiscal policy response to the pandemic can be considered to fall outside the scope of Bulgaria's RRP, notwithstanding the fact that Bulgaria has generally responded adequately and sufficiently to the immediate need to support the economy through fiscal means in 2020 and 2021, in line with the general escape clause of the Stability and Growth Pact.

Contribution to growth potential, job creation and economic, social and institutional resilience

- (18) In accordance with Article 19(3), point (c), of and Annex V, criterion 2.3, to Regulation (EU) 2021/241, the RRP is expected to have a high impact (Rating A) on strengthening the growth potential, job creation, and economic, social and institutional resilience of Bulgaria, contributing to the implementation of the European Pillar of Social Rights, including through the promotion of policies for children and youth, and on mitigating the economic and social impact of the COVID-19 crisis, thereby enhancing the economic, social and territorial cohesion and convergence within the Union.
- (19) Simulations by the Commission services show that the RRP, together with the rest of measures of the European Union Recovery Instrument, has the potential to increase the GDP of Bulgaria by 1.9% to 3% by 2026, not including the possible positive impact of structural reforms, which can be substantial. The most significant persistent positive effects on growth and productivity over the medium to long run are expected to stem from investments in decarbonisation of the economy, including the deployment of renewable energy generation and storage and increased energy efficiency, as well as from investments supporting businesses and measures expected to attract industrial investment and develop industrial ecosystems.

- (20) The set of reforms and investments presented by Bulgaria is expected to stimulate growth and increase the resilience of the economy by addressing important structural deficiencies and long-standing vulnerabilities. The measures included in the RRP to improve the business environment, including by strengthening the institutional framework and digitalisation of the public administration, judiciary and the construction sector, are expected to create significantly more favourable conditions for private investments in the country. In addition, reforms and investments in education and skills, research and innovation, decarbonisation and digitalisation as well as support for businesses, especially for SMEs in their twin transition are expected to make a significant contribution to sustainable long-term economic growth and job creation.
- (21) The RRP features significant reforms and investments to support economic, social and territorial cohesion, which contribute to the European Pillar of Social Rights. Social vulnerabilities should be mitigated through the improvement of the social support system, notably the reform of the minimum income scheme and the modernisation of long-term care for older people and people with disabilities. The envisaged measures are expected to contribute to increasing social resilience to shocks, reducing social inequalities, and creating opportunities for the most vulnerable groups to enter the labour market. Measures related to education and skills, including digital skills, should increase socioeconomic resilience by addressing the persistent and significant skills gaps and strengthening the employability and productivity of the workforce. Measures in the area of education are expected to support equal access to quality education and training and reduce drop-out rates. In addition, the measures in the area of health are expected to strengthen the responsiveness and accessibility of healthcare and contribute to improving the geographical distribution of health workers. The RRP should further contribute to reducing territorial disparities through reforms supporting a territorial, bottom-up approach as well as dedicated infrastructure investments in the water sector in regions outside of the capital city, and investments to secure better transport connections in the north of the country. Other investments in transport and digital connectivity across the country and increased availability of e-government and other administrative services in remote and sparsely populated areas are also expected to enhance territorial cohesion. Finally the reforms and investments towards decarbonisation of the economy should set the ground for investments under the Just Transition Fund to ensure that the coal regions are supported through the transition and that no one is left behind.
- (22) The RRP includes various interventions to contribute to the implementation of the European Pillar of Social Rights through the promotion of policies for children and youth. Reforms and investments are expected to improve equal access to quality education and promote participation in early childhood education, through the mandatory inclusion of four-year olds in pre-school education and promoting the personal development of young people, via the establishment of youth centres. In addition, the RRP focuses on the modernisation of schools, including by setting up science, technology, engineering, and mathematics (STEM) laboratories, which ensures continuous adaptation to current learning challenges, in particular digitalisation.

Do no significant harm

- (23) In accordance with Article 19(3), point (d), of and Annex V, criterion 2.4, to Regulation (EU) 2021/241, the RRP is expected to ensure that no measure (Rating A)

for the implementation of reforms and investments projects included in the RRP does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852 of the European Parliament and of the Council² (the principle of 'do no significant harm').

- (24) In line with Regulation (EU) 2021/241 and the 'do no significant harm' Technical Guidance adopted by the Commission (2021/C 58/01), Bulgaria has provided evidence and assurances that the measures for the implementation of reforms and investment projects included in the RRP should not lead to significant harm to any of the six environmental objectives, namely climate change mitigation, climate change adaptation, sustainable use and protection of water and marine resources, circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems. Particular attention has been paid to measures with impact on environmental objectives that warrant close scrutiny.
- (25) The RRP is expected to ensure that no significant harm is done to environmental objectives by selecting measures that either contribute substantially to an environmental objective or have no or an insignificant foreseeable impact on environmental objectives. Other measures, including broad support schemes, are designed to ensure compliance with this principle. Milestones or targets should ensure that the requirements for compliance with the principle of 'do no significant harm' are enshrined in the design of the schemes and of all stages of implementation, including during the tendering process, where applicable, and in all cases in the final outputs. For measures requiring a substantive assessment in accordance with the Commission's technical guidance, such as renewables power production, sustainable mobility and building renovations, specific milestones and targets should be established to ensure that no significant harm is done to any of the six environmental objectives. As such, 'do no significant harm' criteria should be integrated into the milestones related to the selection process for relevant projects and, where applicable, references to an exclusion list in the relevant milestones and targets.

Contribution to the green transition including biodiversity

- (26) In accordance with Article 19(3), point (e), of and Annex V, criterion 2.5, to Regulation (EU) 2021/241, the RRP contains measures that contribute to a large extent (Rating A) to the green transition, including biodiversity, or to addressing the challenges resulting therefrom. The measures supporting climate objectives account for an amount which represents 58.9% of the RRP's total allocation calculated in accordance with the methodology set out in Annex VI to that Regulation. In accordance with Article 17 of that Regulation, the RRP is consistent with the information included in the National Energy and Climate Plan 2021-2030.
- (27) In terms of contribution to the Union 2030-2050 climate and energy-related targets and the objective of climate neutrality by 2050, the RRP addresses some of the key policy challenges and contributes to attaining these objectives, while remaining effort will be needed to fully attain such objectives, in particular as Bulgaria has the highest carbon intensity in the EU, four times the EU average. The measures in the Bulgarian RRP include long-lasting reforms and investments that are expected to effectively

² Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment, and amending Regulation (EU) 2019/2088 (OJ L 198, 22.6.2020, p. 13).

contribute to the green transition. This includes reforms and investments to support the deployment of renewable energy generation and large-scale electricity storage and a clear commitment to phase out coal and lignite power generation as soon as possible and at the latest by 2038.

- (28) In addition, an investment in the electricity network infrastructure with the aim to modernise the electricity grid through the inclusion of digital tools and methods is expected to lay the basis for increased penetration of electricity from renewable sources and greater integration with neighbouring countries. The combination of reforms and investments included in the RRP are expected to deliver an additional 3.5 GW of renewable power generation and new storage facilities with 6000 MWh of usable energy. The RRP also includes measures to support the development of pilot projects enabling the introduction of green hydrogen and biogas for industrial applications and for future use in transport and for the production of electricity and heat. Substantial investments in energy renovation of public and private buildings, and street lightning are expected to increase energy efficiency. Reforms and investments are expected to make a significant contribution to advancing the decarbonisation and climate objectives as set out in the Bulgarian National Energy and Climate Plan and long-term strategy for decarbonisation. This includes binding targets for the reduction of the carbon dioxide emissions associated with electricity generation by 40% below 2019 levels, to be achieved at the latest in 2025, and legislation on decarbonisation, including a calendar for the phase-out of coal and lignite power plants and a regulatory cap on their carbon dioxide emissions applicable as of 1 January 2026. In addition, the RRP supports the shift to sustainable mobility with a reform on promoting electric mobility and with numerous investments aimed at the modernisation and digitalisation of public transport through the acquisition of a zero-emission rolling stock, the deployment of the European Rail Traffic Management System and the construction of a new segment of the metro in Sofia, which are expected to contribute to the decarbonisation of the transport sector. Road safety measures included in the RRP should contribute to making transport more sustainable by addressing transport safety and attractiveness also through reduction by half of road safety blackspots/hotspots.
- (29) The RRP also contributes to the Union's environmental policy objectives such as improving water management, promoting sustainable agriculture, and preserving biodiversity. The RRP features reforms and investments in the water supply and sewerage services, including the modernisation and digitalisation of water management and improving control of water use. The measures dedicated to protecting and restoring ecosystems and natural habitats are expected to contribute to building effective Natura 2000 management structures in the country as well as to restoring climate-related ecosystems and protecting biodiversity. Reforms and investments, including targeting the management and protection of environmental and natural resources in the area of sustainable agriculture and promoting the technological and ecological transition of the Bulgarian agricultural sector, aim to enhance the sustainable management and competitiveness of the sector in the context of the green transition. These measures should ensure a lasting impact of the Bulgarian RRP on the green transition, including on biodiversity and environmental protection.

Contribution to the digital transition

- (30) In accordance with Article 19(3), point (f), of and Annex V, criterion 2.6, to Regulation (EU) 2021/241, the RRP contains measures that contribute to a large extent (Rating A) to the digital transition or to addressing the challenges resulting from it.

The measures supporting digital objectives account for an amount which represents 25.8% of the RRP's total allocation calculated in accordance with the methodology set out in Annex VII to that Regulation.

- (31) The RRP has a strong focus on the digital transition, with measures included throughout the components, which reflects the broad and crosscutting nature of the envisaged digitalisation efforts. Significant investments and reforms in digital connectivity should increase the coverage of very high capacity networks in rural and sparsely populated areas that are lagging behind in terms of digital inclusion and create a favourable environment for the deployment of 5G networks and digital infrastructure. The RRP also includes a comprehensive package of reforms and investments aimed at supporting the development of e-government and digitalisation of the public administration and judiciary, which contributes to reducing the administrative burden on citizens and businesses and increasing the quality and effectiveness of public services in areas such as justice, health, agriculture and environment, culture, employment and social protection. The RRP also supports the digitalisation of the transport and energy sectors thus contributing to their progressive decarbonisation. As regards the private sector, the investments in the digital transformation of business processes and increased cybersecurity capabilities should contribute to improving their efficiency and productivity. Moreover, digital technologies and infrastructure are expected to enhance Bulgaria's innovation capacity, with a particular focus on green and digital technologies. In addition, several universities and research organisations should have access to ultra-fast connectivity needed to participate in European research networks.
- (32) Increasing the level of digital skills of the population is another priority supported by the RRP, including through targeted reforms and investments in the education system, such as setting up STEM laboratories in schools, and investment for upskilling and reskilling to increase employability of the workforce by enhancing digital skills.

Lasting impact

- (33) In accordance with Article 19(3), point (g), of and Annex V, criterion 2.7, to Regulation (EU) 2021/241, the RRP is expected to have a lasting impact on Bulgaria to a large extent (Rating A).
- (34) The reforms proposed in the RRP are expected to deliver long-term results and bring about lasting structural changes. In particular, the envisaged reforms that aim at fostering the green and digital transition, the comprehensive reforms in the education and training systems, and the reform of the research and innovation ecosystem are expected to have a lasting impact on Bulgaria's economy by strengthening skills for the labour market and fostering productivity and sustainable long-term growth. The reforms of healthcare, social services, including long-term care, and of the minimum income scheme are expected to lastingly improve the health care and social protection systems of Bulgaria in terms of inclusiveness, adequacy and effectiveness.
- (35) The implementation of the reforms envisaged in the RRP, notably of the reforms of the institutional framework and the rule of law, is expected to bring about structural changes to the public administration and institutions, contributing to a lasting improvement of their functioning and administrative capacity. The RRP includes key reforms of the judicial system to ensure the effectiveness of criminal investigations, including the accountability and criminal liability of the Prosecutor General, increasing the capacity to fight corruption in the judiciary as well as improvements in

the capacity of anti-corruption bodies, the integrity of public servants and the efficiency of the anti-money laundering supervisory authorities. Reform efforts should also focus on improving the governance of state-owned enterprises, increasing transparency and competition in the public procurement process, enhancing the quality of the legislative process, and strengthening audit and control mechanisms. Moreover, the RRP features reforms and investments expected to unlock the potential of e-government and digital public services and thus lastingly increasing the efficiency of the public administration. The RRP aims at enhancing the administrative capacity for strategic planning and implementation of priority policies.

- (36) The RRP contains numerous reforms and investments expected to have a lasting impact by supporting the green and digital transition, with a focus on smart and sustainable economy. Significant reforms and investments included in the RRP have the potential to contribute to the decarbonisation of the economy by supporting the increased deployment of renewable energy generation and storage, increasing energy efficiency, contributing to sustainable road and rail mobility as well as sustainable agriculture and water resources management. Investments fostering the acquisition of digital skills, the digitalisation of the public sector, businesses and research organisations and investments in digital connectivity are expected to lastingly increase the efficiency in those sectors. In addition, the plan includes investments to support businesses in the twin transition and to stimulate the smart and sustainable growth.
- (37) The lasting impact of the plan can also be enhanced through synergies between the plan and other programmes, including those financed by cohesion policy funds, in particular by addressing in a substantive manner the deeply rooted territorial challenges and by promoting a balanced development.

Monitoring and implementation

- (38) In accordance with Article 19(3), point (h), of and Annex V, criterion 2.8, to Regulation (EU) 2021/241, the arrangements proposed in the RRP are adequate (Rating A) to ensure effective monitoring and implementation of the RRP, including the envisaged timetable, milestones and targets, and the related indicators.
- (39) The National Fund Directorate of the Ministry of Finance is the body responsible for collecting and reporting data on progress and for preparing and submitting payment requests and receiving payments from the Commission. It will also act as the focal point at the national level regarding the preparation of common rules and procedures for the implementation of the Facility, for carrying out the checks and controls on the implementation of investments and reforms, including active monitoring of the progress in implementing the measures on the basis of the milestones and targets. The Central Coordination Unit Directorate of the Ministry of Finance will be responsible for monitoring the implementation of the milestones and targets of the plan, including progress on common indicators, green and digital contribution of investments etc. It is also tasked with establishing a strategic framework for information and communication activities in relation to the implementation of the plan and for administration, maintenance and upgrade of the IT systems for programmes under shared management with the EU and under the Facility. The Economic and Financial Policy Directorate of the Ministry of Finance is the authority responsible for reporting on the progress in the implementation of the milestones and targets of the plan within the European Semester cycle. The Executive Agency for the Audit of EU Funds, attached to the Ministry of Finance, is responsible for the implementation of audit and

control under the Facility. The following responsibilities also fall within the remit of the body: verification of the reliability of the data on the implementation of the milestones and the way in which they are collected; providing assurances that double funding, fraud, corruption and conflict of interest are prevented in the implementation of the plan and that the principle of sound financial management is respected.

- (40) The RRP defines milestones and targets for all reforms and investments and is consistent with the long-term objectives pursued in the plan. The proposed qualitative and quantitative indicators used for milestones and targets are sufficiently clear, robust and comprehensive to ensure that their completion can be verified and traced. The number of milestones and targets reflects the large number of measures and sub-measures to ensure the efficient monitoring and implementation of the plan. Milestones and targets are also relevant for measures already completed which are eligible pursuant to Article 17(2) of Regulation (EU) 2021/241. The satisfactory fulfillment of these milestones and targets over time is required to justify a disbursement request.
- (41) Member States should ensure that financial support under the Facility is communicated and acknowledged in line with Article 34 of Regulation (EU) 2021/241. Technical support may be requested under the Technical Support Instrument established by Regulation (EU) 2021/240 of the European Parliament and of the Council³ to assist Member States in the implementation of their RRP.

Costing

- (42) In accordance with Article 19(3), point (i), of and Annex V, criterion 2.9, to Regulation (EU) 2021/241, the justification provided in the RRP on the amount of the estimated total costs of the RRP is to a medium extent (Rating B) reasonable and plausible, is in line with the principle of cost efficiency and is commensurate to the expected national economic and social impact.
- (43) Bulgaria has provided individual estimated costs for all the measures in the RRP that will generate expenditure. Bulgaria has provided generally clear and sufficient information to justify the cost estimates associated with each of the reforms and investments in the plan, where necessary at the sub-investment level. The evidence provided by Bulgaria is sufficient to conclude that the amount of the estimated total cost of the plan is reasonable and plausible, as the amounts are appropriate and in line with the nature and type of the envisaged reforms and investments. For the majority of measures, calculations behind the cost estimates are provided, and these are for a large degree clear and understandable. For certain measures, more details could have been provided to explain how the final budget was computed. For demand-driven measures (such as investments in energy efficiency in buildings, or support programmes for businesses), a reference to the full budgetary execution, and, where appropriate, to the expected number of beneficiaries, have been included. For the majority of measures, Bulgaria has provided information on the cost of similar measures carried out in the past whenever these were available. Where this was not available, as for instance for novel projects, Bulgaria has provided price quotes or, in some cases, pricing information from publicly available sources. The estimated cost of measures included in the plan is generally consistent with similar measures, including investments funded

³ Regulation (EU) 2021/240 of the European Parliament and of the Council of 10 February 2021 establishing a Technical Support Instrument (OJ L 57, 18.2.2021, p. 1).

by other Union programmes if available. The cost estimates of the Bulgarian RRP have been reviewed by the Bulgarian Executive Agency for European Funds Audit, which stated that the cost estimates are complete, reasonable and plausible within the meaning of Regulation (EU) 2021/241, and that they do not have any other source of funding. Bulgaria provided sufficient information and evidence that the amount of the estimated total costs of the RRP to be financed under the Facility is not covered by existing or planned Union financing. Finally, the estimated total costs of the RRP is in line with the principle of cost-efficiency and is commensurate with the expected national economic and social impact.

Protection of the financial interests of the Union

- (44) In accordance with Article 19(3), point (j), of and Annex V, criterion 2.10, to Regulation (EU) 2021/241, the arrangements proposed in the RRP are adequate (Rating A) to prevent, detect and correct corruption, fraud and conflicts of interests when using the funds provided under that Regulation, and the arrangements are expected to effectively avoid double funding under that Regulation and other Union programmes. This is without prejudice to the application of other instruments and tools to promote and enforce compliance with Union law, including for preventing, detecting and correcting corruption, fraud and conflicts of interest, and for protecting the Union budget in line with Regulation (EU, Euratom) 2020/2092 of the European Parliament and of the Council⁴.
- (45) The internal control system described in the RRP is based on robust processes and structures and clearly identifies actors and their roles and responsibilities for the performance of the internal control tasks. The internal control system and other relevant arrangements, including the collection and publication of data on final recipients are expected to prevent, detect and correct corruption, fraud and conflicts of interest when using the funds under Regulation (EU) 2021/241 and to avoid double funding under that Regulation and other Union programmes. A repository system for monitoring of the implementation of the RRP is to be put in place and operational by the time of the first payment request. A milestone should ensure that the system includes, as a minimum, the following functionalities: (a) collection of data and monitoring of the achievement of milestones and targets and (b) collection, storing and ensuring access to the data required by Article 22(2) point (d)(i) to (iii) of that Regulation.
- (46) Specific measures should be implemented to ensure compliance with the rules relating to the prevention, detection and correction of fraud, conflict of interest, corruption and double financing. The RRP provides information on the administrative capacity of the bodies which will monitor, control and implement the RRP in Bulgaria, as well as those bodies that will perform audit activities. It also gives information on the legal mandate of the various bodies. In accordance with Article 20(5), point (e) of Regulation (EU) 2021/241 a milestone on the assessment of the administrative capacity of the responsible authorities and capacity needs constitutes a measure necessary for complying with Article 22 of that Regulation and should be fulfilled before the first payment request as a precondition for any disbursement under the

⁴ Regulation (EU, Euratom) 2020/2092 of the European Parliament and of the Council of 16 December 2020 on a general regime of conditionality for the protection of the Union budget (OJ L 433 I, 22.12.2020, p. 1).

Facility. In addition, a milestone should require the entry into force of the Act approving the Management and Control system and that milestone should also be fulfilled before the submission of the first payment request as a precondition for any disbursement under the Facility.

Coherence of the RRP

- (47) In accordance with Article 19(3), point (k), of and Annex V, criterion 2.11, to Regulation (EU) 2021/241, the RRP includes to a high extent (Rating A) measures for the implementation of reforms and public investment projects that represent coherent actions.
- (48) The RRP is structured around four coherent pillars supporting the recovery of the Bulgarian economy, the contribution to the green and digital transition, and the enhanced resilience towards more sustainable and inclusive growth. Each pillar is built around components including consistent packages of mutually reinforcing and complementary reforms and investments. The entry into force of reforms early in the timeline of the plan ensures a supportive environment for the realisation of investments, which in turn contributes to the objectives of the reforms. At the level of the RRP, all pillars pursue complementary objectives and represent coherent actions. The RRP does not present inconsistencies or contradictions between pillars or components. All pillars under the plan foresee measures that reinforce the effects on the green transition. Digital solutions included across the RRP, in particular, those in the transport and energy sectors, are also expected to contribute to the decarbonisation of the economy, and to promote smart, sustainable and inclusive growth. Measures to support businesses are expected to contribute to fostering the twin transition. In addition, measures contributing to an improved business environment support all investments included in the RRP, while investments and reforms in education and skills are also expected to foster the digital transition as well as research and innovation.
- (49) The need for establishing systematic complementarities with cohesion policy funding is acknowledged and examples are presented in the components. Demarcation lines are sufficiently developed and should also be taken into account for the finalisation of the partnership agreement and cohesion policy programmes.

Equality

- (50) The RRP contains measures that are expected to help Bulgaria address the challenges in the area of gender equality and equal opportunities for all, including measures targeting the personal development of young people from vulnerable groups, including Roma, the mobility and opportunities for the independent living of people with disabilities and the quality of life of older people. The RRP also includes measures aimed at promoting equal access to healthcare and education, including investments in kindergartens, with implications for the labour market participation of women. In the plan, Bulgaria commits to ensure that respect for gender equality and equality for all is safeguarded at all stages of preparation and implementation of the envisaged reforms and investments.

Security self-assessment

- (51) Bulgaria has provided a security self-assessment for investments in digital capacities and connectivity, in accordance with Article 18(4), point (g), of Regulation (EU)

2021/241. Throughout the RRP, several components include a section that explains the adherence of the measures to the Union's open strategic autonomy and security issues.

Consultation process

- (52) The RRP describes that Bulgaria has consulted a wide range of stakeholders, including social partners, regional and local authorities, civil society organisations, business community and other relevant stakeholders at the initial stages of the RRP preparation. The first draft of the RRP was subject to a public consultation which gathered over 90 positions from interested parties, which served as basis for the subsequent revisions of the RRP. Consultation at the later stages has been more targeted, involving mostly the social partners and specific sectoral representatives. To ensure ownership by the relevant actors, it is crucial to involve all local authorities and stakeholders concerned, including social partners, throughout the implementation of the investments and reforms included in the RRP.

Positive assessment

- (53) Following the positive assessment of the Commission concerning the Bulgarian RRP with the finding that the RRP satisfactorily complies with the criteria for assessment set out in Regulation (EU) 2021/241, in accordance with Article 20(2) of and Annex V to that Regulation, this Decision should set out the reforms and investment projects necessary for the implementation of the RRP, the relevant milestones, targets and indicators, and the amount made available from the Union for the implementation of the RRP in the form of non-repayable financial support.

Financial contribution

- (54) The estimated total cost of the RRP of Bulgaria is BGN 13 491 125 932, which equals EUR 6 897 903 157 on the basis of the EUR BGN ECB reference rate of 15 October 2021. As the RRP satisfactorily complies with the criteria for assessment set out in Regulation (EU) 2021/241 and, furthermore, as the amount of the estimated total costs of the RRP is higher than the maximum financial contribution available for Bulgaria, the financial contribution allocated for Bulgaria's RRP should be equal to the total amount of the financial contribution available for Bulgaria.
- (55) In accordance with Article 11(2) of Regulation (EU) 2021/241, the calculation of the maximum financial contribution for Bulgaria is to be updated by 30 June 2022. As such, in accordance with Article 23(1) of that Regulation, an amount for Bulgaria not exceeding the maximum financial contribution referred to in Article 11(1), point (a) of that Regulation should be made available now for a legal commitment by 31 December 2022. Where necessary following the update of the maximum financial contribution, the Council, on a proposal from the Commission, should amend this Decision to include the updated maximum financial contribution, calculated in accordance with Article 11(2) of that Regulation, without undue delay.
- (56) The support to be provided is to be financed from the borrowing by the Commission on behalf of the Union on the basis of Article 5 of Council Decision (EU, Euratom) 2020/2053⁵. The support should be paid in instalments once Bulgaria has satisfactorily

⁵ Council Decision (EU, Euratom) 2020/2053 of 14 December 2020 on the system of own resources of the European Union and repealing Decision 2014/335/EU, Euratom (OJ L 424, 15.12.2020, p. 1).

fulfilled the relevant milestones and targets identified in relation to the implementation of the RRP.

- (57) This Decision should be without prejudice to the outcome of any procedures relating to the award of Union funds under any Union programme other than the Facility or to procedures relating to distortions of the operation of the internal market that may be undertaken, in particular under Articles 107 and 108 of the Treaty. It does not override the requirement for Member States to notify instances of potential State aid to the Commission under Article 108 of the Treaty,

HAS ADOPTED THIS DECISION:

Article 1

Approval of the assessment of the RRP

The assessment of the RRP of Bulgaria on the basis of the criteria provided for in Article 19(3) of Regulation (EU) 2021/241 is approved. The reforms and investment projects under the RRP, the arrangements and timetable for the monitoring and implementation of the RRP, including the relevant milestones and targets, the relevant indicators relating to the fulfilment of the envisaged milestones and targets, and the arrangements for providing full access by the Commission to the underlying relevant data are set out in the Annex to this Decision.

Article 2

Financial contribution

1. The Union shall make available to Bulgaria a financial contribution in the form of non-repayable support amounting to EUR 6 267 312 124.⁶ An amount of EUR 4 636 043 337 shall be available to be legally committed by 31 December 2022. If the update provided for in Article 11(2) of Regulation (EU) 2021/241 results in an updated maximum financial contribution for Bulgaria that is equal to or more than EUR 6 267 312 124, a further amount of EUR 1 631 268 787 shall be available to be legally committed from 1 January 2023 until 31 December 2023. If the update provided for in Article 11(2) of Regulation (EU) 2021/241 results in an updated maximum financial contribution for Bulgaria that is less than EUR 6 267 312 124, the difference between the updated maximum financial contribution and the amount of 4 636 043 337 shall be available to be legally committed in accordance with the procedure set out in Article 20(8) of Regulation (EU) 2021/241 from 1 January 2023 until 31 December 2023.
2. The Union financial contribution shall be made available by the Commission to Bulgaria in instalments in accordance with the Annex to this Decision.
3. The release of instalments in accordance with the financing agreement shall be conditional on available funding and a decision by the Commission, taken in accordance with Article 24 of Regulation (EU) 2021/241, that Bulgaria has satisfactorily fulfilled the relevant milestones and targets identified in relation to the implementation of the RRP. In order to be eligible for payment, Bulgaria shall

⁶ This amount corresponds to the financial allocation after deduction of the Republic of Bulgaria's proportional share of the expenses of Article 6(2) of Regulation (EU) 2021/241, calculated in accordance with the methodology of Article 11 of that Regulation.

complete the milestones and targets no later than 31 August 2026, subject to the entry into force of the legal commitments referred to in paragraph 1.

Article 3

ANNEX

to the

Proposal for a COUNCIL IMPLEMENTING DECISION

on the approval of the assessment of the recovery and resilience plan for Bulgaria

{SWD(2022) 106 final}

ANNEX

SECTION 1: REFORMS AND INVESTMENTS UNDER THE RECOVERY AND RESILIENCE PLAN

1. Description of Reforms and Investments

A. COMPONENT 1: EDUCATION AND SKILLS

This component of the Bulgarian recovery and resilience plan aims to improve the quality and effectiveness of the education and training systems. It encompasses two reforms and four investments, covering the following areas:

- access to education: construction and renovation of educational infrastructures and youth centres across the territory, implementation of distance and hybrid forms of learning, and the progressive inclusion of four-year-olds in the educational system;
- development of digital skills and promotion of science, technology, engineering and mathematics (STEM) fields in Bulgarian schools: update of curricula and construction of STEM centres, including school laboratories;
- skills relevance and adult learning: reform of the regulatory frameworks for higher and vocational education and training and development of an online platform for adult learning linked to the public employment services.

The component contributes to addressing the challenges identified in the country-specific recommendations to improve employability by enhancing skills, including digital skills and to improve equal access and increase the quality, labour market relevance and inclusiveness of education and training (country-specific recommendation 4 from 2019 and 2 from 2020).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

A.1. Description of the reforms and investments for non-repayable financial support

Reform 1 (C1.R1): Reform in preschool and school education and lifelong learning

The objective of this reform is to increase quality and access to education and training. The reform consists of the entry into force of a legislative package, which shall include:

1. amendments to the Preschool and School Education Act, including secondary legislation. The amendments shall introduce: revisions to curricula, with a focus on science, technology, engineering and mathematics (STEM) subjects; additional hybrid forms of learning, combining in-presence and distance options; as well as the mandatory inclusion of four-years-old in preschool education, which shall be implemented progressively and completed by the school year 2023/2024;

2. amendments to the Employment Promotion Act, which shall expand eligibility for trainings participation and introduce new options for trainings and for the validation of competencies;
3. amendments to the regulatory framework for vocational education and training (VET), which shall introduce changes to the list of professions for VET and their programmes, in accordance with the needs of professional competences, including in the green and digital sectors.

The reform shall also include the adoption of an action plan containing the measures addressing the recommendations of the Strategic Framework for the Development of Education, Training and Learning in the Republic of Bulgaria (2021-2030). This Strategic Framework shall set out the priorities for the development of the Bulgarian education system until 2030 and provide recommendations, with a particular focus on access to quality education for vulnerable groups, including Roma;

The implementation of the reform shall be completed by 30 September 2023.

Reform 2 (C1.R2): Higher education reform

The objective of the reform is to enhance the effectiveness of higher education across the territory of Bulgaria.

The reform includes:

1. the entry into force of the amendments to the Higher Education Act. The amendments shall include the introduction of fees exemption for students who sign a traineeship agreement with an employer; new programmes targeting sectors with expected labour market shortages; as well as an updated system of accreditation of higher education institutions;
2. the adoption of the National Map of Higher Education, which shall provide an analysis of the offer of higher education and resources available across the territory;
3. the adoption of an action plan containing the measures addressing the recommendations of the Strategy for the Development of Higher Education in the Republic of Bulgaria 2021-2030. The Strategy shall set key objectives and make recommendations to foster access to quality higher education, increase the labour market relevance of higher education and promote research, including via the development of international research networks.

The implementation of the reform shall be completed by 31 December 2022.

Investment 1 (C1.I1): STEM centres and innovation in education

This investment complements reform 1 ‘Reform in preschool and school education and lifelong learning’. The objective of the investment is to modernise teaching tools and enhance the learning in the fields of science, technology, engineering and math (STEM) subjects in Bulgarian schools, via the construction and/or refurbishment of a national and three regional STEM centres, as well as the establishment of more STEM laboratories in schools, including high-tech classrooms, which are expected to complement the measures of the national programme “Construction of School STEM environment”.

STEM laboratories in schools, including high-tech classrooms are expected to promote digital literacy and enhance teaching methods of STEM subjects. The national STEM centre is expected to act as a centralised unit that develops content, tools and methodologies to support the trainings of both teachers and students. The

three regional centers are expected to support the trainings of the teachers and the students, as well as organise conferences, congresses and seminars.

The implementation of the investment shall be completed by 30 June 2026.

Investment 2 (C1.I2): Modernisation of educational infrastructures

This investment complements reform 1 ‘Reform in preschool and school education and lifelong learning’. The investment shall consist of the construction and renovation of educational facilities. These educational facilities shall encompass kindergartens, schools, including vocational upper secondary schools, student dormitories and university campuses.

The locations of the newly built educational infrastructures and the existing educational infrastructures to be renovated shall be selected on the basis of objective criteria, notably national priorities stated in National Strategies, and, where relevant, analysis of the educational needs across the territory and other relevant documents, such as Maps and Methodologies adopted by the Ministry of Education and Science.

The implementation of the investment shall be completed by 30 June 2026.

Investment 3 (C1.I3): Provision of digital skills trainings and set-up of a platform for adult learning

This investment complements reform 1 ‘Reform in preschool and school education and lifelong learning’. The objective of the investment is to improve the up- and re-skilling of the workforce, with a focus on digital skills. This shall be achieved by establishing a digital platform and electronic resources, to promote the uptake of distance learning for adults. The investment shall consist of two parts:

1. Sub-investment 1: platform for e-learning for adults

The platform for e-learning for adults shall offer access to online courses and learning resources. To cover the needs of the population with low digital skills and the lack of internet connection, this sub-investment shall also include the establishment of a network of digital clubs throughout the country and equipped with laptops and staffed, thus enabling users to access the digital platform for adult learning free of charge. Digital clubs shall be located in existing infrastructures, such as administrative buildings, regional information centers, libraries, and Labour Office Directorates.

2. Sub-investment 2: Training on digital skills

The second sub-investment shall cover the provision of trainings for digital skills. The trainings shall be free of charge and cover basic and medium digital skills, consistent with the European Digital Competences Framework DigComp2.1, for unemployed and for employed people. The successful completion of the training shall be testified by a certificate.

The implementation of the investment shall be completed by 30 June 2026.

Investment 4 (C1.I4): Youth centres

The objective of the investment is to foster young people’s skills, encompassing digital, entrepreneurial and financial literacy, in order to promote social inclusion and employability of young people, encompassing those from vulnerable groups, including Roma. This investment shall include:

- the construction of youth centres across the territory. The locations of the youth centres shall encompass district and non-district cities and shall be selected on the basis of relevant criteria, in particular, youth unemployment and share of young people from vulnerable groups, including Roma;
- the establishment and construction of a national focus centre, which is expected to coordinate the activities and set out the objectives of the youth centres.

The implementation of the investment shall be completed by 30 June 2026.

A.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

Seq N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
1	C1.R1: Reform in preschool and school education and lifelong learning	Milestone	Entry into force of the amendments to the Pre-school and School Education Act and to secondary legislation.	Provision in the law indicating the entry into force of the amendments to the Pre-school and School Education Act and to secondary legislation				Q4	2020	The amendments to the Preschool and School Education Act and to secondary legislation shall include: <ul style="list-style-type: none"> - the update of the STEM core curricula and syllabus as follows: introduction of new IT skills (encoding) in classes five-seven; increase in mathematics hours in classes five-seven; increase in geography and economics hours in class six; - additional distance learning opportunities, including hybrid forms of learning combining in-presence and online learning; - the inclusion of four-year-olds in the mandatory preschool programme. The amendment shall provide for a gradual phase-in of the mandatory inclusion which shall be completed no later than for the school year 2023/2024.
2	C1.R1: Reform in preschool and school education and lifelong learning	Milestone	Entry into force of the amendments to the Employment Promotion Act	Provision in the law indicating the entry into force of the amendments to the Employment Promotion Act				Q4	2022	The amendments to the Employment Promotion Act shall: <ul style="list-style-type: none"> - introduce the possibility of combining vocational training with participation in a training course for persons over 16 years of age; - introduce the option of validating professional skills and key competences acquired through non-formal learning or self-learning; - Increase the flexibility of training opportunities, including by increasing the offer of online trainings.
3	C1.R1: Reform in preschool and school education and lifelong learning	Milestone	Action Plan for the implementation of the Strategic Framework for the Development of Education, Training and Learning in the Republic of Bulgaria (2021-2030)	Adoption by the Council of Ministers				Q4	2022	The action plan for the implementation of the Strategic Framework for the Development of Education, Training and Learning in the Republic of Bulgaria (2021-2030) shall formulate measures and actions, including their timeline, to address the objectives of the Strategic Framework. <p>The objectives of the Strategic Framework shall include:</p> <ul style="list-style-type: none"> - better access to quality education for children

Number	0	19500	Q2	2026	19500 young people (under 29), encompassing those from vulnerable groups, including Roma, shall register in at least one of the activities of the youth centres, including trainings or group counselling. In addition, 4700 young people, included in the target of 19500, shall have successfully completed an examination of digital competence after participating in trainings at the youth centers.

B. COMPONENT 2: RESEARCH AND INNOVATION

The Research and Innovation component of the Bulgarian RRP contains measures aimed at improving the innovation output of Bulgaria, thus spurring its economic growth in the medium and long term. The component contains a reform that aims to highlight research and innovation as a clear priority of the country's future development and pooling national and EU resources in order to overcome the current fragmentation of the ecosystem. The key elements of the reform are: the establishment of a new Ministry for Innovation and Growth, replacing the State Agency for Research and Innovation, as well as the adoption of a Research and Innovation Act. The component further includes investments to foster the research and innovation performance of public research institutions and innovative business. The investments introduce new financing channels to support research and innovation activities and enhance the innovation capacity of the Bulgarian Academy of Sciences.

The measures included in the component contribute to addressing country-specific recommendation 3 of 2019 ('Focus investment-related economic policy on research and innovation') and country-specific recommendation 3 of 2020 ('Streamline and accelerate the procedures to provide effective support to small and medium-sized enterprises and self-employed').

B.1. Description of the reforms and investments for non-repayable financial support

Reform 1 (C2.R1): Common policy for the development of research and innovation.

The objective of the reform is to foster an efficient policy coordination in all phases of research and innovation and to spur the Bulgarian innovation outcome. This will be done through the creation of a research and innovation ecosystem that ensures close links between academia and the business sectors.

The reform shall include the following elements:

- Entry into force of the Research and Innovation Act and related legislative acts;

The Research and Innovation Act shall:

- define the legislative parameters of the national policy for the development and financing of research and innovation;
- regulate the role and responsibilities of each of the institutions involved in the process of policy design, implementation, monitoring and evaluation in the field of research and innovation;
- regulate technology transfer activities;
- amend the legislation on intellectual property rights, building on the recommendations of the World Bank received in the country report on

knowledge transfer,¹ as well as on the recommendations of the Joint Research Centre.²

The preparation of the Act shall be carried out with the involvement of the relevant ministries, agencies, and stakeholders, including higher education institutions and representatives of the private sector.

- Establishment of the Innovation Board;

The Innovation Board shall be an advisory body to the Ministry of Education and Science and the Ministry of Innovation and Growth, co-chaired by the two ministers.

The members of the Innovation Board shall be selected among Bulgarian and international scientists and business representatives. The Board shall include at least 17 representatives of the business sector. They shall be selected based on a transparent procedure and appointed for a period of at least 5 years.

The Innovation Board shall be permanent and meet at least 6 times a year. It shall advise the Ministry of Education and Science and the Ministry of Innovation and Growth on all the matters related to the research and innovation policy.

The implementation of this reform shall be completed by 30 September 2023.

Investment 1 (C2.I1): Programme to accelerate economic recovery and transformation through research and innovation

The investment's objective is to enhance Bulgaria's research and innovation performance and the effectiveness of technology transfer and foster information-sharing among research universities in Bulgaria; the investment consists of putting in place an effective financing system of research and innovation activities that rewards project proposals by innovative small and medium enterprises and higher education institutions.

The investment shall include the following activities:

- Financing of 38 projects by Bulgarian small and medium enterprises which have been awarded the quality label "Seal of Excellence" under Horizon Europe;
- Financing of 10 projects by Bulgarian higher education institutions which were given a high "above the threshold" evaluation (i.e. above 10 points) by the European Commission, but did not receive European budget funding in the area "Widening Participation and Spreading Excellence" of FP Horizon Europe;
- Financing for two European Research Area (ERA) Chairs;

¹ 'Enhancing the Contribution of Bulgaria's Public Research to Innovation: A Survey-based Diagnostic BULGARIA COUNTRY NOTE', The World Bank, 2020.

² 'Strategic Evaluation of the Bulgarian Centres of Competence and Centres of Excellence and Recommendations for their Further Development', European Commission Joint Research Centre, 2021.

- Funding the implementation of innovation programmes by nine research higher education institutions in Bulgaria.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects shall

- exclude the following list of activities and assets: (i) activities and assets related to fossil fuels, including downstream use³; (ii) activities and assets under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks⁴; (iii) activities and assets related to waste landfills, incinerators⁵ and mechanical biological treatment plants⁶; and (iv) activities and assets where the long-term disposal of waste may cause harm to the environment; and
- require that only activities and assets that comply with relevant EU and national environmental legislation may be selected.

The implementation of this investment shall be completed by 30 June 2026.

Investment 2 (C2.I2): Enhancing the innovation capacity of the Bulgarian Academy of Sciences

The investment aims to enhance the innovation capacity of the Bulgarian Academy of Sciences (BAS). The investment includes projects to:

- modernise the physical and digital infrastructure of BAS and in particular to renovate two buildings;
- restore the infrastructure at 14 BAS locations, upgrade the Joint Innovation Centre;
- install fibre connectivity and deploy a Euro Quantum Communication Infrastructure (QCI) network.

Furthermore, it includes the financing of research projects to enhance the innovation output of BAS, with a particular focus in the field of green and digital technologies.

³ Except projects in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01).

⁴ Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible shall be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

⁵ This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

⁶ This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects shall

- exclude the following list of activities and assets: (i) activities and assets related to fossil fuels, including downstream use⁷; (ii) activities and assets under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks⁸; (iii) activities and assets related to waste landfills, incinerators⁹ and mechanical biological treatment plants¹⁰; and (iv) activities and assets where the long-term disposal of waste may cause harm to the environment; and
- require that only activities and assets that comply with relevant EU and national environmental legislation may be selected.

The implementation of this investment shall be completed by 30 June 2026.

B.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

⁷ Except projects in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01).

⁸ Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible shall be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

⁹ This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

¹⁰ This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

C. COMPONENT 3: SMART INDUSTRY

The Smart Industry component of the recovery and resilience plan of Bulgaria aims to create favorable conditions and providing incentives for private investment in Bulgaria. In particular, the component aims to attract industrial investments and developing industrial ecosystems and supporting small and medium-sized enterprises (SMEs) and mid-capitalisation companies (mid-caps) in modernising their technology and in transitioning to green, circular and digital-oriented business practices.

The measures included in the component contribute towards addressing country-specific recommendation 3 of 2019 ('Focus investment-related economic policy on research and innovation, [...] and improving the business environment') and country-specific recommendation 3 of 2020 ('Streamline and accelerate the procedures to provide effective support to small and medium-sized enterprises and self-employed, also ensuring their continued access to finance and flexible payment arrangements' [...] Focus investment on the green and digital transition, in particular on clean and efficient production and use of energy and resource).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

C.1. Description of the reforms and investments for non-repayable financial support

- Reform 1 (C3.R1): A legal framework to attract industrial investment and develop industrial ecosystems

The objective of the reform is to create favourable conditions for entrepreneurs, investors and research institutions in industrial parks by establishing a framework for the development of industrial ecosystems.

This shall be achieved by the entry into force of the Industrial Parks Act, which shall regulate possible state support and incentives to attract investment in industrial parks; provide for a reduction of the procedures required for industrial investment; and set the minimum standards for industrial park investments to benefit from state support.

The implementation of this reform shall be completed by 31 March 2021.

- Investment 1 (C3.I1): Public support programme for the development of industrial districts, parks and similar territories and attracting investments ("AttractInvestBG")

The objective of this investment is to boost economic growth, create new jobs and increase the country's export capacity by creating favourable conditions for the investors in the industrial parks. The investment is building on Reform 1.

The investment shall consist of a grant scheme for the provision of the physical, research and digital infrastructure in the industrial parks.

The Ministry of Innovation and Growth shall select a minimum of five industrial parks or zones (new, under construction or existing) and their operators for support through grants. The selection shall be carried out on the basis of a public, open and competitive process, on the basis of clear criteria for selection established beforehand. The expected economic and employment impact of each park/zone (based on an analysis) shall be included among the main criteria for the selection.

Potential operators that apply for the grants shall include in their applications a development strategy and business plan for the industrial park/zone, including among the selection criteria analyses on:

- The expected economic and employment impact of each park/zone, including the direct impact and the impact at regional or national level;
- the businesses already established or expected to establish themselves in the park/zone, based on clear analysis;
- the infrastructural works envisaged for each park/zone, both internal and external, with a provisional budget.

In the preparation of their applications, the potential operators are expected to consult the responsible authority of the area where the industrial park/zone is located (municipality, region, other).

The grant shall support infrastructure that shall be made available to all the park/zone tenants and comprises technical infrastructure (such as roads, water and sewage), as well as green and innovative common internal infrastructure (such as solar stations or buildings for laboratories to be refurbished by the industrial park/zone tenants).

The eligibility criteria shall require the operators carrying out the construction to ensure that at least 70 % (by weight) of the non-hazardous construction and demolition waste from the construction (excluding naturally occurring material defined in category 17 05 04 in the European List of Waste established by Commission Decision 2000/532/EC) generated on the construction site will be prepared for re-use, recycling and other material recovery, including backfilling operations using waste to substitute other materials, in accordance with the waste hierarchy and the EU Construction and Demolition Waste Management Protocol. The potential operator shall limit waste generation during construction, in accordance with the EU Construction and Demolition Waste Management Protocol and taking into account best available techniques and facilitate re-use and high-quality recycling by selective removal of materials, using available sorting systems for construction waste.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects shall

- exclude the following list of activities and assets: (i) activities and assets related to fossil fuels, including downstream use¹¹; (ii) activities and assets under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions

¹¹ Except projects in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01).

that are not lower than the relevant benchmarks¹²; (iii) activities and assets related to waste landfills, incinerators¹³ and mechanical biological treatment plants¹⁴; and (iv) activities and assets where the long-term disposal of waste may cause harm to the environment; and

- require that only activities and assets that comply with relevant EU and national environmental legislation may be selected.

The implementation of this investment shall be completed by 30 June 2026.

Investment 2 (C3.I2): Economic Transformation Programme

The objective of the Economic Transformation Programme is to support the innovation and growth of Bulgarian businesses, in particular by fostering their green and digital transition.

The programme shall support Bulgarian small and medium-sized enterprises and mid-caps through financial instruments and grants. The programme shall consist of three funds:

Fund 1 - Growth and Innovation;

Fund 2 - Green Transition and Circular Economy;

Fund 3 - Climate Neutrality and Digital Transformation.

Fund 1 shall be composed of the following instruments:

- o Investment 2.1.a - Guarantee instrument for growth

The guarantee instrument shall be implemented as a contribution to InvestEU with the European Investment Fund (EIF) as an implementing partner. By providing a portfolio guarantee, the instrument aims to alleviate the challenges faced by businesses in obtaining credit finance to quickly recover from the COVID-19 crisis and create opportunities for business expansion to achieve growth and sustainable development. The guarantee instrument shall target SMEs and small mid-caps and shall cover various financial products, including working capital funds, including revolving credit lines, investment loans, and leasing.

¹² Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible shall be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

¹³ This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

¹⁴ This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

To ensure that the investment complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the contribution agreement between the European Commission and the Bulgarian Government shall

- require the application of the Commission’s technical guidance on sustainability proofing for the InvestEU Fund; and
- exclude the following list of activities and assets from eligibility: (i) activities and assets related to fossil fuels, including downstream use¹⁵; (ii) activities and assets under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks¹⁶.

The implementation of this investment shall be completed by 31 December 2024 when the InvestEU Investment Committee approves finance or investment operations amounting to 100% of the total amount of finance or investment targeted.

o Investment 2.1.b - Equity instruments for growth

The objective of this measure is to alleviate the long-lasting economic negative impact of the COVID-19 crisis on Bulgarian undertakings. Equity growth instruments, including venture capital funds, growth funds, mezzanine funds, redemption funds and private debt funds, will be provided to SMEs and mid-caps.

The equity instruments shall be implemented by the EIF as a financial partner (implementing partner) through a direct award to the EIF by a dedicated RRF funding agreement to be signed between the Republic of Bulgaria and the EIF for the management of the RRF supported equity operations.

For general purpose corporate finance instruments, the investment policy shall:

- be adopted by the governing bodies of the financial instrument;
- be in line with the Commission’s Guidance Note of 22 January 2021 (SWD(2021) 12 final) related to financial instruments;
- include selection criteria to ensure compliance with the “Do no significant harm” Technical Guidance (2021/C58/01) of supported transactions under this measure
 - o through the use of sustainability proofing;
 - o by requiring that beneficiaries that derived more than 50% of their direct revenues during the preceding financial year from activities or assets on the following list of activities to adopt and publish green transition plans: (i) activities related to fossil fuels, including downstream use¹⁷; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks¹⁸;

¹⁵ Except projects in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01).

¹⁶ Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible shall be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

¹⁷ Except projects in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01).

¹⁸ Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible shall be provided. Benchmarks

- (iii) activities related to waste landfills, incinerators¹⁹ and mechanical biological treatment plants²⁰; and (iv) activities where the long-term disposal of waste may cause harm to the environment. This requirement could be implemented, for example, by relying on the EIF's new restricted sectors (non-infra equity Funds – Paris alignment framework), adjusted by certain additional restrictions on ETS sectors and certain transport activities; and
- by requiring the verification of legal compliance with the relevant EU and national environmental legislation of the beneficiary by the EIF for all transactions, including those exempted from sustainability proofing.

The implementation of this investment shall be completed by 30 June 2026 (approval of operations by the responsible Investment Committee amounting to 100% of the overall amount of financing allocated to equity instruments for Growth).

○ Investment 2.1.c - Grant scheme for technological modernisation

The objective of this measure is to increase the efficiency of production processes, achieve higher productivity, reduce production costs and optimise the production chain by providing grants to SMEs.

The Ministry of Innovation and Growth shall ensure that an effective management and control system is implemented at administrator level and shall be able to take corrective action whenever necessary, including by performing sample checks at company level, while the administrator shall monitor and report regularly on the progress of the project implementation in accordance with all the respective conditions.

In order to ensure that the measure complies with the 'Do no significant harm' Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects shall

- exclude the following list of activities and assets: (i) activities and assets related to fossil fuels, including downstream use²¹; (ii) activities and assets under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks²²; (iii) activities and

established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

¹⁹ This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

²⁰ This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

²¹ Except projects in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the 'Do no significant harm' Technical Guidance (2021/C58/01).

²² Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible shall be provided. Benchmarks

assets related to waste landfills, incinerators²³ and mechanical biological treatment plants²⁴; and (iv) activities and assets where the long-term disposal of waste may cause harm to the environment; and

- require that only activities and assets that comply with relevant EU and national environmental legislation may be selected.

The implementation of this investment shall be completed by 30 September 2024.

o Investment 2.1.d - Grant scheme for information and communication technology solutions and cybersecurity in small and medium enterprises

The investment consists of a grant scheme that aims to support the deployment of digital technologies in SMEs, reaching the first level “computerisation” and the second level “connectivity” of digitalisation to ensure they satisfy the basic requirements, including with respect to cybersecurity measures, for the uptake of Industry 4.0 and the transition to higher levels of digital transformation.

The Ministry of Innovation and Growth shall ensure that an effective management and control system is implemented at administrator level and shall be able to take corrective action whenever necessary, including by performing sample checks at SME level, while the administrator shall monitor and report regularly on the progress of the project implementation in accordance with all the respective conditions.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects shall

- exclude the following list of activities and assets: activities and assets related to fossil fuels, including downstream use²⁵; (ii) activities and assets under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks²⁶; (iii) activities and assets related to waste landfills, incinerators²⁷ and mechanical biological treatment

established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

²³ This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

²⁴ This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

²⁵ Except projects in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01).

²⁶ Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible shall be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

²⁷ This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration

- plants²⁸; and (iv) activities and assets where the long-term disposal of waste may cause harm to the environment; and
- require that only activities and assets that comply with relevant EU and national environmental legislation may be selected.

The implementation of this investment shall be completed by 31 December 2024.

o Investment 2.1.e - Innovation pool (equity instruments for innovation)

The investment consists of setting up a Fund to implement equity instruments for innovation with the objective to increase the innovation capacity of companies, accelerate their productivity improvements and the transition to a knowledge economy. The equity instruments shall include venture capital funds, technology transfer funds, seed and social impact funds.

The equity instruments shall be implemented by the EIF as a financial partner (implementing partner) through a direct award to the EIF by a dedicated RRF funding agreement to be signed between the Republic of Bulgaria and the EIF for the management of the RRF supported equity operations.

For general purpose corporate finance instruments, the investment policy shall:

- be adopted by the governing bodies of the financial instrument;
- be in line with the Commission's Guidance Note of 22 January 2021 (SWD(2021) 12 final) related to financial instruments;
- include selection criteria to ensure compliance with the "Do no significant harm" Technical Guidance (2021/C58/01) of supported transactions under this measure
 - o through the use of sustainability proofing;
 - o by requiring that beneficiaries that derived more than 50% of their direct revenues during the preceding financial year from activities or assets on the following list of activities to adopt and publish green transition plans: (i) activities related to fossil fuels, including downstream use²⁹; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks³⁰; (iii) activities related to waste landfills, incinerators³¹ and mechanical

ashes, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

²⁸ This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

²⁹ Except projects in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the 'Do no significant harm' Technical Guidance (2021/C58/01).

³⁰ Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible shall be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

³¹ This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of

- biological treatment plants³²; and (iv) activities where the long-term disposal of waste may cause harm to the environment. This requirement could be implemented, for example, by relying on the EIF's new restricted sectors (non-infra equity Funds – Paris alignment framework), adjusted by certain additional restrictions on ETS sectors and certain transport activities; and
- by requiring the verification of legal compliance with the relevant EU and national environmental legislation of the beneficiary by the EIF for all transactions, including those exempted from sustainability proofing.

The implementation of this investment shall be completed by 30 June 2026 (approval of operations by the responsible Investment Committee amounting to 100% of the overall amount of financing allocated to equity instruments for Innovation).

Fund 2 is composed of the following instruments:

- Investment 2.2.a. - Grant scheme for investments in renewable electricity sources for own use with local storage facilities

This scheme aims at promoting the green transition in the private sector. The scheme shall provide grants for investments for combining renewable electricity sources for own use with local storage facilities. Projects shall be in compliance with intervention field 033 of Annex VII to the RRF Regulation. At least 50% of the value of the project shall be co-financed by the beneficiary.

The Ministry of Innovation and Growth shall ensure that an effective management and control system is implemented at administrator level and shall be able to take corrective action whenever necessary, including by performing sample checks at company level, while the administrator shall monitor and report regularly on the progress of the project implementation in accordance with all the respective conditions.

In order to ensure that the measure complies with the 'Do no significant harm' Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects shall

- exclude the following list of activities and assets: activities and assets related to fossil fuels, including downstream use³³; (ii) activities and assets under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks³⁴; (iii) activities and assets

increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

³² This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

³³ Except projects in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the 'Do no significant harm' Technical Guidance (2021/C58/01).

³⁴ Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible shall be provided. Benchmarks

related to waste landfills, incinerators³⁵ and mechanical biological treatment plants³⁶; and (iv) activities and assets where the long-term disposal of waste may cause harm to the environment; and

- require that only activities and assets that comply with relevant EU and national environmental legislation may be selected.

The implementation of this investment shall be completed by 30 March 2026.

o Investment 2.2.b. - Guarantee instrument for energy efficiency and renewable energy

The guarantee instrument shall be implemented as a contribution to InvestEU with the EIF as an implementing partner. The instrument aims to address Bulgaria's challenges in providing support for investments in energy efficiency and renewable energy. The guarantee instrument shall target SMEs, small mid-cap companies and individuals. It is intended to cover a wide range of financial products (e.g. working funds, including revolving credit lines, investment loans, leasing). The sectors to be supported shall be in line with the Regulation (EU) 2021/241 and the eligibility criteria of InvestEU and will be defined following a detailed market assessment.

To ensure that the sub-investment complies with the 'Do no significant harm' Technical Guidance (2021/C58/01), the contribution agreement between the European Commission and the Bulgarian Government shall

- require the application of the Commission's technical guidance on sustainability proofing for the InvestEU Fund; and
- exclude the following list of activities and assets from eligibility: (i) activities and assets related to fossil fuels, including downstream use³⁷; (ii) activities and assets under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks³⁸.

The implementation of this investment shall be completed by 30 June 2024, when the InvestEU Investment Committee approves finance or investment operations amounting to 100% of the total amount of finance or investment targeted.

established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

³⁵ This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

³⁶ This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

³⁷ Except projects in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the 'Do no significant harm' Technical Guidance (2021/C58/01).

³⁸ Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible shall be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

- Investment 2.2.c - grant scheme for the support of businesses in the transition to a circular economy

The main objective of this scheme is to support manufacturing businesses in the transition to a circular economy by introducing circular production and consumption patterns, environmental standardisation and promotion of waste recycling and reuse technologies, repair and the use of bio-based products.

Projects shall be in compliance with intervention fields 047 and 047bis of Annex VII to the Regulation (EU) 2021/241. At least 50% of the value of the project shall be co-financed by the beneficiary.

The Ministry of Innovation and Growth shall ensure that an effective management and control system is implemented at administrator level and shall be able to take corrective action whenever necessary, including by performing sample checks at company level, while the administrator shall monitor and report regularly on the progress of the project implementation in accordance with all the respective conditions.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects shall

- exclude the following list of activities and assets: activities and assets related to fossil fuels, including downstream use³⁹; (ii) activities and assets under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks⁴⁰; (iii) activities and assets related to waste landfills, incinerators⁴¹ and mechanical biological treatment plants⁴²; and (iv) activities and assets where the long-term disposal of waste may cause harm to the environment; and
- require that only activities and assets that comply with relevant EU and national environmental legislation may be selected.

The implementation of this investment shall be completed by 31 December 2025.

³⁹ Except projects in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01).

⁴⁰ Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible shall be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

⁴¹ This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

⁴² This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

Fund 3 is composed of the following instrument:

- Investment 2.3.a Equity instruments for climate neutrality and digital transformation investments

The instruments aim at investing in assets that contribute to climate neutrality and accelerate the green and digital transition in priority sectors in Bulgaria. This shall be carried out by supporting the creation of infrastructure assets (renewables, biomass, storage, recharging infrastructure for electric vehicles, hydrogen), digital infrastructure (ICT, optical infrastructure, data centres, 5G), urban regeneration, energy efficiency and social infrastructure.

The equity instruments shall be implemented by the European Investment Fund (EIF) as a financial partner (implementing partner) through a direct award to the EIF by a dedicated RRF funding agreement to be signed between the Republic of Bulgaria and the EIF for the RRF supported equity operation.

For general purpose corporate finance instruments, the investment policy shall:

- be adopted by the governing bodies of the financial instrument;
- be in line with the Commission's Guidance Note of 22 January 2021 (SWD(2021) 12 final) related to financial instruments;
- include selection criteria to ensure compliance with the "Do no significant harm" Technical Guidance (2021/C58/01) of supported transactions under this measure through the use of sustainability proofing;
- require that beneficiaries that derived more than 50% of their direct revenues during the preceding financial year from activities or assets on the following list of activities to adopt and publish green transition plans: (i) activities related to fossil fuels, including downstream use⁴³; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks⁴⁴; (iii) activities related to waste landfills, incinerators⁴⁵ and mechanical biological treatment plants⁴⁶; and (iv) activities where the long-term disposal of waste may cause harm to the environment. This requirement could be implemented, for example, by relying on the EIF's new restricted sectors (non-infra equity Funds – Paris alignment framework), adjusted by certain additional restrictions on ETS sectors and certain transport activities; and

⁴³ Except projects in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the 'Do no significant harm' Technical Guidance (2021/C58/01).

⁴⁴ Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible shall be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

⁴⁵ This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

⁴⁶ This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

- Require the verification of legal compliance with the relevant EU and national environmental legislation of the beneficiary by the EIF for all transactions, including those exempted from sustainability proofing.

The implementation of this investment shall be completed by 30 June 2026 (approval of operations by the responsible Investment Committee amounting to 100% of the overall amount of financing allocated to equity instruments for climate neutrality and digital transformation investments).

C.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

D. COMPONENT 4: LOW-CARBON ECONOMY

This component of the recovery and resilience plan of Bulgaria addresses the challenge of decarbonising the energy sector. The Bulgarian economy is the most resource- and carbon-intensive in the EU. The intensity of greenhouse gas emissions is more than four times higher than the EU average. The energy sector is the largest emitter of greenhouse gases in Bulgaria, accounting for more than 70 % of the country's total emissions.

The objective of the component is to decarbonise the economy through a sharp increase in the use of renewables and in energy savings, investments in smart grids, interconnections and storage infrastructure, market reforms and better governance of the energy sector. In particular, the component aims to accelerate the decarbonisation of the energy sector by cutting the carbon dioxide emissions from lignite and coal fired-power plants and by facilitating the deployment of renewables and alternative energy sources (such as green hydrogen and biogas). It also aims to reduce both primary and final energy consumption with renovation of the national stock of residential and non-residential buildings, both public and private. Measures on flexibility and digitalisation of the electricity grid and increase of the crossborder interconnections capacities with the neighbouring Member states shall improve market integration. The component also aims to establish a competitive wholesale and retail markets through a gradual deregulation of electricity prices by 2025. The component includes measures improving the corporate governance of state-owned enterprises in the energy sector, in particular the Bulgarian Energy Holding ('BEH'), by separating from its structure the transmission system operators.

These investments and reforms shall support address Bulgaria's country-specific recommendations of 2019 and 2020 to "focus investment-related economic policy on [...] energy infrastructure and energy efficiency" (country-specific recommendation 3, 2019) and to "focus investment on the green and digital transition, in particular on clean and efficient production and use of energy and resources, environmental infrastructure [...], contributing to a progressive decarbonisation of the economy, including in the coal regions" (country-specific recommendation 3, 2020).

No measure in this component is expected to do significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the 'Do no significant harm' Technical Guidance (2021/C58/01).

D.1. Description of the reforms and investments for non-repayable financial support

Reform 1 (C4.R1): Establishment of a National Fund for Decarbonisation

The reform aims at establishment of the National Decarbonisation Fund and its sub-funds.

The measure consists of assessing the national energy efficiency regulatory framework by an independent expert panel to: (i) identify barriers to energy efficiency investments and provide recommendations for changes to the national

regulatory framework; (ii) identify options on the structure of the National Fund for Decarbonisation in particular on governance and operating rules; and (iii) identify potential sources for the capitalisation of the National Fund for Decarbonisation, including for technical assistance and mechanisms to use the National Fund for Decarbonisation's capital to transform from grants to financial instruments.

The law and related secondary legislation establishing the National Decarbonisation Fund and its sub-funds shall define the precise structure, governance and operating rules of the Fund.

The National Fund for Decarbonisation shall be used to offer grants and technical assistance combined with financial instruments including credit lines and guarantees and/or a combination of them. The Fund shall provide for the creation of a single point for technical assistance to applicants through one-stop-shops or similar mechanisms.

The implementation of the reform shall be completed by 30 September 2024.

Reform 2 (C4.R2): Facilitate investments in energy efficiency renovations in residential buildings

The objective of the reform is to tackle barriers to energy efficiency investments by amending the Condominium Ownership Management Act to facilitate the decision-making by owners of multi-apartment buildings; to regulate the professional management of condominium property in multi-apartment buildings; and to facilitate the application for collective loans to different financial institutions.

The amendments shall be coordinated with related changes to other pieces of primary and secondary legislation. The implementation of the measure is expected to contribute to the efficiency of energy efficiency investments in building renovation.

The implementation of the reform shall be completed by 30 September 2022.

Reform 3 (C4.R3): Definition and criteria for “energy poverty” for households

The objective of this reform is to contribute to tackle energy poverty and protect vulnerable consumers by introducing in the Energy Act and secondary legislation a definition of “energy poverty” and criteria for identifying households in energy poverty and vulnerable consumers. The reform shall take into account the criteria listed in the Directive (EU) 2019/944: low income, high expenditure of disposable income on energy and poor energy efficiency.

The implementation of the reform shall be completed by 31 December 2022.

Investment 1 (C4.I1): Support for the renovation of building stock

The objective of the measure is to improve the energy efficiency of the building stock by reducing on average by at least 30% of primary energy consumption.

The measure consists of building renovation investments split into three sub-measures: i) energy efficiency renovation of residential buildings; ii) energy efficiency renovation of non-residential buildings, including public buildings and iii)

energy efficiency renovation of non-residential buildings in manufacturing, trade and services, as well as buildings in the tourism sector.

The sub-measures under this investment are expected to be implemented in complementarity with cohesion policy investments. The demarcation shall be made at project level and a monitoring mechanism shall be in place to avoid double-funding, notably with Programme Development of Regions 2021-2027 and Programme Environment 2021-2027.

The implementation of the investment shall be completed by 30 June 2026.

Sub-measure 1: Renovation of residential buildings

The sub-measure shall consist in energy efficiency renovation in multi-apartment buildings. These type of buildings are managed in co-ownership mode in accordance with the Condominium Ownership Management Act tackled by Reform 2 in this component (C4R2). The sub-measure shall lead to the renovation of residential buildings with a total gross floor area of at least 3.6 million m².

The scheme under the sub-measure shall stipulate that renovations are, on average, expected to achieve a minimum of 30% primary energy demand savings.

Sub-measure 2: Renovation of non-residential, public buildings

The sub-measure shall consist in the financing of measures for the sustainable energy renovation of state and municipal buildings (including administrative services buildings, public service buildings in the field of culture and art and sports buildings, as well as buildings owned by the Bulgarian Academy of Sciences). The sub-measure shall lead to the renovation of non-residential buildings with a total surface area of at least 1.4 million m².

The scheme under the sub-measure shall stipulate that renovations are, on average, expected to achieve a minimum of 30% primary energy demand savings.

Sub-measure 3: Renovation of non-residential buildings in manufacturing, trade and services, as well as buildings from the tourism sector

The sub-measure shall consist in financing of measures for sustainable energy efficient renovation of buildings in the fields of manufacturing, trade and services.

The scheme under the sub-measure shall stipulate that renovations are, on average, expected to achieve a minimum of 30% primary energy demand savings.

In order to ensure that the measure complies with the 'Do no significant harm' Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects shall exclude the financing of installations covered by the European Union Emissions Trading System (EU ETS).

Investment 2 (C4.I2): Support for renewable energy for households

The objective of the measure is to increase the use of renewable energy in final energy consumption in the household sector by financing the purchase of new ‘best in class’ solar systems for domestic hot water and photovoltaic systems.

The measure consists of the financing of two types of measures for the use of renewable energy by households: i) installation of solar systems for domestic hot water supply and ii) installation of photovoltaic systems of up to 10 kWp, including electricity storage.

The investment shall support at least 10 000 households with inefficient solid fuel heat sources for their replacement by ‘best in class’ solar domestic hot water (DHW) or photovoltaic systems.

The investment shall finance the purchase of ‘best in class’ solar domestic hot water (DHW) or photovoltaic systems in compliance with the “do no significant harm” Technical Guidance (2021/C58/01).

The implementation of the investment shall be completed by 30 June 2025.

Investment 3 (C4.I3): Support for energy-efficient street lighting systems

The objective of the measure is to increase energy efficiency, reduce energy costs for outdoor artificial lighting and improve living conditions for the population in the country through technological renewal and modernisation of outdoor artificial lighting systems.

The measure consists of the reconstruction and modernisation of municipal outdoor artificial lighting systems. The investment shall aim at achieving on average at least a 30% primary energy demand reduction when comparing before and after implementation of the measure.

The implementation of the reform shall be completed by 30 June 2025.

Reform 4 (C4.R4): Boosting energy efficiency and renewable energy projects through the energy bills

The objective of the reform is to broaden the scope for implementing measures and projects to improve energy efficiency and the use of renewable energy in a context of limited financial resources.

The measure consists of amendments to the Energy Act and secondary legislation to enable the use of Energy Service Companies (ESCO) models for covering the financing for energy efficiency renovations and renewable energy installations through the energy bills.

The implementation of the reform shall be completed by 31 December 2022.

Reform 5 (C4.R5): One-stop shop for renovations

The objective of the reform is to reduce administrative burden linked to the renovation process by assisting citizens and businesses with information, technical

assistance and advice on regulatory, technical and financial issues related to their energy efficiency improvement projects.

The measure consists of the initial piloting and subsequent deployment of operational one-stop-shops in all NUTS-3 regions in the country. The one stop-shops shall integrate all the necessary information and services needed for energy renovation.

The implementation of the reform shall be completed by 31 December 2023.

Reform 6 (C4.R6): Boosting electricity generation from renewable sources

The objective of this reform is reducing the administrative burden for investments from renewable sources concerning installation, connection and operation.

Amendments to the relevant primary and/or secondary legislation, including the acts by the national regulator shall: (i) simplify licensing and permitting procedures for RES (i.e., solar and onshore wind), including energy storage facilities, ensure short and binding administrative response times and accountability procedures for unnecessary delays, reducing the grid connection timeline (for both solar and onshore wind); (ii) enable dedicated ‘go-to’ areas where onshore wind parks would be compliant with environmental legislation; (iii) simplify the procedure for renewables installations for own use up to 1 MW (e.g. rooftop PV installations for households and SMEs) by excluding from the procedure the technical approval by the distribution system operator and phase out the obligation to declare excise duty for self-generation.

In addition, amendments to the relevant primary and/or secondary legislation shall eliminate barriers, introduce a specific regulatory, and support framework for the construction, connection and operation of electricity storage facilities. This element of the reform is expected to support the implementation of investment 8 on storage.

As a result of these actions, at least 3 500 MW of additional renewable capacity (wind and solar) compared to existing installed capacity (wind and solar) shall be brought into operation and connected to the grid by 30 June 2026.

The implementation of the reform shall be completed by 30 June 2026.

Reform 7 (C4.R7): Unleashing the potential of hydrogen technologies and hydrogen production and supply

The objective of this reform is to remove key impediments identified in the roadmap for the development of the hydrogen technology and implement measures needed for the development of the whole hydrogen value chain.

The implementation of the reform shall be completed by 31 March 2023.

Investment 4 (C4.I4): Digital transformation of the electricity transmission grid

The objective of this investment is to increase the penetration of renewable energy sources, to increase flexibility in the operational management and monitoring of the electricity system and the net cross-border transmission capacity at borders with Member States (i.e., Romania and Greece).

The investment includes a comprehensive programme for the overall digital transformation of systems and processes of the Electricity System Operator covering the automated management of substations, upgrade of the supervisory control and data acquisition system (SCADA) with the introduction of remote back-up, extension and upgrade of telecommunication network, including comprehensive cybersecurity system and upgrade of the electricity markets administration systems.

As a result of those actions, the conditions and requirements for the technical feasibility of the electricity transmission system shall be met to integrate a cumulative new 4 500 MW of production capacity from renewable sources into the electricity system by 31 March 2026. Also, a cumulative 1 200 MW of additional net interconnection capacity with Romania and Greece compared to the existing available capacity shall be made available to the market by 30 June 2025.

The implementation of the investment shall be completed by 31 March 2026.

Investment 5 (C4.I6): Pilot projects for the production of green hydrogen and biogas

The objective of the investment is to contribute to decarbonising the Bulgarian energy market by providing support for the development of pilot projects to enable the production of green hydrogen and biogas. The investment shall consist of grants for the installation of: (i) green hydrogen production capacities of at least 55 MW in electrolyzers, producing at least 7 800 tonnes of hydrogen per year from renewable sources and (ii) biogas production facilities of at least 9 MW, producing at least 7 ktoe per year of biogas.

The implementation of the investment shall be completed by 31 December 2025.

Reform 8 (C4.R8): Liberalisation of the electricity market

The objective of this reform is to complete the liberalisation of the electricity markets, including wholesale and retail markets. This reform shall consist of the following elements:

- The first element aims to fully liberalise the wholesale electricity market by 2022. This element shall be implemented through amendments to the Energy Act and to the secondary legislation, which shall terminate the public supplier role for the Natsionalna Elektricheska Kompania EAD (NEK) and abolish the quotas for the regulated market. It shall also forbid long-term contracts, such as power purchase agreements, or any similar measures having the same or equivalent object or effect with the exception of those for electricity from renewable sources or concluded on the power exchange. The long term electricity purchase contracts for Maritsa East 1 and Maritsa East 3 which expire in 2024 and 2026, respectively shall not be extended and/or benefit of any new State support.
- The second element shall improve the electricity balancing market by ensuring that: (i) the balancing capacity shall be purchased on market terms; (ii) the price of balancing energy suppliers shall be published within 30 minutes after intraday market closure; (iii) a single balancing price shall be introduced for periods without balancing energy activation; (iv) a 15-minute imbalance settlement period shall be introduced; and (v) no price caps for balancing electricity shall be set.

- The third element shall liberalise the electricity retail market by providing a progressive full retail price deregulation for households, in parallel with the full ability to switch supplier. The phasing out of regulated prices for household customers shall take place in two successive stages in 2023 and 2025, respectively covering a significant share of the household market.

The amendments to the Energy Act shall be adopted by 30 September 2022, with entry in force on the same day for the measure concerning electricity wholesale market, 31 December 2022 for the measures concerning the electricity balancing market and 31 December 2023 for the measure concerning the electricity retail market.

The market coupling on the day-ahead market at the border with Romania as well as with Greece on the intraday market shall be completed by 31 December 2021 and 31 December 2022, respectively.

Investment 6 (C4.I7): Support for new capacities for electricity generation from renewable sources and electricity storage

The objective of the investment is to contribute to Bulgaria's goal to increase the share of clean energy in its energy mix towards climate neutrality by supporting the installation of new renewable power production capacity together with electricity storage through a technologically neutral competitive tender between different technologies. In order to ensure that the measure complies with the 'Do no significant harm' Technical Guidance (2021/C58/01), the eligibility criteria contained in the terms of reference for upcoming calls for projects shall refer only to solar and wind technologies.

The investment shall consist of grants for the construction of the selected installations, for installing and putting into operation of at least 1 425 MW of renewables power production capacity co-located with at least 350 MW of energy storage systems.

The implementation of the investment shall be completed by 30 June 2026.

Reform 9 (C4.R9): Roadmap to Climate Neutrality

The objective of the reform is to provide an updated strategic framework for the decarbonisation of the economy. The reform covers two main measures: the establishment of an 'Energy Transition Commission to prepare scenarios and recommendations for a roadmap to Climate Neutrality and the adoption of a parliamentary resolution.

The Commission shall be set up at expert level with broad involvement of stakeholders to ensure expertise, independence and pluralism. The Commission shall assess different scenarios for the coal/lignite phase out, including for an accelerated phase-out, in line with comparable neighbouring Member States. The scenario report and the recommendations shall be addressed to the Government and made public. The scenarios and recommendations developed shall include steps for completing the phase out of coal/lignite as soon as possible and at the latest by 2038.

The implementation of the reform shall be completed by 30 September 2022.

Reform 10 (C4.R10): Decarbonisation of the energy sector

The objective of the reform is the decarbonisation of the energy sector, with a focus on power generation. The reform covers two main measures: binding targets for the reduction of the carbon dioxide emissions associated with electricity generation by 40% below 2019 levels to be achieved in 2025, and legislation on decarbonisation, including a calendar for the phase-out of coal and lignite power plants and a regulatory cap on their carbon dioxide emissions applicable as of 1 January 2026.

Total verified emissions in 2019 for the power sector amounted to 21 182 433 tons of carbon dioxide emissions, among which the lignite and coal-fired power plants amounted to 19 437 716 tons of carbon dioxide emissions. The measure is expected to reduce the carbon dioxide emissions related to electricity generation from coal and lignite-fired power plants by at least 8 455 406 tons.

The reduction of the carbon dioxide emissions shall cover: TPP Maritsa 3 EAD, TPP Maritsa East 2 EAD, TPP Bobov dol EAD, AES-3C Maritza East 1, TPP Contour Global Maritsa East 3, TEC BRIKEL EAD, TEC Republika, TPP Russe East, and Toplofikacia Sliven.

In the implementation of the decarbonisation targets set under milestones 54-57, the authorities shall take due account of the overarching environmental performance of concerned installations, notably with regards to emissions of air pollutants such as dust and sulphur dioxide, as well as compliance with EU standards for ambient air quality in all air quality zones where the installations are located

The implementation of the reform shall be completed by 30 June 2026.

Investment 7 (C4.I9): Pilot project on combined heat and power from geothermal sources

The objective of the investment is to promote the production of renewable energy from geothermal sources by putting into operation a pilot geothermal power plant for the production of electricity and heat.

The investment shall consist in grants for the construction of the selected installations, with the objective of installing at least 10 MW of electricity and 30 MW of heat. The investment shall also provide 3D seismic mapping of deep geothermal reservoirs providing conditions for production and electricity and build a specialised laboratory at university level for research and training on combined geothermal energy system. Amendments to the regulatory framework shall remove key impediments identified in the roadmap for the development of geothermal energy as a renewable energy source, and regulate the use of geothermal energy.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects shall exclude the following list of activities: any exploration or extraction of either oil or gas and no equipment purchased or used for such purposes; support to district heating systems using fossil energy sources nor any investments in installations falling within the scope of the EU Emission Trading System (ETS). It shall be ensured, that there is no methane releases. It shall also be ensured, that the geothermal drilling would have no harmful impact on water scarcity

and water quality. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation can be selected.

The implementation of the investment shall be completed by 30 June 2026.

Investment 8 (C4.I8): National infrastructure for storage of electricity from renewables (RESTORE)

The objective of the investment is to enable a significant increase the share of renewable energy (wind and solar) in the energy mix and ensure the security, stability and readiness of the Bulgarian electricity system.

The investment shall consist of support to install and commission a national infrastructure of grid-scale electricity storage facilities with 6000 MWh of usable energy capacity. The facilities (consisting of batteries, inverters, transformers, power electronics/intelligent electronic devices and control automation) will be distributed around the territory of Bulgaria and located near renewable generating capacity. The implementation shall be carried out through open and competitive bidding processes on the basis of clear, transparent and non-discriminatory criteria. It will also contribute to the implementation of smart grids, ensuring a high degree of balancing and congestion management of the grids, which is necessary to integrate electricity generated from renewable energy.

The implementation of the investment shall be completed by 30 June 2026.

Reform 11 (C4.R11). Improving corporate governance of state-owned companies in the energy sector

The objective of the reform is to improve the transparency and competitiveness of state-owned companies in the energy sector. The measure shall consist in separation of ownership and control within the State of the two transmission systems operators for natural gas and electricity (i.e. Bulgartransgaz EAD and ESO EAD) from the corporate structure of the Bulgarian Energy Holding EAD. In addition, an independent audit report shall be submitted to the European Commission, presenting a detailed assessment on market compliance of cross subsidisation between state-owned or state-controlled energy undertakings in relation to power production from coal, if any occurred, including any transfers of capital among separate activities and among undertakings of the same group in relation to power production from coal. The report shall be submitted annually, in relation to the previous calendar year.

The implementation of the reform shall be completed by 31 March 2024.

D.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

E. COMPONENT 5: BIODIVERSITY

This component of the Bulgarian recovery and resilience plan aims at ensuring effective management of the National Ecological Network with a view to protecting and restoring ecosystems and natural habitats and species of European and national importance.

The component contributes to addressing the Country Specific Recommendation on focusing investment on the green transition, in particular on environmental infrastructure (Country Specific Recommendation 3 of 2020).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

E.1. Description of the reforms and investments for non-repayable financial support

Reform 1 (C5.R1): Establishment of the governance structure of the Natura 2000 Network

The objective of the measure is to build effective Natura 2000 management structures.

The measure consists of legislative changes, which set up structures for managing the Natura 2000 network at national and regional level and introduce requirements for developing network management plans. The legislative changes shall also introduce the requirement that all protected areas are managed on the basis of planning documents, which shall define site-specific conservation objectives and measures.

The implementation of the reform shall be completed by 30 September 2022.

Investment 1 (C5.I1): Integrating the ecosystem approach and applying nature-based solutions into the protection of Natura 2000 sites

The objective of the measure is to ensure high quality management of biodiversity and the Natura 2000 network in Bulgaria.

The measure consists of a series of actions, which include, inter alia, the development of site-specific conservation objectives and measures for Natura 2000 sites and the restoration of climate-related ecosystems through nature-based solutions as part of the management of Natura 2000.

The implementation of the investment shall be completed by 30 June 2025.

Investment 2 (C5.I2): Restoring climate key ecosystems in line with the EU Biodiversity Strategy and the objectives of the European Green Deal

The objective of the measure is to restore the carbon capture potential of ecosystems and to generate more ecosystem goods and services in Bulgaria.

The measure consists of a series of activities divided into the following strands: Ensuring the connectivity of the Natura 2000 network through the restoration of traditional landscapes and the creation of ecological corridors; Restoration of

wetlands and connectivity to rivers (rivers, wetlands, floodplains, peatlands and marshes); Increasing the percentage of protected areas, in line with the 2030 EU Biodiversity Strategy; Integration of conservation and educational measures for the conservation of native protected species and the sustainable development of zoos.

The implementation of the investment shall be completed by 31 December 2025.

E.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

F. COMPONENT 6: SUSTAINABLE AGRICULTURE

This component of the Bulgarian recovery and resilience plan aims at enhancing the sustainable management and competitiveness of the Bulgarian agricultural sector in the context of the green transition.

The component contributes to addressing the country-specific recommendations for the years 2019 and 2020 that recommend focusing investment and investment-related policies on the green transition (Country Specific Recommendation 3 of 2019 and Country Specific Recommendation 3 of 2020).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

F.1. Description of the reforms and investments for non-repayable financial support

Reform 1 (C6.R1): Updating the strategic framework of the agricultural sector

The objective of the measure is to adapt the strategic framework of the Bulgarian agricultural sector to make it compatible with the country's commitments stemming from the UN Sustainable Development Goals and the European Green Deal.

The measure consists of adopting the National Action Programme contributing to the objectives of the Farm to Fork Strategy 2030 aimed at promoting green investment, sustainable management of natural resources (water, soil, air), adaptation to and mitigation of climate change. The programme shall set out a framework for the management and protection of the environment and natural resources in the field of agriculture.

The implementation of the reform shall be completed by 30 June 2026.

Investment 1 (C6.I1): Fund to promote the technological and ecological transition of agriculture

The objective of the measure is to contribute to addressing the issues that hamper the competitiveness and sustainability of the Bulgarian agricultural sector and to accelerate the sector's adaptation to climate change, the greening of its production and its digital transformation.

The measure consists of setting up a Fund for promoting the technological and ecological transition of agriculture. The Fund shall provide support to farmers for the implementation of activities ensuring the protection of the environment and climate change mitigation, introducing innovative production and digital technologies, agricultural production and organisation technologies, the automation of work processes, the shortening of supply chains and the conservation of genetic resources. The Fund shall promote investments in four strands: 1) technological and environmental modernisation; 2) preparation centres for marketing and storage of fruit and vegetables; 3) construction/reconstruction and equipment of holdings for the rearing and evaluation of male breeding animals, including the harvesting of biological material from them and 4) effective water management on farms.

It is expected that this measure does not do significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measure and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01). In particular, the call for proposals under the Fund shall include selection criteria ensuring compliance with the 'Do no significant harm' Technical Guidance (2021/C58/01) of supported projects through the use of an exclusion list and the requirement of compliance with the relevant EU and national environmental legislation. The strand on the efficient water management on agricultural holdings shall only provide support to investments, which ensure that the impact on the water bodies is such that they are expected to retain good status after the investments taking into account the future projections of climate change impact in a range of scenarios.

The implementation of the investment shall be completed by 31 December 2025.

Investment 2 (C6.I2): Digitalisation of processes from farm to fork

The objective of the measure is to facilitate the automated data exchange between the administration and farmers with a view to ensuring a more efficient and uniform flow of data and avoiding the need for maintaining redundant document formats.

The measure consists of setting up a centralised electronic agricultural information system with several modules enabling: 1) the use of plant protection products and fertilisers by digitising logbooks for their use; 2) control of the use of antimicrobial veterinary medicinal products; 3) traceability from primary production to final consumption on the basis of a unique identifier to inform consumers and stimulate the production of quality and affordable food; 4) online training, including content of training modules and advice to farmers. The measure also includes the setting up of a communication network of field and rain sensors to provide information on soil moisture, air and soil temperature and rainfall.

The implementation of the investment shall be completed by 31 December 2025.

F.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

Seq N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target

G. COMPONENT 7: DIGITAL CONNECTIVITY

This component of the Bulgarian recovery and resilience plan contains measures that aim at building a modern and secure digital infrastructure and maximising the access to online services for citizens, enterprises, public administrations and institutions, especially in rural and remote areas.

The investments included under this component concern the large-scale deployment of digital infrastructure, the digital transformation of the Bulgarian post and delivery of complex administrative services, as well as the construction, development and optimisation of the digital TETRA system and radio relay network.

The reforms included under this component aim to contribute to the development and implementation of an effective policy and regulatory framework, the efficient use of the radio frequency spectrum for the development of 5G networks and services and the creation of a favourable investment environment.

The component supports addressing the 2019 and 2020 country-specific recommendations of the Council and will directly or indirectly contribute to addressing aspects of country-specific recommendation for 2019 and 2020. In particular, the reforms and investments included in this component contribute to strengthening “employability by reinforcing digital skills” (country-specific recommendation 4, 2019), to improving access to distance working and promoting digital skills and equal access to education (country-specific recommendation 2, 2020), and to focusing investments on the green and digital transition (country-specific recommendation 3, 2020), minimising administrative burden to companies by improving the effectiveness of public administration and reinforcing digital government (country-specific recommendation 4, 2020).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the Do No Significant Harm Technical Guidance (2021/C58/01).

G.1. Description of the reforms and investments for non-repayable financial support

Reform 1 (C7.R1): Developing and implementing an effective policy and regulatory framework

The reform shall improve the strategic, policy and regulatory framework through amendments in the Electronic Communications Act aimed at ensuring more effective, efficient and coordinated use of radio spectrum; development of the electronic communications market; maintaining conditions for effective competition; enabling the establishment and development of very high capacity networks, including 5G networks; improving the protection of citizens’ interests and the rights of end-users, including persons with disabilities.

The reform complements other past actions, such as:

- The updated National Broadband Plan for Next Generation Access “*Connected*

Bulgaria". The updated plan was adopted in August 2020, outlining national objectives and priorities at European level up to and beyond 2025;

- The strategic approach to digital transformation through the framework "*Bulgaria's Digital Transformation 2020-2030*", established in July 2020.

The implementation of this measure shall be completed by 31 December 2021.

Reform 2 (C7.R2): Efficient use of radio spectrum

The reform aims to address the challenges of 5G readiness and promote the accelerated deployment of 5G networks. The following activities are foreseen:

- Reduction of spectrum fees, effective as of 1 January 2021 (the amount of the one-off fee was reduced by 50 % and the annual fee for spectrum use by 35 %);
- Accelerated spectrum assignment process in the 700 MHz, 2.6 GHz, 3.6 GHz and 26 GHz bands.

The implementation of this measure shall be completed by 30 June 2023.

Reform 3 (C7.R3): Creating a favourable investment environment

The reform aims to address key recommendations of the Common Union Toolbox for Connectivity⁴⁷, and shall:

- Streamline the permit procedures for the construction, maintenance, equipment and/or improvement of radio transmission systems, as well as their replacement or completion by assembling or dismantling elements of the radio transmission system;
- Extend the right of accessing existing physical infrastructure controlled by public sector bodies to commercial operators where the latter have no interest in building such networks or would consider shared use as an opportunity to reduce their investment costs;

The implementation of this measure shall be completed by 30 June 2021.

Investment 1 (C7.I1): Large-scale deployment of digital infrastructure

The actions under this investment aim to:

- Develop of the state backbone network (the Single Electronic Communications Network of the State – "SECN") by increasing its transmission capacity and ensuring connectivity to all municipal centres.
- Provide ultra-fast internet connectivity for universities and research organisations.
- Support the deployment of very high capacity networks ("VHCN") in rural and sparsely populated areas.

Pillar A – Development of the State backbone network by increasing its transmission capacity and ensuring connectivity to all municipal centres

⁴⁷ https://ec.europa.eu/newsroom/dae/document.cfm?doc_id=75185

The actions under this Pillar shall upgrade the SECN of the public administration and extend the network to additional 185 municipal centres provide secure cyber-resilient communications and clean pipe internet for government and national security needs, and provide optical transfer capacity to municipal centres and settlements in “white areas” where broadband services for citizens and businesses are not available due to a “market failure”.

The implementation of this project shall enable access for providers of public interest services to broadband internet and/or data transmission in access points, in order to provide electronic services to citizens and businesses, as well as other educational, social and health services. In addition, it shall be possible to provide speeds of up to 100 Gbps for specific users such as universities and research organisations that need to connect to the European scientific network GEANT and the National Supercomputing Centre in Sofia HighTech Park.

Pillar B - Enhancing connectivity in sparsely populated, remote and rural areas

The activities under Pillar B shall support the deployment of VHCNs in sparsely populated, remote and rural areas. The investment aims at creating conditions for the deployment of VHCNs in areas with identified market failure where commercial operators would not invest due to the lack of economic viability. The action shall enable coverage for 350 000 people to have access to services with speed of at least 1Gbps.

The implementation of these measures shall be completed by 30 June 2026.

Investment 2 (C7.I2): Construction, development and optimisation of the digital TETRA system and radio relay network

This action shall achieve national coverage of the TETRA system of the Ministry of Interior, increase the number of subscribers of the system from all state institutions and improve the capacity and quality of services. The envisaged radio coverage of the TETRA communication system shall reach 90% for portable TETRA radio terminals and 95% for mobile TETRA radio terminals on the territory of Bulgaria.

The TETRA system shall be used as a unified radiocommunication system to provide a communication environment for management, interaction and coordination in the Ministry of Interior as well as other government structures responsible for crisis prevention accidents, disasters and national security issues.

The implementation of this measure shall be completed by 31 December 2024.

Investment 3 (C7.I3): Digital transformation of Bulgarian Posts and delivery of complex administrative services

The actions under this investment shall aim at: (1) the renovation of selected post offices in remote rural areas to improve their energy efficiency and create conditions for providing complex administrative and basic telemedicine services, (2) the modernisation and digital transformation of the Bulgarian Post, (3) the implementation of a pilot system for basic telemedicine diagnostic services, and (4) pilot deployment of recharging stations for electric vehicles.

Sub-measure 1: Renovation and modernisation of post offices

This sub measure shall include the renovation of 536 post offices located outside municipal centers, in small settlements with a population of more than 500 inhabitants. The renovation shall aim at improved energy efficiency of the buildings through exterior and interior modernisation and replacement of polluting and/or energy inefficient heating appliance with more efficient ones.

The implementation of this measure shall be completed by 30 June 2026.

Sub-measure 2: Modernisation and digital transformation of the Bulgarian Post

The modernisation and digital transformation of Bulgarian Post shall ensure that the Bulgarian Post provides administrative and e-government services with manned assistance in all 2100 postal offices in remote and rural areas where the public administration is not present.

This investment shall also include building a secure Software Defined Network, upgrading and unifying the computer and office equipment at all offices of the Bulgarian Post, increasing the capacity of information centres, the implementation of closed-circuit television (CCTV) systems with centralised management and control, the implementation of a traceability system for door-to-door consignments, the implementation of integrated Enterprise Resource Planning (ERP) and Customer Relationship Management (CRM) systems, and the implementation of a unified front-office services system.

Under this investment, biometric stations for Bulgarian Identity Documents (BIDs) shall be deployed in 450 settlements in post offices outside municipal centres and locations with offices of the Ministry of the Interior. The measure also envisages post office staff training.

The implementation of this measure shall be completed by 31 December 2025.

Sub-measure 3: Pilot system for telemedicine diagnostic services

This sub-measure shall include the implementation of a pilot system for basic telemedicine diagnostic services at the post offices in 450 selected remote settlements. The telemedicine terminals shall provide measurements of basic parameters (e.g. pulse, temperature, blood sugar levels etc.) and shall include a secure communication via an encrypted real-time channel for data transmission to National Health Information System and the patient electronic file and shall allow for secure communication with health service providers. Bulgarian Post officials shall receive online training for bio-assistants in order to assist customers in carrying out telediagnoses and liaising with healthcare professionals for telecounselling and access to data.

The implementation of this measure shall be completed by 31 December 2025.

Sub-measure 4: Pilot project for the construction of recharging infrastructure for electric vehicles

This activity includes a pilot project for the deployment of recharging stations for electric vehicles close to post offices in a minimum of 100 selected settlements in rural areas of tourist value. Recharging stations with a capacity of up to 22 kW DC shall be installed (one per settlement).

The implementation of this measure shall be completed by 31 December 2024.

H. COMPONENT 8: SUSTAINABLE TRANSPORT

The main objective of the component is to enhance the sustainability of the transport sector by reforming the road and railways sectors, promoting zero-emission vehicles, enhancing road safety, and investing in railways, intermodal transport and sustainable urban mobility. This includes investments in the modernisation and digitalisation of railways, new zero-emission rolling stock, European Rail Traffic Management System deployment, and clean public transport. The component is expected to contribute to the green and digital transition, as well as towards a more balanced territorial growth.

The reforms and investments Component 8 on Sustainable Transport are expected to contribute to addressing the Country-Specific Recommendations conveyed to Bulgaria in 2019 and 2020, on the need to focus investments on sustainable transport.

No measure in this component is expected to do significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

H.1. Description of the reforms and investments for non-repayable financial support

Reform 1 (C8.R1): Strategic transport framework

The reform aims at enhancing the sustainability of transport, through the update of the national strategic framework, in line with the National Development Programme Bulgaria 2030, and the definition of specific targets for its implementation.

This reform includes the following sub-measures as main areas of intervention:

1.1 Combined transport

The National Plan for the Development of Combined Transport in Bulgaria by 2030 shall be developed with the main objective of implementing a policy to stimulate and support the shift of freight to more environmentally friendly modes of transport. The plan shall include a package of targeted measures to promote more sustainable and less polluting transport, covering (1) organisational and administrative issues, (2) operational issues and support for the service, and (3) improvement of infrastructure, including terminal equipment.

The reform shall be completed by 30 June 2022.

1.2 Railways sector

The reform shall contribute to the implementation of rail transport priorities established under the National Development Programme Bulgaria 2030 and its three-year action plans.

The objective of the reform is to achieve a higher quality, wider coverage and use of passengers' railways services.

The reform shall include a review of the existing public service contracts (PSC) for the provision of rail passenger services, including a market assessment underpinning the scope of public service obligations, and the tendering of the public service contracts which expire between 2021 and Q2 2026 through a fair, non-discriminatory and competitive award procedure in line with the applicable EU legal framework at that time. This concerns in particular the passenger railways services whose new public service contract shall be signed by 31 December 2024 following a fair, open and non-discriminatory competitive award procedure.

The reform shall also result into a higher technical capacity to prepare and implement projects on the Trans-European Transport Network (TEN-T) railways network (whose level of completion is 12% at end 2021 vs the EU target of 100% by 2030), installation of European Rail Traffic Management System (ERTMS) on the TEN-T network to reach 707 km coverage by Q2 2026, increase by 15% in the total number of passengers using rail transport by the end of 2025, and reduction of journey time by railways between Bulgarian largest cities.

The reform shall be completed by 30 June 2026.

Reform 2 (C8.R2): Road safety

The objective of the reform is the improvement of road safety and reduction of victims of road accidents, as Bulgaria has one of the highest rate of road accident fatalities in the EU.

The reform includes setting up a conceptual framework for new road safety management in a single integrated strategic document for 2021-2030 and the implementation of its first action plan by 30 June 2023.

The reform shall result in the removal of at least 50% of the total number of road safety blackspots/hotspots and is expected to lead to a 30% reduction of annual deaths and serious injuries from road safety accidents by 2025 (compared to 2019).

The reform shall be completed by 31 March 2026.

Reform 3 (C8.R3): Sustainable urban mobility

The objective of the reform is to promote the sustainable urban mobility, through the use of Sustainable Urban Mobility Plans integrated into territorial strategies for the development of NUTS 2 (Nomenclature of Territorial Units for Statistics) planning regions and integrated into development municipal plans as well as the assessment of their implementation. It shall also result in 20 municipalities with approved Sustainable Urban Mobility Plans that shall be supported by a purchase of clean urban public transport zero-emission vehicles and installation of charging infrastructure.

The reform shall be completed by 30 June 2025.

Reform 4 (C8.R4): Integrated public transport

The objective of the reform is to contribute to better integration of public transport, and thereby to increase the quality, connectivity, reliability and efficiency of the transport service provided.

The reform includes the analysis of public transport system as well as the review of the existing regulatory framework. Based on the results, a new Public Transport Act shall be adopted, establishing a clear regulatory framework defining the public transport as well as the responsibilities and obligations of the entities that perform it. It shall also create the legal framework for the introduction of a single transport ticketing system at the latest by Q1 2026 and a single integrated transport scheme aiming to improve the public transport efficiency in Bulgaria.

The reform shall be completed by 30 June 2026.

Reform 5 (C8.R5): Electric mobility

The reforms aims to stimulate the development of zero-emission and low-emission transport in Bulgaria, by creating low-emission zones in the largest and most polluted cities, providing incentives for zero-emission vehicles, and developing a wide network of alternative fuels infrastructure (electric charging stations).

In particular, the reform shall introduce a new legislative framework to promote the deployment of electric charging infrastructure and zero-emission vehicles and limiting the use of the most polluting vehicles.

It shall include legislative measures to promote zero-emission mobility. It shall include incentives and regulation changes for building of electric charging stations infrastructure and incentives to increase of zero-emission electric vehicles (both procured by public entities and purchased/leased/owned by private entities or individuals) in line with the “polluter pays” principle, such as scrapping schemes for most polluting vehicles (EURO 3 and below) and adjustment of ownership/registration taxes based on emission levels. The reform shall also result in the installation of 10 000 electric charging stations, including fast ones, across Bulgaria, and in the total number of 30 000 zero-emission vehicles (new or used cars) registered in Bulgaria, as well as the introduction of low-emission zones in the country’s largest and most polluted cities.

The reform shall be completed by 30 June 2026.

Investment 1 (C8.I1): Railways rolling stock

The investment includes the procurement of new trains owned by the Bulgarian State and run under the Public Service Contract (PSC) by the selected undertaking(s) as carrier(s): 42 zero-emission interoperable electric multiple units with a maximum speed of 160 km/h equipped with European Rail Traffic Management System (ERTMS) – 7 double-deck and 35 single-deck – for sub-urban public passenger railway transport and 20 zero-emission one-deck interoperable push-pull trainsets incl. locomotives with a maximum speed of 200 km/h equipped with ERTMS for inter-regional transport (operation on medium and long distances). Such purchase

shall improve the competitiveness of rail transport and enable a significant modal shift of passengers from road to railways.

Furthermore, 18 electric battery remotely-controlled shunting locomotives shall be purchased.

The investment shall be completed by 31 March 2026.

Investment 2 (C8.I2): European Train Control System on-board equipment

The main objective of the project is to equip the on-board part of zero-emission electric locomotives and of zero-emission electric multiple-units with the European Rail Traffic Management System (ERTMS) - European Train Control System (ETCS), a single digital European signalling and speed control system, which ensures the interoperability of national rail systems. This technology reduces maintenance costs of signalling systems and increases train speed, infrastructure capacity and railway safety.

This investment shall include the installation of interoperable track-side ETCS equipment on 108 electric locomotives and electric multiple-units, a significant increase vs the current 2 locomotives equipped with such technology. It entails the following steps:

- develop a funding allocation mechanism that takes into account information of the eligible railway undertakings, including the number of train-kilometres in the last 5 years, a 10-year business plan for the running of the equipped units and information regarding the provision of own funding (since beneficiaries are expected to fund 50% of the total cost);
- based on the results of the previous point, a procedure under the Public Procurement Act will be announced for the delivery, installation, commissioning, testing and obtaining of permits and training by the Ministry of Transport. The winning participant will deliver the ETCS equipment and carry out the installation in the selected rolling stock.

The investment shall be completed by 31 March 2026.

Investment 3 (C8.I3): Digitalisation in railways transport and ERTMS

The investment aims at improving the quality of rail transport services by monitoring operational parameters and increasing the reliability, security and safety of railways transport in section Ruse – Kaspichan in TEN-T (Trans-European Transport Network) Comprehensive Network. It shall include the deployment of the European Rail Traffic Management System (ERTMS) Level 2 on the TEN-T core network (that consist of the European Train Control System and the Global System for Mobile Communications – Railway) as a signalling and speed control system for monitoring and controlling the parameters of rolling stock in motion and railway infrastructure.

The investment includes dispatching central systems with automatic control of train movements situated at a single dispatch centre, an optical cable network and digital telecommunication systems with equipment. Furthermore, new infrastructure of

automatic level crossings as well as passenger travel information systems and video surveillance in the area of railway stations shall be constructed.

The investment shall be completed by 30 June 2026.

Investment 4 (C8.I4): Intermodal terminal in Ruse

The investment includes the construction of a new intermodal terminal (IMT) - that integrates different modes of transport (inland waterway, rail and road) - and its infrastructure for containers in Ruse (North Central Planning Region in Bulgaria). Ruse is a key intermodal hub/intersection (in the TEN-T core intermodal transport network under Regulation (EU) No 1315/2013 as part of the EU Rhine-Danube Transport Corridor).

The scope of the project shall cover the construction of the basic and the enabling infrastructure. The remaining loading and unloading equipment will be provided by the future terminal operator. The Bulgarian State will have ownership of the terminal infrastructure, but the National Railways Infrastructure Company shall tender the construction award.

The main objectives and benefits of the implementation of the Ruse IMT project are: increase international intermodal traffic with countries of the Transport Corridor Europe-Caucasus-Asia (connecting the middle Asia and the eastern and central Europe); provide regular train connections to Turkey, the central and western Europe, Greece and Sofia; improve the transport supply of the Shumen Industrial Park (located 120 km from the Ruse IMT).

The IMT shall have a capacity of 115 200 TEU/year, which represents an increase of 150% vs current intermodal capacity in Bulgaria.

The investment shall be made in accordance with the Do Not Significant Harm Technical Guidance (2021/C58/01). In particular, it shall do no harm to the environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the plan. In particular, 70 % of construction and demolition waste generated on the construction site shall be prepared for re-use, recycling and other material recovery, including backfilling operations using waste to substitute other materials, in accordance with the waste hierarchy and the EU Construction and Demolition Waste Management Protocol. The Primary Energy Demand (PED) setting out the energy performance of the building resulting from the construction shall not exceed the threshold set for the nearly zero-energy building (NZEB) requirements in national regulation implementing Directive 2010/31/EU.

The investment shall be completed by 31 December 2025 and the launch of the tender for the selection of the IMT operator shall be completed by 31 March 2026.

Investment 5 (C8.I5): Road safety

The investment aims to enhance the road safety management activities on national and municipal roads. A network-wide road safety survey procedures shall be performed, to enable targeted road safety inspections and taking direct corrective actions.

First, it shall include the procurement of specialised equipment for the assessment on the state of road safety of roads (such as surface performance and their functional condition). Second, it shall include the development and integration of software applications for the management and prioritisation of road safety activities, better traffic flows of heavy good vehicles at border crossing points, as well as the establishment of a national electronic system for the reporting and processing of road infrastructure safety related signals.

The investment shall be completed by 31 December 2024.

Investment 6. Sofia metro line 3

The investment refers to the construction of a section of line 3 of Sofia metro for a total length of 3 km and with 3 stations, which will provide a clean, rapid and efficient public transport service to passengers with intermodal connections.

The investment shall allow transport of 7.6 million passengers per year on average as of 2026; it is expected to lead to a reduction in greenhouse gases and air pollution in the city, in the number of cars in circulation in the city and to enhance the public transport for the city's inhabitants.

The investment shall be completed by 31 December 2025.

Investment 7 (C8.I7): Green mobility — pilot scheme to support sustainable urban mobility

The investment aims at supporting sustainable urban mobility measures under a pilot scheme.

It includes 68 zero-emission public transport vehicles (urban and interurban), 27 electric charging stations for public transport vehicles, development of Intelligent Transport Systems in 10 municipalities, and integrated digital solutions to improve the efficiency and effectiveness of public transport as well as infrastructure for safe urban mobility targeting vulnerable road users - pedestrians and cyclists.

The investment shall be completed by 30 September 2024.

H.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

Seq N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
161	C8.R1: Strategic transport framework	Milestone	Entry into force of the National Plan for the Developme nt of Combined Transport in Bulgaria by 2030	Entry into force the plan via approval of the government				Q2	2022	The National Plan for the Development of Combined Transport in Bulgaria by 2030 shall enter into force via approval by the Council of Ministers. The National Plan for the Development of Combined Transport in the Republic of Bulgaria by 2030 shall encourage and facilitate modal shift towards more environmentally friendly modes of transport — rail, inland waterway and maritime — and achieve a more sustainable and less polluting impacts of transport with a clear action plan including objectives, resources and timeline until 2030.
162	C8.R1: Strategic transport framework	Milestone	Strengtheni ng the capacity to manage and implement TEN-T railways projects	Independent audit completed				Q4	2022	The responsible bodies for transport investments, such as the National Railway Infrastructure Company (NRIC), Road Infrastructure Agency, together with the Ministry of Transport and Communication, shall be subject to an independent audit of their organisation, administrative and technical capacity to carry out the management and coordination, tendering procedures, financial management, monitoring, and internal quality control and reporting. The audit shall include the definition of the organisation, coordination, split of responsibilities and resources (quantity and profile of staff, other technical resources) needed to prepare and implement TEN-T projects in view of the objective of completing the TEN-T core network by 2030.
163	C8.R1: Strategic transport framework	Milestone	Strengtheni ng the capacity to manage and implement TEN-T railways projects	Implementation capacity building measures following an independent audit				Q4	2023	In order to support and accelerate the development of the TEN-T network, targeted measures shall be implemented at national level to reinforce the capacity of responsible bodies, such as the National Railway Infrastructure Company (NRIC), Road Infrastructure Agency, together with the Ministry of Transport and Communication to manage and implement the TEN-T projects in view of the objective of completing he TEN-T core network by 2030. The capacity building measures adopted shall be based on the results of the

I. COMPONENT 9: LOCAL DEVELOPMENT

This component of the Bulgarian recovery and resilience plan aims at setting the framework for improving the competitiveness and sustainable development of the regions of the country and promoting local development. The component also targets water management, which is an important aspect of the green transition.

The component contributes to addressing the country-specific recommendations for the years 2019 and 2020 that recommend taking into account regional disparities and focusing investment and investment-related policies on water and on the green transition, in particular on environmental infrastructure (Country-Specific Recommendation 3 of 2019 and Country-Specific Recommendation 3 of 2020).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

I.1. Description of the reforms and investments for non-repayable financial support

Reform 1 (C9.R1): A new regional approach with the direct involvement of local communities in the management of European funds and instruments

The objective of the measure is to promote the direct involvement of local communities in each region of the country in the management of EU funds. This is expected to boost the sense of ownership at local level and to increase policy effectiveness by addressing locally identified needs in a more targeted way.

The measure consists of legislative changes strengthening the role of regional and local authorities in the preparation and implementation of integrated territorial strategies and projects financed with EU funds.

The implementation of the reform shall be completed by 30 June 2022.

Reform 2 (C9.R2): Continuation of the water sector reform

The objective of the measure is to optimise the regulatory framework for water supply and sewerage services.

The measure consists of the adoption of a new law, the Water Supply and Sewerage Act, which shall provide the conditions for consolidation in the provision of water supply and sewerage services and introduce uniform conditions for service quality and efficiency criteria to be met by the water supply and sewerage operators. The legislation shall refine the tariff setting mechanisms, ensuring cost-based pricing for the use of the systems and the consumed services while also ensuring financial sustainability of the operators.

The implementation of the reform shall be completed by 31 March 2023.

Investment 1 (C9.I1): Programme for the construction/completion/reconstruction of water supply and sewerage systems, including waste water treatment plants for agglomerations between 5 000 and 10 000 population equivalent

The objective of the measure is to ensure efficient and sustainable water use in compliance with the EU and national water legislation.

The measure consists of the construction, reconstruction and modernisation of water supply and sewerage systems, and drinking and waste water treatment plants in 13 agglomerations and their included settlements of between 5 000 and 10 000 population equivalent. In line with the water sector reform, the project shall only cover investments in agglomerations within the territory of a consolidated regional water operator for which regional feasibility studies have been prepared.

The implementation of the investment shall be completed by 30 June 2026.

Investment 2 (C9.I2): Digitalisation for integrated management, control and efficient use of water

The objective of the measure is to enhance the water quantity management by digitilising it and improving the control of water use.

The measure consists of setting up and putting into operation an integrated water quantity management system. The system shall collect data to monitor water levels, water consumption, inflows, ecological flow and shall use data from meteorological, hydrometric stations and radars for the assessment of available water resources and meteorological factors.

The implementation of the investment shall be completed by 30 September 2025.

I.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target

										EAD, National Electric Company EAD and the National Institute of Hydrology and Meteorology. The system shall collect real-time data from additional infrastructure (measuring devices and systems) which shall be built as part of the project and which shall be used for surveillance and monitoring of the water levels, water consumption, inflows and ecological flows. The system shall also include the automation of meteorological and hydrometric stations and data radars for the assessment of water resources and meteorological factors.
212	C9.I2: Digitalisation for integrated management, control and efficient use of water	Milestone	Completion and delivery of a fully operational integrated water quantity management information system	Issuance of the taking over certificate for the delivery of an integrated water quantity management system				Q3	2025	Information system for integrated water quantity management developed, delivered and fully operational

J. COMPONENT 10: BUSINESS ENVIRONMENT

This component aims to strengthen the potential for sustainable growth and increase the overall resilience of the Bulgarian economy by addressing challenges in the overall business environment and improving the institutional framework. It includes reforms and investments in areas such as justice, the fight against corruption, the digitalisation of the public administration, the governance of state owned enterprises, anti-money laundering, the quality of the legislative process, public procurement, and audit and control mechanisms.

The measures included in the component contribute to addressing country-specific recommendation 3 of 2019 in relation to improving the business environment, and country-specific recommendation 4 of 2020 in relation to minimising administrative burden to companies by improving the effectiveness of public administration and reinforcing digital government, ensuring an effective functioning of the insolvency framework, and stepping up the efforts to ensure adequate risk assessment, mitigation, effective supervision and enforcement of the anti-money laundering framework.

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the ‘Do no significant harm’ Technical Guidance (2021/C58/01).

J.1. Description of the reforms and investments for non-repayable financial support

Reform 1 (C10.R1): Accessible, effective and predictable justice

The objective of this reform is to improve the accessibility, effectiveness and predictability of the justice system.

The reform shall include annual analyses of the implementation of the e-justice rules laid down in the Civil Procedure Code and the Criminal Procedure Code, including the rules on service of notices and summons to an electronic address, the possibility of payment of fees and other obligations to the court by electronic means, drafting of judicial acts as electronic documents and signing them with a qualified electronic signature, exercise of procedural rights and performing procedural actions in an electronic form, as well as holding of remote court sessions.

The reform shall additionally include legislative amendments to the Administrative Procedure Code, allowing judicial acts to be drafted as electronic documents and signing them with a qualified electronic signature. In addition, it shall enable the electronic submission of documents and holding remote court sessions.

These measures are expected to contribute to investments 1 and 2 in relation to the digitalisation of justice.

To improve access to justice, the reform shall include legislative measures to broaden the scope of free legal assistance and exemptions from court fees.

Finally, the reform includes the adoption of a roadmap for the implementation of judgments of the European Court of Human Rights, which shall include specific measures, timelines, and responsible institutions.

The implementation of the reform shall be completed by 31 March 2026.

Reform 2 (C10.R2): Anti-corruption

The objective of this reform is to further combat corruption at all levels of public administration, justice and prosecution systems.

In particular, the reform shall:

- ensure that the members of the Civil Council of the National Council on Anti-Corruption Policies monitor the implementation of the National Strategy for Prevention and Counteraction against Corruption and its associated Roadmap;
- set up an electronic platform for the exchange of information to facilitate the verification of declarations of assets and interests and the identification of conflicts of interest;
- improve the role of the Inspectorate of the Supreme Judicial Council in the prevention and counteracting corruption through revised ethical guidelines and trainings. This shall not lead to increase in the disciplinary powers of the Inspectorate. The Venice Commission shall be consulted before the Inspectorate revises the guidelines and organises the trainings;
- enhance the integrity of civil servants by implementing an integrity verification mechanism for civil servants occupying positions that have a high corruption risk;
- introduce tools for countering corruption and promoting integrity in the State Owned Enterprises through the adoption of a Code of Ethics, the introduction of corruption risk management systems and measures to enhance transparency;
- set up an Anti-Corruption Body, based on the existing Anti-Corruption and the Illegal Assets Forfeiture Commission, with the authority to investigate and to use the evidence it gathers in criminal proceedings, subject to appropriate legal safeguards for the rights and freedoms of individuals and businesses.

With the objective of ensuring the effectiveness of criminal investigations and the accountability and criminal liability of the Prosecutor General, the reform shall:

- introduce the possibility of a judicial review of a prosecutor's decision not to open an investigation and other measures;
- introduce an obligation of the Prosecutor General to respond to questions raised in the report on the activities of the Public Prosecutor's Office, limit the powers of the Prosecutor General in relation to oversight of legality of the activities of the prosecutors by introducing the judicial review of prosecutorial acts, and introduce an annual reporting by the Prosecutor General on investigations and convictions in corruption cases;
- provide for the necessary safeguards and guarantees for an independent investigation of the Prosecutor General and their deputies.

Finally, the reform shall include legislative measures to protect whistle-blowers and to regulate lobbying activities in the context of public decision-making.

The implementation of the reform shall be completed by 31 March 2026.

Reform 3 (C10.R3): Introduction of mandatory judicial mediation

The objective of this reform is to introduce mandatory mediation in certain civil and commercial cases.

This shall be achieved by adopting legal amendments to the Civil Procedure Code and the Law on Mediation, which shall provide for a legal obligation, for parties in certain civil and commercial disputes to take part in judicial mediation.

The implementation of the reform shall be completed by 31 December 2022.

Reform 4 (C10.R4): Strengthening insolvency procedures

The objective of this reform is to increase the efficiency of insolvency and restructuring procedures.

This shall be achieved by adopting legislative amendments to the Commercial Law in transposition of Directive (EU) 2019/1023 to reform insolvency and restructuring procedures and ensure the use of electronic means in insolvency, restructuring and discharge of debt procedures, as well as provide for stricter regulation of the profession of insolvency practitioners, early warning tools, duties of the directors in case of likelihood of insolvency and legal guarantees for traders to register the actual management addresses when registering companies.

The reform shall also cover implementation measures, including trainings on the new insolvency framework to insolvency practitioners and judges, electronic tools for the purpose of communication throughout insolvency and restructuring proceedings, adoption of manuals, codes, templates and guidelines on the different procedures, as well as statistical data collection and publication.

The implementation of the reform shall be completed by 30 June 2023.

Reform 5 (C10.R5): Digital reform of the Bulgarian construction sector

The objective of this reform is to lay the foundation for the digital transformation of the construction sector in Bulgaria.

This shall be achieved through the development and adoption of a long-term strategy to introduce the Building Information Modelling into the design, execution and maintenance of construction works, as well as a roadmap for its implementation. The drafts of the strategy and the roadmap shall be prepared with the support of project REFORM/SC2020/089 "Preparation and launch of digital reform of the Bulgarian construction sector".

The implementation of the reform shall be completed by 31 March 2023.

Reform 6 (C10.R6): Registry reform to unlock the potential of eGovernment

The objective of this reform is to improve the organisation, quality, and security of registers in the public administration, enhancing the potential of eGovernment and reducing administrative burden on citizens.

The reform shall establish the necessary legal framework for the establishment, maintenance and use of electronic registers through amendments to the following laws:

- the Electronic Governance Law, which shall introduce the obligation for all executive branch bodies to keep, maintain, and update the registers in electronic form;
- the Law on Cadastre and Property Register, which shall establish the requirements for the content of property accounts in the land register and responsibilities of the registry judges for setting them up;
- the Law on Civil Registration, which shall prohibit public administrative authorities from requiring documents relating to the civil status of citizens.

This reform is expected to contribute to the implementation of investment 9 on digitalising registration data in public administration.

The implementation of the reform shall be completed by 31 March 2024.

Reform 7 (C10.R7): Improving the governance framework for state-owned enterprises

The objective of this reform is to improve the governance of state-owned enterprises.

To that end, the Council of Ministers shall adopt:

- a state ownership policy, which shall include the justification and the objectives for the participation of the state in state-owned enterprises (SOEs), as well as the role of the state in the management of SOEs and in the implementation of the policy;
- annual summary reports on the activities of state-owned public enterprises as of the year 2020;
- a transformation program for statutory state-owned enterprises based on the analysis of the nature of their activities - primarily commercial or public functions;
- a report assessing and confirming the compliance of the composition of boards of large state-owned enterprises with the selection procedures laid down by the Law on Public Enterprises.

The implementation of the reform shall be completed by 30 June 2023.

Reform 8 (C10.R8): Strengthening the anti-money laundering framework

The objective of this reform is to strengthen the anti-money laundering framework by ensuring its correct implementation, enhancing the capacity of the Financial Intelligence Unit to analyse suspicious transaction reports, adoption of an action plan to mitigate the money laundering and terrorist financing risks identified through the national risk assessment, as well as updating the national risk assessment.

This shall be achieved by the following measures:

- adoption of supervisory strategies and guidance on the approach to politically exposed persons, as well as revision of supervisory procedures by the supervisory authorities under the Law on Measures against Money Laundering in order to mitigate money laundering risks and increase the implementation of the anti-money laundering framework by obliged entities under their supervision;

- adoption of an action plan by the Council of Ministers to mitigate the money laundering and terrorist financing risks identified through the national risk assessment;
- adoption of an update to the national risk assessment of money laundering and terrorist financing report, including sectorial risk assessments of the non-profit sector, of virtual assets and of citizenship investment schemes.

The implementation of the reform shall be completed by 31 March 2023.

Reform 9 (C10.R9): Improving the quality of the legislative process

This reform aims to improve the quality and predictability of the legislative process within the National Assembly.

This shall be achieved by provisions in the Rules for the Organisation and the Activity of the National Assembly ensuring that:

- all draft legislation proposed by Members of Parliament is accompanied by reasoning and a preliminary impact assessment;
- a summary view of stakeholders' opinions and the committee's summary opinion are included in the parliamentary committee reports on draft laws; and
- the proposals for amendments and supplements to a draft legislative act adopted at the first vote may not refer to legislative acts, different from those, the amendment or supplement of which has been proposed in the initially submitted draft legislative act, except under specific circumstances.

The implementation of the reform shall be completed by 31 December 2021.

Reform 10 (C10.R10): Public procurement

The objective of this reform is to improve transparency and increase competition in the public procurement process.

With respect to the use of negotiated public procurement procedures without prior publication ("no call bids") and contracting with single bids, legislative amendments shall ensure regular reporting, increased controls by relevant agencies, and effective and dissuasive sanctions in case of violations of the rules. In addition, ex-ante checks on public procurement in relation to Union funds shall be increased and new standard e-forms for public procurement shall be introduced.

As a result, the share of negotiated procedures without prior publication shall be reduced significantly, while also ensuring a separate reduction of the share of contracts with single bids.

Furthermore, legislative amendments shall aim to reduce "in-house" procurement procedures by introducing a ban on re-assigning tasks to sub-contractors, transparency requirements and effective and dissuasive sanctions in case of non-compliance with such requirements.

The implementation of the reform shall be completed by 31 December 2025.

Reform 11 (C10.R11): Entrepreneurial Bulgaria

The objective of this reform is to foster the development of the high-tech sector in the country by improving access to capital and talent, improving the business administration environment and promoting entrepreneurship.

The main elements of the reform are the following:

- introduction of a procedure and requirements for issuing a visa for start-up entrepreneurs;
- adoption of a personal bankruptcy law;
- introduction of a more flexible type of a commercial company into the Commerce Law;
- adoption of a framework to allow for an accelerated liquidation of legal entities;
- providing more flexibility in the regulatory conditions for distance work.

The implementation of the reform shall be completed by 31 December 2023.

Reform 12 (C10.R12): Economic analysis council

The objective of the reform is to lay the foundations for a process of gradual and sustainable provision of in-depth academic economic expertise to the Bulgarian government with, which is expected to be a starting point for improving strategic and long-term economic decision-making.

The reform shall establish an Economic Analysis Council as an advisory body, which shall be supported by a secretariat. The main output of the Economic Analysis Council shall be an annual report on the state of the Bulgarian economy.

The implementation of the reform shall be completed by 31 December 2023.

Investment 1 (C10.I1): Strengthening, further developing and building on the Unified Information System of Courts

The objective of this investment is to increase the digitalisation in the justice system by building on the Unified Information System of Courts.

The Unified Information System of Courts shall be upgraded to:

- provide for new modules for the electronic allocation and digitalisation of order for payment cases and for the administration of mediation procedures;
- ensure the technical capacity of courts to operate entirely online; and
- set up additional data centres.

The investment is expected to support the implementation of reform 1 on accessible, effective, and predictable justice.

The implementation of the investment shall be completed by 31 December 2023.

Investment 2 (C10.I2): Digitalisation of key litigation processes in administrative justice

The objective of this investment is to increase the digitalisation in administrative courts through the upgrade of the Single Case Management Information System.

The upgrade shall enable a number of new functionalities for the system, including the deployment and automation of the process of service of electronic summons, remote access to and submission of electronic documents for citizens, and the capacity for remote court hearings in the 28 administrative courts. It shall be supported by the entry into operation of a data storage hardware in a data centre.

The investment is expected to support the implementation of the reform 1 on accessible, effective, and predictable justice.

The implementation of the investment shall be completed by 31 December 2025

Investment 3 (C10.I3): Transformation of the information and communication infrastructure at the Public Prosecutor's Office

The objective of this investment is to increase the digitalisation and security of the information exchange within the Public Prosecutor's Office through the upgrade of the internal information and communication infrastructure.

The upgrade shall consist of:

- increased exchange of internal data in an electronic form;
- secure remote access and e-identification;
- automatic exchange of electronic data with other law enforcement authorities in Bulgaria;
- integrating the internal infrastructure with the Single e-Justice Portal; and
- an increased level of cybersecurity and facilitating data protection compliance.

The investment is expected to support the implementation of reform 2 on anti-corruption.

The implementation of investment shall be completed by 31 December 2024.

Investment 4 (C10.I4): Improving the quality and sustainability of the security services

The objective of this investment is to improve the quality and effectiveness of anti-corruption and security policies by supporting their green and digital transformation.

This investment shall:

- establish an intelligent national security system by modernising and building on the existing systems in the Ministry of the Interior;
- establish and integrate video surveillance systems with vehicle number recognition functionality on a number of locations;
- provide new, environmentally-friendly police vehicles with video surveillance equipment to replace 300 of the oldest patrol vehicles in use.

The investment is expected to support the implementation of reform 2 on anti-corruption.

The implementation of the investment shall be completed by 31 December 2024.

Investment 5 (C10.I5): Supporting the introduction of mandatory judicial mediation

The objective of this investment is to support the introduction of mandatory judicial mediation in certain civil and commercial cases by extending the network of mediation centres and provision of trainings.

The investment shall support the establishment of 15 new mediation centres in the district courts and of 113 territorial divisions in the regional courts.

Trainings for the introduction of mandatory judicial mediation shall be delivered to judges, mediators and court coordinators in the mediation centres.

The investment is expected to support the implementation of reform 3 on introduction of mandatory judicial mediation.

The implementation of the investment shall be completed by 30 June 2024.

Investment 6 (C10.I6): Supporting a pilot phase for the introduction of Building Information Modelling

The objective of this investment is to build up the capacity of the Building Information Modelling community in Bulgaria.

The investment shall include specialised training for experts in the state administration, creation of a website with online courses and materials for experts from the private sector, creation of an integrated BIM module for the Unified Information System for Spatial Planning, Investment Design and Building Authorisation and the provision of IT equipment (hardware and software) for experts from municipal, regional and state administrations.

The implementation of the investment shall be completed by 30 June 2026.

Investment 7 (C10.I7): Unified Information System for Spatial Planning, Investment Design and Building Authorisation

The objective of this investment is to reduce the administrative burden of citizens and businesses in relation to construction by setting up a platform for the provision of electronic administrative planning services and the authorisation of construction.

The project is expected to significantly shorten the time to deliver services in the spatial planning, investment design and commissioning of completed construction works by enabling complex e-government services.

The implementation of the investment shall be completed by 30 June 2026.

Investment 8 (C10.I8): Spatial monitoring, control and management through upgrading the Aerospace Monitoring Centre (AMC)

The objective of this investment is to support data-based policymaking in addressing public and private sector challenges, including in the context of public emergencies.

This shall be achieved through:

- upgrading the hardware of the Aerospace Monitoring Centre at the Ministry of Interior to allow the possibility of receiving data from more satellites and sensors, as well as from unmanned aircraft systems, along with the operation of a software for processing the received data;
- expanding the capacity of the data centres of the Ministry of Interior.

The implementation of the investment shall be completed by 30 June 2024.

Investment 9 (C10.I9): Digitising data in the administration containing paper registries

The objective of this investment is to support the digitalisation of the public administration.

This shall be achieved through the digitisation of paper registers of the Registry Agency, and the Agency for Geodesy, Cartography and Cadastre, and the digitisation of civil status records held by municipal administrations.

The implementation of the investment shall be completed by 31 December 2025.

Investment 10 (C10.I10): Upgraded strategic planning system

The objective of this investment is to improve the strategic planning processes of the central government.

This shall be achieved by upgrading the National Statistical Institute's monitoring information system into a strategic planning tool monitoring the implementation of all strategic documents at central government level. In addition to covering all existing strategic papers, the information system shall also support aligning such strategies with the United Nations' Sustainable Development Goals.

The implementation of the investment shall be completed by 31 December 2025.

Investment 11 (C10.I11): Ensuring an adequate information and administrative environment for the implementation of the recovery and resilience plan

The objective of this investment is to improve the information and administrative capacity for the delivery of key projects in the context of performance-based funding, with a focus on the recovery and resilience plan of Bulgaria.

This shall be achieved through further upgrades to the Unified Management Information System, which shall include an improved provision and analysis of data to ARACHNE, and the provision of trainings on public procurement for final recipients of funds with a focus on beneficiaries with identified weaknesses. Furthermore, an administrative map analysing the capacity of beneficiaries shall be published.

In order to establish a legal and institutional framework for the adequate functioning of control and audit systems for the recovery and resilience plan of Bulgaria, the reform shall include:

- setting up a repository system with all the functionalities required for the monitoring of the implementation of the recovery and resilience plan of Bulgaria;
- setting up a management and control system in the context of the recovery and resilience plan of Bulgaria;
- a workload analysis of the National Fund Directorate and the Central Coordination Unit, taking into account the additional requirements of the recovery and resilience plan of Bulgaria;
- changes to the structural regulations for the Executive Agency 'Audit of EU Funds'.

The implementation of the investment shall be completed by 31 December 2025.

J.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

	for the implementation of the recovery and resilience plan									the achievement of milestones and targets. The National Fund Directorate training team shall be prepared under the 'General technical support for the implementation of Bulgaria's RRP' project. The main part of trainings shall be delivered in the period 2023-2025.

K. COMPONENT 11: SOCIAL INCLUSION

This component of the Bulgarian recovery and resilience plan aims to foster social inclusion by

- improving social protection and service provision. This shall encompass a reform of the minimum income scheme, and the development of new tools for the Social Assistance Agency and for the Employment Agency;
- reforming long-term care provision in Bulgaria, in accordance with the Common European Guidelines on the transition from institutional to community-based care as well as with the UN Convention on the Rights of Persons with Disabilities. In addition, persons with permanent disabilities shall be supported through the provision of assisting devices to promote their mobility and independent living;
- promoting the social economy and the cultural and creative sectors. This shall be achieved by the construction of focus centres for the social and solidarity economy providing supporting tools to social enterprises, by establishing grant schemes for cultural and creative sectors and by digitising content of museums, libraries and archives.

The component encompasses two reforms and seven investments and contributes to addressing the challenges identified in the CSRs, notably the recommendations to address the shortcomings of the minimum income scheme (country-specific recommendation 2 2020 and 4 2019), as well as to improve access to integrated employment and social services (country-specific recommendation 4 2019).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

K.1. Description of the reforms and investments for non-repayable financial support

Reform 1 (C11.R1): Reform of the minimum income scheme

The minimum income scheme reform aims to improve the adequacy and coverage of the minimum income scheme.

The reform shall cover the entry into force of the Social Support Code and amendments to secondary legislation to: establish a mechanism for the automatic annual update of the minimum income scheme based on the at-risk-of-poverty threshold and to modify the eligibility criteria of the minimum income scheme. The payment of the minimum income shall be financed by the Bulgarian state budget.

The reform shall also amend the Employment Promotion Act, introducing the definition of ‘economically inactive’ and a set of activities targeting the activation of the economically inactive people.

The implementation of the reform shall be completed by 31 December 2024.

Reform 2 (C11.R2): Reform of social services

The objective of the reform is to improve the provision of social services, including long-term care, in Bulgaria, in accordance with the Common European Guidelines on the transition from institutional to community-based care, the European Strategy of

Persons with Disabilities 2021-2030, and the UN Convention on the Rights of Persons with Disabilities, in particular the principles of freedom of choice and independent living.

The reform shall encompass the adoption of a National Map of Social Services, which shall be developed on the basis of an analysis of the social services offer and needs at municipal and regional level.

It shall also encompass a new Ordinance on the Quality of Social Services, which shall be developed with relevant social partners and shall cover: the minimum quality standards of the facilities providing social services; the minimum requirements for the modernisation of facilities providing social services; the requirements concerning the qualifications of the personnel providing social services; as well as indicators to monitor the performance and quality of the provision of social services. It shall also determine the maximum number of users per facility providing social services.

The implementation of the reform shall be completed by 31 December 2023.

Investment 1 (C11.I1): Modernisation of long-term care

The investment complements reform 2 ‘Reform of social services’ and its objective is to reform the building stock of the facilities where social services are provided to persons with disabilities and older people.

The construction and renovation activities under this investment shall be based on the results of the analysis of the social services offer and needs at municipal and regional level and in line with the requirements set out in the Ordinance on the Quality of Social Services. The investment shall include:

- the construction of new facilities providing residential care, together with new facilities providing day-care, including counselling, therapy and rehabilitation activities for persons with disabilities. Each facility providing day care shall be built in the proximity of a facility providing residential care. The facilities providing residential care shall provide at least 2500 new places;
- the renovation of existing facilities providing residential care for older people to meet quality standards, as per the Ordinance on the Quality of Social Services;
- energy efficiency renovations in existing facilities providing social services, achieving at least 30% of energy savings on average.

The implementation of the investment shall be completed by 30 June 2026.

Investment 2 (C11.I2): Provision of assisting devices to persons with permanent disabilities

This objective of the investment is to improve the social inclusion of persons with permanent disabilities by promoting personal mobility and accessibility.

The investment consists of providing assisting devices, including software programmes, based on the specific needs of the beneficiaries. Beneficiaries shall also be trained to learn how to deploy the assisting devices. This investment shall reach at least 3300 persons with permanent disabilities.

The implementation of the investment shall be completed by 30 June 2024.

Investment 3 (C11.I3): Development of the social economy

The objective of this investment is to promote the social economy by providing assistance to the development of social and solidarity economy enterprises and organisations.

The investment shall encompass the construction of focus centres for the social and solidarity economy, which shall support social and solidarity economy enterprises and organisations by providing counselling activities and technical assistance, including through assisting in the digitalisation of the business processes of those enterprises. The location of the focus centres shall ensure that every region, as identified by the level two of the nomenclature of territorial units for statistics classification, shall be served by one focus centre.

In addition, the investment shall include the set-up of a digital platform to promote the products and services of the social and solidarity economy enterprises and organisations.

The implementation of the investment shall be completed by 31 December 2025.

Investment 4 (C11.I4): Modernisation of the Social Assistance Agency

The objective of this investment is to improve the service provision of the Social Assistance Agency through the renovation of its facilities.

The investment shall encompass renovations in the facilities of the Agency and building an accessible environment for persons with disabilities via the installation of stair climbing devices.

The implementation of the investment shall be completed by 30 June 2024.

Investment 5 (C11.I5): Modernisation of the Employment Agency

The objective of this investment is to increase the efficiency and quality of the services provided by the Employment Agency by developing new and/or improving existing electronic platforms and systems. The investment shall also contribute to further integration of the electronic systems for employment and other services, including social services

The new and updated tools shall foster a more efficient matching of job seekers to job vacancies, including via the upgrade of software to conduct surveys and improved data storage systems.

The implementation of the investment shall be completed by 31 December 2024.

Investment 6 (C11.I6): Development of the cultural and creative sectors

The objective of the investment is to support the development and promotion of the cultural and creative sectors in Bulgaria.

The investment shall encompass:

- a reform of the National Fund for Culture targeting transparent planning, coordination and monitoring of its activities;
- grant schemes and programmes targeting the international promotion of Bulgarian cultural products, cultural policies in large and small municipalities, audience development and access to culture, as well as digital, managerial and entrepreneurial skills for people working in the cultural and creative sectors, encompassing the public and private sector.

The implementation of the investment shall be completed by 31 December 2025.

Investment 7 (C11.I7): Digitisation of collections of museums, libraries, and archives

The objective of the investment is to digitise content of museums, libraries and archives to improve accessibility and foster preservation.

The investment shall encompass the digitisation of the content of at least 28 museums, 10 libraries, and State archives, including the Bulgarian National Film Archives, the Bulgarian National Television, the Bulgarian National Radio, the Bulgarian News Agency, and the National Archive Fund.

The implementation of the investment shall be completed by 30 June 2026.

L. COMPONENT 12: HEALTHCARE

This component of the Bulgarian recovery and resilience plan aims to improve the provision and availability of health services across Bulgaria. It encompasses six reforms and seven investments.

The component includes investments in the health sector across the territory, including modernisation of part of the hospitals and medical facilities providing either paediatric, oncological or psychiatric care.

The component also includes the construction of outpatient care units, the establishment of an air ambulance system, as well as measures addressing shortages of healthcare professionals, including their unbalanced geographical distribution.

The enhancement of e-health and digital innovation in healthcare shall be supported by the completion of the implementation of the National Health Information System and by the development of a platform for medical diagnostics.

In addition, the component introduces strategies and action plans underpinning the investments. National strategies and plans also cover additional relevant concerns, including health education in schools and healthy aging.

The component contributes to addressing the challenges identified in the country-specific recommendations to mobilise adequate financial resources to strengthen the resilience, accessibility and capacity of the health system, and ensure a balanced geographical distribution of health workers (country-specific recommendation 1 2020), as well as to improve access to health services and addressing shortages of health professionals (country-specific recommendation 4 2019).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

L.1. Description of the reforms and investments for non-repayable financial support

Reform 1 (C12.R1): Upgrading the strategic framework of the healthcare sector

The objective of the reform is to increase the resilience of the health system to shocks, as well as to increase the population's access to quality and timely healthcare by providing the strategic underpinning of future investments and reforms and identifying relevant actions.

The reform shall include the adoption of a number of strategies and plans, namely:

- the National Health Strategy 2021-2030, which shall aim to address the existing structural challenges of the health sector, including the shortages of healthcare professionals across the territory, by setting out the strategic goals and priorities over a 10-year period;
- the National Strategy for Mental Health of the Citizens of the Republic of Bulgaria 2021-2030, which shall provide recommendations to foster the integration of psychiatric services into community-based services and services received at home (deinstitutionalisation), as well as addressing the main

- problems faced by the psychiatric care system in the country, including outdated equipment and facilities as well as staff shortages;
- the National Strategy for Child and Adolescent Health and Paediatric Care in the Republic of Bulgaria 2021-2030, which shall provide targeted recommendations to strengthen health care services for children and adolescents, starting from pregnancy;
 - the National Strategy for Healthy Geriatric Care and Ageing in the Republic of Bulgaria 2021-2030. The strategy shall promote a comprehensive set of recommendations targeting the health and well-being of older people, taking into account regional demographic trends and the availability of services, including access to health and social services.

The adoption of these strategies shall be complemented by the adoption of accompanying action plans for their implementation. The action plans shall build on the recommendations of the strategies to outline measures, including their timeline.

The reform also includes the adoption of:

- the National Map on the Long-Term Needs of the Healthcare Sector in Bulgaria, which shall provide recommendations on how to promote a balanced distribution of healthcare services in Bulgaria, based on an analysis covering health facilities in each region;
- the National Plan for Combating Cancer in the Republic of Bulgaria 2021-2027, which shall outline measures aiming to reduce cancer incidence and mortality, targeting screening activities for early detection of cancer, as well as cancer treatment therapies;
- the National Plan for the Restructuring of Hospital Care in the Republic of Bulgaria 2021-2027, which shall outline measures to restructure and optimise the organisation of the hospital sector and to improve access to healthcare hospital services.

The implementation of the reform shall be completed by 31 March 2023.

Reform 2 (C12.R2): Development of e-health and of the National Health Information System

The objective of the reform is to foster the development of e-Health.

The reform includes the adoption of the National Strategy for e-Health and Digitalisation of the Health System 2021-2030, which shall provide recommendations on the digitalisation and integration of health services to increase the efficiency and coverage of eHealth in Bulgaria. An action plan outlining the measures to implement the recommendations of the strategy shall also be adopted.

The reform also includes an update of the legal framework in the country with regard to e-Health, concerning: telemedicine, including telediagnosics and telemonitoring; the terms and conditions for prescribing and dispensing medicinal products; the establishment and maintenance of the electronic health records of the citizens; as well as the working processes of the National Health Information System (NHIS).

In addition, the reform shall finalise the implementation of the NHIS, thus establishing a single digital environment for the collection and exchange of medical information.

The implementation of the reform shall be completed by 30 June 2023.

Reform 3 (C12.R3): Improving the attractiveness of healthcare professions and promoting a more balanced distribution of healthcare professionals across the territory

The objective of the reform is to address the shortages of healthcare professionals and their uneven distribution across the country.

The reform shall include the development, adoption and entry into force of a legislative package and other actions, which shall: allow medical professionals, in particular nurses and midwives, to set-up their own practice; provide for the reimbursement by the National Health Insurance System of the services provided by medical professionals, in particular nurses and midwives, in their practices; increase the number of university places for nursing specialisations; promote a more balanced distribution of healthcare workers, including via the provision of financial incentives funded via State Budget and European Structural Funds; and enhance the representation of healthcare professionals in the regular negotiation process with the National Health Insurance Fund.

The implementation of the reform shall be completed by 30 June 2026.

Reform 4 (C12.R4): Strategic framework and action plan to increase the availability of primary and outpatient care

The objective of the reform is to provide the basis for strengthening the provision of primary and outpatient care across the territory by adopting a national strategy and a related action plan.

The reform shall include the adoption of a National Strategy for Improving the Accessibility and Capacity of Non-Hospital Primary Care and Ensuring a Balanced Territorial Distribution of Medical Care and Healthcare in the Republic of Bulgaria 2021-2027 and the action plan for its implementation. The strategy shall set out recommendations to ensure a balanced distribution of primary and outpatient care in Bulgaria, while the action plan shall outline the measures addressing the recommendations of the strategy.

The implementation of the reform shall be completed by 31 March 2023.

Reform 5 (C12.R5): Supporting the improved provision of preventive screening activities

The objective of the reform is to support the effectiveness of healthcare provision by developing a plan to promote screening activities of health conditions and diseases throughout the territory of Bulgaria.

The reform shall include the development and adoption of a National Plan for the Development of Comprehensive Prenatal and Neonatal Screening and Screening of Socio-Significant Diseases 2021-2027, which shall underpin the establishment of screening centres across the territory, including of a National Interdisciplinary Centre, foreseen under investment 7 'Development of outpatient care'.

The implementation of the reform shall be completed by 31 March 2023.

Reform 6 (C12.R6): Plan for modern health education in schools

The objective of the reform is to contribute to reducing preventable health diseases via the provision of healthcare education in schools.

The reform consists of the development and adoption of a Plan for Health Education in the Bulgarian School 2021-2027. The plan shall specify measures to promote a healthy lifestyle among students in the areas of reproductive health, nutrition and harmful consumption of alcohol and other psychoactive substances.

The implementation of the reform shall be completed by 31 December 2022.

Investment 1 (C12.I1): Modernisation of hospital facilities

The investment complements reform 1 ‘Upgrading the strategical framework of the healthcare sector’. Its objective is to enhance the provision of paediatric and oncological care.

The investment shall include the provision of equipment to hospitals providing paediatric and oncological care, as well as the establishment of a National Centre for Proton Therapy Radiation, focusing on the treatment of children with cancer.

The existing facilities providing pediatric and/or oncological care receiving equipment and equipment needs of each facility shall be determined on the basis of the recommendations of the National Map on the Long-Term needs of the Healthcare Sector, as well as other relevant criteria, in particular issued permits for the performance of certain activities, such as radiotherapy, where relevant.

The implementation of the investment shall be completed by 30 June 2026.

Investment 2 (C12.I2): Centres for interventional diagnosis and endovascular treatment of cerebrovascular diseases

The objective of the investment is to strengthen the provision of healthcare for cerebrovascular diseases.

The investment shall establish specialised centres in hospitals. The centres shall be equipped for the interventional diagnosis and treatment of cerebrovascular diseases.

The implementation of the investment shall be completed by 31 December 2025.

Investment 3 (C12.I3): Modernisation of psychiatric care

The investment complements reform 1 ‘Upgrading the strategical framework of the healthcare sector’ and in particular of the ‘National Strategy for Mental Health of the Citizens of the Republic of Bulgaria 2021-2030’ and the related action plan. The objective of the investment is to improve the conditions for hospitalised patients, improving the outdated equipment and infrastructures of some facilities providing psychiatric care.

The measure consists of renovating and equipping facilities providing psychiatric care. The facilities which shall be renovated and receive equipment as well as the equipment needs of each one of those facilities shall be determined on the basis of an analysis of the needs of the facilities providing psychiatric care.

The implementation of the investment shall be completed by 31 December 2025.

Investment 4 (C12.I4): Establishment of an air ambulance system

The objective of the investment is to set up an air ambulance system. This includes the purchase of helicopters to provide emergency medical assistance, where immediate and rapid transportation is required, as well as the construction of operational sites with hangars for the helicopters.

This air ambulance system shall provide for the transportation of people affected by a situation of emergency, medical personnel as well as medical supplies.

The implementation of the investment shall be completed by 30 June 2026.

Investment 5 (C12.I5): National digital platform for medical diagnostics

The objective of the investment is to enhance medical diagnostic.

The investment shall establish a digital platform for medical diagnostics, which shall foster digital diagnostics across medical specialties by enabling data processing through validated machine learning algorithms. The platform shall be made available to healthcare facilities, encompassing hospitals, clinics, laboratories and outpatient units, and which are operating in the fields of oncology, diagnostic radiology, dermatology and pathology and shall be integrated into the National Health Information System (NHIS), thus complementing reform 2 ‘Development of e-health and of the National Health Information System’.

The implementation of the investment shall be completed by 30 June 2026.

Investment 6 (C12.I6): Improving the 112 national emergency communication system

The objective of the investment is to strengthen emergency response.

The investment consists of developing further the functionalities of the National System 112. This shall encompass the centralisation of emergency services in a single emergency system, the NextGen 112 platform, with the aim of enhancing the emergency response network of the Single European Number 112 across the territory of Bulgaria. The measure also includes revisions to the relevant regulation, which shall outline the operational procedures and functions of the NextGen 112 platform.

The implementation of the investment shall be completed by 30 September 2024.

Investment 7 (C12.I7): Development of outpatient care

The investment complements Reform 3 ‘Improving the attractiveness of healthcare professions and promoting a more balanced distribution of healthcare professionals across the territory’, Reform 4 ‘Increasing the availability of preventive and outpatient care’, and Reform 5 ‘Improving the provision of preventive screening activities’. Its objective is to foster preventive and outpatient care.

It consists of building or renovating at least 300 outpatient medical units in underserved areas in Bulgaria and establishing a National Interdisciplinary Centre. The outpatient units shall be equipped and at least one medical professional shall establish a practice in the units, so to provide healthcare services.

The locations of the units shall be chosen on the basis of the National Map on the Long-Term needs of the Healthcare Sector and other relevant criteria, including the

need to cover most underserved areas, with a focus on the areas with no access to healthcare within a reasonable reach, as identified using data from the Census and the Ministry of Health.

The implementation of the investment shall be completed by 30 June 2026.

2. Estimated total cost of the recovery and resilience plan

The estimated total cost of the recovery and resilience plan of Bulgaria is BGN [13 491 125 932], which equals EUR [6 897 903 157] on the basis of the EUR BGN ECB reference rate of 15 October 2021.

SECTION 2: FINANCIAL SUPPORT

1. FINANCIAL CONTRIBUTION

The instalments referred to in Article 2(2) shall be organised in the following manner:

1.1. First Instalment (non-repayable support)

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
1	C1R1 Reform in preschool and school education and lifelong learning	Milestone	Entry into force of the amendments to the Pre-school and School Education Act and to secondary legislation.
5	C1R2 Higher education reform	Milestone	Entry into force of the amendments to the Higher Education Act
6	C1R2 Higher education reform	Milestone	National Map of Higher Education
29	C2I1 Programme to accelerate economic recovery and transformation through research and innovation	Target	Signature of contracts with research higher education institutions
35	C3R1 Legal framework to attract industrial investment and develop industrial ecosystems	Milestone	Entry into force of the new Industrial Parks Act
113	C4R8 Roadmap to Climate Neutrality	Milestone	Entry into force of the Government Decision establishing the Green Energy Transition Commission
137	C7R2 Efficient use of the radio frequency spectrum	Milestone	Entry into force of the decree on the reduction of spectrum fees
140	C7R3 Creating a favourable investment environment	Milestone	Entry into force of legislative changes implementing recommendations under the Connectivity Toolbox
148	C7I2 Construction, development and optimisation of the digital TETRA system and radio relay network	Milestone	Award of contracts for development of TETRA system and radio relay network
161	C8R1 Strategic transport framework	Milestone	Entry into force of the National Plan for the Development of Combined Transport in Bulgaria by 2030
169	C8R2 Road safety	Milestone	New road safety strategy and its action plan
199	C8I6 Sofia metro line 3	Milestone	Contracts on the construction of

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
			new sections of line 3 of Sofia metro following open and competitive tender
207	C9R1 A new regional approach with the direct involvement of local communities in the management of European funds and instruments	Milestone	Amendments to the regulatory framework regarding management of EU funding
213	C10R1 Accessible, effective and predictable justice	Milestone	Adoption of a Roadmap by the Council of Ministers for the implementation of judgments of the European Court of Human Rights
238	C10R8 Strengthening the anti-money laundering framework	Milestone	Adoption of the action plan to mitigate the money laundering and terrorist financing risks identified in the national risk assessment
241	C10R9 Improving the quality of the legislative process	Milestone	Entry into force of the Rules for the Organisation and the Activity of the National Assembly
279	C10I11 Ensuring an adequate information and administrative environment for the implementation of the recovery and resilience plan	Milestone	Provision of a information system for monitoring and management of the implementation of the RRP
280	C10I11 Ensuring an adequate information and administrative environment for the implementation of the recovery and resilience plan	Target	Update of video guides to cover in full all business processes of the RRP information system
281	C10I11 Ensuring an adequate information and administrative environment for the implementation of the recovery and resilience plan	Milestone	Entry into force of the act setting up the Management and Control system for the RRP
282	C10I11 Ensuring an adequate information and administrative environment for the implementation of the recovery and resilience plan	Milestone	Ensuring the administrative capacity of the National Funds Directorate and of the Executive Agency "Audit of EU Funds" in relation to the RRP activities
286	C11R1 Reform of the minimum income scheme	Milestone	Entry into force of the amendments to the secondary legislation of the Social Assistance Act

316	C12R1 Upgrading the strategic framework of the healthcare sector	Milestone	National Map of the Long-Term Needs of the Healthcare Sector
317	C12R1 Upgrading the strategic framework of the healthcare sector	Milestone	National Health Strategy 2021-2030 and action plan for the implementation of the strategy
318	C12R1 Upgrading the strategic framework of the healthcare sector	Milestone	National Strategy for Child and Adolescent Health and Pediatric Care in the Republic of Bulgaria 2021-2030 and action plan for the implementation of the strategy
319	C12R1 Upgrading the strategic framework of the healthcare sector	Milestone	National Plan for Combating Cancer in the Republic of Bulgaria 2021-2027
328	C12R6 Plan for modern health education in schools	Milestone	National Plan for Health Education in the Bulgarian Schools 2021-2027
		Instalment Amount	EUR 724 039 480

1.3. Third Instalment (non-repayable support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
17	C1I3 Provision of digital skills trainings and set-up of a platform for adult learning	Milestone	Signature of contracts for the development of the platform for e-learning for adults
59	C3I2.2.c grant scheme for the support of businesses in the transition to a circular economy	Milestone	Selection procedures completed
184	C8I1 Railways rolling stock	Milestone	Contract(s) on supply of new zero-emission railways rolling stock for sub-urban and inter-regional transport and shunting locomotives
221	C10R2 Anti-corruption	Milestone	Entry into force of the electronic platform and supporting legislative amendments to strengthen anti-corruption bodies and units
242	C10.R10: Public Procurement	Milestone	Public Procurement Agency's control and verification methodology updated
324	C12R3 Improving the attractiveness of healthcare professions and promoting a more balanced distribution of healthcare professionals across the territory	Milestone	Entry into force of amendments to laws and secondary legislation to address shortages and promote a more balanced distribution of healthcare professionals across the country
334	C12I3 Modernisation of psychiatric care	Milestone	Signing contracts for renovation works and the provision and installation of equipment and furniture in medical facilities providing psychiatric care
307	C11I6 Development of the cultural and creative sectors	Milestone	Entry into force of the amendments to the legislative framework of the National Culture Fund
312	C11I7 Digitisation of collections of museums, libraries, and archives	Milestone	Establishing a uniform methodology and standards for the digitisation of content
24	C2R1 Common policy for the development of research and innovation	Milestone	Entry into force of new Research and Innovation Act and screening of amendments to other legislative acts required
27	C2I1 Programme to accelerate economic recovery and transformation through research and innovation	Milestone	Notifications awarding projects by innovative SMEs and higher education institutions and research organisations
31	C2I2 Enhancing the innovation capacity of the Bulgarian Academy of Sciences	Milestone	Upgraded Joint Innovation Centre within the Bulgarian Academy of Sciences
32	C2I2 Enhancing the innovation capacity of the Bulgarian Academy of Sciences	Milestone	Deployment of Quantum Communication Infrastructure network
36	C3I1 AttractInvestBG	Target	Award of grants for the development

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
			of industrial parks /zones and signature of contracts
64	C4R1 Establishment of a National Fund for Decarbonisation	Milestone	Entry into force of the law establishing the National Fund for Decarbonisation and its sub- funds and related secondary legislation.
90	C4R7 Unleashing the potential of hydrogen technologies and hydrogen production and supply	Milestone	Entry into force of the amendments to the legislative framework, implementing the National Roadmap
109	C4I5 Pilot projects for the production of green hydrogen and biogas	Milestone	Launching a call for projects for the production of green hydrogen and biogas.
115	C4R9 Decarbonisation of the energy sector	Milestone	Entry into force of legislation adopting the coal and lignite phase-out calendar and introducing a CO2 emissions cap for lignite and coal fired power plants.
116	C4R9 Decarbonisation of the energy sector	Milestone	Entry into force of implementing decision(s) enforcing the carbon dioxide emissions limit for production of electricity from coal and lignite
117	C4R9 Decarbonisation of the energy sector	Target	Reducing carbon dioxide emissions from the power sector (I)
94	C4R11 Improving corporate governance of state-owned companies in the energy sector	Milestone	No cross-subsidisation between the state-owned energy undertakings
99	C4I6 Support for new capacities for electricity generation from renewable sources and electricity storage	Milestone	Launch of a tender for the construction of 285 MW production capacity of electricity from renewable sources (wind and solar power) co-located with energy storage systems
122	C4I8 National infrastructure for storage of electricity from RES (RESTORE)	Milestone	Signature of contract for delivery, installation, connection and commissioning of storage facilities with a capacity of 500MW (6000 MWh).
139	C7R2 Efficient use of the radio frequency spectrum	Milestone	Completion of assignment of the available spectrum in the 700 MHz and 800 MHz bands
164	C8R1 Strategic transport framework	Milestone	Rail market assessment underpinning the scope of public service obligation under the new public service contract for public rail transport service
170	C8R2 Road safety	Milestone	Implementation of the new road safety action plan
175	C8R4 Integrated public transport	Milestone	Analysis of public transport system and review of its regulatory framework
178	C8R5 Electric mobility	Milestone	Law on promoting electric mobility

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
194	C8I4 Intermodal terminal in Ruse	Milestone	Contract for supervision under the Spatial Development Act concluded
208	C9R2 Continuation of the water sector reform	Milestone	Entry into force of the new Water and Sewerage Act
220	C10R2 Anti-corruption	Milestone	Anti-Corruption body set up and operational
222	C10R2 Anti-corruption	Milestone	Entry into force of the legislative amendments to safeguard the effectiveness of criminal proceedings and improve the accountability and criminal liability of the Prosecutor General
229	C10R4 Strengthening insolvency procedures	Milestone	Measures to implement the reform to the insolvency framework
230	C10R5 Digital reform of the Bulgarian construction sector	Milestone	Strategy and roadmap for the introduction of Building Information Modelling (BIM) in the design, execution and maintenance of construction works
233	C10R6 Registry reform to unlock the potential of eGovernment	Milestone	Entry into force of amendments to the Electronic Governance Law and the Law on Civil Registration
236	C10R7 Improving the governance framework for state-owned enterprises	Milestone	Adoption of a transformation program for statutory state-owned enterprises
237	C10R7 Improving the governance framework for state-owned enterprises	Milestone	Compliance of the composition of the boards of large state-owned enterprises with the selection procedures set out in the Law on Public Enterprises confirmed
240	C10R8 Strengthening the anti-money laundering framework	Milestone	Enhance the capacity and capabilities of supervisors to mitigate money laundering risks and increase the implementation of the anti-money laundering framework by obliged entities
259	C10I2 Digitalisation of key litigation processes in administrative justice	Target	Introduction of an electronic summons and notification system
264	C10I4 Improving the quality and sustainability of the security services	Target	Intelligent video surveillance systems installed and operating in urban infrastructure sites
284	C10I11 Ensuring an adequate information and administrative environment for the implementation of the recovery and resilience plan	Target	Update of video guides to cover in full all business processes of the RRP information system
320	C12.R1 Upgrading the strategic framework of the healthcare sector	Milestone	National Strategy for Healthy Geriatric Care and Ageing in the Republic of Bulgaria 2021-2030 and action plan for the implementation of the strategy
323	C12R3 Improving the attractiveness of healthcare professions and promoting a more balanced distribution of healthcare	Milestone	Entry into force of amendments to laws and secondary legislation to address shortages and promote a

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	professionals across the territory		more balanced distribution of healthcare professionals across the country
322	C12R2 Development of e-health and of the National Health Information System	Milestone	Upgrade of the National Health Information System (NHIS)
336	C12I4 Establishment of an air ambulance system	Milestone	Signature of contracts for the supply of helicopters to the air ambulance system
326	C12R4 Strategic framework and plan to increase the availability of primary and outpatient care	Milestone	National Strategy for Improving the Accessibility and Capacity of Non-Hospital Primary Care and Ensuring a Balanced Territorial Distribution of Medical Care and Healthcare in the Republic of Bulgaria 2021-2027 and action plan for the implementation of the strategy
327	C12R5 Supporting the improved provision of preventive screening activities	Milestone	National Plan for the Development of Comprehensive Prenatal and Neonatal Screening and Screening of Socio-Significant Diseases 2021-2027
		Instalment Amount	EUR 748 778 870

1.4. Fourth Instalment (non-repayable support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
9	C1I1 STEM centres and innovation in education	Milestone	Signature of contracts for the provision of construction or renovation works for the national and regional STEM centres and to the STEM laboratories in schools
4	C1R1 Reform in preschool and school education and lifelong learning	Milestone	Entry into force of the amendments to the regulatory framework in the field of vocational education and training
12	C1I2 Modernisation of educational infrastructures	Milestone	Signature of contracts for the provision of construction or renovation works to educational facilities
303	C1I4 Modernisation of the Social Assistance Agency	Milestone	Signature of contracts for the renovations and refurbishment of antenna offices of the Social Assistance Agency
26	C2R1 Common policy for the development of research and innovation	Milestone	Establishment of the Innovation Board
41	C3I21.a Guarantee instrument for growth	Target	Operations amounting to at least 50 % of the total allocated financing

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
			approved by the InvestEU Investment Committee
53	C3I2.2.a Grant scheme for combining renewable electricity sources with local storage	Milestone	Selection procedures completed
57	C3I2.2.b - Guarantee instrument for energy efficiency and renewable energy	Target	Operations amounting to at least 50 % of the total amount of resources allocated to the instrument approved by the InvestEU Investment Committee.
73	C4I1 Support for the renovation of the building stock Sub-measure 2: Renovation of non-residential buildings, including public buildings and Sub-measure 3: Renovation of non-residential buildings in manufacturing, trade and services, as well as buildings from the tourism sector	Milestone	Signature of contracts for the energy-efficiency renovation for non-residential buildings
96	C4R6 Boosting electricity generation from renewable sources	Milestone	Entry into force of the amendments to the national legislative framework to support fast deployment of off-shore wind
80	C4I3 Support for energy-efficient street lighting systems	Milestone	Signature of grant contracts for renovation of public lightning systems (call 2)
100	C4I6 Support for new capacities for electricity generation from renewable sources and electricity storage	Milestone	Launch of a tender for the construction of 285 MW production capacity of electricity from renewable sources (wind and solar) co-located with energy storage systems
110	C4I5 Pilot projects for the production of green hydrogen and biogas	Milestone	Signature of contract(s) for the construction of electrolyser capacity and biogas
84	C4R5 One Stop Shop for renovations	Target	Establishing of physical one-stop shops in each NUTS-3 region (or functional area);
106	C4I7 Pilot project on combined heat and power from geothermal sources	Milestone	Setting up a specialised laboratory for research and training in the field of geothermal energy
107	C4I7 Pilot project on combined heat and power from geothermal sources	Milestone	Signature of contracts under the support scheme for development of a pilot project for combined heat and electricity generation from geothermal sources.
127	C5I1 Integrating the ecosystem	Target	Development of site-specific

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	approach and applying nature-based solutions into the protection of Natura 2000 sites		conservation objectives and measures for Natura 2000 sites
131	C6R1 Updating the strategic framework of the agricultural sector	Milestone	Adoption of the National Action Programme contributing to the objectives of the Farm to Fork Strategy 2030
133	C6I1 Fund to promote the technological and ecological transition of agriculture	Milestone	Award of grant agreements for support under the Fund to promote the technological and ecological transition of agriculture
135	C6I2 Digitalisation of processes from farm to fork	Milestone	Award of the contracts for 1) software solutions for the electronic information system for the agriculture sector and 2) the communication network of field and rain sensors
141	C7I1 Large-scale deployment of digital infrastructure	Target	1Gbps access points to state network for providers of services of general interest
152	C7I3 Digital transformation of Bulgarian Posts and delivery of complex administrative services	Milestone	Modernised and unified ICT equipment
163	C8R1 Strategic transport framework	Milestone	Strengthening the capacity to manage and implement TEN-T railways projects
202	C8I7 Sustainable urban mobility pilot scheme	Milestone	Contracts for the new zero-emission public transport vehicles
209	C9I1 Programme for the construction/completion/reconstruction of water supply and sewerage systems, including waste water treatment plants for agglomerations between 5 000 and 10 000 population equivalent	Milestone	Award of contracts for the design and construction of the wastewater treatment plants and the water supply and sewerage network
211	C9I2 Digitalisation for integrated management, control and efficient use of water	Milestone	Award of contract for technical design and building the information system for integrated water quantity management
223	C10R2 Anti-corruption	Milestone	Entry into force of legislative measures to regulate lobbying activities
245	C10R10 Public Procurement	Milestone	Introduction of new standard e-forms for public procurement
247	C10R10 Public Procurement	Target	Reduction of the share of negotiated procedures without prior publication
246	C10R10 Public Procurement	Target	Reduction of the proportion of contracts awarded on the basis of a single bidder
254	C10R11 Entrepreneurial Bulgaria	Milestone	Entry into force of amendments to the Commercial Law for creating a legal framework to achieve an accelerated liquidation of legal persons

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
255	C10R11 Entrepreneurial Bulgaria	Milestone	Entry into force of amendments to the Labour Code improving the regulatory conditions for distance working in Bulgaria
257	C10R12 Economic analysis council	Milestone	Adoption of an annual report on the state of the Bulgarian economy
258	C10I1 Strengthening, further developing and building on the Unified Information System of Courts	Milestone	Upgrade of the Unified Courts Information System
265	C10I4 Improving the quality and sustainability of the security services	Milestone	National Intelligent Security System set up and operational
276	C10I9 Digitising data in the administration containing paper registries	Target	Digitising registry data and civil status records
287	C11R1 Reform of the minimum income scheme	Milestone	Entry into force of the Social Support Code, the amendments to secondary legislation and to the Employment Promotion Act
291	C11R2 Reform of social services	Milestone	National Map of Social Services
305	C11I5 Modernisation of the Employment Agency	Milestone	Signature of contracts for the development of IT facilities and e-services of the Employment Agency
339	C12I5 National Digital Platform for Medical Diagnostics	Milestone	Signature of contracts for the development of the National Digital Platform for Medical Diagnostics
343	C12I7 Development of outpatient care	Milestone	Signature of contracts for the construction and renovation works and the provision of medical equipment to outpatient units and to the National Interdisciplinary Screening Centre
		Instalment Amount	EUR 611 887 578

1.5. Fifth Instalment (non-repayable support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
20	C1I3 Provision of digital skills trainings and set-up of a platform for adult learning	Target	Number of people with a certificate in digital skills obtained through participation in a training
18	C1I3 Provision of digital skills trainings and set-up of a platform for adult learning	Target	Fully operational digital clubs
304	C11I4 Modernisation of the Social Assistance Agency	Target	Number of territorial units of the Social Assistance Agency renovated
87	C4I4 Digital transformation of the electricity transmission grid	Target	Increase of net cross-border transmission capacity by 600 MW

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
118	C4R10 Decarbonisation of the energy sector	Target	Reducing carbon dioxide emissions from the power sector (II)
93	C4R11 Improving corporate governance of state-owned companies in the energy sector	Milestone	Separation of ownership and control within the State of the transmission system operators Bulgartransgaz EAD and ESO EAD
101	C4I6 Support for new capacities for electricity generation from renewable sources and electricity storage	Milestone	Launch of a tender for the construction of 285 MW production capacity of electricity from renewable sources (wind and solar) co-located with energy storage systems
123	C4I8 National infrastructure for storage of electricity from RES (RESTORE)	Target	Electricity storage (I)
70	C4I1 Support for the renovation of the building stock Sub-measure 1: Renovation of residential buildings	Milestone	Signature of contracts for the energy efficiency renovation for multi-family residential buildings
77	C4I2 Support for renewable energy for households	Milestone	Signature of contracts for installation of renewable energy sources (RES)
142	C7I1 Large-scale deployment of digital infrastructure	Target	10Gbps access points to state network for providers of services of general interest
143	C7I1 Large-scale deployment of digital infrastructure	Target	200Gbps access points in Universities and Scientific Institutes interconnected with GEANT Network
149	C7I2 Construction, development and optimisation of the digital TETRA system and radio relay network	Target	Delivered end user devices and equipment
153	C7I3 Digital transformation of Bulgarian Posts and delivery of complex administrative services	Target	Finalisation of renovation of post offices entrusted with a service of general economic interest
182	C8R5 Electric mobility	Target	Zero- and low-emissions vehicles registered
203	C8I7 Sustainable urban mobility pilot scheme	Target	New zero-emission vehicles
206	C8I7 Sustainable urban mobility pilot scheme	Milestone	Infrastructure for safe urban mobility targeting vulnerable road users — pedestrians and cyclists
176	C8R4 Integrated public transport	Milestone	New regulatory framework for public transport
224	C10R2 Anti-corruption	Milestone	Introduction of tools for counteracting corruption and enhancing integrity in the activity of the state-owned enterprises
268	C10I5 Supporting the introduction of mandatory judicial mediation	Target	Enhancing capacity for the introduction of mandatory judicial

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
			mediation
269	C10I5 Supporting the introduction of mandatory judicial mediation	Milestone	Trainings of judges, mediators and court coordinators and awareness-raising campaigns on the introduction of mandatory judicial mediation
274	C10I8 Spatial monitoring, control and management through upgrading the Aerospace Monitoring Centre (AMC)	Milestone	Building-up and expanding the capacity of the Data Centers of the Ministry of Interior
275	C10I8 Spatial monitoring, control and management through upgrading the Aerospace Monitoring Centre (AMC)	Milestone	Upgrade of the Aerospace Monitoring Centre at the Ministry of Interior
298	C11I2 Provision of assisting devices to persons with permanent disabilities	Target	Persons with permanent disabilities that have received assisting devices
292	C11I1 Modernisation of long-term care	Milestone	Signature of contracts for construction and renovation of facilities providing social services
341	C12I6 Improving the 112 national emergency communication system	Milestone	Entry into force of the amendments to the legislative framework of the Single European Number 112
332	C12I2 Centres for interventional diagnosis and endovascular treatment of cerebrovascular diseases	Milestone	Signature of contracts for the construction works and for the provision of medical equipment to the centres for interventional diagnosis and endovascular treatment of cerebrovascular diseases
		Instalment Amount	EUR 550 863 750

1.6. Sixth Instalment (non-repayable support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
19	C1I3 Provision of digital skills trainings and set-up of a platform for adult learning	Milestone	Fully operational platform for e-learning for adults
30	C2I1 Programme to accelerate economic recovery and transformation through research and innovation	Target	Reports on the implementation of the Innovation Programmes
26	C2R1 Common policy for the development of research and innovation	Milestone	Legislative acts identified in the report on the amendments to other legislative acts amended and entered into force/ secondary legislative acts entered into force
47	C3I2.1.c Grant for technological modernisation	Target	Completed projects to support technological modernisation
37	C3I1 AttractInvestBG	Target	Signature of contracts for the internal and external infrastructure of industrial parks /zones
42	C3I2.1.a Guarantee instrument for growth	Target	Operations amounting to 100 % of the total allocated financing approved by the InvestEU Investment Committee
49	C3I2.1.d Grant scheme for information and communication technology and cybersecurity in SMEs	Target	Completed projects to support entry-level digitalisation in companies
58	C3I2.2.b Guarantee instrument for energy efficiency and renewable energy	Target	Financial or investment operations amounting to at least 100 % of the total amount of resources allocated to the instrument approved by the InvestEU Investment Committee.
65	C4R1 Establishment of a National Fund for Decarbonisation	Milestone	National Fund for Decarbonisation and its sub-funds is operational
86	C4I4 Digital transformation of the electricity transmission grid	Target	Technical conditions enabled for the integration of new 2 500 MW production capacity from renewable sources into the electricity system
102	C4I6 Support for new capacities for electricity generation from renewable sources and electricity storage	Milestone	Launch of a tender for the construction of 285 MW production capacity of electricity from renewable sources (wind and solar) co-located with energy storage systems
129	C5I2 Restoring climate key ecosystems in line with the EU Biodiversity Strategy and the objectives of the European Green Deal	Target	Restoring wetlands
144	C7I1 Large-scale deployment of digital infrastructure	Target	Municipality centers with new access nodes for very high capacity networks
145	C7I1 Large-scale deployment of digital	Target	Population with access to VHCNs

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	infrastructure		with speed of 1Gbps or higher
150	C7I2 Construction, development and optimisation of the digital TETRA system and radio relay network	Target	Delivered, installed, integrated, and put into operation new stationary, compact, and mobile base stations
154	C7I3 Digital transformation of Bulgarian Posts and delivery of complex administrative services	Milestone	Integrated services systems deployed
155	C7I3 Digital transformation of Bulgarian Posts and delivery of complex administrative services	Target	Settlements without government front-offices, which have postal stations that act as intermediaries for providing administrative and e-Government services on behalf of central, regional and local government authorities
156	C7I3 Digital transformation of Bulgarian Posts and delivery of complex administrative services	Target	Settlements without Medical Centers, which have postal stations equipped and acting as intermediaries for basic telemedicine diagnostics services
157	C7I3 Digital transformation of Bulgarian Posts and delivery of complex administrative services	Target	Settlements with e-charging point for self-service with public access, installed nearby a postal station
165	C8R1 Strategic transport framework	Milestone	New public service contract (PSC) for public rail transport services
179	C8R5 Electric mobility	Target	New public electric charging stations
189	C8I2 European Train Control System on-board equipment	Target	Delivery and installation of the ERTMS/ETCS on-board equipment
197	C8I5 Road safety	Milestone	Software application and specialised vehicles to enable improved road safety management incl. assessment of road infrastructure
198	C8I5 - Road safety	Target	Network-wide road safety survey
200	C8I6 Sofia metro line 3	Target	Progress in the completion of construction of new sections of metro line 3 in Sofia
204	C8I7 Sustainable urban mobility pilot scheme	Target	Charging stations for public transport vehicles
205	C8I7 Sustainable urban mobility pilot scheme	Target	Intelligent digital solutions for transport in municipalities
216	C10R1 Accessible, effective and predictable justice	Milestone	Entry into force of the legislative amendments to the Administrative Procedure Code, setting the legal framework for e-Justice in administrative cases
249	C10R10 Public Procurement	Target	Reduction of the share of negotiated procedures without prior publication
248	C10R10 Public Procurement	Target	Reduction of the proportion of contracts awarded on the basis of a single bidder
260	C10I2 Digitalisation of key litigation processes in administrative justice	Milestone	Entry into operation of an information module enabling the

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
			digitally remote submission and receipt of electronic documents in court cases by the parties and their legal representative
261	C10I2 Digitalisation of key litigation processes in administrative justice	Milestone	Entry into operation of an information module for remote hearings and provision of the necessary hardware for remote hearings
263	C10I3 Transformation of the information and communication infrastructure at the Public Prosecutor's Office	Milestone	Upgrading the information and communication infrastructure at the Public Prosecutor's Office
266	C10I4 Improving the quality and sustainability of the security services	Target	Acquiring police cars with video surveillance systems for prevention of corrupt behaviour and practices
267	C10I4 Improving the quality and sustainability of the security services	Target	Equipping police officers with body cameras.
289	C11R1 Reform of the minimum income scheme	Target	Beneficiaries of the monthly minimum income support
306	C11I5 Modernisation of the Employment Agency	Milestone	IT facilities of the Employment Agency
313	C11I7 Digitisation of collections of museums, libraries, and archives	Milestone	E-platform on cultural heritage
329	C12I1 Modernisation of hospital facilities	Milestone	Signature of contracts for the provision of medical equipment to hospital facilities
342	C12I6 Improving the 112 national emergency communication system	Milestone	Upgrade of 112 National Emergency Communication System
344	C12I7 Development of outpatient care	Target	Constructing/renovating, equipping and staffing outpatient units in remote settlements throughout the country
		Instalment Amount	EUR 631 679 090

1.7. Seventh Instalment (non-repayable support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
22	C1I4 Youth centres	Target	Finalisation of the construction and renovation works for youth centres and for a national focus centre
44	C3I2.1.b Equity instruments for growth	Target	Operations amounting to 50 % of the total allocated financing approved by the Investment Committee
51	C3I2.1.e Innovation Pool (Equity Instruments for Innovation)	Target	Operations amounting to 50 % of the total allocated financing

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
			approved by the Investment Committee
54	C3I2.2.a Grant scheme for combining renewable electricity sources with local storage	Target	Operational capacity of installed storage facilities
81	C4I3 Support for energy-efficient street lighting systems	Target	Reduction of energy consumption
88	C4I4 Digital transformation of the electricity transmission grid	Target	Increase of net cross-border transmission capacity by additional 600 MW
119	C4R10 Decarbonisation of the energy sector	Target	Reducing carbon dioxide emissions from the power sector (III)
121	C4R10 Decarbonisation of the energy sector	Milestone	Entry into force of decision by the Regulator imposing annual carbon emission limits for individual installations
124	C4I8 National infrastructure for storage of electricity from RES (RESTORE)	Target	Electricity storage (II)
128	C5I1 Integrating the ecosystem approach and applying nature-based solutions into the protection of Natura 2000 sites	Target	Restoring climate-related ecosystems through nature-based solutions
174	C8R3 Sustainable urban mobility	Milestone	Evaluation of the implementation of Sustainable Urban Mobility Plans
181	C8R5 Electric mobility	Target	Low-emission zones
185	C8I1 Railways rolling stock	Target	New zero-emission railways rolling stock in operation (I)
225	C10R2 Anti-corruption	Milestone	Verification mechanism for enhancing the integrity of the civil servants operational
300	C11I3 Development of the social economy	Milestone	Digital platform for the social economy
311	C11I6 Development of the cultural and creative sectors	Target	People working in the culture and creative sector who completed a training
		Instalment Amount	EUR 422 218 922

1.8. Eighth Instalment (non-repayable support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
33	C2I2 Enhancing the innovation capacity of the Bulgarian Academy of Sciences	Milestone	Refurbishment of the research infrastructure of the Bulgarian Academy of Sciences
60	C3I2.2.c grant scheme for the support of businesses in the transition to a circular economy	Target	Completed projects in the area of circular economy

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
78	C4I2 Support for renewable energy for households	Target	Number of assisted households benefiting from RES
111	C4I5 Pilot projects for the production of green hydrogen and biogas	Target	Production of green hydrogen
112	C4I5 Pilot projects for the production of green hydrogen and biogas	Target	Biogas production,
130	C5I2 Restoring climate key ecosystems in line with the EU Biodiversity Strategy and the objectives of the European Green Deal	Target	Transforming coniferous (evergreen) plantations
134	C6I1 Fund to promote the technological and ecological transition of agriculture	Target	Number of supported project beneficiaries through the Fund
136	C6I2 Digitalisation of processes from farm to fork	Milestone	Completion and delivery of fully operational 1) electronic agricultural information system and 2) communication network of field and rain sensors
158	C7I3 Digital transformation of Bulgarian Posts and delivery of complex administrative services	Target	Settlements without Medical Centers, which have postal stations equipped and acting as intermediaries for basic telemedicine diagnostics services
159	C7I3 Digital transformation of Bulgarian Posts and delivery of complex administrative services	Target	Settlements without government front-offices, which have postal stations that act as intermediaries for providing administrative and e-Government services on behalf of central, regional and local government authorities
190	C8I2 European Train Control System on-board equipment	Target	Delivery and installation of the ERTMS / ETCS on-board equipment
195	C8I4 Intermodal terminal in Ruse	Milestone	Completion of the intermodal terminal construction
201	C8I6 Sofia metro line 3	Target	New section of metro line 3 in Sofia
212	C9I2 Digitalisation for integrated management, control and efficient use of water	Milestone	Completion and delivery of a fully operational integrated water quantity management information system
242	C10R10 Public Procurement	Milestone	Public Procurement Agency's control and verification methodology updated
250	C10R10 Public Procurement	Target	Reduction of the share of negotiated procedures without prior publication
262	C10I2 Digitalisation of key litigation processes in administrative justice	Milestone	Purchase and deployment of data storage hardware in a data centre of the Supreme Judicial Council
278	C10I10 Upgraded strategic planning system	Target	Upgraded strategic planning system
285	C10I11 Ensuring an adequate information and administrative environment for the implementation of the recovery and	Target	Final recipients trained to ensure their capacity to implement the RRP

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	resilience plan		
277	C10I9 Digitising data in the administration containing paper registries	Target	Digitising registry data and civil status records
301	C11I3 Development of the social economy	Target	Social enterprises receiving digital equipment
302	C11I3 Development of the social economy	Milestone	Report on the activities carried out by the focus centres
293	C11I1 Modernisation of long-term care	Target	Renovating residential care homes for older people
308	C11I6 Development of the cultural and creative sectors	Target	Support for European cultural cooperation
309	C11I6 Development of the cultural and creative sectors	Target	Support for the distribution of cultural content
310	C11I6 Development of the cultural and creative sectors	Target	Support for cultural policies of Bulgarian municipalities
330	C12I1 Modernisation of hospital facilities	Target	Hospital facilities receiving new medical equipment
333	C12I2 Centers for interventional diagnosis and endovascular treatment of cerebrovascular diseases	Target	Centres for interventional diagnosis and endovascular treatment of cerebrovascular diseases
335	C12I3 Modernisation of psychiatric care	Target	Renovated and equipped psychiatric care facilities
		Instalment Amount	EUR 604 465 761

1.9. Ninth Instalment (non-repayable support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
10	C1I1 STEM centres and innovation in education	Target	Finalisation of the construction works and renovation activities of the National and three regional STEM centres
11	C1I1 STEM centres and innovation in education	Target	Schools with newly built and/or equipped STEM laboratories, including high-tech classrooms
13	C1I2 Modernisation of educational infrastructures	Target	Finalisation of renovation of schools
14	C1I2 Modernisation of educational infrastructures	Target	Finalisation of the construction of kindergartens and schools
15	C1I2 Modernisation of educational infrastructures	Target	Finalisation of renovation activities in student dormitories
16	C1I2 Modernisation of educational infrastructures	Target	Finalisation of construction and/or renovation works of campuses

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
21	C1I3 Provision of digital skills trainings and set-up of a platform for adult learning	Target	Number of people with a certificate in digital skills acquired through participation in training
23	C1I4 Youth centres	Target	Students/young people registered in at least one of the activities of the youth centres.
28	C2I1 Programme to accelerate economic recovery and transformation through research and innovation	Target	Completed projects by innovative SMEs and higher education institutions and research organisations
34	C2I2 Enhancing the innovation capacity of the Bulgarian Academy of Sciences	Target	Completed research projects in the field of green and digital transition
38	C3I1 AttractInvestBG	Target	Completed projects for infrastructure in the selected industrial parks/zones - Industrial parks/zones operational
39	C3I1 AttractInvestBG	Target	Creation of new jobs in the industrial parks/zones
45	C3I2.1.b Equity instruments for growth	Target	Operations amounting to 100 % of the total allocated financing approved by the Investment Committee
52	C3I2.1.e Innovation Pool (Equity Instruments for Innovation)	Target	Operations amounting to 100 % of the total allocated financing approved by the Investment Committee
55	C3I2.2.a Grant scheme for combining renewable electricity sources with local storage	Target	Operational capacity of installed storage facilities
62	C3I2.3.a Equity instruments for climate neutrality and digital transformation investment	Target	The responsible Investment Committee approved operations amounting to 100 % of the total allocated funding
71	C4I1 Support for the renovation of the building stock Sub-measure 1: Renovation of residential buildings	Target	Completed energy-efficiency renovation of multi-family residential buildings – surface renovated housing infrastructure (gross floor area)
74	C4I1 Support for the renovation of the building stock Sub-measure 2: Renovation of non-residential buildings, including public buildings	Target	Completed energy-efficiency renovation of non-residential buildings – renovated surface of public buildings (sub-measure 2)
75	C4I1 Support for the renovation of the building stock Sub-measure 2: Renovation of non-residential buildings, including public buildings	Target	Completed energy renovation of non-residential buildings – number of renovated buildings (sub-measures 2 and 3)

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	and Sub-measure 3: Renovation of non-residential buildings in manufacturing, trade and services, as well as buildings from the tourism sector		
89	C4I4 Digital transformation of the electricity transmission grid	Target	Technical conditions enabled for the integration of additional 2 500 MW from renewable sources (wind and solar) into the electricity system
125	C4I8 National infrastructure for storage of electricity from RES (RESTORE)	Target	Electricity storage (III)
108	C4I7 Pilot project on combined heat and power from geothermal sources	Target	A pilot demonstration geothermal power plant is operational.
103	C4I6 Support for new capacities for electricity generation from renewable sources and electricity storage	Target	Additional new production capacity of electricity from renewable sources co-located with electricity storage capacity commissioned
104	C4R6 Boosting electricity generation from renewable sources	Target	Overall new production capacity of electricity from renewable sources (wind and solar power) commissioned
120	C4R10 Decarbonisation of the energy sector		Reducing carbon dioxide emissions from the power sector (IV)
132	C6R1 Updating the strategic framework of the agricultural sector	Target	Increase in the share of organic farming which embraces the green and digital transition
210	C9I1 Programme for the construction/completion/reconstruction of water supply and sewerage systems, including waste water treatment plants for agglomerations between 5 000 and 10 000 population equivalent		Newly built / reconstructed water supply network connected to newly built/reconstructed waste water treatment plants
146	C7I1 Large-scale deployment of digital infrastructure	Target	Municipality centers with new access nodes for very high capacity networks
147	C7I1 Large-scale deployment of digital infrastructure	Target	Population with access to VHCNs with speed of 1Gbps or higher
160	C7I3 Digital transformation of Bulgarian Posts and delivery of complex administrative services	Target	Finalisation of renovation of post offices entrusted with a service of general economic interest
166	C8R1 Strategic transport framework	Target	Deployment of ERTMS on TEN-T
167	C8R1 Strategic transport framework	Target	Increase of number of carried passengers by railway transport
168	C8R1 Strategic transport framework	Target	Travelling time for the rail section Sofia-Plovdiv - Burgas
171	C8R2 Road safety	Target	Removal of road safety hotspots/blackspots
172	C8R2 Road safety	Target	Reduction in the number of victims of road traffic accidents
180	C8R5 Electric mobility	Target	New public electric charging

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
			stations
183	C8R5 Electric mobility	Target	Zero- and low-emission vehicles registered
186	C8I1 Railways rolling stock	Target	New zero-emission railways rolling stock in operation (II)
192	C8I3 Digitalisation in railways transport and ERTMS	Milestone	Deployment of ERTMS Level 2 (ETCS) on the railway section Ruse – Kaspichan
196	C8I4 The intermodal terminal in Ruse	Milestone	Selection of the operator of the intermodal terminal
177	C8R4 Integrated public transport	Milestone	Introduction of the single ticket service for public transport
215	C10R1 Accessible, effective and predictable justice	Target	Publication of four annual analyses of the implementation of the e-justice rules in the Civil Procedure Code and the Criminal Procedure Code
226	C10R2 Anti-corruption	Milestone	Annual analyses on the implementation of the National Strategy for Preventing and Combatting Corruption (2021-2027) and its associated Roadmap and annual reporting on progress to the European Commission in the framework of the Rule of Law mechanism
270	C10I6 Supporting a pilot phase for the introduction of building information modelling	Milestone	A website with online courses and materials for online training on Building Information Management (BIM) for experts from the private sector is set up
271	C10I6 Supporting a pilot phase for the introduction of building information modelling	Target	Provision of fully equipped workstations for Building Information Modelling and training
272	C10I6 Supporting a pilot phase for the introduction of building information modelling	Milestone	An integrated Building Information Modelling module for the Unified Information System for Spatial Planning, Investment Design and Building Authorisation is created and operational
273	C10I7 Unified information system for spatial planning, investment design and construction permitting	Milestone	Single information system for spatial planning, investment design and construction authorisation
294	C11I1 Modernisation of long-term care	Target	New facilities providing social services for persons with disabilities
295	C11I1 Modernisation of long-term care	Target	Energy savings renovation in existing facilities providing social services
296	C11I1 Modernisation of long-term care	Target	Share of adults receiving support in specialised institutions compared to those receiving support in

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
			community-based services or at home
314	C11I7 Digitisation of collections of museums, libraries, and archives	Target	Digitised content publicly available on the e-platform
337	C12I4 Establishment of an air ambulance system	Target	Delivery of the helicopters for the air ambulance system
338	C12I4 Establishment of an air ambulance system	Target	Operational sites for the air ambulance system
345	C12I7 Development of outpatient care	Target	Constructing/renovating, equipping and staffing outpatient units in remote settlements throughout the country
346	C12I7 Development of outpatient care	Milestone	Establishment of the National Interdisciplinary Screening Centre
331	C12I1 Modernisation of hospital facilities	Milestone	Establishment of the National Centre for Proton Therapy Radiation
325	C12R3 Improving the attractiveness of healthcare professions and promoting a more balanced distribution of healthcare professionals across the territory	Milestone	Number of places for nursing specialisations in universities
340	C12I5 National Digital Platform for Medical Diagnostics	Target	Health facilities deploying the National Digital Platform for Medical Diagnostics
		Instalment Amount	EUR 604 465 762

SECTION 3: ADDITIONAL ARRANGEMENTS

1. ARRANGEMENTS FOR MONITORING AND IMPLEMENTATION OF THE RECOVERY AND RESILIENCE PLAN

The monitoring and implementation of the recovery and resilience plan of Bulgaria shall take place in accordance with the following arrangements:

- *The National Fund Directorate* of the Ministry of Finance shall collect and report data on progress and act as the Authority responsible for preparing and submitting payment requests and receiving payments from the EC. The Directorate shall act as a focal point at national level with regard to the preparation of common rules and procedures for the implementation of the Facility, for carrying out checks and controls on the implementation of investments and reforms, including active monitoring of the progress in implementing the measures on the basis of the milestones and targets set in the RRP.
- *The Economic and Financial Policy Directorate* at the Ministry of Finance shall be responsible for the reporting on the progress in the implementation of the milestones and targets of the Bulgarian RRP within the European Semester cycle.
- *The Central Coordination Unit Directorate* shall be responsible for the development of the Plan, the programming documents, including the allocation of funds under the Facility and the drawing up of a strategic framework for information and communication activities in relation to the implementation of the Plan. The Directorate shall be responsible for monitoring the implementation of the milestones and targets of the Plan, including progress on common indicators, green and digital contribution of investments etc. The Directorate shall also be responsible for the setting up of the information system with all the functionalities required for the monitoring of the implementation of the Bulgarian RRP as well as for the further upgrades to the Unified Management Information System.
- *The Executive Agency “Audit of EU Funds”*, attached to the Minister of Finance, shall carry out the audit work under the Facility in order to provide assurance on the reliability of the data on the implementation of the milestones and objectives and the way in which they are collected, as well as assurance that the implementation ensures that double funding, fraud, corruption and conflict of interest are prevented and the principle of sound financial management is respected.

2. ARRANGEMENTS FOR PROVIDING FULL ACCESS BY THE COMMISSION TO THE UNDERLYING DATA

In order to provide full access to the Commission to the underlying relevant data, Bulgaria shall have in place the following arrangements:

The collection of data on progress with the implementation milestones and targets and the related reporting is carried out by the *National Fund Directorate*. The Bulgarian authorities shall use the information system for monitoring of the implementation of the RRP (adaptation of the ‘Unified Management Information System’ for the EU structural funds), with the following elements filled in the system by the final recipients:

- contracts concluded with contractors;
- supporting and payment documents;
- documents proving performance, such as certificates or acts;

- payment forecasts;
- documents proving that the milestones and targets have been met.

Final recipients shall be made responsible for record keeping, including statistics and other financing data, as well as records and documents in electronic format until five years starting from the date of the final payment. Each final recipient shall be responsible for collecting and entering the data listed under Article 22 (2) (d) (i) to (iii) of Regulation (EC) No 2021/241 into the repository system the data listed under Article 22 (2) (d) (i) to (iii) of Regulation (EC) No 2021/241. The storage of the required information shall be provided in the repository system and the system's administrative officer provides access to it for control and audit purposes, subject to the provisions of the applicable legislation relating to the protection of personal data.

In accordance with Article 24(2) of Regulation (EU) 2021/241, upon completion of the relevant agreed milestones and targets in Section 2 of this Annex, Bulgaria shall submit to the Commission a duly justified request for payment of the financial contribution. Bulgaria shall ensure that, upon request, the Commission has full access to the underlying relevant data that supports the due justification of the request for payment, both for the assessment of the request for payment in accordance with Article 24(3) of Regulation (EU) 2021/241 and for audit and control purposes.
